Radio Drama

(*Continued from page 29*)

starve in the theatre rather than feast in business. He took whatever he could get, acting and directing with de Mille, with Alan Dwan, with little theatre groups, notably the Comedy Club and the Snarks where he directed Hope Williams before she became famous.

During this period he was requested by the Gold Dust Twins company to put them on the air with a "real drama." Mr. Radcliffe thinks that on this sketch over WEAF he probably put the first sound effects on the air. He recalls bringing vacuum cleaners in taxicabs to prove to the doubting salesmen that he could create the sound of an automobile on the ether waves by such means.

Two years ago Mr. Radcliffe was asked to direct the *Melodrama Hour* for the National Broadcasting Company and the rest is history. As he demanded better and better plays, *The Melodrama Hour* quietly turned into the *Radio Guild*, just as simply as the duchess' pig in *Alice in Wonderland* turned into a baby. Now *The Radio Guild* boasts such great guest artists as Eva Le Galliene, and Dudley Digges.

"Radio drama is a natural evolution," Vernon Radcliffe says. "It is the next step after the motion picture, and just as important a form of drama. In every age the theatre adapts itself to its audience. We used to have it on moving wagons, in ballrooms to suit the populace and now we have reached the stage when Radio drama is the form most suited to our twentieth century audiences—n audiences, who create by popular d the theatre of the air. Great thi coming of it, and greater will com

This is the opinion of an enth To some of you Radio drama wil bring this soul-reaching satisfacti those of you who live in big ci shadow will probably never loom enormous proportions on your horizon. But to millions it is a of coming in contact with what t theatrical minds have to offer, a sesame to illusion and romance.

ANOTHER discussion concerning velopment of Radio drama will in the March issue of RADIO DIGEST. *authorities predict Radio entertainm flavor more of drama and speaking st ever before during 1931.*

Night Clubs of New York

(*Continued from page 11*)

the rendezvous for New Yorkers a Sunday evening to dine and There are few finer bands than mp's, and it was very popular ere.

Daffydil Dickerman outdid him- of the cutest, oddest, and places one could ever imagine, at big plaster plaques of what an conceived the *daffydil* to be, nking eyes that blinked every bass drummer lowered his foot ass pedal, and with crazy Dicker- wings and paintings all around n.

ention Greenwich Village without of the Village Nut Club would wn upon my head the condemna- that very worthy establishment. ght at the Village Nut Club until hours of the morning there may a great deal of clean fun. The very mixed, with a sprinkling rities, day laborers, professional nd all types. If you have lis- one of their broadcasts, you get idea of the way their program is ut each evening. True to their erything is spontaneous, quite d really funny. I enjoyed my- endously the evening I visited it. n the center of Manhattan among s I have already mentioned, one weetest bands in the world—Emil at the El Patio, where Rosita non hold forth nightly. Then "the sweetest music this side of —Lombardo's at the Roosevelt he Hollywood Cafe, perhaps the que and the nearest approach to ight club in its success, with the er and egg men, conventioners of town who come in great big viring ahead for reservations for a hundred people; with the most oor show consisting of the most girls to be found in any show in New York; very clever acts, that such a discriminating eye of Nils Granlund, better known G., can find and pick. In fact, himself is a show all alone, and at I enjoy watching work.

IT IS one place where a celebrity may go without fear called upon to do anything, as has made that a hard and fast er to call upon any celebrity to n no matter how hard the crowd and applaud for that person to Their bands are changed there it there is always good music. there is Jansen's Hof Brau, an ezvous. The Paramount Grill New Yorker, like the Roosevelt, grills with hotel food and good music, and like the Villa Vallee, well-ventilated and aired. Personally I am a crank on fresh air; a smoky, hot, sticky atmosphere ruins the evening for me. I must be where the air is fresh and that is one of the things I am happiest about at the Villa Vallee—the fact that our air is constantly being changed and a person never comes out with smarting eyes.

THERE are so many clubs that it would take pages for me to talk about them. The Central Park Casino, with its gorgeous interior, its superb band, Leo Reisman and his orchestra, than which there is none better, Leo himself being one of the greatest showmen that ever stood before a band. And the Club Richman, where Harry intermittently holds forth (when he is there the place itself takes on a new atmosphere). Harry Richman and George Olson have been responsible for the tremendous run of popularity at this cozy and intimate place.

Coming from the country myself I can speak rather authoritatively when I say I know what the average small town person's conception of a New York night club is. Whether his conception is due to plays, motion pictures, novels, newspaper stories, or word of mouth publicity I do not know; I do know, however, that people in the rural districts and in small cities conceive a New York night club, in its strict sense, to be a place filled with bad air, smoke and excitement, where lewd women with nothing on disport themselves under the delighted eyes of fat butter and egg men from the Middle West, shaking everything at them but the club's license; a place where, from the moment one enters until the departure, they take everything from you but the gold in your teeth; where you are liable to receive anything from a sandbag over the head to a Mickey Finn, which is a potent powder slipped in a drink to put the victim out of the picture temporarily!

These "gyp" clubs, as they are called, did flourish at one time in New York City, and many of our popular Broadway entertainers today can talk for hours about what used to go on inside them. Let me assure you that this type of club has gone by the board, and the only place where an out of town bumpkin might run into such a place would be in a racketeer speakeasy, and the country gentleman who finds himself in a jam in one of these places has no one to blame but himself!

There are a host of new places springing up and closing down nightly, but I hope that I am touching on the most popular ones now running.

Only last night the Paramount Grill opened with an entirely new policy. For a high class hotel to adopt a no couvert charge policy, which the Chinamen have made so popular in their chow mein dance palaces, is revolutionary. The Paramount has taken a step that will probably help them become very successful. One of the finest floor shows in the country, headed by the able and versatile Benny Davis, with a very fine band, Florence Richardson and her boys. From my observations of the debut, the Paramount Grill is going to have a tremendous run.

I SHOULD really leave the description of and location of these clubs to one who makes it his business to tell you where to go in New York, Rian James of the Brooklyn *Eagle*, whose little booklet, "Where To Go" is perhaps the best guide to the restaurants and night clubs of New York City, but since I am asked to write this article I feel that I must at least tell you something about them.

There is one club in particular that is worthy of some detailed consideration. It is located on the site where Texas Guinan herself once held forth. Small, close and very plain, it is perhaps the most successful of New York night clubs and is the nearest to the popular conception that people in the country have of New York night clubs. It is known as the Club Abbey.

Unquestionably its easy location, near Broadway, and its all night policy, in contrast to the two and three o'clock closing of the other clubs, are responsible for the popularity that is has been enjoying for some time. It has become the rendezvous of all the Broadway wiseacres, columnists, and most of Broadway's racketeers are to be seen there throughout the course of a week. The central personality who dominates its dance floor between dance sets is unquestionably in a large measure responsible for the success of the club. A striking figure—a tall, broad-shouldered young man who goes by the name of Jean Mallin. Just how to describe him is extremely difficult. He has a very ready and brilliant wit, and permits himself to be the target for fast repartee on the part of anyone who chooses to fence with him.

He seems to capitalize on a supposed *effeminacy* which he accentuates and heightens, to my mind deliberately. My observation of him on the occasion of my one visit to the Abbey has led me to believe that he does this, realizing that he is making a living and a good one, by carrying out and heightening a character which I believe is not really his.

Although the rest of the floor show is quite daring, fast and full of double en-

tendre, yet this Mallin and his drollery and facetiousness makes the Club Abbey an unusual place to visit. Almost any night one will encounter such persons as Winchell, Hellinger, and all those who are so typical of Broadway's night life.

The blasé out-of-towners seeking something entirely different should try to find a member to go with to the most unique establishment that it has ever been my pleasure to visit, namely Belle Livingston's place on 58th Street, between Park and Lexington. She has brought a Continental atmosphere into an old house. One of the objections she always found most people had to offer about establishments where one could eat and dance, was that the air was bad, so in this three-story house of hers she took particular pains to see that every room has direct contact with the outside, thus ensuring all her guests of that most precious stimulant to a good evening—fresh air.

THE room where one dances is perhaps the most unique, presenting a Turkish Harem effect, due to the lamps which hang from the ceiling, the lighting effect, and the paintings on the wall. Around the edge of the room built to the wall, are luxurious lounging places with large, silk pillows and small benches in front with ash trays. There is a room entirely in red, with a fireplace at the rear end at which the cooking is done right before the eyes of the diners. It is her modern English eating room and is very attractive.

I forgot to mention that the entrance into the establishment is through a large, iron gate, like that of a prison.

Upstairs are lounge rooms and places where one can converse without being disturbed by the diners or the dancers. Then there is a room for backgammon, and another one for ping pong, and a beautiful, intimate golf course, with little water hazards in which, on the opening night, she had live eels—but the eels went the way of all flesh, i.e., down the drain pipe!

Her shows vary from a small group of acts to something of a circus nature; in fact, one of my friends, on his first night there, was amazed on entering to see a whole troupe of African savages doing a war dance in the middle of the floor.

Belle Livingston herself has a very colorful and interesting background and history, and is one of the most gracious lady-hosts that one would expect to find in such an unusual place. The few times I have been there, there have been tremendous crowds, with many celebrities scattered among them, which indicates that if one gives the public something different, good business brings itself.

To close this little discussion of night clubs and not mention the "Queen of the Night Clubs," as she styles herself, that very unusual woman, Texas Guinan, would be almost a sacrilege. I have found Texas Guinan to be a very human person, one who has a great respect for the feelings of others. She has become successful and capitalized on the adoption of a policy of pep, animation, whirlwind speed in floor shows, beautiful girls with little or nothing to wear. If there was ever a person qualified for a degree of Professor of Night Club Psychology, it is certainly she!

I marvel at her audacity in calling her nightly audiences "suckers," as some of them really are, but she seems to be able to do it without harm to herself. She thrives on noise, bedlam, and pandemonium, and her opening act is to throw to her audience every noise-making device that it is possible for her to purchase.

She picks her girls with an eye to beauty of face and form. Some of them are very clever, others merely fill out the picture. The girls who work for her say that she is a very wonderful person to work for, very human and sympathetic, but she is a Simon Legree for work and sets a good example by her own indefatigable zeal throughout the course of a long evening to the wee hours of the morning. It has been my pleasure to introduce her and to be introduced by her at theatrical and charitable affairs, and she has shown me the courtesy of leaving me alone when I didn't want to be introduced, which is more than many persons would do. She has had streaks of success and streaks of trouble and misf
but through it all she remains s
dauntless and a hard worker. W
each other at benefits at which w
form on Sunday nights for various
causes. There on the stage wi
"girls," as she calls them, she put

to use a jack, but he assumed
n that band of robbers at the garage in New York would not let him go out without one. He looked for it everywhere—in the tool box, under the cushion, under the seat—everywhere. In a kind of sleepy half-witted helplessness he even found himself looking in his pockets for it. All in vain. There was no jack. For all he knew, there never had been. He had spoiled one good dinner suit, one fairly good left hand, and one already damaged temper battling with that spare tire only to find that he might just as well have left the darned thing in place. He couldn't put it on anyway.

He was wondering whether to hoof it to the nearest village or just to die quietly from exposure and chagrin, when

far in the distance he saw a point of light. A point that grew and grew as it came nearer and nearer. It was a south-bound car coming his way. Perhaps it would give him a lift. It was going the wrong way but at least it could take him to shelter. He stepped out to do a bit of wig-wagging, hoping all the time that his recent scrimmage with the spare had not left him looking too much like a bandit. He didn't want to frighten the good Samaritan that was coming his way. As the car drew close he became a human semaphore of distress. Sure enough his potential help slowed up, stopped. The car was also a one seater and the driver of it, as he came forward into the light of our hero's lamps was revealed as a bespectacled and benevolent-looking fellow just the type to extend a helping hand. Would he give our young friend a lift? Well, surely he would, but what was the trouble? Just a blowout? But that was nothing. Oh, no jack? Well, but he had a jack. It would be the work of a minute. And not only did the kindly stranger produce the jack from his own car, but he did most of the work that had to be done, saying that wayfarers should help one another and humming a tune to himself as he made his words good.

Old Nassau didn't do much but hover around and nurse his wounded left hand. In no time the stranger was climbing back into his own car and Old Nassau had nothing to do but pick up a few tools and go on his way. He wondered how much time he'd lost. He stepped around in front of his lamps and reached for his watch. It was gone. His anger was explosive. Just when he was thinking what a kindly chap this stranger had proved to be, just when he was thinking what a friend!" old this was, after all, this had to happen to him. His mind worked fast. There was not a second to lose. The dirty crook was already at his wheel.

HE REMEMBERED in a flash that in the pocket of the door of his car there had been or was a loaded revolver. It took him one second to get it. In another second he was on the running board of the Good Samaritan's car, with the revolver stuck in the Good Samaritan's startled face. "You dirty bum," he said. "Wayfarers ought to help each other, ought they? You dirty bum. If I hear a word out of you I'll fill you full of lead. Just hand over that watch." With shaking hands the Good Samaritan dove into his vest pocket and came across.

With the watch in his pocket and the pistol still aimed, our hero backed across the road, slid into his seat, and started his engine going. In another moment, his bitterness assuaged, his wounded hand forgotten, the watch in his pocket, he streaked off to New York at sixty miles an hour. From time to time he kept saying to himself "the dirty bum" or "wayfarers should help each other, my eye" or once and again just those words "the dirty bum". It was almost six in the morning and the sleepy city was stirring with a new day's life when he drove his car into the garage, walked two blocks to the club, woke up the night watchman, went up to his room, and prepared to turn in.

It was what he saw when he got there that rooted him to the spot and sent his heart into his boots. The dreadful thing he saw was something lying on the dressing table—something which, in the haste of his departure for Princeton, he had left lying along with his keys and loose change. It was his watch.

Tuneful Topics

(*Continued from page 76*)

tor of the orchestra. Gibbons had several melodies and ideas, and as a result of one afternoon's collaboration we wrote a chorus called *My Cigarette Lady*. The tune always haunted me; we never played it on the engagement as it was merely a song we both carried in our heads.

In the fall we went to London, and when I returned in the Spring Gibbons stayed on and became director, not only of a great English orchestra, but the dance recording head of the Victor Co. American publishers published two of his songs which you may have heard, *A Garden in the Rain* and *Peace of Mind*. While they were not sensational, they were pretty tunes and well-liked.

A few months ago Gibbons passed through New York on his way to the Metro-Goldwyn-Mayer Studios to write for pictures. Meeting him at a party at Roger Wolfe Kahn's recalled to me the song we had written together, and I began a broadcast of the chorus, which was all we had written. The response was so overwhelmingly favorable that one of the subsidiaries of the Radio Music Company, with whom I am contracted to write, namely Davis, Coots and Engel, asked me if they might publish the song.

I found it impossible to get in touch with Gibbons, so I set myself down to write the melody of the verse and the two verses themselves. The chorus, as we originally conceived it, might mean that the cigarette lady was the girl that he had loved and lost, or it might be just his conception of the girl-to-be. I chose the latter and more happy viewpoint, and really believe that I did even better on the verse than I did on the chorus, which sometimes happens. I can think of several compositions where the verse was much better than the chorus, though that is not usually the case.

I am expecting daily to receive a copy of the finished song, as it went to press over a week ago. We do it quite slowly, at about thirty-two measures a minute, and I find that the key of D is the best range for the voice.

10.—Little Things in Life

IRVING BERLIN offers to the world the panacea (if there is any) for the present large-spread depression. Some people say that the depression is merely a myth in our minds which would be dissipated if we would tell ourselves that there is none. But I know that there is, and we find in the song, *The Little Things in Life*, the solution to the entire matter.

The trouble with us is that we want large, marble houses, with a whole coterie of liveried servants, butlers, footmen, and what-not; too many empty rooms, too many cars, too many yachts. Mr. Berlin expresses in song the belief that the little things in life—simple rooms, a little rain, a little sunshine, and finally the baby's cry, all these things if taken in moderation by the little man and little wife will bring the two happiness.

My first reaction to the song was unfavorable. Like all Berlin songs this has to be heard several times before it grows on you. When I heard the song later on the air, done to its best advantage by one of the best Radio bands, I realized its possibilities, became one of its strongest supporters, and it has found a prominent place on my own Radio pro[gram]

The fact that it is climbing up t[he] of best sellers (today I find it fifth [on] the top) indicates that the public [is] a receptive mood for this type of [song]. What more can be said than that? [The] Berlin organization has another h[it] their hands.

We play it quite slowly, about t[hir]ty-two measures a minute.

Again I want to congratulate Mr. I[rving]

Is A Comedian Fun To His Wife?

(*Continued from page 28*)

She then sees to it that he selects a variety in his clothes and that the man doesn't talk him into anything.

He loves to see the feminine me[mber] of his family well dressed, and pays bills without a murmur. But his clothes never mean a thing to him

He likes to consult Mrs. Stone [about] his shows, even though he knows h[e will] not act upon her suggestions. It is [not] that he wants to think out loud a[nd] see what her reaction is. He must [have] a little audience for whatever he [does]. Certainly he could never have a [more] interested or eager one than his fami[ly].

He's a democratic, humble man man whom his family honors and res[pects] no less than the world. He has [a] reverence for women and treats [his] mother with rare, old-fashioned cou[rtesy].

It isn't to be wondered, therefore Mrs. Stone said to me, in partin[g] could ask nothing more of life than my girls should find as good a hu[sband] as I have."

Vote For Your Favorite Station in Radio Digest Popularity Contest.

See page 5 for Story . . . Here are Rules and Conditions

1. The contest started with the issue of RADIO DIGEST for October, 1930, and ends at midnight, April 20, 1931. All mail enclosing ballots must bear the postmark on or before midnight, April 20, 1931.

2. Balloting by means of coupons appearing in each monthly issue of RADIO DIGEST and by special ballots issued only when requested at the time of receipt of paid in advance mail subscriptions to RADIO DIGEST when received direct and not through subscription agencies according to the schedule given in paragraph four.

3. When sent singly each coupon clipped from the regular monthly issue of RADIO DIGEST counts for one vote. BONUS votes given in accordance with the following schedule:

For each two consecutively numbered coupons sent in at one time a bonus of five votes will be allowed.

For each three consecutively numbered coupons, a bonus of fifteen votes will be allowed.

For each four consecutively numbered coupons, a bonus of twenty-five votes will be allowed.

For each five consecutively numbered coupons, a bonus of thirty-five votes will be allowed.

For each six consecutively numbered coupons, a bonus of fifty votes will be allowed.

For each seven consecutively numbered coupons, a bonus of seventy-five votes will be allowed.

4. Special ballots will be issued only when requested at the time of receipt of paid in advance mail subscriptions, old or new, to the RADIO DIGEST when received direct and not through subscription agencies according to the following voting schedule:

1-year paid in advance mail subscription direct..	$3.00	150 votes
2-year; two 1-year paid in advance mail subscriptions direct.....	6.00	325 votes
3-year; three 1-year; one 1 and one 2-year paid in advance mail subscriptions direct..	9.00	500 votes
4-year; four 1-year; two 2-year; one 3-year and one 1-year; paid in advance mail subscriptions direct.	12.00	750 votes
5-year; five 1-year; one 2-year, and one 3-year; two 2-year and one 1-year; one 4-year and one 1-year; paid in advance mail subscriptions direct.....	15.00	1,000 votes
10-year; ten 1-year; five 2-year; three 3-year and one 1-year; two 4-year and one 2 or two 1-year; two 5-year paid in advance mail subscriptions direct.	$30.00	2,500 votes

5. For the purposes of the contest the United States has been divided into 48 districts, comprised of the 48 states of the Union.

6. The station located within the borders of each State receiving the highest number of votes cast by individuals residing within the same State will be declared the Champion Station of that State, and will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the second largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the third largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the fourth largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

7. In the event of a tie for any of the prizes offered, prizes of identical value will be given to each tying contestant.

8. Any question that may arise during the contest will be decided by the Contest Editor, and his decision will be final.

Believe It Or Not

(*Continued from page 25*)

Among the latter are many epistles branding me as a colossal liar and fake. But I really don't mind this as it is a form of flattery. They simply didn't know the truth when they heard it. Whenever they come in with a signature and address, which is seldom, they are immediately answered and the verity of the statement in question is proved. I have yet to be caught in a lie.

There are many incredulous tales to be told of the broadcasting studios, of the daily show that goes on inside. Over a year ago, John B. Kennedy told the story in *Collier's Weekly* of Nathaniel Shilkret. While leading his forty-piece orchestra through the intricate rhythms of Gershwin's *Rhapsody in Blue*, the lighting current failed and the studio was instantly wrapped in complete darkness. "Without a moment's halt," said Kennedy, "Shilkret and his men carried on, in the darkness, and finished Gershwin's complicated masterpiece without losing so much as half a note. From this number they passed to others—with nothing but two candles stuck on the conductor's rack so that the musicians could follow his signals and his baton. The listening millions were unaware of the slightest hitch."

It takes about 200 Radio and telephone engineers to handle a coast to coast network program, exclusive of the engineers in the local studios. And sometimes it is found more convenient for broadcasting a program on the Pacific Coast to bring it all the way east and back again, crossing the continent twice.

Believe it or not, Radio listeners-in hear sound broadcast before it reaches the ears of those persons in the studio twelve feet from the microphone. For, the minute that it gets on the wire, sound becomes an electrical impulse which travels at the rate of 186,000 miles per second.

Believe it or not, according to the statistics gathered by Radio Retailing, 4,438,000 factory Radio sets were sold during the past year.

Radio is soaring skywards—ascending fast, and it is my belief that the next great star of Radio will be able to ask—and what is more important, receive—$25,000 a week for his services. I base my argument on the vast economic power of the broadcasters, glancing at their tremendous resources, at their possibility of attracting an audience of 60,000,000 persons, and safely declare they can afford to pay the price.

It makes interesting food for thought and meat for the dreamers, as it was not so long ago that the amusement world raised an incredulous eyebrow because Sir Harry Lauder was able to take back to his fortress in Scotland $30,000 for a thirty-minute swim in the Radio sea. Lauder received this staggering sum only once. He was not asked to send his little black bag on a regular weekly trip to the studio cash box.

Al Jolson startled even that section of Broadway that is familiar with his huge earnings when he received $7,500 for singing three songs on the microphone.

There have been numerous occasions when the Radio men have paid enormous sums for individual performances, but no single artist has yet signed the dotted line for a regular weekly salary of five figures. Yet I feel the day is not far off. From the standpoint of the amusement world it will most emphatically be THE DAY—*Der Tag*.

There are on the lists of the broadcasters any number of artists who are receiving in excess of $1,000 a week. Big money as reckoned by Broadway, but not so big as reckoned on the Radio waves. Big money to them means salaries of more than $10,000 a week. The broadcasters will be ready to pay it—and plenty more, when they find the stars. Meanwhile they are busy with their binoculars. Believe it or not.

Radiographs

(*Continued from page 63*)

where you make money. In four or five years, if present conditions keep up, I'll have my million. Then I'll step out and let my brother take over. He can make his pile and buy his island if he wants one."

Present conditions are rather strenuous, as he is in charge of seventeen orchestras in cities as far apart as Boston, Buffalo, Detroit, Los Angeles, Rio de Janeiro, Paris, London. Before long he expects to have an orchestra in practically every large city in the world, working through the United Hotels Company. Then there is his Radio work—his sustaining hours over Columbia, his commercial program with the Smith Brothers—his personal appearances at various private and public dances, his phonograph recordings.

He goes to bed late and gets up early. Two or three hours sleep a night is enough for him. He says he got his training getting up to milk the cows.

"Take today; it's typical of most of my days. It's five-thirty now. I'm here till six, when I leave and go to my office for dictation. Then I dress and am in White Plains for a dance at eight-thirty. I am in Greenwich, Connecticut, from ten to ten-thirty for debutante party. Then I'm at Ossining for fifteen minutes at a public dance. Then I'm back here at the Biltmore from twelve to twelve-thirty, when we also go on the air. I'm at another dance from one-fifteen to two. I'm at the Plainfield Country Club in New Jersey, from three to six. I get back to New York at seven. I sleep till nine-thirty and then get up in order to make my appointment at the Victor studios at ten." He glanced at his watch.

"But your health," I gasped. "[illegible] can't stand up under that continu[illegible]

"Yes, I can. I go to a doctor [illegible] month and have him look me ove[illegible] careful about diet. I don't dr[illegible] smoke. It's just a question of [illegible] used to it. But it doesn't leave yo[illegible] leisure."

"I don't see how it leaves yo[illegible] But if you do get some, what do [illegible] with it?"

"You'd be surprised. One of [illegible] cret vices is riding a bicycle."

So far all his heavy responsibiliti[illegible] put no mark upon Bert Lown. [illegible] twenty-six and could pass for [illegible] younger. People, upon being intr[illegible] to him, often think he is the son [illegible] orchestra leader and ask for his fa[illegible]

All his success has come to him [illegible] three years. Three years ago he w[illegible] ing cash registers. One of the [illegible] of his success is his ability to d[illegible] authority.

He wrote those two popular nu[illegible] *By By Blues*, and *You're the One [illegible] For*. His new theme song for [illegible] *With You By My Side*.

And I, for one, hope he doesn[illegible] that South Sea island very soon.

Classical Music Simplified

(*Continued from page 79*)

that can be done to transmit these s[illegible] even though they may know that it [illegible] be much better in most cases if the [illegible] ing voices and the speaking practi[illegible] both men and women could be imp[illegible]

With broadcast music, the mat[illegible] different. The object of broadcast[illegible] to convey to you and to me the n[illegible] possible reproduction of the effect [illegible] music has when it is heard in the [illegible] sort of concert room from the seat i[illegible] room which is known to be acous[illegible] best situated. In order to achiev[illegible] object both the musicians and the [illegible] neers have to learn that there is a [illegible] deal more to it on the one hand, tha[illegible] mere putting of sounds into a micro[illegible] and on the other hand than merely d[illegible] with the electrical output accordi[illegible] readings on energy measuring mete[illegible]

It is my deliberate opinion that [illegible] is grave danger to the growth of m[illegible] art on the one hand, and to the a[illegible] pleasure derivable from listening to t[illegible] casts of good music on the other han[illegible] less a study can be made, on a large [illegible] of the whole problem from the [illegible] standpoints of the engineers and o[illegible] musical artists. I consider that the [illegible] principle upon which any such stud[illegible] be successfully made is the princi[illegible] equality between the musicians (p[illegible] cers) and the engineers (reproducer[illegible] broadcast music.

Crashing Airplane

(*Continued from page 19*)

r we all had taken long drinks from
ethen jug, we piled the scattered
n a heap. Then in a springless
n cart, drawn by two ponies, we
auled across the desert and over a
road to the little town of Alcan-
in the province of Murica, about
iles inland from Cape Palos and
ort of Cartagena. I had ended my
nt from Paris to Fez in a lonely
between two ranges of the Sierra
Mountains in Andalusia, land of
ors, and within an hour's flight of
Granada.

n we arrived at Alcantarilla they
s to the only hotel, a little two-
Spanish inn, the *Hospedaje y Casa*
idas, where they gave us each a
f cognac and a bed. Summoned
ately after our arrival, several
physicians came, dressed the
of my companions, closed the
s to darken the rooms, and forbade
to enter.

was the last I saw of them. The
said that although Noailhat and
erpignan mechanic were quite
injured, they were sure they
ecover before long. They assured
y would be well cared for at a
ospital. Some months later I
rom Noailhat. He had recovered
but forgotten the crash. The
ic from Perpignan got well, too.

a brief stay in Granada, I set out
is. When I got there and told my
hat had happened in the lonely
n the South of Spain she said:
interesting. But you have arrived
time. Come down to the Rue St.
with me. I want you to meet
oiselle Augustine and see the
frocks I have picked out. And
rget your travelers' cheques."

ext day, in a taxi-cab piled high
xes filled with fluffy things, plus
for Monsieur, whose derby had
recked at the foot of the Sierra
s, we turned up at Le Bourget
ady to take off for London on the
of our 25,000-mile air tour of
Asia and Africa.

igh Cost of Haste

(*Continued from page 86*)

night happen. We do most of
rrying because our minds are

l troubles, and very little of our
nd worry is caused by actual losses
edy. The things about which we
he most are in almost every in-
but trifles which are exaggerated
active imaginations.

y should be unnecessary. As
l, we hurry because we worry, and worry arises from fear of what might happen. Why do we constantly fear that we are going to meet something that we cannot conquer? Haven't we managed to meet what life has offered up to now? Why should we feel that we cannot continue to meet the needs of this hour and the next hour, and the next? When we worry and we hurry, all we accomplish is a tenseness of mind which prohibits the accomplishment of whatever it is we want to do. Therefore, one of the soundest mottos for us all is the old one, "when angry, count ten"—only to this motto should be added, "When worried and hurried." In the time that it takes you to count ten, you should be able to restore order to your mental state and to quiet your frenzied, unthinking impulses.

Without exaggeration, haste can ruin your entire life, it can spoil your chances of happiness, and, it can do more than almost anything else to mar your attractiveness. Haste dulls the eyes, wrinkles the face, checks digestion, causes your glands to manufacture poisonous fluids, and puts you in a frame of mind which is obviously harmful to your appearance.

Coming back once more to Mr. Einstein and his theory of relativity, I want to remind you that haste concerns time, and time is, after all, relative. A woman in Texas with every modern convenience writes to me that she has no time to be attractive. Mrs. Thompson, raising ten children on a run-down farm without any conveniences, always had time to be attractive. Whether one understands Mr. Einstein's theory of relativity or not, it seems to me that these two examples demonstrate more or less adequately a certain relative value of time and that they have a pertinent application to this article's title—The High Cost of Haste.

I am Doubling and Tripling Salaries

Many of My Men Earn $50 $75, $100 a Week

I'll Train You at Home to Fill a BIG PAY Job *in Radio*

IF YOU ARE earning a penny less than $50 a week, send for my book of information on the opportunities in Radio. It's FREE. Mail the coupon now. A flood of gold is pouring into this new industry, making thousands of fine jobs every year. My training fits you for all lines—manufacturing, selling, servicing sets, in business for yourself, operating on board ship or in a broadcasting station, television, aircraft Radio, and many others. My FREE book gives you full information on Radio's many opportunities for big success and how you can quickly learn at home to be a Radio Expert.

Broadcasting stations need trained men continually for jobs paying $1,800 to $5,000 a year.

Many Make $50 to $100 a Week

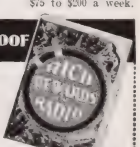
Why go along at $25, $30 or $45 a week when you can get ready in a short time for Radio where the good jobs pay $50, $75 and up to $100 or $200 a week. Get into this live-wire field of quick success.

Aviation is needing more and more trained Radio men. Operators employed through Civil Service Commission earn $2,000 to $2,800 a year.

Your Training Need Not Cost You a Cent

Hold your job. I'll not only train you in a few hours of your spare time a week, but the day you enroll I'll show you 10 ways to make money on the side repairing, installing, selling Radio sets in your neighborhood. I give you eight big laboratory outfits that teach you to build and service practically every type of receiving set made. G. W. Page, 1807 21st Ave., S., Nashville, Tenn., writes: "I picked up $935 in my spare time while taking your course."

Spare time set servicing is paying N. R. I. men $200 to $1,000 a year for their spare time. Earnings begin at once after enrolling.



ACT NOW
Get My Book—FREE

My book has shown hundreds of fellows how to make more money and win success. Investigate. Find out what Radio offers you, how my Employment Department helps you get a job after graduation, and the many other features of my training. Mail the coupon for your copy RIGHT NOW. J. E. Smith, President, Dept. 1BR3, National Radio Institute, Washington, D. C.

Talking Movies—an invention made possible only by Radio—offers many fine jobs to well-trained Radio men, paying $75 to $200 a week.

Science and Religion

(*Continued from page 55*)

view that the future is predestined and that time merely turns over the leaves of a story that is already written.

Until recently this was almost universally accepted as the teaching of science, at least in regard to the material universe. It is the distinctive principle of the mechanistic outlook which some years ago superseded the crude materialistic answer. But today physical theory is not mechanistic. Now it is built on a foundation which knows nothing of this supposed determinism. So far as we have yet gone in our probing of the material universe, we cannot find a particle of evidence in favor of determinism.

THERE is no longer, I think, any need to doubt our intuition of free will. Our minds are not merely registering a predetermined sequence of thoughts and decisions. Our faculties, our purposes are genuine, and ours is the responsibility for what ensues from them.

I think we must admit that, for we are scarcely likely to accept a theory which would make the human spirit more mechanistic than the physical universe.

I now turn to the question, "What must we put into the skeleton scheme of thinking?" I have said that physical science is aloof from this transmutation. If I am positive on this side of the question, it is not as a scientist that I claim to speak. It was by looking into our own nature that we viewed the first failure of the physical universe to be co-extensive with our experience of reality. Something through which truth may act must surely have a place in reality if we are to use the term reality at all.

In our own nature, all through the conduct of our consciousness with a nature transcending ours, there are other things which claim the same kind of recognition—a sense of beauty, of morality, and finally at the root of all spiritual religion, an experience which we describe as the consciousness of God.

I would say that when from the human heart the cry goes up, What is it all about? it is no true answer to look only at that part of experience which comes to us through certain sensory organs and reply—it is about atoms and chaos, it is about a universe of fiery globes moving on to impending doom; it is about noncomputated algebra; but rather it is about a spirit in which truth has its shrine, with potentialities of self-fulfilment in its response to beauty and right.

It is the essence of religion that presents this side of experience as a matter of everyday life. To live in it we have to grasp it in the form of familiar recognition and not as a series of abstract statements. Its counterpart in our outward life is the familiar world and not the symbolic scientific universe.

The man who commonly spoke of these ordinary surroundings in scientific language would be insufferable. It means a great deal to me to conceive of God as Him through whom comes power and guidance, but just because it means so much I have no use for it if it is only fiction which will not stand close examination. Can we not give some assurance that there is such a God in reality and that belief in Him is not merely a sop to my limited understanding?

The fact that scientific method seems to reduce God to something like an ethical code may throw some light on the nature of the scientific method. I doubt that it throws much light on the nature of God. If the consideration of religious experience in the light of psychology seems to remove from the conception of God every attribute of love, it is pertinent to consider whether something of the same sort has not happened to our human friends after psychology has systematized them.

It does not fall within my scope to give the questioner the assurance he desires. I doubt whether there is any assurance to be obtained except through the religious experience itself, but I bid him hold fast to his own knowledge of the nature of that experience. I think that that will take him nearer to the ultimate truth than codifying and symbolizing.

It is true that in the relativity theory we continue our attempt to reach purely objective truths. With what results? A world so abstract that only a mathematical symbol can inhabit it.

IN THE other great modern development of physics, the quantum theory, we have, if I am not mistaken, abandoned the aims and become content to analyze the physical universe into ultimate elements which are frankly subjective.

If it is difficult to separate out the subjective element in our knowledge of the external world, it must be much more difficult to distinguish it when we come to the problem of a self-knowing consciousness where subject and object, that which knows and that which is known, are one and the same.

I have been laying great stress on experience, speaking of the problem of experience. In this I am following the dictates of modern physics. I do not wish to imply that every experience is to be taken at face value. There is such a thing as emotion and we must try not to be deceived. In any attempt to go deeply into the meaning of religious experience, we are confronted by the difficult problem of how to protect and eliminate delusion and self-deception. I fully recognize that that problem exists, but I must excuse myself from attempting a solution.

The operation of cutting out delusion in the spiritual domain requires a de surgical knife, and the only knife I, as a physicist, can manipulate bludgeon which it is true crushes il but at the same time crushes even of non-material significance, and ev duces the material world to a state creativeness.

I am convinced that if in physi pursue to the bitter end our atten reach purely objective reality we simply undo the work of creatio present the world as we might conc to have been before the Spirit mov the face of the waters. The sp element in our experience is the cr element, and if we remove it as trying to do in physics, on the g that it always creates an illusion, we reach what was in the beginning.

Reasoning is our great ally in the for truth, but reasoning can only from promises. At the beginning argument we must always come ba our innate convictions. There are convictions at the base even of ph science. We are helpless unless we also, as perhaps the strongest con of all, that we have within us some of self-criticism to test the truth convictions.

That is not infallible, that is to is not infallible when associated human frailty, but neither is rea infallible when practiced by our bl ing intelligence. To make sure th are not without this guidance wh embark on the adventure of spiritua uncharted though it be, it is suf that we carry a compass.

Are American Wom Lax in Politics?

(*Continued from page 85*)

against our sex are really done. N so definitely implies the gaining of ity as the existence of women in p Nothing for us could mean quite so No woman M. P. sees herself in the as a peculiar person either in the of Commons or out of it. In fact, women have been in politics it absolutely for granted, and in th spect, I think we have made a ste ward. If I can establish the positi women in the life of the country tween your country and mine, one get a different picture. What I have trying to talk to you about is the tion of women in politics rather tha where else. Along that line I thin women of Britain have established selves and now are taken for grante are looking across with eager and h expectations of finding the influen women in the politics of other cou go at least as far as it has gone country in the past few years.

Ladies Must Fly

(*Continued from page 81*)

tainly consider Radio to be an able factor in flying," concluded hols, "and I'd like again to ex- gratitude and indebtedness to sley whose plane made possible it."

It ed the present round-trip trans- al record of 31 hours and 58 from Jacksonville, Fla. to San al. and return, made last June pt. William S. Brock and Ed- Schlee as pilots. It also partici- the Los Angeles to Chicago non- e in August and was the official ip in the National Air Reliability September.

ow Miss Nichols has added to list of attainments the record inental flight for women which e in 13 hours, 22 minutes and 31 breaking Mrs. Keith-Miller's y 8 hours, and bettering Col. h's mark by more than an hour! cond only to Lieut. Hawks in the inental speed record.

Nichols is a graduate of Wellesley e was a bright scholar and ma- the social sciences. She has aken an active interest in sports, goes in for hunting, polo, swim- ling and other outdoor activities. cident that probably first awak- r interest in flying occurred in City some eleven years ago, e flew off in a plane with no less shed a person than Eddie Stin- eer aviator. Mr. Stinson was pre- o take off in the plane when this lip of a girl, as Ruth Nichols ve been at that time, insisted ing up with him. While they he looped with her. Miss Nichols have her Five Points then which a *conservative* pilot, and perhaps t experience inspired her to set is fifth commandment!

Nichols lives with her family in usive countryside of Rye, New id is a firm believer in a home, , dishwashing, and all the etcet- domestic life, but she believes mly that every woman should o fly, that is, if her health is

"As the field is limited," con- Miss Nichols, "I don't think she o take it up as a profession. Al- women may distinguish them- n flight-breaking records. I don't that they will ever drive mail- or commercial planes any more than they would drive trucks or sail ocean liners across the seas. They will find their places in the educational, promotion and executive departments.

"Aviation is not a profitable business. The aerial chauffeur does not receive very much over a hundred dollars a month and a bonus on a mileage basis.

"I would like to see everyone fly as much as possible, but women taking up aviation should not expect to find it commercially profitable, or they will be disappointed."

What other startling surprises this famous young aviatrix is going to spring on the interested on-lookers, remain to be seen, but this much can be surmised; that this record-smashing is not going to be confined between the constantly shrinking borders of our continent. It may be that one bright morning, Miss Nichols will take off a few hours from her daily work to fly across the Atlantic and say "howdy" to Paris.

Strikes—Lucky and Unlucky

(*Continued from page 48*)

uses his fingers, nonchalantly flicking jazz demons from the air, as though he is not exercising even as far as the wrists.

He explains his directing thusly:

"Sometimes I use a baton to shift gears. The original idea of the baton was to extend the arm. Imagine a conductor with a wooden arm. No life! There is expression in the fingers. I lift a finger at the violins. My men all know what that means. I wave a finger at the clarinets. I make a fist and sweep at the drummers.

"There has been a great deal of comment upon my introducing everything from jew's harp, or a saw, to funny little whistles in my orchestra. They create not only melody and rhythm—but humor. A dance orchestra should have an underlying current of humor. Humor is happiness. Dancing must be happy."

And, wow, what an opinion B. A. Rolfe has about setting the classics to dance music. He considers it vulgar and inexcusable! Sort of sacrilegious, he feels too. He has all the bound-in-the-wool, old fashioned ideas of musical traditions despite the fact that he is a jazz artist now.

Lucky is the largest dance orchestra on the air. It takes a lot of men to play all the little doo-dads "B. A." drags around. At first there were thirty-six men. Now there are fifty musicians and a lot of singers.

Can you help keeping an eye on this busy fellow to watch what he'll do with the fortune he is recuperating? Just sort of a curious eye to see what he'll tackle next.

Want to bet that he'll found that Native School of music and perhaps be going around again some day with a button trying to find a shirt to sew it on?

The Pipes *of* Pan

No More Farcical Auditions for Amateurs, Please—Keep Radio Censors Within Bounds And Let Them Strike A Happy Medium

GEORGE D. LOTTMAN

CENSORS are always a bane, to someone or another, although it cannot be gainsaid that they serve a useful purpose, and that, sans censors, decency and dignity might, occasionally run amuck.*

Many professional censors, however, have a bad habit of taking their authority too seriously, and, sooner or later, they become despots. The responsibility of passing on the mental diet of their fellowman is a huge one, and the liability, at times, goes to their heads.

Take, for example, the Radio censor. True it is, as the big chains claim, that one never knows who may tune in on a program. A little child is as apt as not to dial in the giddy comment of a careless announcer. America's youth must be protected, and so on.

Yet we have seen specimens of the Radio censor's handiwork that would make a horse laugh. They have read evil into harmless song lyrics, and double-entendre into innocuous "gags". They have placed the stamp of smut on innocent recitations and inoffensive continuity.

Can't censors *ever* strike a happy medium?

* * *

FLATLY and irrevocably this writer herewith declares against auditions in Radio studios, or anywhere else, for that matter.

Auditions are farces—all of them. We've attended dozens, and have yet to be present at a "discovery" of any significance whatsoever. Auditions, it appears, are the last resort of the untalented; when all else has failed, the aspirant to Radio fame submits to one.

A person with genuine talent soon finds an agent to interest himself in that person's future. Experience has shown that only once in a decade is a genius unearthed at those ludicrous sessions that occur regularly at Radio stations, and result in nothing but a costly waste of everyone's time.

Granted that those in authority are qualified to pass on the merits or demerits of those who offer their wares. What then? Nothing ever happens but the routine taking of names and addresses, and the amateur then waits pitifully to receive the summons that never comes.

It's unfair to the deluded victim, to begin with. He or she must appear at some inconvenient time and waste hours waiting for The Opportunity. The aspirant to Radio laurels is then told to "make it snappy" and under this tremendous nervous strain, usually is licked at the very start. Efforts of the amateurs are taken as jokes by the "holier-than-thou" critics who pass judgment.

It's all too pathetic—and meaningless. Nothing *ever* happens. Let's stop it!

* * *

IT CANNOT be gainsaid that there are certain commercial broadcasts that are widely disliked, and yet they continue on like Tennyson's brook, with their sponsors apparently oblivious to public opinion.

We know of several concerning which a unanimity of opinion prevails, and that opinion is that they represent a shameful waste of air. Perhaps you, too, have a pet peeve in this regard, and find, after conversation with your friends, that they concur.

The programs we have in mind are bad because their sponsors, instead of sticking to the merchandising of their own produce, have suddenly become self-appointed master-showmen, to the neglect of their businesses and everything else. Fascinated by their new power, they abuse it, and tell veteran purveyors of entertainment, who stand by amused, how the public is to be catered to. The result is more often than not pitiful; again a little knowledge proves to be a dangerous thing.

We know of one internationally famous orchestra that flopped disastrously under commercial auspices, and lost considerable prestige. Now on its own, the same organization offers weekly a highly commendable broadcast, and its director explains the difference by saying, simply: "No longer are we being interfered with by autocratic amateurs who tell us what and how to play. Not being troupers, the smell of the theatre is foreign to them."

* * *

WHEN is a song "old"? How long after a ditty has passed into forgetfulness should it again be revived?

Songs with a tradition, like *After the Ball* and *The End of a Perfect Day*, never grow old. There's a ripe and mellow to compositions of this type, whic them delectable dainties for the matter how hoary they may be.

But it's different as far as last popular song is concerned. Nothir ephemeral, at best, as the Tin Pa product; it's usually as short-liv evanescent as a newspaper. Of there are exceptions, such as *M Waltz* and *Three O'clock in the M* but there are only a few such tun decade.

When it comes to the tin-panny song, however, its usual life is a if it exists that long. Next season comes irksome, and the following is nothing less than painful.

Chronic song revivalists on t should take this into consideration. Berlin's old songs are always pleasa when you attempt to resurrect the ingless drivel of a year back, you noying — not entertaining — your patrons.

* * *

AN EXECUTIVE at one of the tant Radio stations discusse article in last month's RADIO DIGE ferring to the indiscriminate cho songs on Radio programs.

We commented, if you rememb the frequency with which certain are offered, and declared that the rep of the "hits" of the day gave ma teners-in a sinking feeling aroun region of the stomach.

The executive mentioned above o solution. Here's his remedy:

"What Radio stations need mor anything else," he told us, "is an who could be designated a 'pr editor,' and whose function it wo to prevent Radio over-doses of c tunes.

"Under this plan each orchestr vocalist would submit their progra this individual, sufficiently in advanc continued. "If he notes thereon an surd reiteration of titles, he should b mitted to 'blue-pencil' them un fully."

In connection with this same th the writer is in receipt of a letter M. H. Aylesworth, president of th tional Broadcasting Co., who says, a other things: "We are doing our b prohibit duplication and I thoro agree with you in regard to the of overdoing music by repetition."

* Critics are not always right, nor are they always wrong! Publishers usually place their remarks in a "column" where complete freedom of expression can be maintained without regard to the Editors. Through this method censorship is not allowed to dull the sharp edge of criticism and the true function of critics in stimulating keener thinking is protected. —EDITOR.

...usos of Tomorrow

(Continued from page 56)

...as heard only in minor rôles, as ...iably the case with newcomers. ...t have been singing them yet had ...mother seen to it that, as a boy, ...ical training was not neglected. ...rtain Tuesday morning at rehears-al. Tibbett was informed that he was to sing Valentine in *Faust* Friday night in case he could prepare the part, which was new to him. That gave him approximately three days to work up a part for which there should be at least three months' preparation. He was flushed with the news when he appeared at my studio. He took the score home, sat down at the piano and hardly left it, in fact, until he had made the rôle his very own. It was a grind, but Tibbett's success on Friday night gave the management confidence in him.

Lawrence Tibbett is not a pianist but the knowledge of that instrument gained by him in former years was the golden key of fortune without which his name would not be the byword it is today.

The singer must necessarily wait until the voice changes or settles before it is advisable to study singing seriously or before very much can be told about the voice. Boys particularly would find it an advantage if they would save their singing voices until they have changed. That is why it is so vital that the ground should be prepared. Many boys with beautiful voices are encouraged to sing publicly and allowed to sing too long with the result that the voice breaks and never returns.

How are we then to prevent this failure of those with beautiful voices?

It is a matter primarily for the parents to decide, for it is chiefly their responsibility. The wail that I hear most frequently is, "Oh, if my parents had only made me practice." If every mother, who finds it at all possible, would see that the education of her children includes the study of music, preferably the piano, since it is the beginning and end of most music, more American singers would succeed.

..Here's *the* RADIO TRAINING *you've been waiting for*

Why envy the man who knows radio...who is able to assemble and repair fine sets...who knows the "why" and the "how," the theory and the practice of radio?

You, too, can learn about radio servicing, operating, radio telephony and telegraphy, broadcasting...radio in all its branches.

Learn at Home, in Your Spare Time

In order to make it easy for every man to study radio, RCA Institutes, is now training men in every branch of radio...So that men can get this training at home in their spare time, or at any of the resident schools throughout the country.

The RCA Institutes complete Home Laboratory Training Course gives you thorough and reliable radio training. You progress easily, step by step, and you receive with your training the complete RCA Institutes' Laboratory equipment—a modern outlay of apparatus furnished to every student, enabling you to solve radio problems. This is the logical way for you to acquire in your spare time the commercial knowledge and ability required by the radio industry.

Home Training Course by America's Oldest and Foremost Radio Training Organization

This home training course and laboratory equipment are backed by more than twenty years' experience.

Send for this FREE BOOK Today!

Learn the facts about the radio industry...all about the opportunities in radio...about RCA Institutes and the staff of RCA Institutes instructors who train you. This book should be read by every ambitious man who wishes to train for the future. Forty pages of pictures and text. Describes in detail the training that has placed thousands of men in responsible positions in radio.

RCA INSTITUTES, Inc.

RCA INSTITUTES, Inc.

Arturo Toscanini

(*Continued from page 7*)

his blankets and begins to read it as though it were a book. In two hours, he has finished reading the manuscript—and he knows every note that has been written there!

Everyone knows, moreover, how when he first came to the Metropolitan Opera House in 1913, he started the rehearsal of Wagner's *Götterdammerung*—the most intricate and the longest opera score in existence—without the music, and that he knew every bar and every passage in the whole opera! But not every one knows that his memory is phenomenal in other respects too. It was in 1913, when he was rehearsing a Rossini opera at the Metropolitan, that the first 'cellist made a mistake. It was a slight mistake and Toscanini, far from mentioning anything, did not even seem to notice it. The maestro had evidently not heard, thought the 'cellist with relief.

The following season when Toscanini was back with the Metropolitan he rehearsed the Rossini opera once again and when he came to that very 'cello passage, in which the 'cellist had made a mistake a year before, he raised a warning finger to the musician! Another anecdote—which, because I myself heard it, know that it is no legend but a true happening—is even more unbelievable. Two years ago, the trombonist came up to Toscanini and regretfully told the maestro that he would not be able to play that day.

"Why?" asked Toscanini with surprise.

"One of my valves is broken," the trombonist explained. "I cannot possibly play lower C."

TOSCANINI thought for a moment. Then he answered: "That's all right. You'll be able to play. There's no lower C appearing in your music for today!"

Toscanini is, of course, a tyrant as a conductor. I say "of course" because every great conductor must be. He will not permit anyone to do anything which he does not sanction. At the Metropolitan Opera House, a famous opera-singer was imported to sing the principal role in Gluck's *Orfeo*. During one of the solo passages, the soprano held her high C a trifle too long to suit the maestro and so he interrupted her outburst with the orchestral interlude. The soprano rushed backstage, burst into violent tears, and swore she would never again sing under such a conductor.

In La Scala, especially, was he known for his tyranny. He was known to throw books and music-stands at the unprotected heads of erring musicians. At one time he almost pierced out the eye of a first violinist with the end of his baton because the maestro had, in a moment of rage, called him a rather indelicate name. But all this despotism is only because Toscanini is an artist at heart and in soul and, consequently, an imperfection wounds him more deeply than any possible pain.

But the members of his orchestra have noticed that during the past two years, his terrible tyranny has been tremendously diminished. He has become infinitely more patient and gentle. He is now kind and docile. He will explain, even a hundred times, how a certain passage should be played and then, when the performer makes a mistake, he will explain once again. His patience is almost superhuman. I myself have heard him rehearse the flute solo in Pizzetti's *Concerto dell 'Estate* thirty-six times! Nor will he stop until he has attained perfection. He speaks quietly, explains clearly and tersely, and seldom loses his temper.

Of course, there are still times when his temper explodes and when it does—every once in a while—his musicians feel the real force of the famous Toscanini fury! During a rehearsal of a modern work by Respighi, the orchestra failed to comprehend a certain interpretation, and Toscanini worked faithfully and patiently over it for more than an hour. At last, seeing that all his work was in vain and that the orchestra still did not understand, he emitted a heart-breaking cry of pain and such a furious volley of imprecations and Italian oaths that the very walls quivered. The effect of that outburst was electric, and when his heat cooled somewhat and he explained once again his interpretation, the orchestra played as it had never played before.

One other time I saw Toscanini in anger. It was in discussing with Arbos, the celebrated Spanish conductor, a certain passage in the *Ninth Symphony* of Beethoven. Arbos, venturing that Toscanini had missed a certain effect, sang to him the passage as he thought it should sound. Toscanini volubly and heatedly told Arbos what he thought—in not very gentle language.

At rehearsals, Toscanini works minutely over each passage, each phrase, each note. He sings continually, both while explaining his interpretations and while the orchestra is playing—in a nervous and high-pitched voice. In explaining his interpretations he also dances and postures and pantomimes. For a vulgar sound he will tell his men to play like this—he will inflate his cheeks and kick out his right leg—for a delicate sound he will quiver his fingers nervously in the air.

Toscanini has a most miraculous ear for sounds. Each different tone has a definite meaning for him and that meaning he tries to convey to his orchestra. The cornet should play like a sigh, the ... should try to laugh and the violins ... be angry (and Toscanini shakes h... in mid-air). And so sensitive is h... that the entire orchestra may pla... *tissimo* and yet he will know if th... net has played the sigh or if the ob... laughed correctly.

Toscanini is a happy man if th... chestra plays well; he has no othe... piness in life. At the end of the reh... he will nod with approval to his ... applaud their efforts and then leav... stage joyfully. But if they play ... then the man becomes a different p... He scowls at everyone, he will not ... to the right or to the left but will ... ously leave the stage; he will not ... into contact with anyone for that ... For example, during the intermissi... one of the Philharmonic concerts ... year—when one of the cornetists m... mistake—Toscanini rushed furiously ... his platform, silently walked toward ... private room and there punched ... into a thin walnut cabinet until i... came mere splinters. But such day... rare, after all—for as Toscanini hi... says (and who should know better ... he?) the Philharmonic is one of the g... est orchestras in the world.

SOMETHING more ... mate about this man: He is married ... has two daughters—one of whom ac... his advisor, councillor and dearest fr... During one of his tempestuous tem... they will avoid him fastidiously—... Mrs. Toscanini walks into his pr... study, soothes him and finally annou... that "the war is over." He earns, from ... Philharmonic Symphony Society, $2... for every public appearance; rehear... however, are free. He also does not ... paid for assuming the leadership of ... Bayreuth Festival.

He has very marked penchants ... prejudices, nor does he ever attemp... conceal them. Sometimes he is bru... frank. He is a dear friend to Wi... Mengelberg, the conductor, yet when ... heard Mengelberg conduct the *Fifth S...phony* of Beethoven he openly called ... a "pig". He hates Tschaikovsky viole... and any mention of the Russian's n... causes him to fly up in anger; he de... jazz—and once at a party of a rich ... ciety woman he refused to shake the h... of George Gershwin; he dislikes all m... ern music, too—and yet his programs ... cluttered with "first-performances" ... because he feels it his duty to perf... them. He worships Beethoven wit... schoolboy awe and reverence. A... Beethoven comes Wagner.

He detests publicity, applause, ovatio... he never caters to the will of his a... ences; he never reads the criticisms ... his concerts; he sticks, with scrupul... fidelity, to every desire of the compo... he conducts. And he loves music w... the simple passion of a young romanc... lover.

FALSE TEETH ARE A GREAT INVENTION *but* KEEP YOUR OWN AS LONG AS YOU CAN

Ten years too late . . . most people seek protection

FALSE TEETH are better than none, but if you prefer to keep your own don't wait for pyorrhea to make your gums spongy and swollen before giving your mouth the care it deserves.

A great British doctor is authority for the statement that many people actually have a pyorrhea condition in their mouths as long as ten years before the real havoc of this disease begins to tell.

As it progresses the gums soften, the teeth may loosen in their very sockets and dangerous poisons spread throughout the system until extraction and false teeth are the last resort.

If your gums are the least bit tender; if your toothbrush shows red when you clean your teeth, don't wait another day before taking protective action.

See your dentist twice a year

Everyone who values his teeth should see his dentist at least twice a year. Modern dentistry can do a lot to prevent needless trouble in your mouth. In your own home, however, it is your own responsibility to give your teeth the finest care possible.

Forhan's is the formula of R. J. Forhan, D. D. S., who for years specialized in the treatment of pyorrhea.

It contains Forhan's Astringent, an ethical preparation widely used in the dental profession for the treatment of pyorrhea and is an invaluable aid in warding off this dread gum disease.

Start using Forhan's today. It costs a little more than other brands, but the real money difference is actually so small that it is nothing compared with the protection it brings. Price 35¢ and 60¢ in tubes. Forhan Company, Inc., New York; Forhan's Ltd., Montreal

NOW ON THE AIR!
New Forhan program—featuring Evangeline Adams, world-famous astrologer—every Monday and Wednesday at 7.30 P. M. Eastern Standard Time—Columbia network.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

False teeth often follow pyorrhea, which comes to four people out of every five past the age of 40

FOLLOW MY STARS OF YOUTH TO A

★ ★ Clearer, softer skin

Frances Ingram herself tells how to keep the skin lovely at its 6 vital places

YOU are just as young and attractive, or just as old, as your skin looks," I told a charming woman who recently came to consult me. "Keep your skin immaculately clean... Keep it youthful at my six stars... And *you* are youthfully lovely."

Then I explained to her my method with Milkweed Cream.

"To cleanse the skin, spread my Milkweed Cream generously over your face and neck. Let it remain for several minutes, to allow the delicate oils to penetrate deeply into the pores, and then remove every vestige of it with soft linen.

"Now—apply a fresh film of the Milkweed Cream. With outward and upward strokes pat it into the skin at the six points starred on my mannequin.

"There are special *toning* ingredients in this Milkweed Cream. These penetrate the cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

* * *

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

* * *

I have recommended my Milkweed Cream and my method to so many women, and have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES—*If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

INGRAM'S Milkweed Cream

Frances Ingram, Dept. R-110
108 Washington St., N. Y. C.

Please send me your free booklet, "Why Only a Healthy Skin Can Stay Young," which tells in complete detail how to care for the skin and to guard the six vital spots of youth.

ACTUAL PHOTOGRAPH OF STUDENTS WORKING IN SERVICE DEPT. OF COYNE RADIO SHOPS

LEARN RADIO--TELEVISION TALKING PICTURES in 8 WEEKS

By Actual Work --- In the Great Shops of Coyne

Don't spend your life slaving away in some dull, hopeless job! Don't be satisfied to work for a mere $20 or $30 a week. Let me show you how to make REAL MONEY in RADIO—THE FASTEST-GROWING, BIGGEST MONEY-MAKING GAME ON EARTH!

THOUSANDS OF JOBS OPEN

Paying $60, $70 to $200 a Week

Jobs as Designer, Inspector and Tester, paying $3,000 to $10,000 a year—as Radio Salesman and in Service and Installation Work, at $45 to $100 a week—as Operator or Manager of a Broadcasting Station, at $1,800 to $5,000 a year—as Wireless Operator on a Ship or Airplane, as a Talking Picture or Sound Expert—THOUSANDS OF JOBS PAYING $60, $70 and on UP TO $200 A WEEK.

No Books - No Lessons

All Practical Work

Coyne is NOT a Correspondence School. We don't attempt to teach you from books or lessons. We train you on the finest outlay of Radio, Television and Sound equipment in any school—on scores of modern Radio Receivers, huge Broadcasting equipment, the very latest Television apparatus, Talking Picture and Sound Reproduction equipment, Code Practice equipment, etc. You don't need advanced education or previous experience. We give you—right here in the Coyne Shops—all the actual practice and experience you'll need. And because we cut out all useless theory, you graduate as a Practical Radio Expert in 8 weeks' time.

TELEVISION

Is on the Way!

And now Television is on the way! Soon there'll be a demand for THOUSANDS of TELEVISION EXPERTS! The man who learns Television NOW can make a FORTUNE in this great new field. Get in on the ground-floor of this amazing new Radio development! Come to COYNE and learn Television on the very latest, newest Television equipment.

Talking Pictures

A Great Field

Talking Pictures and Public Address Systems offer thousands of golden opportunities to the Trained Radio Man. Here is a great new field of Radio work that has just started to grow! Prepare NOW for these marvelous opportunities! Learn Radio Sound work at Coyne on actual Talking Picture and Sound Reproduction equipment.

EARN AS YOU LEARN

Don't worry about a job! Coyne Training settles the job question for life. We often have more calls for Coyne graduates than we can supply. YOU GET FREE EMPLOYMENT SERVICE FOR LIFE. And don't let lack of money stop you. If you need part-time work while at school to help pay living expenses, we will gladly help you get it. Many of our students pay nearly all of their expenses that way.

COYNE IS 31 YEARS OLD

Coyne Training is tested, proven beyond all doubt. You can find out everything absolutely free. How you can get a good Radio job or how you can go into business for yourself and earn from $3,000 to $15,000 a year. It costs NOTHING to investigate! Just MAIL THE COUPON for YOUR COPY OF MY BIG FREE BOOK!

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

CHEER up—there's no need to worry about your favorite entertainment. All along the line broadcasting has been doing well financially as well as artistically. The fact that the two leading chains reported a gross income for the year of $26,667,391 and the local stations received from $30,000,000 to $50,000,000 makes it possible for them to hire better talent and perform better service technically. These figures do not take into consideration the money paid to artists by outside sponsors. They represent a 42 per cent increase over the 1929 revenues.

* * *

Will Senator Fess be able to force through his bill demanding 15 per cent of the broadcasting facilities of the United States for educational purposes? Perhaps you will know the answer by the time you read this. The National Association of Broadcasters is opposed to the bill.

* * *

ANITA LOOS, who is known to every listener in America as the author of *Gentlemen Prefer Blondes,* is being interviewed by Miss Genn for her views on the question *Is the American Woman Happy?* Miss Loos holds a pessimistic view and does not hesitate to declare that the American woman is not happy. Why? Well, she is going to tell us why and you will read what she has to say in our April RADIO DIGEST. There would be two sides to the question, of course. Cosmo Hamilton, the famous novelist, maintains that the American woman is happy. In fact, he has given the subject a great deal of serious thought and in a succeeding issue of RADIO DIGEST Miss Genn has planned to give you his reasons, as expressly stated for your benefit, why he thinks that American women are indeed happy. Are they happy and don't know it? Cosmo will answer in full.

* * *

Bears! Harold McCracken, the Big Grizzly Bear Man from the Rockies, will tell us about some of his exciting adventures in hunting grizzlies in our April number. He's discovered a new way of hunting under better sporting conditions with bigger thrills and no bloodshed.

* * *

It appears from where we sit that our Peggy Hull is due to arrive as a real national celebrity of the air. She has just had her first broadcast as a representative of RADIO DIGEST at WMCA, New York. Letters from listeners along the Atlantic seaboard state they were "thrilled" and want to hear her again. Miss Hull has been through nine wars and her advent to the air was highly recommended to RADIO DIGEST by Floyd Gibbons, who praised her as the only officially accredited woman war correspondent in the World War. He later devoted his own program to a story of her adventures in Siberia and China.

A FAIR listener from Norfolk, Virginia, writes to ask we won't print something more about Ray Perki "He has the funniest line of chatter I ever heard from Radio," she writes. That's just what thought when we printed one of sketches a while back, and then an terview about his life in his own wor So we asked Mr. Perkins to drop in a see us and bring along his portfol Next month you will see what he j written for readers of RADIO DIGE He doesn't know which of these th titles to give it: *How to Live on 5.(Watts a Day. Thru Etheria on a K cycle,* or *Broadcastoroil.* * *

Mr. Mike, the genial interlocutor between the Ra and the sound picture, is bringing the stars of the scre and the stars of the air closer together. We know t Paramount represents a substantial part of the CBS and t RKO is a significant factor of NBC. What has happer since Radio has become so "high hat" that a screen notal can't pop on or off just for a bit of publicity merely by a ing for it? You'd be surprised. Don't miss the story our next issue, *That Hollywood Voice.*

* * *

Nick Kenny, Radio editor of the New York *Mirror,* wr this epitaph for the Late Lobo I.; whose woof was kno to Radio listeners from coast to coast:

"But if there's a dog's heaven
Up there in the skies,
We know that Old Lobo is there."

We're going to give you a story about this famous d in our April RADIO DIGEST—and if you're a dog lover y can't afford to miss it.

* * *

AT 5 o'clock E. S. T. on any Sunday afternoon you h over the NBC network the voice of Harry Emers Fosdick. It is a safe bet you would hear him better home over the Radio than you wo hear him by trying to get into church on Riverside Drive, New Yo The auditorium seats 3,000 and packed to the doors every time he announced for the pulpit. He's rugged, wholesome man with a genu love for his fellow beings. His Ra congregation probably is the largest America. We are going to give yo character study of Dr. Fosdick in next issue of RADIO DIGEST. * *

It is hard to understand why some of the good statio seem to get all the bad breaks. Good old KYW of Westi house, Chicago, one of the first broadcasting stations in t world, sister of KDKA, was kicked out of the fine chan it originally had, then pushed around a couple of times, a as we go to press WWJ of Detroit is demanding the chan KYW now uses for the entire time.

Next Month Decides

STATE CHAMPIONS

Be Sure To Nominate your Favorite Stations Now—
Remember April Will Be The VOTING Month

RADIO DIGEST'S station popularity contest for the State Championship will soon draw to a close. Midnight, April 20th, winds up the contest. Have you a favorite station? Is there any station you want to see at the of the heap in this contest? If there is, don't delay any r, but nominate the station you consider the most popular our state now and clip Ballot No. 6 below.

housands of listeners are registering selections in this contest. From e to California, and from the Cana- border to the Rio Grande enthusi- listeners are voicing their selections. y vote counts, so prepare your ballots and get ready to shoot next month you get the last coupon ballot.

e Radio stations themselves are d up about this contest. They want in. But they can't win unless you them by nominating your selections voting for them.

is a small thing to ask, but it means eat deal to the Radio station. Just our mind wander back over the many y hours of entertainment made pos- by the men and women in the broad- ng studios. Think of all the plan- : all the downright hard work; all the aches; and all the enthusiasm and mination that have gone into the ng of these programs. Consider h things, then register your appreciation by voting.

e letters we receive indicate the enthusiasm of listeners. is one from a young lady in Louisville, Kentucky. Her e is Helen Otterpohl, and she writes: "I nominate WHAS ouisville, Kentucky, because I think it is the most wonderful on on the air.

There is nothing in the whole wide world that I enjoy as much ar Jack Turner. After a hard day at school, I go home and n to his wonderful melodies. And our announcer is great. I like the New York stations too. Because when I hear them over the Radio, I can imagine myself in that mammoth city. I have never been there and it is my heart's desire."

You can't go wrong by climbing on the bandwagon! If any station has provided the pleasure for you that WHAS has brought into the life of this young lady the least you can do is to register your vote in favor of that station. Whether you like the work of only one artist, or just tune in because the announcer is a favorite. remember the station is in back of the program. They want to give you better programs—the kind you like. This contest will encourage those who are working toward this end and stimulate them to even greater endeavors.

And if you don't believe the staff helps make the program just listen to what Miss Clara Kienzle, of Philadelphia, Pa., has to say about it: "Like many others I too think the announcers have a lot to do with the popularity of a station. Therefore, my first preference is WPEN because of its wonderful staff. WPEN has a fine variety of entertainment and there is something for everyone. Of course, we have that famous Mystery Announcer and gang, and there is not another program that can equal this one. My other choices are WELK, WIP, WFAN. My reasons for choosing these is because of a few programs that I like."

Send in your nominations, after reading the rules on page 102, All stations, both large and small, have a chance to win. And even if the station you select does not come out first in your state, at least give your favorite the satisfaction of making a good showing in the contest. The medallion in the center of the page, suitably engraved, will go to the winners together with a scroll of honor. GIVE YOUR STATION A BREAK! Send your nominations now.

Erno Rapee

A SLIGHT man, but at close range one se
the sharp-edged cheek bones that speak of detern
nation and will-power. They make credible the ma
velous versatility of the man who conducts intrica
classical scores without rehearsal, who plays the pian
with genius and fire, and who has composed suc
popular song hits as "Charmaine" and "Angela Mia

Little Man with the Big Stick

Erno Rapee

Roxy Maestro is Unique Among Orchestra Leaders —Commands World's Largest Symphony Organization but can Switch to Jazz Instantaneously

By DAVID EWEN

EVERY Sunday afternoon, the Radio brings to every listener two superb symphonic concerts. One of them is that of the Philharmonic ony Society; the other is that of the Symphony Orchestra, conducted by Rapee. Strange as it may sound it Roxy Symphony Orchestra, and not ilharmonic, which is today recogis the largest symphonic ensemble world. Almost two hundred men rected by Erno Rapee's baton—two hundred men, constituting . in many respects, the most unique ra in the world.

Rapee's tremendous orchestra is not only because it is the largest in the world, nor even because so t plays so superbly. It is unique, thing, because of its unbelievable ity: on Sundays, for the broadcasts, play Bach or Beethoven or Wagt an hour later, on the stage of the heatre it may be required to play s, jazz-medleys, popular tunes. It ue, also, because it plays so perdespite the paucity of its rehearsals. Sunday broadcast, something like n hour of preparation is required the orchestra can play such intrid rare masterpieces as, for example, l Strauss's *Ein Heldenleben* or a er Symphony.

when we realize that the average nic orchestra rehearses ten hours h of its concerts, we begin to realize ggering is the achievement of this le. Finally, this orchestra is unique it can take almost any standard ony and play it well from sight; atter of fact, it has done this very ore than once before the micro-

No wonder, then, that Toye, the own English music-critic, said—earing Rapee's band—that no orchestra throughout entire Europe could be placed upon an equal footing with the Roxy Symphony Orchestra!

It was Gustav Mahler, the composer, who once wisely remarked: "There is no such classification as good orchestras or bad orchestras; there are only good conductors and bad ones." Who, therefore, is this man who is responsible for the overwhelming artistic success of the Roxy Orchestra?

He is Erno Rapee, who has been its leader ever since its inception in 1926, except for that brief vacation he took in Hollywood when his orchestra fell into the hands of a capable substitute, Joseph Littau. Rapee was born in Budapest—and from his very birth it seemed apparent that he had been born for music. As a mite of a child, he would sing to himself interminably little snatches of melodies, as he played with his toys or as he lulled himself to sleep. When he grew a little older, he began to toy with the yellow keys of the long-neglected piano in his house—first making up little pieces of melodies with his little forefinger and then, with the utmost patience, attempting to find for these melodies a suitable harmonic garb. His life from the very start was absorbed with and devoted to music.

It was inevitable for the parents to notice that a musician had been born into their midst, and Erno's father—an intelligent bourgeois—decided to develop this manifest musical talent of his son. A neighboring music-teacher was hired to teach the boy the piano and rudiments of composition. The boy took to music as a duck takes to water. No exercises seemed to be difficult for those indefatigable fingers; no study too dull or ponderous for that receptive mind. He learned his music with a facility and ease which staggered his teacher. It was not long before Erno outstripped every effort of his guide; before he had completely outgrown him. There was nothing left to do but to enter the boy into the National Academy—perhaps one of the foremost musical conservatories in Europe. Here, it was felt by both teacher and parent, that Erno's musical talents would reach full maturity.

They did. Under the guidance of such great teachers as Emil Sauer, the boy's musical gifts grew ripe—and soon blossomed. He became a pianist of great talent; in his composition he revealed a rich inventiveness; in his conducting he showed that he could bring new freshness to every symphony he touched. He graduated from the Academy with the highest of honors. All of his famous teachers prophesied a great musical career for him.

From that time on he constantly acquired a greater and greater importance and authority in the musical world. First, he officiated as the assistant conductor to Ernest von Schuch of the Dresden Orchestra—but soon because his duties were few and far between, he resigned in order to devote himself to greater activity. For the entire year he toured as piano-virtuoso—appearing with the Vienna, Berlin and Budapest Philharmonic Orchestra, making a very marked impression upon critics and audience. But, somehow, piano virtuosity interested him but little; he was far more eager to

(*Continued on page* 99)

Flashes from the HIGHWAY

Noted Explorer Pictures His Greatest Moments

"The Evil Spirit must leave your hands."

WHAT was my greatest thrill? You mean my *greatest* thrill? Let me see—um—er—the time I was nearly drowned in a coal mine? No, I think the time I was trapped in a hotel fire was a bit more of a squeak. Cracky gee, I don't know, what you would call the greatest thrill. Is it more of a thrill to look into the face of Death and get away than to have merely an exhilarating experience of discovery or witness a seeming miracle?

I have certainly had my share but I think the time I was a passenger in a plane with the fearless Nungesser, famous French ace, and the engine went dead while we were about a mile high—and we fell, and fell, and fell— Oh, man, that was a time my nerves squirmed and twisted with suspense and racking horror.

Want to hear about that?

It happened just a month before Nungesser returned to France to make ready for that last long ride that ended in another fall of which the world will never know. A brave man was this French war bird. He had a head and a heart that never failed him while he lived. And I considered myself indeed a lucky man to be zooming skyward as his flying companion. Up and up we went. The fields spread out below in checkered squares. Long white lines stretched across the panorama showing the concrete highways. We were climbing at a very sharp angle. The craft was small and keenly respo to the hand of the pilot. The pow engine radiated a quiver of life into fiber of the structure. There was a in the whirr of the propeller that ga a feeling of confidence and security. we were skimming through azure blu drifting cloudlets. Suddenly the s rhythm turned to a jerky palpit Instantly the plane ceased its ascen leveled off. I could see Nungesser ing the controls and peeking beneat cowl. The sputtering grew worse. —pop-pop—and the engine was still

I heard Nungesser mumbling some in French as he jerked away at some beyond the range of my vision.

"Trouble, we have trouble, Mr. C

ADVENTURE by Gilbert Gable

THRILLS

Miracle of the Painted Desert

Sky Tumbling with Nungesser

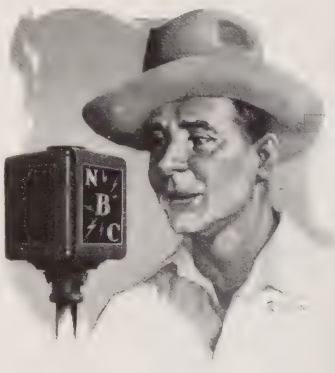
Trailing The Thunder Bird

THRILLS? No end to 'em. A mule kicked Gilbert Gable head first off a Grand Canyon trail—and was he scared when he saw the bottom down the wall of that cliff—but he didn't let go . . . An Indian showed him a big rock where "the Thunder Bird" had walked—dinosaurs! Two skeletons and no end of tracks where the animals had tramped around. He discovered a deserted Indian village a thousand years old . . . He flew with Nungesser and tumbled four thousand feet—still he lives.

SO WE picked on Mr. Gable for another thrill story. And here it is as he told it to a representative of RADIO DIGEST.

engine, she is dead!" lashed a quick glance rd me. I said noth- My tongue was in throat. My stomach rising up to meet it, use at that instant we keeling over and I the hard old earth up at us at a terrific straight over the nose plane. The wind screeched hideously. realized then we were plunging head- to the earth—a few seconds more its rocky knuckles would blot us out istence and probably of all semblance uman beings. Good-bye, good-bye! futile and uncertain everything had always been anyway. And now this was to be the end—nothing uncertain about the end! Not now—yet—I could see Nungesser still struggling with something below the rim of my cowl. His brain was functioning one hundred per cent—perhaps—but—what chance—we'd smash in half a minute. He gave a mighty tug. The plane shifted a bit, yes it was veering out a trifle—another pull—

Bang-crash! There was a grinding splintering sound. The air had stopped roaring past my ears. We were on the ground. We were alive. We could stand up. The plane was smashed but we had escaped practically unhurt. I think the realization of this fact was the greatest thrill I have ever known.



Poor Nungesser—how many times since then have I pictured him in my mind in that last long flight. I know this—that he fought through to the last minute, the very last second!

To feel that Death has reached out his

long fleshless arm to nab you and you have managed to escape is an experience that gives you one kind of a thrill. Then to behold a miracle through savage superstition is another.

Want to hear about the miracle of the Painted Desert?

I have only recently returned from that desolate country as you may know. The Painted Desert is located in the very bad, bad lands of Arizona. My camp was at the edge of this wilderness. The nearest railroad was 110 miles distant. Navajo Indians were my only neighbors and I think the nearest one was about 75 miles away. The Navajos have a primitive sort of civilization of their own. They are satisfied with what they have and are not interested much in our schools and other forms of culture. They have much to command the respect of some of us who consider ourselves of a better breed. We live according to our light.

Gilbert Gable at the mike.

Since the white man does not care to live in the discomfort and frugality of the desert the Navajos confine themselves to that part of the country. Although they are widely scattered they manage to keep in contact with each other. They live in crude huts which they call *"hogans"*. I too lived in one of these peculiar huts, and I came to be especially friendly with the Navajo chief, Seginetso, truly a splendid survival of the noble red man.

One day to my great surprise Indians came galloping down to my camp from the four points of the compass. There were 300 of them. They represented various divisions of the Navajos. At their head rode Chief Seginetso. Obviously it was a concerted movement and their mission was one of importance. However, my familiarity with the Navajo conception of good manners caused me to restrain any evidence of curiosity until they were ready to tell me why they had come of their own volition. We chatted of various commonplace things and of the extremely dry weather, and bad crops, the chief employing an interpreter to speak for him. We were sitting before the open fireplace. The group included a number of his leading counselors. Several moments passed in silence while the chief puffed at his pipe. Suddenly he lifted his hand and asked solemnly a question that was interpreted to me.

"Are you a friend of the Navajos?"

"Yes. I am a friend of all Indians," I nodded with equal solemnity.

"As a friend of the Navajos would you be willing to help our people who find themselves in great difficulty?"

"I should be pleased to do anything in my power to prove that I am a true friend of the Navajos."

Moments of puffing the pipe in silence. These Indians are very proud. To ask help of the white men is only a matter of last resort.

"It has been a very bad year. The grain has failed. Our people will suffer from cold and hunger."

And then he reluctantly asked me if I could lend them some grain, some sheep and some wool or any other commodities I could spare until they could repay me from another season of harvest. It was a very ponderous and weighty question. To respond quickly and graciously would be extremely discourteous no matter how willingly and gladly I might feel to give them all that I had. So I listened gravely and silently and reserved my answer for due and worthy deliberation. I told them I would have to think many things and would give them my answer in a little while. This was to their satisfaction.

For considerable time I sat looking into the fire and pretending to be in deep cogitation. At last I arrived at my decision. I turned to the interpreter:

"It will be very, very difficult, but I shall try to do for you whatever I can."

This pleased the chief mightily. He arose with every expression of gratitude and left my hut. The others followed after him. They were pleased not merely that I had promised to help them but had done so with real Indian grace and proper consideration of the gravity of their request. In the morning I made good on my promise and they rode away.

THE friendship thus engendered repaid my advances many fold. First came the miracle of the Painted Desert. All precedents were broken when I was invited to witness one of their healing ceremonials—for no white man, they said, had ever before been permitted to see this most sacred of their ancient rites.

The girl, who was to be healed by the ceremonial, was afflicted with an infected hand. Her left hand was swollen enormously, and her fingers were stiff and paralytic—sticking out of that swollen hand like clothes-pins out of dough. All about her were grouped thirty-five Indians —and in front of her was the w doctor. The witch-doctor, before ceremonial began, took a black pie tallow and drew a line below the str girl's lips, and under the lips of ever in the tent. This was to signify tha one should say anything evil against poor, sick girl. A crimson tallow used to draw a line, in the same fas under the eyes; and a green tallo draw a line under the forehead of e one in the tent—to signify in the manner that no one should see or t anything evil about the girl. With done, the ceremonial began.

THE witch-doctor b dancing, making the weirdest antics i inable—a grotesque dance, it was!— intoning an equally weird chant in hi tive Navajo language. This chant h truly remarkable psychological effect only upon the sick girl but also upo of us. First the witch-doctor intone a deep haunting voice:

There is nothing wrong with your foo
No! there is nothing wrong with foot!
We are sure that there is nothing w with your foot!

All of the Indians repeated this after passionately and with accompanying tesque gestures, the same lines for ab twenty minutes — repeating the clearly, slowly, effectively, until they w fully and deeply impressed upon the m of the sick girl. Then when they that the sick girl was fully convinced t there was nothing at all wrong with foot, they began in the very same w to tell her that there was nothing wr with her stomach, either, or with her cl or face. Finally—the entire proced took several hours—they began to sp about her afflicted hand. The witch-d tor intoned:

But an evil spirit has settled in your ha
The evil spirit has stayed too long in y hand!
It is time for the evil spirit to leave y hand!

The Indians repeated this tirelessly for other twenty minutes—once again passi ately, accompanying it with a wild, barba dance. One could see that they really lieved that their passion—both in th singing and in their dancing—would dr out the evil spirit from the sick girl's ar

After this—not doubting for a mom but that their ceremonial would be m efficacious—the Indians began a monst celebration in honor of the departure the evil-spirit of the infected hand of t sick-girl. A tremendous bon-fire was bui and it almost seemed that the flam licked the heavens. Around this bon-fi —led by the witch-doctor—a weird dan took place in which the entire tribe to part, accompanied by haunting, shrieki

This doe-skin hangs on the wall in Mr. 's hotel-room illuminated by a cu- dark-gray pigment. It bears the fol- inscription: "To Clini Nazuni e Horse'—friend of the Navajo: Seginetso, Chieftain of the Western Navajo Tribe in the Painted Desert, and through him all his People, this token is given to one who, by his friendship and love, has become, himself, a brother of the Tribe.—Seginetso." This is one of Mr. Gable's priceless possessions, and one which accompanies him wherever he goes. —Editor.)

THE third of my great thrills was the discovery of the dinosaur tracks—tracks which revealed the fact that those prehistoric creatures had populated Arizona ten million years ago, perhaps more.

It happened that during the building of a trading-post in Arizona, on the outskirts of the Painted Desert, the traders brought a huge rock, on which I discovered, much to my surprise, strange foot-imprints. An Indian who was with me at the time—his name is Gold-Tooth—told me that those strange imprints had been made by the Thunder-Bird, the same bird whose flash of the eyes caused lightning. He asked me if I would care to visit a certain remote place, in the very heart of the desert, where he could show me hundreds of such footprints. He warned me that the trip was an arduous one; that, as a matter of fact, he did not believe any other white man had made it before. I told him, however, that I would most certainly go with him —irrespective of the discomforts and dangers.

IT was an arduous journey. First it was the stretches of desert —bleak and depressing — terrible in its aspect. Then we came to a sand-wash which extended for ten miles and which was so soft that, at times, we were afraid that the automobile we were in would sink into the very bowels of the wash. However, we came to the end of our journey without any mishap—only to find that our troubles had only just begun. There, in front of us, was an impassable wall—terrifying in its height. This we set about to scale, and a difficult task it was! Finally, we reached the top. We saw that we were on the edge of an 800 foot cliff. This was the opening of a bowl, with strangely colored layers. The sight of this bowl almost took my breath away—but it was nothing in comparison with what I was to see in a few minutes. Gold-Tooth led me a few feet away. "There," he said to me triumphantly, pointing in front of him, "there are the footsteps of the Thunder Bird." I looked in front of me, and my heart stood still. For I realized for the first time that I had, unconsciously, come upon the footsteps of the dinosaurs—that, unwittingly, I had probably stumbled upon one of the major archeological discoveries of our time, a true revelation of the Lost World.

(*Continued on page 107*)

I Thought I'd DIE!

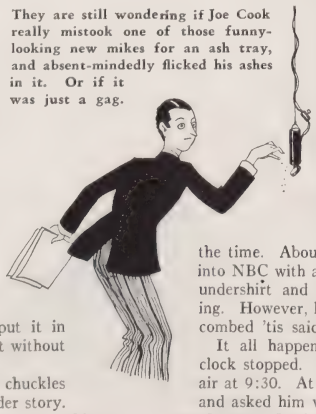
By Alma Sioux Scarberry

Helen Morgan was like a fish out of water when Ted Husing sat her on the piano and gave her a hankie to twist. Then she could open up and

IT'S AN ill wind that blows nobody a good laugh!

And, a broadcasting studio is a good place to giggle away your blues. Once upon a time some of these little Radio funnies seemed tragedies. But, the funniest thing the writer has ever seen around a studio was born a laugh and will die a laugh.

It was one night when Eddie Cantor was appearing in a Radio revue. The thousand-dollar-a-minute comedian stood near the mike ready to go on. He looked a little confused and as though he had something on his mind. Nervous, thought the spectators.



Then Eddie looked around the studio as though he had lost something. The walls were decorated with bridges representing the bridges surrounding New York. Directly in front of the mike was the Queensborough bridge. Suddenly Eddie stepped over to the wall, took his gum out of his mouth and stuck it on a girder of the bridge.

A light of relief dawned in his eye. A ripple of amusement swept through the studio. Mr. Cantor, without turning a hair went through his act. He was given special permission to leave before the performance was over in order to get back to the theatre.

Just before the door was opened for him he stopped, whirled around and walking back to the wall rescued the parked chewing gum, put it in his mouth, and went out without cracking a smile.

One of the heartiest chuckles might have been a murder story. For obvious reasons the name of this very celebrated foreign prima donna cannot be given. You can imagine, perhaps.

They are still wondering if Joe Cook really mistook one of those funny-looking new mikes for an ash tray, and absent-mindedly flicked his ashes in it. Or if it was just a gag.

The young lady, a gorgeous blonde, is married to a romantic and hot-headed Italian. During her performance she simply would not stand close to the mike. The harrassed announcer finally had to take matters in his own hands.

Not only is the lady gorgeous but she is no featherweight. It was no easy task when the announcer decided to take her by the plump shoulders and propel her nearer to the mike. She did not quite catch on and it was necessary for him to keep a hold on her.

The Italian husband at first sat on the edge of his chair and looked surprised. Then as it began to look more and more as though the announcer was having difficulty in keeping away from the lovely shoulders his face became flushed and he gritted his teeth. Finally he could stand it no longer and he turned to the nearest studio employee and hissed murderously:

"Who is that fool making love to my wife? I'll break his neck!"

It took several minutes in the control room later to convince the husband that what looked like a love scene was merely a matter of business.

There is the funny yarn on Doc Rockwell that wasn't so funny at the time. About the time he dashed into NBC with a raincoat on over his undershirt and his suspenders trailing. However, his hair was perfectly combed 'tis said. That's something.

It all happened like this. Doc's clock stopped. He was to go on the air at 9:30. At 9:25 a hostess called and asked him where in the name of sense he was. He laughingly told her not to get excited that it was only 9 o'clock. Then he learned his clock had stopped!

He had been lying on the bed rea comfortably. With a yell he jumped grabbed his raincoat and rushed dow the elevator waving a ten-dollar bill. still wonders what became of that old lady he grabbed out of a cab, waving the bill which was all given to driver for a five-minute ride. Joh Young stalled the program until Doc there.

Willie Howard panics the st crowd, especially those responsible the broadcast, when he steps over f Broadway to the mike. When the calls for crawling on the floor W MUST crawl. He forgets that the n can't follow.

One night in an imitation of Jolson got down on his hands and knees to his "Mammy" how he missed her. almost socked the announcer in the when he tried to lift him up bodily so t the fans could hear him. And once w he was doing Eddie Cantor they coul keep him from rushing around the stu ten feet away from the mike, clapping hands, a la Eddie.

Julia Sanderson and Frank Crumm once musical comedy favorites, marr for years and still very much in love, for that they are not on the stage when t broadcast. If the number is a love s they lock arms or kiss and insist u taking all the old steps and going thro all the motions. They forget, too, t there is a mike.

Ben Alley crouches like an old m For some reason—he can't figure it out he can't sing unless the mike is about foot shorter than he is, so that he c stoop over it. He always looks as thou he's freezing to death.

Freddie Rich can't direct unless stamps his feet. It is absolutely necessa

little superstitions. At first the people around the studio thought she was taking leave of her senses when she started running around the mike. Later she explained:

"Oh, I always run around after each number. It's good luck."

Josef Hoffman, pianist, was strangely missing after a number one evening. The studio was in a panic when it became time for him to go on again. John S. Young was delegated to dash forth and bring the celebrity back to his public. Josef was found entirely oblivious to the fact that he was holding up a broadcast, sitting in the studio with Floyd Gibbons trying to count how fast he really could talk. He was counting on his fingers and looked very much as though he were talking a sign language.

THEY are still wondering if Joe Cook really mistook one of those funny looking new mikes for an ash tray one day and absent-mindedly flicked his ashes in it. Or if it was one of the Cook gags.

It is a safe bet that Bill Munday, Atlanta football announcer, won't close any doors the next time he comes to town. Poor Bill!

The first time he was here he locked himself in the bath of his room at the St. Regis Hotel and it was two hours before a maid came to the rescue and let him out. Bill was too shy to yell out the window. Later he grinned:

"Unaccustomed as I am to public bathing—what can you expect?!"

It might be just as well to withhold the name of the theatre where he locked himself out the last time he was here. Because they passed him into the forty-eleventh balcony where he couldn't see a thing.

"I'll leave," says Bill. And he stepped out on a fire escape, banged the door angrily and started down. On the last landing he discovered looking up at him menacingly, two cops with drawn guns. They thought he was a burglar.

However, they didn't shoot. Bill dashed back up the fire escape—then decided to explain before he got shot. He waved and shouted and they let him down without plugging him full of bullets. When he explained who he was and told how he had gotten shut out one of the cops recognized him and chaperoned him from the alley. But, Bill can't see the joke.

John S. Young—now it can be told because it happened three years ago, announced the "Cheerio" program one morning in his pajamas and bedroom slippers with an overcoat wrapped tightly around his nervous form. His alarm failed to go off and he awakened five minutes before the zero hour.

Fortunately, he was living at the Allerton a block from the National Broadcasting Building. He dashed into a cab, then into the freight elevator and up the back way. But he says he will never be quite so young and gay again.

The big laugh on Eddie Thorgersen is rich. He, as you no doubt know, is the favorite announcer of a big cigarette program since the passing of the late John B. Daniel. A short while after Eddie was selected for the cigarette program, he was announcing the arrival of a celebrity at a pier. It was necessary for him to run down to another pier and up three flights of stairs in

ght have been a mur-

husband gnashing
s teeth in rage.

record time to another mike. Eddie arrived, breathless and all of a doo-dah and told his listeners:

"Whoops, I'm all out of breath! I'll just have to give up cigarettes!"

Fortunately, his bosses were not listening in!

One temperamental prima donna sent word to the studio that all corridors must be cleared of smokers before she arrived and that no one should be allowed in the studio because a cigarette whiff would ruin her. The queen must be obeyed. So her orders were carried out. The announcer arrived a moment after she did and found her pacing the floor puffing madly on a smoke.

ROSA PONSELLE passes through the corridors between smoking musicians with a scarf tightly wrapped around her mouth to keep the cigarette smoke from annoying her.

Amos 'n' Andy are getting to the studio an hour early these days. Some time ago they arrived about ten minutes before time at their Chicago studios and found all the elevators out of order. They had to walk fifteen flights. Never again!

Chaliapin, like Broun, always makes himself comfortable when he sings. He removes coat, tie and collar button. Once the collar button got lost and the studio floor was covered with crawling musicians, announcers, etc. It was Chaliapin himself who, finally, joining the hunt for the elusive button, gleefully crawled under the piano and found it.

They have a terrible time trying to break Rudy Vallee of strangling the mike. He will grab hold of it and bring it to him, rather than move to it. And moving a carbon mike shakes the carbon into small particles and causes it to become insensitive and noisy. They have solved the problem by seeing that Rudy gets one of the new condenser mikes. At first they threatened to tie his hands.

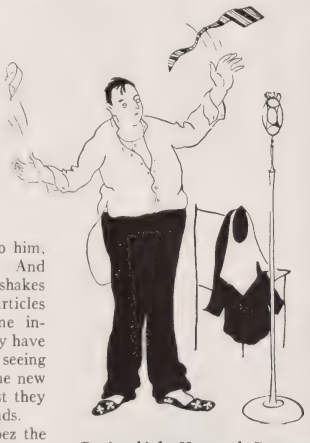
They call Vincent Lopez the "absent minded professor". Vincent will forget almost anything. His continuity is delivered to him at the mike. Otherwise he will lay it down somewhere and no one ever finds it again.

Pete and Aline Dixon are still shivering a little and finding it hard to laugh about that time a few weeks ago when their continuity hung on the ringing of a telephone and they were on the air when Pete remembered that they had forgotten about it. He says he lived a thousand years and thought of a thousand things in about half a minute.

Then, he spied a contraption that had served them as a door bell. Blithely ringing it he sang out:

"Joan was that the doorbell or the telephone?"

And the ever helpful Mrs. Dixon piped back:



"Why, darling, I'm sure it was the telephone!"

Thus the day was saved. Alexander Woollcott, writer, draws pictures as he broadcasts. As nonchalantly as though he weren't the slightest bit interested in the fact that hundreds of thousands are listening to him. He also dresses especially for the occasion. Blue shirt always, and a low collar to give his Adam's apple freedom.

One of the funniest sights of the studios is watching Howard Barlow conductor, as he handles his symphony crowd. He sings, unconsciously all the words under his breath, and imitates all the instruments. His mouth goes constantly. He is as funny as David Ross who, when reading his flowery poetry, makes flowery gestures, quite in keeping with his sugary words. Frank Knight makes grimaces.

And of all things. Weber and Fields can't broadcast standing up. Whether school keeps or not they must sit and rest or they can't work.

The saxophonist of the Interwoven Orchestra never throws out his old hats. He has such a superfluity of wind that the ordinary mute, which looks like a cork, won't serve—he sticks a battered felt hat on the end of his sax to help hold down his volume.

Don't think Heywood Broun is getting ready to take a bath. He likes comfort!

One of the most devastating studio accidents is the dropped music rack. Since violinists and actors range in height from five feet to six feet six, there must be a screw to raise and lower said rack. Sometimes screws don't hold, sometimes musicians are too lazy to turn them tight — then, suddenly, at a crucial moment, down will go music to waist level. Musician or actor cranes his neck, beckons wildly to page boys for aid. Boy rushes in to the rescue, raises rack, and everyone breathes a sigh of relief. But all the time the broadcast must go on!

Then there was the lady caller who insisted that Columbia play *Baby's Birthday Party* at 3 o'clock in the afternoon to celebrate her little girl's birthday. "I'm sorry," said hostess, "but at 3 o'clock Toscanini and the New York Philharmonic Orchestra are on the air." "W
said the mother, "can't Toscanini

And this is not Nancy Carroll. You see the picture Bernadine visualized as she sat in front of the camera

yourself had really done all the photographing — howbeit mentally — and that the camera man had merely made the outward gesture. Of course, you will see the picture of your own face—but the entire expression will be a borrowed one —the reflected image of the favorite star you had in mind.

This is exactly what Bernadine Hayes did when she wanted suitable pictures to submit to those ogres of motion picture producers.

Bernadine, hailed Queen of the Radio Show last autumn in New York, was sipping her hot coffee and milk and chatting away in her quiet, mellow voice just the day before she took the train to Hollywood.

Her perky little brown beret set off her beautiful milk-white skin and her mass of flowing bronze hair.

"NO, thank you, I'll not have anything but a baked apple and a cup of half-coffee and half-milk. I mustn't go beyond my calories," she smiled.

"Oh, I'm perfectly thrilled about going to Hollywood. Of course, I have no contract as yet, but they are paying all of my expenses.

"The directors up at First National liked these pictures very much and thought I had dramatic possibilities. And these pictures helped put me over.

"And let me tell you how I took these photos. You know, I believe a great deal in one's state of mind and I applied this theory when I went to the photographer.

"Now, look at this picture here," pointed the consumer of calories to the Garbo likeness. "I just visualized Greta Garbo when I looked into the camera—and—well, don't you see the similarity yourself?"

Surely enough there was an unmistakable resemblance. If dear Greta, the Woman of Mystery, can't find the whereabouts of her wistful expression which she attaches to her lips, let her reward Bernadine for the return of it—for the slightly-darker-than-Titian maiden has certainly captured it and the languorous

(*Continued on page 96*)

Personal Recollections of Early Days by The World's Greatest Golfer

BOBBY "Putts

Enthusiasts are following Bobby down aerial fairways just as they dogged his footsteps on the greens.

THE scene is a studio of the National Broadcasting Company, the time 8 o'clock, Wednesday evening, the period of the Lambert Pharmacal Company. A stocky young man, registered on his Atlanta driving license as Robert Tyre Jones, but known to the world of golfers as "Bobby", begins to talk:—

GOLF is a very ancient game, as those things go. It has evolved from a simple Scottish pastime into an international pursuit. Formerly played by comparatively few people on comparatively rough courses in the British Isles, it has steadily grown until now the best estimates indicate that there are upwards of four million playing golf today in the United States alone. And even far-away Japan is rapidly yielding to its charms.

In more or less its present form, golf originated in Scotland, so long ago that there is no record of its actual beginnings. It is known that the playing of golf at St. Andrews was forbidden by royal edict during the latter half of the fifteenth century because it was said to contravene public morals and to interfere with the practice of archery and other manly exercises. But it is not known when it first was played. Golf, then, has a background of at least four hundred years—how much more no one knows—and except for improvements in turf, putting greens, implements and the ball, it is still the same old game.

And it is a fascinating game, too, that everyone can play and enjoy. The people interested in golf are interested in it from the intimate standpoint of players of the game and not merely as spectators at another fellow's show. You know, as well as I, the thrill that comes when a drive sails far down the middle of the fairway; when a long iron stops near the flag; or when a long putt drops into the hole. You do not have to draw upon your imaginations to supply an understanding of these things.

But, after all, there are two kinds of golf; the ordinary garden variety and tournament golf—and they are in a sense as different as can be. Plain ordinary golf you know, but tournament golf, with its thrills and troubles, is enjoyed by only a very small group which goes on year year, each year adding a new memb two but in the main remaining abou same. I am thinking that it will be more interesting to you if I will de most of my time to describing interes matches which I have seen and which haps you have not, and in trying to you a little clearer insight into what tournament golfer thinks and worries a during a match.

In talking of these things I am ne sarily confined in great part to the ma in which I have myself taken part, unless someone like Johnny Goodma Andrew Jamieson has come along in early round to offer me an unwilling tirement, I have been too much occu with my own troubles to have eyes or for anything that might be happening e where on the course.

I REALIZE that this cedure is likely to put me in the clas the nineteenth hole post mortem pest loves to describe his every stroke to unwilling but helpless audience. I k several of these who would like noth better than to have the opportunity wh I have now.

But in order to reassure you, that I not ramble on too far afield, I may as tell you that I thoroughly appreciate Mrs. Ruth Bryan Owen meant when advised those who might think broadca ing easy to lock themselves in a pad cell and try to tell a funny story t thing which looked like an electric These new-fangled microphones do

story for the sake of continuity, hing else, should start in the begin- This is particularly true in my case. se I started from exactly scratch o experience and very little of any- else, and the building up process was a long affair. And sometimes I that those early matches, coming at e when I didn't think much myself lidn't give my opponent credit for ng much either, are among the most sting.

e earliest part of my competitive ex- ice was gained in those kid matches d the East Lake golf course, begin- omewhere close to my sixth birthday. Adair was my opponent and play- from the time when our parents ed us to go on the Big Course, as we it then. Perry was four years my , but at that time he was not a great arger nor stronger than I was, so our nters resulted more or less evenly. matches are cherished memories

like to think of them and the times d, but I am not going to bore you any sort of an account of them. We think much in those days. We had heard of the straight left arm or g from the inside out. We merely d up to the ball and socked it, set out it as hard as we could go, and upon ng up with it we socked it again. rally, at that age we did considerably socking than walking.

t the time came later when Perry and re to have our chances to play one er in tournaments. True, they were invitation affairs, and one state cham- hip, but they were just as important then as national championships later ne. In those days—1913, '14, and I think that Southern golf was con- ably less a part of the national game it is today. There were many fewer rs and even those who played, except Nelson Whitney and a few others from Orleans, aspired to little in the way tional championships. For these rea- sons, the invitation tournaments assumed quite an important position in the golf of the section.

So Perry and I, because of indulging parents, managed to attend most of these tournaments held in Georgia, Tennessee, and Alabama and in 1915 and '16 we collided in match play four times, and on two occasions we produced a really interesting match.

DURING 1914 the difference in our ages began to tell and Perry began to take his place in the top rank of Southern golf, leaving me, then twelve years old, to continue puttering around with the kids and to marvel at his accomplishments. In 1914 he had reached the final of the Southern amateur, where he lost to Nelson Whitney; but he had beaten in the semi-final of that tournament, George Rotan of Texas, afterwards a member of the Walker Cup team. This was quite a nice beginning for a sixteen-year-old boy.

First golfing picture of Bobby Jones five years old, on the East Lake Golf Course.

Naturally, this pace was a bit too fast for me. But when 1915 rolled around I, too, began to put on a little weight and to add a few much needed yards to my drive. My first meeting with Perry occurred in this year in the invitation tournament over the Roebuck course in Birmingham, and although it resulted in a win for me, it by no means marked the time when I regarded myself as the equal of Perry. I was lucky to win, Perry was off his game and I had enough brains to know it. Anyway the golf was ragged over a sun-baked course, so that match does not merit description.

But in 1916 Perry and I met three times —once in the semi-final of the Montgomery invitation, once in the final of the East Lake invitation, and lastly in the final of the Georgia State championship at Brookhaven in Atlanta. Two of these, the first and last, were as interesting as any golf matches I have ever played.

The Montgomery Invitation has long been a popular fixture. It is played in late May or early June and so starts the tournament season. If I remember correctly 1916 was a pretty lean year for Montgomery in a golfing way, for the field was made up almost entirely of Atlanta, Birmingham, and Montgomery players. There were three Atlantans in the last four—Perry and I in the upper bracket, and Perry's father George in the lower. Perry beat me and his father beat him in the afternoon round to win the tournament.

As we started off that morning, I remember feeling that I was in all likeli-

I Wanted *to* Broadcast *and* Did

Mrs. Velma West Sykes, Radio artist and playwright, who tells her studio experiences here.

From "Home-Body" to Radio Artist Was An Easy Jump For Her—Rehearsed into Silver Tea Pot To Gain Mike Practice

By Velma West Syke

"WHAT makes a Radio Celebrity? How can I break into the studios?" All over the country musical and dramatic artists and talented people are knocking on the sound-proof doors of stations and demanding admittance. This personal experience story, by a woman who was lucky enough to be drafted into service, reveals tricks of the trade which novices must learn. Mrs. Velma West Sykes, after one try in a studio, became an addict. She spent two years with KMBC in Kansas City, and her plays are now presented over WLW, KOMO, KGU and elsewhere.

I FELL into Radio work quite by accident. It had never been one of my ambitions to broadcast. In fact, the idea had never entered my head. When offered the homemaker's half hour on a local station, I knew nothing—or practically nothing—about Radio. I was not even a regular listener, though we had a crystal set in the house. But the idea rather appealed to me. While women constitute the big majority of listeners during daytime hours, I had heard the criticism that about all one could get was a recipe or two that might much more easily be looked up in a good cook book than copied down while being read over the Radio.

That was one place where I fell down and still do. I simply detested giving recipes over the Radio and always did it too fast for them to be copied. Reasoning that the modern woman spends less time in the kitchen than she now does in other activities—and that perhaps a schedule might be worked out that would include some of the other things in which she invests her time, I accepted the job. I almost said "the challenge", for Radio is so very new that all of us connected with it are more or less adventurers and experimenters.

IT WORRIED me a bit because I had had no microphone experience and my voice is rather low. But this, it seemed, was an advantage. In the early days of Radio, the high, shrill woman's voice had almost kept women out of the studios altogether. Better broadcasting facilities and the discovery that there were women's voices adapted to the microphone opened up this new field to women. Now practically every station has at least one woman on its staff, outside of the musicians.

It might amuse you to know how I tried myself out the day before I was to have my real "try-out" at the studio. My method was to sit down and calmly read my manuscript into an old silver tea handed down in the family. May I r ommend this to anyone having to mak first performance? The microphone ne held any terrors for me, but it might i had tried to talk without a prepared m uscript in front of me.

PERHAPS one reason broadcasters like to have a manuscript front of us is that we nearly always spe before three audiences—something th demands more alert attention and conce tration than before one. There is the a dience out front staring in thru the b plate glass window; the audience in t studio, composed of musicians and oth members of the staff who often try make life miserable for the one in fro of the microphone by playing pranks a "cutting up" out of the range of the a dience out front, and then there is th "vast unseen audience".

The last is the real critical audienc You have nothing but your voice wit which to interest it, and that voice mu not slip and stumble and you must n cough into the microphone. In speakin before a regular audience, a speaker ma pause to mop his brow or take a drink o water and lose no contact. If he stumble a little, a gesture will tide him over suc a rough spot. But he has none of thes things to help him out in front of the mi crophone.

Radio artists are usually recruited fron

fields; music, drama and journalism. uity writers have usually had news- experience, experience writing for ines, or perhaps dramatic experience. ncers may come from any of the fields, if the voice registers well. ll must learn over again because alents must be made to conform to requirements. They must adapt elves to this new field, which is un- ything else.

people know that in the best stu- ll programs, even to the announcer's are written out before they are put his does not mean, of course, that announcers do not improvise also, at they depend altogether on what tten down, especially on informal ms. But it does mean that the m has been arranged so that it will ust so many minutes, that there will hemming and hawing by the an- r while musicians search for a mu- number. The orchestra also has a of the program and knows the con- of the musical numbers.

best Radio speakers usually have talks written out and timed. As e frequently told guest speakers to appear on my programs, "You elf will be better pleased your talk if you have it n out. If not, you are to be like the movie s who told her girl friend f she had her life to live again, she would marry me men but in different If you do not have your written out, you may say things that you intended o I doubt it—but you ot say them in the proper nce."

ny people object to the r grade of so many Ra- rograms. Granting that true, the same may be f our literature, our mu- d of most arts in general. programs must neces- be of a varied type in to please the majority of rs. The fan mail on pro- that are really worth and up to a high level ot begin to be so big as which comes in on old iddling contests and reci- r caramel nut pies. So e the program director is ly between the devil and ep sea. If the advertiser rdon us, we shall let him for the devil, and the ail will stand for the deep

THE program di- —and the advertisers to he sells time—feel that ation is popular if the man staggers into the studio every morning. Newspapers and magazines have circulation figures—based on their subscription lists and their news stand sales. Radio stations have circulation figures based on fan mail receipts. So we can hardly blame the director if he feels he must please the advertiser and the writers of fan mail—then his station will pay dividends.

THERE are people on the staff of every station who would like to strive for "real art", no doubt. But alas, in Radio, as in the recognized arts, one must learn to cater to the masses. And one cannot do that with violin solos by a real artist who has studied for years and is the complete master of his instrument. It can be done only by an old-time fiddler who never took a lesson in his life but who pats his foot to keep time while he plays *Turkey in The Straw*. I really believe that if John McCormick and The Woodchopper were singing on the same station, The Woodchopper would pull twice the fan mail that the famous tenor would. Why?

In the first place, McCormick's program would necessarily be formal. Formal programs do not bring a staggering mail man into the studio next morning. In the second place, people who appreciate John McCormick are not in the habit of writing to Radio stations. In the third place, they would find little to say to him. Oh, occasionally, perhaps—but not like The Woodchopper's admirers. They feel that he is "folks" like them—people stand in awe of artists like McCormick.

It was one of the biggest surprises in the world to me to see the kind of letters that people write in to Radio artists—or would you prefer that I said "performers?" Having conducted a magazine department for women for a number of years before taking up broadcasting, I was familiar with the type of woman who bares her soul and her quarrels with her husband to someone she has never met but who has gained her confidence in a way no personal friend can. But I was utterly unprepared for the lack of discretion and even modesty exhibited by my own sex in writing to Radio stations. And it seems to be the woman Radio Fan who writes—and writes—and writes.

I am not referring now to legitimate Radio correspondence, which is the life of every station, in a way, for the letters are courteous and sensible letters of appreciation, the only kind of applause possible to a Radio program. I am thinking of the proposals of marriage which come in to announcers — and other proposals. I am thinking of the silly, flirtatious and kittenish letters which come in and are handed around the studio with a laugh and a few sly winks. You may think I am exaggerating when I say proposals of marriage, but I assure you I have seen many come in to the men of the station, with names signed and addresses given. One woman wrote, "I just tremble all over when I hear your voice. I know it's becawz I luve you. I think it would be so 'romantick' if we would meet and get married." As the artist who received this was already married, the writer was doomed to disappointment in her dream of matrimony.

Picture shows audience's conception of characters in a Radio drama—Don Bernard, Lucille Husting and Theodore Doucet of the Empire Builders. Actually, studio actors seldom dress in character except for special occasions.

Men do not write into Radio stations in this vein, as a rule. I am not sure why this is, except perhaps breach of promise suits have taught the more cautious sex never to write anything that will not read well in court. Then, men like a more physical appeal than the voice. Women may fall in love with an announcer without even seeing his picture—although these are sent out upon request to admiring fans—but a man wants to see what the owner of a voice looks like before committing himself on paper. An amusing instance of this kind happened in our studios once.

Oh, yes, the phone plays its part in putting fans in touch with Radio artists whom they admire. I have answered the phone at the studio when a girls' sorority, holding a meeting, called upon and invited a male harmony team out to sing—offering to pay them with kisses. And to show you how commercialized Radio artists can become, the boys asked for their regular fee instead, although magnanimously adding that the fee offered would be a most welcome addition.

IT WAS amusing to have one listener write in and ask me what I did with my own children while I was at the studio. Now this was a perfectly natural question and there was no reason why I should resent it at all. Almost any busy mother might wonder how another mother finds time to do something outside the home when she, herself, keeps busy all the time in the home. So I explained on the air that this letter had come in and that I appreciated the logic of it. Then I told them how my own children were all in school and that I drove them to their schools each morning on my way to the studio. Only a few hours were spent at the station so they found me at home in the evening when they returned. I am sure this simple and truthful statement gave my audience more confidence than if I had resented the question as being impertinent.

Women have often been said to have no sense of humor but the difficulty really lies in the fact that they have less chance than men to cultivate it, I believe. It is very noticeable that speakers who are witty and even jocular in a group of men will suddenly turn serious when facing an audience of women. Morning Radio programs for women are usually pretty serious affairs, dealing with their physical household tasks and well loaded with advice—much of it not disinterested, for there may be a brand of flour or baking-powder to impress upon their minds. Fortunately, the only advertising we were expected to do at our station was the courtesy type, which means brief announcements after a program that has contained no mention of any particular firm or brand of anything.

SO WHEN I introduced *The Gabbies*, I knew I was making a strike in the dark. But sometimes we hit better than we aim, for they become my most popular feature. *The Gabbies* were an ordinary couple typical of all married couples, and for about eight or ten minutes, argued about every subject (one at a time, however) that husbands and wives do argue about. KGU, a Honolulu station, was one of the stations that used them later, so it is evident that even in Hawaii they know something about domestic squabbles. Fortunately, we had an ideal couple cast in the parts and they literally made the characters live, so that people wrote in, laughing and protesting that someone had been listening in on their domestic squabbles.

I know of at least one divorce that was postponed by this Radio couple. A woman wrote in and said, "I want to thank you for saving my home. I was going around morbidly cooking my last meal for my husband when I tuned in on *The Gabbies*. Their argument was so similar to the one we had had, and it sounded so absurd to take it seriously in the end, that I had a good laugh and got all about leaving my husband. doesn't even know I had planned it

A Radio play has nothing but the with which to work and any action takes place must be told by the co sation, since it is bad technique fo announcer to keep breaking in wit planations. Consequently, all plays must be written especially fo Radio or adapted to it, either of wh not an easy task.

We discovered women liked plays dealt with problems much like the they were trying to solve themselves of the best we ever gave, it seems t now, was written by a professor of li ture at Missouri University, and called *The Kettle Singing*. It was story of a woman who was ready to into a new house, the house she dreamed of for twenty years, but somehow did not thrill her now that it all ready for occupancy. Her husb grandmother, a spry old lady with a s tongue, pries the poor woman's secret of her. She was not happy about new house because she had brought termites and put them under the house so that her husband would not off building the new house again had done for so long. (Termites, by way, are a kind of ant that eats the bers out of houses so that they bec unsafe.) Then her conscience began ing her, but it all ended happily, in of the fact that she confesses to her band, tho the grandmother, who buried three husbands, says, "Let a kick him—don't ever tell a man anythi

While we had an excellent cast of teur players, all of them had not had matic experience. Naturally, this lim some of them, for they were incapabl taking emoti parts. But on other hand, developed a n ralness that we sidered prefer to the affecta so many gradu of dramatic sch feel called u to use. This is ticularly obn ious over the dio to the ave listener. The s accent and voic not always best for the crophone. Oxford accent be a very deli ful one, as is Harvard acc but in the mi west, they do go over so well the typical R audience. Th sound affected, (*Cont. on p. 1*

If you could only see them:— "And now folks, you are listening to a half hour for dinner music by the Three Husketeers, Dr. Veeral's Health Biscuit Trio."

Body and Soul Girl

LIBBY HOLMAN

sil Surgeon's fe Slipped—And e Her Famous anin' Voice

Success Comes at Last—Wins M. A. at Columbia Aims for Sorbonne Ph.D.

By HAYNES A. GILBERT

BY HOLMAN'S recent success in revue, night-club, on phonograph-records and over the Radio—you have heard guest-artist to Alexander ott, Walter Winchell and also e Fleischmann Hour—is paved many years of failure. She o New York from her home- Cincinnati, eight years ago, ed with a B.A. degree from the sity of Cincinnati and a yearn- ire to appear on the stage as Her finances were low, so she d at the Y. W. C. A. at 610 ton Avenue, ate her meals at feteria downstairs and walked from one producer's office to r. And wherever she went she ven the same verdict: "You're t—but your voice is awful!" everance, however, soon won small part as a streetwalker in *ool*, but the play was a flop. there she went to *The Sapphire* and that, too, was a flop. Her wo shows were the highly suc- *Garrick Gaieties* and the *wich Village Follies*—but now it ibby's turn to flop. She was the rôle of a comedienne be- her producers thought that her was simply terrible. For a it seemed that she attained success Ziegfeld signed her for the second ny of *Show Boat*. But the second ny of *Show Boat* never materialized there followed more disappoint- . Cast in the leading part in *Rain-* the show was a failure from the She was encouraged to enter vau- but she got no further than a trial F. Keith's Fordham because the er discovered that Libby simply 't sing.

was in the *Merry-Go-Round* that she made something of a hit. A singing was suddenly and unexpectedly left t during rehearsal time, and Libby n, who was one of the chorines, for the chance. Herndon listened r sing, frowned gloomily, said that her voice was abominable—but, shrugging his shoulders, confessed that he had no alternative since the opening night was but a few days away. "Perhaps the critics won't notice how awful you are," he told Libby encouragingly. She was given two songs to sing, *What Do You Say?* and *Hogan's Alley*—and the criticisms the next morning had praise only for Libby Holman. So effectively did she sing *Hogan's Alley* that she was soon afterwards tendered a very doubtful compliment. The producer of *Rang Tang*—an all-Negro show—offered Libby a leading part in his next all-Negro show an offer which Libby Holman refused in her politest language!

From the *Merry-Go-Round*, Libby went to the first *Little Show* where she made a decided hit with her singing of *Moanin' Low*. From there she went to *Three's A Crowd*, where she is now stopping the show every night with her *Body and Soul* number. And the rest spells success.

In attempting to explain the peculiar and poignant quality of Libby Holman's mellow voice, her private physician, Dr. Colby, thinks he has at last hit upon the true explanation. It seems that in her childhood, a physician in clipping off her tonsils likewise clipped off a part of her soft palate—and what, at the time, evoked imprecations and oaths from poor Libby now inspires her to profuse genuflections of gratitude. But this was only one of the series of accidents which made her a star. She was given a part in the *Garrick Gaieties* because she had beautiful legs and despite the fact that she had a "terrible voice." And just when, after her innumerable flops, Libby decided to devote herself to studies instead of to the theatre (going as far as to get her M.A. degree at Columbia University for French Literature), there came her success as moaner.

YOU will find Libby Holman every day from 12 to 1 at the Russian Cavalry School at Ninety-first Street, indulging in her favorite sport: horseback riding. From there she goes to any nearby restaurant to partake of her favorite dish: sometimes it is frankfurters, more often it is hamburger steak. Her afternoons are spent quietly either in reading, recording or studying. Twice a week she takes lessons in harmony, and once a week a course in dramatic technique. The evenings, of course, find her at *Three's A Crowd* where she is one of the mainstays, and during the night she entertains the guests at the Lido Night Club. Once in a while she sandwiches in a broadcast among all these activities. She goes to sleep at four in the morning

Guilty—Not

Trial of Vivienne Ware and Its Sequels Are Broadcast under Conditions of Real Murder Case—Listeners Serve as Jury

By Doty Hobart

"HEAR YE! Hear ye! Hear ye!"——The voice of the court bailiff, booming over the loudspeakers in the homes of several millions of listeners, fired the opening gun of a Radio dramatic program which is now considered to be the most outstanding feature presented on the air in the year of our Lord, 1930.

When this gun discharged its fusillade of "Hear ye's" the imagination of the self-appointed jury was fired with a sense of obligation new to the minds of those individuals, who by the grace of modern genius are known collectively as "that vast Radio audience." For the first time in the history of Radio a legitimate reason had been found for requesting the individual listener to use his or her head!

Oddly enough, the listeners had to be hauled, figuratively speaking, into court to accomplish this. For years General and Mrs. Public have been content to tune in on a program; sit back and listen; read a book and half listen; or play bridge and not listen at all. As far as using the Radio for compelling a listener to actually think—well, no one ever thought of that until Vivienne Ware was brought to trial for the killing of Damon Fenwick. At that, Fenwick was never actually killed. He never really existed, except as a corpus delicti in the mind of a feature writer on the staff of the New York American.

"The Trial of Vivienne Ware" was just another Radio drama until things began happening to it, to the members of the cast and, most important of all, to the listeners. The inside story of all the various happenings which took place before, during and after the "trial" is in itself one of the most dramatic chapters of Radio history. And now it can be told.

AS frequently is the case, when a radical venture is attempted in any established business, the gentleman, in whose mind the idea germinated and who became the prime mover in promoting the original production, was and still is, in no way connected or familiar with Radio broadcasting. Other than having visited a broadcasting studio on one or two occasions his knowledge of broadcasting is that of any average listener. But his work as a newspaperman made it possible for him to sense what the pu might like. The gentleman's nam Edmund D. Coblentz. He is the ed of the New York American.

Last October, on one of those it quent days in the life of a newsp editor when a few leisure moments sent themselves to the chief of staf which to relax, Mr. Coblentz picked a newspaper and settled back in his c to enjoy the privilege of reading pleasure. If you don't think that is editor's idea of luxury, ask the man is one. For once he was not scann copy and make-up with a critical e To speak freely, very freely in f

Let the People Decide

Guilty or Not Guilty?

Put the verdict in the hands of the people of the county—not merely a dozen hit-or-miss voters. Give the man whose life is at stake a true verdict by the people.

Such an evolution of American jurisprudence has been illustrated as a future possibility through the aid of Radio. The demonstration took place in the NBC broadcasts of the mock trial of Vivienne Ware. Real lawyers, real judges and ethically correct court procedure put the case up to the listeners—and the listeners mailed their verdict.

—or—

Guilty?

Lack of space prevents many an
ng little item from living in type.
e must have had a hand in pre-
a cabled dispatch from Copen-
hagen, Denmark, stating that a murder trial had been broadcast in that city. The published news item which caught and held the attention of Editor Coblentz was brief in the extreme. Just a sentence or two. That was all. Apparently the rewrite man to whom the dispatch had been turned over had been unable to enthuse at any great length over the unusual event. The item was used as a space filler.

Out of this space filler grew *The Trial of Vivienne Ware*. Mr. Coblentz does not remember whether the item specifically mentioned the fact that the Copenhagen trial was a real or a fictitious one. But he does remember that the item interrupted his unofficial reading. What had started out to be a few moments of relaxation suddenly took on the aspect of official business.

A conference of departmental heads was called and Mr. Coblentz outlined his idea, suggested by the news item, for the sponsoring of a fictional murder trial on the air by the New York American. The idea met with unanimous approval. It was decided to broadcast the trial as a serial, of six half-hour daily episodes.

KENNETH M. ELLIS, New York American feature writer, was given the job of creating the plot and putting it in dramatic form for possible microphone consumption. It is interesting to note that the man elected to prepare the Radio continuity for the trial wrote and staged the largest outdoor spectacle produced in the United States, the *Pageant of the Apostle Island*, at Bayfield, Wisconsin, in 1924. The pageant, which outlined three hundred years of history, had a cast of 2500 Ojibwe Indians and 500 whites.

While the script was being written Editor Coblentz went to M. H. Aylesworth, president of the National Broadcasting Company, and outlined the plans he already had in mind for the presentation providing appropriate air time on WJZ could be obtained.

The fact that the editor proposed to use the best possible legal talent available to enact three of the principal rôles in the serial drama was a much greater factor in enthusing Mr. Aylesworth with the probable success of the broadcast than did

his prospective client's announcement that the circulation department of his paper would give money prizes for the best verdicts submitted by readers at the conclusion of the trial. Please note this, for the manager of the circulation department comes into this story a little later.

Now WJZ is the key station for one network of NBC and its use for the broadcasting of a purely local evening program, such as the one proposed by the New York American, depended entirely on such time on the air as had not been sold to a national advertiser. Mr. Aylesworth promised to see what he could do for the editor in finding a suitable half hour which would not conflict with the programs of other clients. At the same time he requested that a copy of the script be sent him.

WHEN he had read the submitted manuscript of the trial I have only to quote Mr. Aylesworth to let you realize the ever increasing enthusiasm of the man for this new venture: "The manuscript establishes, I believe, a new standard in the creation of Radio plays. The simplicity and fidelity of the theme, together with the colorful word and character pictures, stand out in this new field of adaptive writing."

The assignment of local air time on WJZ was made and the facilities of the NBC program department were offered the new sponsor.

Before availing himself of the offer Mr. Coblentz approached the internationally famous lawyer, George Gordon Battle, and suggested to this eminent attorney that he read a copy of the script of the Radio trial and check up on the court procedure and legal terms used in order that the broadcast be correct in its courtroom technique. At the same time Mr. Battle was requested to read the part of the defense attorney, it being quite possible that he might be asked to become a Radio actor!

He read the script. He liked the idea. He agreed to play the part! And he said:

"I am frank to say that the perfection of the legal structure of the trial was no small factor in leading me to accept the 'case'. The details of court procedure, of legal phraseology, of the tactics employed in the practice of law, both from the prosecution and the defense angles, are without flaw.

"Very often these things are sacrificed to make a good story. And sometimes a gripping climax is sacrificed to make a dramatic production 'realistic'. But in this case the author has produced a work which does not lack for thrills and mystery—without sacrificing legal forms to achieve it.

"If it was not constructed so as to leave a very open question indeed as to whether the defendant in this case is or is not guilty, I don't believe it would have interested me. But I shall feel, in going on the air in this 'case', that it has some educational value in presenting a unique picture of circumstantial evidence."

Then, something epochal happened in Radioland. A United States Senator, Robert F. Wagner, read the script, was asked to act as the presiding justice in the fictional trial, and accepted the position! He, too, had something to say:

"I am deeply interested in the experiment from a judicial viewpoint. For many months there has been a feeling that the *broadcasting of actual tr courtrooms of the country* might excellent effect upon the course o the conduct of important trials conservation of public time.

"I have never seen a more constructed fictional trial, in w probl evide a m i cross- tion a proce made from essen ture, drama teres Georg don who ha to undertake the defense, has pointed out, the legalistic structur trial is perfect.

Thomas D. Nash, defense-attorney in Chicago

"But the thing which is interes to the extent that I am willing to is the public value of the broadcast

For the third member of the legal rôles necessary to the trial, Coblentz sought the services of a Assistant District Attorney, of Ne Ferdinand Pecora. After readi script Mr. Pecora was as enthusi the other legal minds already reta his willingness to become a Radio

"It's a great case," he said. "of circumstantial evidence, which of the most important function district attorney, is well thought ou one of the neatest problems of pros to make legitimate use of such evi

"The author has presented a attorney hampered by lack of prim evidence, confronted with the prob safeguarding the welfare of the St exhausting every possible shred of c stance which, in a very reasonable bility, would establish the guilt defendant. The district attorney confronted with the necessity of ov ing the natural sentiment which an would feel for a beautiful young d ant.

"IT WILL be a stim experience, to try earnestly to se conviction in the minds of the jury ever to try a case. As the St expect to demand and secure a con in the trial of Vivienne Ware."

By now, with the assurance of g legal talent taking part in the Radi trial, the enthusiasm of those con in presenting the venture shot to a well over par. Mr. Aylesworth agr permit the broadcast to take place NBC theatre, on the stage behind the glass curtain. This theatre, locat Times Square, Broadway, was once a garden where the famous Midnight F held forth.

For the trial the stage was to be

Principals in the New York trial. Left to right, George Gordon Battle, Senator Robert Wagner, and Rosamond Pinchot, daughter of ex-Governor Pinchot

courtroom and realistic action of the adcast play was to be tried out with use of seven microphones. In this a visible audience was privileged to ess natural movements about the stage the performers while the listeners to broadcast, without realizing why, were ted to perfectly timed ses during these move- nts; the latter also being great advantage to the ors.

t takes something unus- to arouse the interest of lio listeners in New York beyond the point of a ier apathetic acceptance any and all programs. with the initial broad- of this unique serial, fully staged by John den, the famous theat- l producer, and William S. Rainey, C production manager, the city's lio listeners for once lost their apathy. trial was discussed on trains, in clubs on the streets—everywhere, by people ll walks of life. Those who did not n to the first episode heard about it n friends and before the week was up *Trial of Vivienne Ware* was the chief c of conversation wherever people ered.

Bobbe Dean of NBC, on stand in San Francisco

he broadcast was well done. Rosa- d Pinchot, daughter of governor-elect ord Pinchot of Pennsylvania, and her- a leading lady from the Broadway e, played the role of the defendant. the Daly, another noted Broadway ess and daughter of the late Arnold y, created the part of Delores DeVine. ll known actors who portrayed other racters in the piece were Joseph by, T. Daniel Frawley, Dallas Wel- l, Jack Kearney, John C. Connolly, n MacBryde and Robert Burton. or female roles were played by Kate Comb and Mattie Keene.

BUT it was not the fine ng of this beautifully balanced cast ch gripped the listeners. Two details the production were responsible for using interest. First of all, the people e hearing a dramatic vehicle which had the earmarks of being a genuine trial. Secondly, each and every listener was ed to take part in the trial—to become nember of the jury in whose hands ed the fate of the defendant. It was up to every listener to do his or her t in analyzing the evidence submitted l, at the conclusion of the trial, when presiding judge had made his charge, take a definite stand either for or inst acquittal. This was indeed some- g new in Radio. And the listener, in- d of trying to get excused from jury y as he is apt to do, began framing ex- es which would keep him, or her, near udspeaker during the run of the trial. Let's leave the listener for a moment l take a look backstage, during broad- casting of the third episode. An occasion presented itself at this time for some rather pointed remarks from one attorney to the other as to the ability of his opponent. The author had done rather well in the script in making these reflections caustic, but they were not, it seems, caustic enough for Pecora and Battle and these two gentlemen, now thoroughly imbued with the realism of their task took the opportunity to add several individual reflections which were not in the script! In the language of the theatre, they started to "ad lib". The result was, that while these perfectly natural bursts of sarcasm added materially to the realism of trial they made the episode, previously timed in rehearsal, run over the allotted thirty minutes.

Director Rainey warned the lawyers that they must watch out in the future. This they promised to do but then it developed that they were not satisfied with the summations as written by Ellis in the script. This was no reflection on his work. But each man, prosecutor and defense attorney, felt that the summations lacked his own individual characteristics. So, and this is probably the only time such a thing has ever happened in a Radio drama, these two lawyer-actors threw away the summations already in the script and wrote their own!

Then Lawyer-actor Pecora asked permission to throw away his own script and deliver his speech to the jury just as he would do it in a regular court. This the director refused to permit. He didn't trust this energetic, masterful orator quite that far. It would have been a grand speech, no question as to that, but in a Radio broadcast, whether it be a trial or a symphony, a half hour is still thirty minutes. Therefore, Mr. Pecora read script as does any Radio actor, and did a splendid job.

Here's another funny twist. The enthusiasm of the lawyers, who felt that their reputations were vitally at stake in this fictitious trial, spread to the bench. Senator Wagner threw away that part of the script which contained the judge's charge to the jury and proceeded to write his own.

This charge to the jury by the judge completed the trial, and as far as those concerned in producing the drama, it completed the broadcast. It was now up to the Radio jurymen and jurywomen to submit their verdicts, each verdict to be accompanied by a two hundred word explanation of the reason for such finding.

In came the verdicts by the thousands. DX listeners in Virginia, in Canada, on ships at sea sent in verdicts. And with nearly every verdict came a letter congratulating the sponsors of the program because of its uniqueness, its entertainment qualities and its educational value. And practically every letter demanded that, if Vivienne Ware be found innocent, Delores DeVine, against whom damaging evidence had been introduced in the trial, be brought before the bar of justice in another trial!

The final verdict by poll was some fourteen thousand for acquittal with about two hundred listeners sending in a "guilty" ballot.

Now here, as it was promised he would do, is where the manager of the circulation department of the New York American

Lillian G. Genn, writer and well-known interviewer

Mrs. Franklin D. "My Home

Governor's Wife, Business Woman, Teacher—But She Always Puts Family Foremost

IS THE home, once glorified and eulogized in song and in story, and cherished by mankind, in danger of disappearing?

There are many who have their finger on the pulse of the times who claim that because the home is no longer the center of activity and much of life is lived outside of it, its foundation is being undermined. That since woman, who has a natural responsibility to it, has deserted it for a job in the business world, it can hardly continue to exist. Certain it is that the home as a place of quiet, refuge and spiritual growth has always filled a vital human need and has done much to influence the morality and character of its members. If, therefore, the power and the spiritual function of the home and family life were indeed declining, it is inevitable that it would have a profound effect on future generations and on the fabric of the nation.

This thought was expressed to Mrs. Franklin D. Roosevelt, wife of the Governor of New York, for the purpose of ascertaining her views on the subject. She is unusually equipped to speak for the modern woman because she herself is an ideal modern wife and homemaker. She is the mother of five children, teacher and vice principal in a New York school, and a grandmother. She is not only hostess at the Executive Mansion in Albany, but also manages the Roosevelt country place at Hyde Park and their house in New York. She takes an active part in political and communal work and is keenly alive to the trends of the day.

In addition, Mrs. Roosevelt is the head of a furniture making enterprise called the Val-Kill Shops. She founded this, with two other associates, in order to create an opportunity for men and boys of the countryside to develop self-supporting handicraft skill.

Despite these numerous interests, Mrs. Roosevelt has always given her home and children her first consideration. She has never allowed anything to interfere with the performance of her duties in that respect.

It was just after the Inaugural ceremonies at Albany, marking the beginning of the Governor's second term, and Mrs. Roosevelt had returned to town to be at her schoolroom. One can hardly believe that she is a grandmother, so youthful and vivacious did she appear. She is a slim, well poised woman, very tall, with a friendly engaging smile that reminds one of the illustrious Colonel, Theodore Roosevelt, the governor's uncle.

The drawing room in which she greeted the interviewer is a rather austere place filled with paintings and old prints of sea scenes, engravings of famous vessels of the navy, and several ship models, all bespeaking her husband's interest in the sea. One recalls, too, that he and two other members of her family held positions as Assistant Secretaries of the Navy.

However, Mrs. Roosevelt seems able to make one forget surroundings, for one very quickly responds to her charming, unassuming manner.

"THERE is no doubt," she said, "that even to the unobservant eye, there are changes taking place in the home. But to my mind, they do not point to its decline. They are, on the contrary, changes that are made necessary in order to meet the new conditions. Our life has become so complex and there have been so many changes in our world, both economic and social, that the home must be adjusted to meet those conditions. Any progressive minded person must view these changes as vital and productive of good.

"When most of the work and tasks of life were performed in the home, and every member had to help in the chores, it is easy to see that family life had to be knit closely together, if only for economic reasons. Recreation was also provided by the family in the home and the members themselves participated.

"But today, with canneries, bakeries, laundries, factories and innumerable labor saving devices, the work has been taken outside of the home. In other words, individualistic production has given way to mass production. There are, as a consequence, no essential tasks for the fami to perform in the house. As for recre tion, since that is now well provided f by outside sources, there is no need f the family to remain at home to creat their own amusement.

"Because, therefore, people no long find it necessary to spend much time i the home, it does not mean that they a less home loving. As a matter of fac outside of a small strata of society in th large cities, you find that in the vast m jority of American homes, parents an children are almost as much together a they used to be. They may not actuall be around the hearthplace, but in th motor car. That makes little differenc

"For home," she continued earnestly "is not a place, but an atmosphere. It i where the thoughts and fondest impulse are. The actual four walls don't coun That is why one cannot tell whether home is successful or not, merely by th amount of time that the family spends i it."

"Then the fact," she was asked, "tha women have entered the business world o are spending more time in outside pur suits, is in no way undermining th home?"

"NOT at all," she laughed "If anything, their work is aiding them t make the home a more interesting an attractive place. Whether a woman en gages in political, welfare or busines work, these outside contacts keep he mind stimulated and help to develop he personality. Life now moves so quickl and so much more is demanded of me and women, that they must constantly b on the *qui vive* if they are to hold thei places. This has particularly meant tha the wife has to prepare herself to play a bigger role; that she must be able t share her husband's interests and pursuits Indeed, the success of marriage depend more than ever before upon this persona

ROOSEVELT *says*

"First"

Another Personality Interview by

LILLIAN G. GENN

Mrs. Franklin D. Roosevelt, wife of the Governor of New York State

ationship between husband and wife. 'For that reason the woman who keeps mind and her interests alive, is a bet- companion to her husband, and a more elligent mother to her children. Nat- lly, she can create a more beautiful ting for the family life.

'To my mind, it is indeed fortunate t the modern woman is able to find an let for her energies and thought in out- e activities. The small apartments, ich have replaced the large, old-fash- ed houses require only a minimum of time and if she were compelled to stay home, she would soon become a dull l discontented person.

"OF COURSE, when a man has small children, I believe that should remain at home with them, n if she can afford a nurse or gov- ess. For it is she alone who can give m the solicitude and spiritual values ich are so essential for them. It is she o can better supervise the habits which ke for good character.

'Character building begins practically the cradle. A child can be given bad bits before it is eighteen months old l a little later on a child will acquire re from example and atmosphere at me than school or long lectures can ch. For that reason, it is a mother's mary duty to concern herself with the bringing of her child and any other rk that she may be doing must be rele- ed to a secondary place.

'If, for the time being, she has to cur- l her activities entirely, she at least is shut off from contacts with the out- e world as her mother and grandmother re. The Radio brings the whole world o her home and helps her to keep reast with the times.

'Thus it should not be such a hardship her to give up her work to devote rself to her children. However, she ould not let herself become dependent upon their interests, for when they have grown up she will only find herself a drag on them. She must plan and utilize her time so that she can do something creative and interesting. Only in that way can she continue to enrich her own and her family life, even when her children have ceased to need her."

Mrs. Roosevelt emphasized the point, though, that while she thought a mother should devote herself to her children during the early, formative years, yet she must be careful not to smother them with too much attention and love. As she brought out in her recent talk over the Radio, and reiterated to the interviewer, a child that is brought up as a hot house plant will be too frail in courage and stamina to meet the vicissitudes of life when he must step out in the world and stand on his own feet. He expects others to pamper him as his parents have done and when he does not get it, he feels thwarted and defeated.

"We must therefore encourage our children to meet their own difficulties," she said. "We must let them find their own solutions to the problems and gain experience for themselves. We must not always strive to make their path easy for them and to throw opportunities into their laps.

"It may seem hard to do this, but it is for the ultimate advantage of the child. When he knows he can do things for himself, he no longer views the world as a fearsome place. He feels sure of his ability to meet any difficulties that arise.

"I also think that no mother should feel sorry that she cannot fulfill every wish her child expresses. His zest in life and that strange character-building process will go on much better when he is always envisaging new fields of endeavor. Nothing is more pathetic than a bored child, and you become bored if you have nothing new to interest you. The mother should open up all the avenues she can for her children, but she should leave them to follow them up for themselves.

"Yes, we have lost a few things but we have also gained many new advantages today."

Irving Berlin—One-time Singing Waiter of the East Side who grew up into the first Tin-Pan Alleyite to make the song-writer more important than the old song-plugger.

The Mulligan Guard. Below—A rare old copy of that 1873 classic—reproduced from the original in the National Broadcasting Company music library, which is a storehouse of treasures often unobtainable elsewhere.

Echoes from the Old

Tin Pan Alley

By Old Timer

TIN-PAN ALLEY winds its way through the very heart of the American scene. True, the hand of change has already erased it completely from the map and true that that street which was once Tin-Pan Alley is today home for wholesale dress dealers —yet, notwithstanding such facts, Tin-Pan Alley remains an inevitable part of the American scene. For Tin-Pan Alley, in its own abrupt fashion, tells us more about America past and present—especially past, when it was at its zenith—than huge tomes can, and tells it to us picturesquely and vividly. It is a name heavy with glamour and tradition. And if Tin-Pan Alley, as a street in New York City which quivered to the awkward strains of industrious tin-pan pianos, is a thing of the past; then its traditions, at any rate, and its graphic name have deservedly lingered on through the years and are still palpitantly and vibrantly alive.

Early in 1898, Broder and Schlam—a world-famous music-publishing house which had been manufacturing a nation's song-hits for the past decade — moved their baggage from San Francisco to New York and opened up a huge office on Twenty-Eighth Street between Fifth and Sixth Avenues. That was the beginning of a grand *hegira* for music-publishers. In all the corners of the city, they shut the doo of their establishments and, followi immediately in the footsteps of the formidable rival, straggled straight Twenty-Eighth Street. Where Brod and Schlam were, there would they b for where Broder and Schlam were the would be, most assuredly, all the famou actors and musicians of the country see ing their songs; there would become co centrated the nation's song industr Within a few months, Twenty-Eigh Street began to quiver and to dance the volcanic strains of popular music; mountain of execrable tunes and of mor or-less pretty tunes were being produce there each hour of the day. Next doo to Broder and Schlam there was now lo cated the offices of Charles K. Harr whose prolific pen was indefatigable an who had already endeared himself to th hearts of all Americans because of pretty ballad *After the Ball* which an entire country was at that time singing. few doors away—at 51 West—were to b found Witmark and Sons, who for year had been known to produce a mass of in gratiating tunes. And somewhere else o the self-same street could one see thr huge and coruscant banners of Harry vo Tilzer advertising his sensational *M Old New Hampshire Home,* of Joseph Stern & Co. who rode to fame and suc cess upon the back of *Sweet Rosie O Grady,* of Leo Feist, the novice in thi company of veterans, and of other now prominent music concerns. And, in th midst of all these celebrities, there wer sprinkled all over the street the smaller and obscurer firms who for years ha been struggling down at Fourteent Street and who now hoped that Uptow Twenty-Eighth Street would become thei

crets . . . Past, Present and Future . . . of the Street of Song . . . with delights on the Gay Old Ditties

ial salvation and ultimate success. e year 1898, therefore, was when this became, for some mysterious rea- the street of song. All day, the s banged and the trumpets wheezed atest numbers; all day actors and ians would walk here mechanically they were in search of new songs. because this place had become so alized, this street which cut between and Sixth Avenues and which lay en 27th and 29th Streets acquired v and strange name. The innocent Yorker might still have known it as ty-Eighth Street but to the world ge it was henceforth to be immortal- as—Tin-Pan Alley.

BUT Tin-Pan Alley had led its first barbaric yawps long be- Broder and Schlam migrated to ty-Eighth Street. Already had it existing for many years down at the gas-lit Fourteenth Street which hed from Union Square to Second ue. And there, in this Mecca of bur- e theatres, of bawdy-houses and of dance-halls, were the first of Amer- popular songs created, written and ted. Remick's had been there long e 1890; Ted Snyder, too, and Wit- and Sons—and around them clus- the myriads of competitors who constantly struggling with one er in the mad scramble to create the tional song of the hour.

d inspiration, down at Fourteenth , did not create the sensational song e hour—no more than it did down in an Alley. Mass-production, com- on, high-powered salesmanship, di- n of labor, song-plugging did the

And these were rapidly introduced the song-writing business, by the eenth Street Minnesingers, until it, became a leading industry. In this m of noises that constituted the eenth Street song-factory—the in- nt braying of bands, the rhythmical ls of tap-dancing, songsters and in- mentalists trying out new parts for eville work—songs were manufac- with speed, precision and efficiency. were formulas for every type of in existence; there were dozens of each specialized in a definite type of busily scratching away at paper to hundreds of songs in their own alized fields—and as, one by one, songs flew from their pens with the te regularity of clockwork they were ht at once to the song-plugger whose

Two of the most famous figures of Old Tin-Pan Alley whose songs will live on through ages to come—Charles K. Harris, who wrote *After The Ball,* and Harry Von Tilzer, composer of *My Old New Hampshire Home.*

duty it was to market them successfully.

For between each song and its success stood the song-plugger. Down at Fourteenth Street, and later in Tin-Pan Alley, the song-plugger was, by far, the most important influence in the music-publishing field. To the publisher the composer was nothing more than a piece-worker who could create at any given moment a certain type of song. The performer was but a day-laborer; hundreds of them were floating around each day from one publishing house to another seeking employment. But the song-plugger was the artist of the trade. Upon his personality, his charm, his popularity, his gift at salesmanship depended entirely whether a certain song could become a success or a total flop. A great song-plugger could actually make any song a success, irrespective of its own merits. But, after all, how many great song-pluggers were there on the street?

ONLY the most meagre handful. There was Pat Howley, a free-lance song-plugger, the cynosure for all publishers' eyes; there was Meyer Cohen whose distinction was that he made of *My Mother Was a Lady* a national success; and there was Izzy Bailin—later to be known as Irving Berlin. Every evening, after the music shops had closed their doors for the day and after the gas-lighter had passed along the dark streets lighting all the gas lamps, those three song-pluggers, together with the song-pluggers of the various publishers, would assemble at Tony Pastor's Theatre. Tony Pastor was always very tolerant to song-pluggers and he would permit one of them to station himself in a box, another in the balcony, a third behind the scenes—and then when the respective song of each song-plugger was sung on the stage, the song-plugger was given the limelight and full liberty to plug his song to his heart's content. And then, after the show was over, the song-pluggers would congregate together with the vaudeville actors and singers at nearby beer-gardens. Cigars would be distributed freely; treats for beer and whiskey would be frequent events and during all this burst of generosity the song-plugger was deftly plying his trade: spreading propaganda to the actors and singers for a new song. The end of a busy and expensive night might have found many sad faces among the song-pluggers—but there was invariably a smile of triumph upon the faces of Meyer Cohen or Pat Howley. For hardly an evening would pass when they would not get some actor to interest himself in their latest number. And that, as every song-plugger and publisher and composer down at Fourteenth Street knew, was the first important step in the making of a successful song.

The song-writing game had become an industry; that musical *entrepreneur*—the song-plugger—had been introduced into the field. Fourteenth Street had now definitely paved the way for Tin-Pan Alley. Tin-Pan Alley thus had its tradition; it was fully prepared now to create its own history.

But little did the song-pluggers and song-composers realize that not the songs themselves but the song-lyrics were to immortalize Fourteenth Street of 1890. Who can forget those bombastic, sentimental, elaborately emotional lyrics which, at that time, clutched at and played havoc with the heart-strings? But which today are remembered and cherished as precious bits of Americana? There were such colossal tragedies as *She's More to be Pitied than Censured*—a tearful ballad about a girl who strayed from the strai and narrow path of virtue. There w such heart-breaking dramas as *After Ball*—that song-success of Charles Harris—wherein (so the elaborate st goes) a young man, walking away fr his sweetheart at a ball to bring he drink, comes back only to find her talk amorously to a stranger; wherein he ra and fumes and refuses to listen to explanations and, then and there, bre the engagements and wherein, years la when he is old and gray he learns that sweetheart had died of a broken heart that the stranger had been none o than—her brother!

There were more cheerful bits, such *The Lost Child*—song-plugged into overwhelming sensation by Pat Howley coming from the pens and presses of St and Marks—in which a lost child come a policeman, in trouble and tears, only learn that the policeman is none other t his father, who had been separated fr his mother because of a petty quar and in which the child brings about a rec ciliation, tender and pathetic, betw husband and wife! Or, to take that so sensation of the age, *My Mother Wa Lady*—the handiwork of Stern and Marl composition and the song-plugging Meyer Cohen:

TWO drummers sat at dinner in grand hotel, one day.
While dining they were chatting in a jo sort of way,
And when a pretty waitress brought th a tray of food,
They spoke to her familiarly in manı rather rude.
At first she did not notice them or ma the least reply,
But one remark was passed that brou the tear-drop to her eye,
And facing her tormentor, with che now burning red,
She looked a perfect picture as appealin she said:

"My mother was a lady like yours will allow,
And you may have a sister who ne protection now!
I've come to this great city to find brother dear,
And you wouldn't dare insult me, sir. Jack were only here!"

Of course, nothing will prevent the bs of Fourteenth Street from fashioning pretty ending and so we learn, as the so progresses to its second stanza, that abusive young fellow is none other th Jack's best friend and that he invites waitress to come with him to Jack so t he might introduce her to Jack—as bride!

When Fourteenth Street moved upto to Twenty-eighth Street it left behind sentimental song-lyric but brought alc its efficacious system of manufactur popular songs. And there on Twen

Street did this system reach its point of efficiency. Tin-Pan ctually went far beyond anything nth Street could conceive of in ed with which successes could be ed, produced and marketed. It ome a huge machine which incessantly, pouring songs out of mouth in innumerable quantities. song-factory of Tin-Pan Alley smoothly operating organization. gracefully subdivided into the vari- egories of song-writing—the hu- vaudeville ditty, the love-song, ular-song (and later, when Tin- ey was to grow out of its adoles- he mammy and the blues-song)— h department boasted of a dozen ers, at least four amanuenses to the blind gropings of illiterate , and a head, the supposed au- in the branch of musical composi- supervise, correct and bellow out Over these various branches of lishing-house, ruled the head of es-department to assign all the and the blame. It was the head sales-department who constantly s finger upon the pulse of a pub- ims and who, when he felt that on for the humorous ditty should oaching, gave a rushing order to norous-ditty department and as- the cream of his song-pluggers. n the market was flooded.

TIN-PAN Alley was, there- very delicate mechanism which the styles and produced the suc- o satisfy the style in a nation's music. And of this very delicate ism the most important cog was song-plugger—who was still flour- despite the change of scene. To g-plugger, were given the greatest es, the highest esteem and the salary. The head of the sales-de- t, the composers, the amanuenses, formers were all shackled to their from nine o'clock in the morning in the evening. But the song- , artist that he was, was the free His work occupied only a few hours day, primarily during lunch-hour, office was the street directly in f the publisher who employed him. as easily recognizable—standing front of his own publishing-house, cigar in his mouth, a derby on his idling lazily, so it seemed to the onlooker, but in truth keeping a eye over all the people who through the street. A song-plug- to know every actor and singer t, at least; the best song-pluggers hem by the first name. And should tor or singer pass innocently Tin-Pan Alley, the song-plugger a tempting cigar in his hand to e fish withal—would attempt to the actor to walk with him into his He would utilize the magnetism personality, the persuasive power of a good cigar or theatre tickets or, even, an excellent dinner, and if these were powerless he would—like the very famous "puller-in" of the Canal Street clothes-shop—attempt to make his actions speak louder than words.

Once the song-plugger had induced the actor to enter the office, the rest became mere routine—a routine in which Tin-Pan Alley was so very efficient. Performers would play for him the latest numbers, tap-dancers would rap out their rhythm, the head of the sales-department would swear religiously that they were embryonic successes. Then the actor, after having tried out the number for himself and after having been pleased, would invariably promise to use it in his next act. The rest was left to the capricious whims of Chance—and to the histrionic abilities of the song-plugger.

That was the method of pushing a song in those halcyon days. For it was the day before the Radio, before the innumerable jazz-bands began to serenade every nook and corner of the country, before those millions of movie-houses sprang up, like so many mushrooms, far and wide—and, consequently, song-plugging was yet the simple task, consisting of nothing more elaborate than securing the interest of the actor in the music. But even without the help of the Radio, jazz-bands and movie houses, the song-plugger, it seems, was not altogether helpless. His own genuine ability in pushing a song to the attention and affection of a whole country seemed to accomplish more wonders than all of our modern wholesale advertising. For with his very simple resources, the song-pluggers accomplished so very much. that in spite of ourselves and our inmost desires, such faded tunes of the Golden Nineties as *Sweet Adeline, Silver Threads Among the Gold, The Bowery, Anybody Here Seen Kelly?* and *Sweet Rosie O'Grady* are still indelibly, eternally I fear, impressed upon our memories.

TIN-Pan Alley had never been kind to the composer who was outside looking in. Since merit played no part at all in the making of a song-success, what need did Tin-Pan Alley have for outside talent? It had, to be sure, its own staffs of composers who could produce music more quickly and more efficiently than any foreigner could. And speed and efficiency was what Tin-Pan Alley required most in its business of making songs. Therefore when, in 1905, Irving Berlin went from door to door along Twenty-Eighth Street to peddle his first song *Marie from Sunny Italy*, success did not run to meet him with open embrace. The larger firms simply turned a deaf ear; the smaller firms were more affable, if not more generous. However, Berlin did not lose heart. True, his part in the creation of *Marie from Sunny Italy* was a small one (only the lyric was his), but he loved it with the affection of a father for his first born. And so he was determined to see it published. Patiently, he continued disturbing the peace of publishers until, one unexpected day, he reaped his reward. A smaller firm, Ted Snyder, accepted the manuscript—and published it soon afterwards.

The royalties were thirty-seven cents

(*Continued on page 106*)

A window on Tin-Pan Alley—Meyer Cohen, song-plugger of the old school, at his desk in the office of Charles K. Harris, an organization which is still publishing hits.

She needs only one name to be remembered—serious, winsome, gay Armida.

By MURIEL ALLEN

That *So Romantic Senorita*

You Hear H and You Pict Gay Caballe Romantically Serenad

Armida of the Ai

DYNAMIC, spontaneous, the Lilliputian embodiment of Spanish temperament and youthful enthusiasm—that is Armida of the Footlights.

Appealing, tender, the elfin spirit of Romance and Dreams—that is Armida of the Air!

"And which do you like best?"

Armida laughed—a happy, rippling laugh.

"Sh!" she whispered, "you mus' not make me geev myself away—too motch!

"You see—my audience—yes, I lov' them a ver' great deal. I laugh with them—I sing to them—I dance for them—so—" And she whirled away, a very avalanche of motion, castanets clicking, eyes flashing, tiny feet twirling her lithe, slender little body about like a bit of thistledown.

"I look into their faces and smile—and they smile back at me!

"But when I sing over WMCA, the leetle round 'mike' (that ees hees name?) that is all I see. No smiling eyes—no happy faces—and so—I eemagine. I say to myself, 'Armida, those people out there—you cannot see them—they cannot see you—so you mus' make them *feel* you—you mus' talk to their hearts—you mus' say to them, over all those miles and miles of space, "Listen—I lov' you—everybody!"—and then that will make them happy so that they will lov' you and like to listen to you—lov' for lov'.

"It seems—somehow—because I cannot see the ones I speak to out there in space, that we are even closer than when there is only a strip of footlights between us. You Americans—you have a beeg word for that—para—paradox! Yes, that ees eet!

"And there is something else too—a something that is just for me. You see, sometimes when I get ver' much excite' or enthuse' in my stage work—*maybe* I make one leetle mistake—maybe take a wrong step or draw a long breath—this way—when I sing—and no one knows. It ees all right!

"But on the air it is ver', ver' different. Every leetle sound—she go out everywhere! If my breath get mixed up and I say 'mhhm' (like that)—thousands of audience hear me—and that ees not so good!

"OR MAYBE I get some—(how do you say—'mike fright'?) and sing one wrong note. Caramba! maybe they cut me off—like thees!" The slender little fingers snapped sharply in mock disgust, like the click of the wee castanets.

"So that ees for me. Why? Becoz' I want to improve—always—every minute—to make my work better and BETTER.

"On the air I mus' not make one leetle blunder—and so it make me always r perfect. You see? And that is wh lov' Radio!"

Armida's background is as full of mance as her young and colorful sp

Her father, a Spaniard from Barcel was an outstanding figure in the Spa theatre when he met and married mother, a beauty of Mexican and Ita descent.

ARMIDA herself was b in the stormy republic below the Grande, and was brought to this cou for her education.

But the love of the stage was in blood. An older sister was perforn in the little town out in California wh the family lived, and Armida beggec be allowed to go with her one evenin

Her request was reluctantly granted, she was still only a baby. The tiny pirant for fame followed her sister's with an interpretive song à la Rac Meller. The number literally "stop the show", and Baby Armida becam regular member of the company.

"And that was the beginning"—sm this diminutive bit of femininity—"w I was seven—years and years ago!" (must be all of nineteen!)

Later on, when she was quite gr up—sixteen or so—she was discove

Harriet Lee

YOU have seen Miss Lee's face on the Radio Digest cover and this picture is merely to remind you that she is getting better looking every day and is still one of the Columbia stars. You remember her on the Weed Chain program, perhaps

WITH twin talents along musical lines it was inevitable that Miss Fields should become a Radio personality. She plays the violin as concert soloist and she also sings as soprano soloist. She won a Juillard scholarship for both. Columbia found her first

Catherine Fields

Lovina Gilbert

OTHERWISE known as Mrs. Russell Gilbert who sings during the Cheerio Hour over the NBC network. She is also heard on other chain programs during the week

Prevention or *Cure?*

"Don't Use 'Aspirin' Type of Welfare Work—Attack Cause of Social Ills," says Daughter of England's Premier

By Ishbel MacDonald

Ishbel MacDonald at her desk at No. 10 Downing Street, headquarters and home of the Prime Minister of Great Britain.

AT CHRISTMASTIME everyone feels generous, kindly and brotherly. Large sums of money are spent in making people happy. rties are given and beaming hosts and stesses shake hands warmly with their s fortunate brethren and speak kindly them. The next week they swoop past m in a purring car which is upholstered e a dream cloud and graceful in every e. That Christmas party leads to noth- . It is a few hours of warmth, satisfac- n and laughter, a few hours when the t and hostess can demonstrate their eriority in a happy, patronizing way in- ad of in the less pleasant way of draw- cloaks aside while passing a less for- ate brother.

Each guest returns to exactly his old ition with happy dreams of sparkling ification but nothing with more uplift- and nothing more tangible than per- s an orange or a bag of candies.

Some so-called social work is like that ristmas party. It leads to nothing. A at deal of energy is put into it, a great l of paid and voluntary labor, and the ult is not worth the labor.

know of an effort organized to raise ds for a certain class of maimed breth- where, out of the 146,000 pounds raised y about 8,000 pounds went to the un- tunate brethren, and the rest went to er expenses.

This is not what I call social service. ial service should have two functions, function of curing and the function of venting social disorders. A third func- n which creeps in, of necessity, is the ction of appeasing. When a human ng suffers from headaches, often he es aspirin when he feels the pain un- rable and thinks nothing more about it. t a wise person goes to the trouble of ding out the cause—eye-strain, indiges- tion or something else if the head aches and then sets to work to do away with that cause and prevent it from arising again. The cure may be so long that the patient still finds the temporary help of aspirin from time to time necessary while the cure is in progress.

A community should regard its social pains and ills in the same way. Many bands of social workers administer aspirin in the form of treats and parties for their less fortunate brethren, and when the happy effects of the treats are over their brethren are in as much pain as before.

I am not opposed to social work of the appeasing type so long as it is a branch of some constructive social work and does not distract the social workers from the main road and the object of their work. So much for aspirin.

HOW about the cure? One should not try to cure without diagnosing the disease. A good instance of how we try to cure without diagnosis is that we send criminals to prison to cure them of their various crimes. How can prison cure crime? We have been breeding crime by choking and stunting the development of the bodies, mind and spirit of some sections of the community, and the cure we offer them is a change to equally unwholesome surroundings, but with better security, where they may be sent officially as bad specimens of human beings who should know better than to have grown up gnarled and twisted. This is only one example of the kind of cure that is sometimes administered by social workers and others who are in charge of the well being of the community. But more understanding is being brought into the treatment of criminals.

Where is the criminal to go when he is reformed? The danger is that he will return to his old surroundings and in them slip back to his old habits. Curative work is not enough. Preventative social work is the most important social work of all. While individuals are being cured, while individuals are being cheered with treats, the work of prevention must go on. Bad houses and the many evil influences must be rooted out and replaced by surroundings which are healthy and wholesome for bodies, minds and souls, and by enlightenment and good education.

Millions of dollars are spent on the upkeep of various kinds of institutions which are filled by patients who need treatment because so few dollars are spent in keeping them in good health. The aim of a good social worker should be to divert the stream of sympathy, energy and dollars which flows to cure people crushed by our social diseases, to help those people before they are crushed—by attacking the social diseases which crush them.

ISHBEL MACDONALD is worthy of a place in the catalogue of famous women not only through reflected glory, but also in her own right. A prominent welfare worker in London, her recent address to two nations, heard through the Columbia System in this country, has caused much comment. It is reproduced here.—EDITOR.

(*Continued from page 45*)

No distinct line can be drawn between curative, preventative and appeasing social services. They are connected and they overlap. But emphasis should be put on the preventative side of social service.

To return to our aspirin, some people laugh when you suggest trying to cure their addiction to headaches. "My dear," they say, "I have been bothered with headaches all my life. It wouldn't do me any good. It wouldn't be me if I hadn't any headaches. I find aspirin eases the pain."

What lack of faith these people have! But as communities, aren't we apt to suffer through lack of faith?

"It is human nature to be criminal. It is human nature to go in for warfare. It is inevitable that we have great wealth at one end of the social scale and crushed humanity at the other end. It is inevitable that we have unemployment. Poor beggars, let us do our best to give them a jolly Christmas." Isn't that how we speak?

But our most appalling lack of faith is in our treatment of the insane. Until very recently we have treated insanity as a sin, something that gives us the creeps and fills us with dread, something that brings shame with it.

I welcome the new light of faith and hope that is held up to us by those of the medical profession and social workers who are fighting against the lack of faith the community possesses. One can practice mental hygiene as well as physical and spiritual hygiene. Insanity, like other human and social diseases, can be prevented if we have the faith and will to do so.

It is the business of electors to vote wisely, for it is the vote of those citizen-electors which affects the welfare of the other citizens of the community. And it is the business of the elected body to legislate or administer for the good of the community.

To my mind, the most constructive social service can be rendered through legislative and administrative bodies. That is why I have chosen administrative work on the London County Council as my career. But when we know the direction of our road and have good surveyors, we can have more than one gang and more than one type of worker upon the route tackling the outstanding obstacles that have to be overcome.

INDEPENDENT societies exist and have existed for generations doing splendid work. They, too, are working for the good of humanity. A very large number of people in all stations of life feel that responsibility towards the community. What I have been unable to decide, after my two short stays in America, is whether you on your side of the Atlantic feel that responsibility more than we do on ours.

It is always difficult here to recruit a new social worker because every public-spirited man or woman seems to slip into some kind of social service of his own accord without being recruited. I have hardly ever found anyone looking for social work to take up. Every one worth while seems to be fully employed in some social work.

Another decision I am unable to m is whether you in America waste your t on useless social work more than we here or if you are more constructive your methods. I think you are m scientific but it does not follow that are more constructive. I have not m faith in statistics and figures.

We both have a mixture of trained untrained social workers. One branch social work after the other is being han through the trained professional so worker and the standard of training is ing and rising. But the voluntary work still find plenty to do. They are pioneers, and more pioneer work is b done by them and being proved by t to be worthy of official recogni Through history we see voluntary eff of individuals in social service, even the water supply and drainage of tow being recognized and taken over by p licly elected bodies or officials. Social s ice in this century alone has brought ab great improvements which we cannot o look.

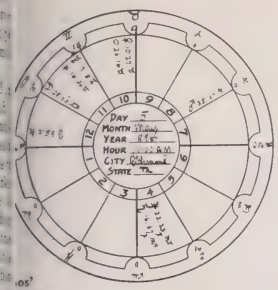
Partly, I do not say wholly, through cial service has the health of the under and his standard of living been impro but enlightenment brings more and m hopes for satisfaction and more and m demands upon social service. There always be work for the voluntary pion and the entrance of the professional cial worker is in my opinion not killing fine spirit of social service.

Our problems are not the same, they can be tackled with the same sp of faith and determination.

Peggy Hull, from recent photograph in uniform she was authorized to wear as only woman war correspondent in the World War.

Only Woman War Correspondent

Peggy Hull



PEGGY HULL who has been presenting horoscopes of the Radio notal s in RADIO DIGEST during the past few months is no idle ethereal drear t just because for the time being she is interested in the movements of e heavenly bodies, as she sincerely believes they influence the destinies f mankind. She was the only accredited woman correspondent in the World W She has seen men die in battle. She has camped in frozen Siberia. She s literally waded in blood at Chinese massacres.

Recently she has been appearing with Mr. Charles R. Tighe, associate edi t of RADIO DIGEST, in broadcasts at WMCA, New York. Listeners have he some of her hair-raising adventures from her own lips. In spite of her mascu e courage she is decidedly feminine. Her voice is low and gentle, as Radio teners have learned.

When Peggy takes on a whim she goes into it thoroughly. That is the rea for her present interest in astrology. She says her own life has worked precisely according to her horoscope—and because her life has been so unus she believes it must have been something more than coincidence. She is no professional astrologer herself but she knows the rules and the ethics intimately. Her horoscopes prepared by a woman friend who is an astrologer of considerable note. Through the assistance this friend Miss Hull has arranged for genuine horoscopes of readers of RADIO DIGEST according to announcement that appears on page 86 of this issue.

It is interesting to remember that Peggy Hull is the only woman who was formally accredited the War Department as newspaper correspondent in the World War. Other correspondents paid the highest tributes. Her war stories were syndicated in more than 100 newspapers.

WOMAN

Threatens Partnership of

AMOS *and* ANDY

Andy's
Horoscope

THERE was nothing in the stranger's aspect to inspire either implicit confidence or a warm welcome.

...n a long, thin body, clothed in a great, ...y cloak, hung hands and feet that ...ped like the wings of a bat. Out of a ...esquely elongated face, stared a pair ...enetrating eyes, and the corners of a ...e mouth drooped with dire portent.

"Who are you?" I asked, too startled ... frightened to be gracious.

"Shsh," the creature whispered, raising ...pectral forefinger to a nose as long as ...opatra's needle. "I'm Mercury!"

I recognized him then, this Messenger ...he Planets, and the planet of reason in ... own right. But what brought him to ... study at this unusual hour, his breath ...t, his gaunt frame drooping with fa...e, his garments heavy with the dust ... long journey?

He dropped into a chair, and fanned ... self with a palm-leaf hand. After a ...nent, his breath came more easily.

"I am not too late?" he contrived to ask.

"For what?"

"To warn them!"

...n spite of his air of mystery—the fur...ness of his entrance, his cryptic ...ch, the evident importance of this ...sion, which he had had to execute in ... haste—I was not greatly engaged ... my visitor from the realm of the ...s.

AMONG all the Great ...ncil of Nine—that planetary hierarchy ...h rules the affairs of men—I liked ... least. The fiery Mars, the inimical ...rn, the graceful, soft-spoken Moon—...e, and all the other rulers of the ...stial Domain, I had found it possible to admire, for their virtues principally, of course, but sometimes for their vices.

But Mercury lacked in his nature enough metal to hold the imprint of either virtue or viciousness: he reminded me of a moldy, old bag of meal, which one could punch into the temporary semblance of individuality, but which would improve the first opportunity to relapse into an indifferent shapelessness.

YET Mercury was not a fool, nor altogether a rogue. Shaken out of his natural lethargy, the sharp sword of his reason had drunk impartially of good and bad men's blood. And tonight, it would seem, he had gathered his cadaverous carcass together and unsheathed his blade in a noble cause.

I looked at him with a little less disfavor.

"When you've completely recovered your breath," I said, "perhaps you will explain who you wish to warn—and of what."

"I have it now—my breath, I mean." And to prove it he dragged himself out of the depths of his chair, with a great swaying and bending of his appendages, and a creaking of his bones. "You must forgive the infirmities of an old man," he went on in a querulous tone, "I've been running errands for that damned Council for centuries—I, whose clear intelligence has fertilized the genius of Uranus, whose sane counsel has held even that infamous, old dastard, Mars, in check; whose cold judgment has led many a child of Venus out of a brothel to sit on the left hand of a King."

"No doubt you have suffered greatly," I remarked. "But what did you come to see me about? What is your warning? Who must be told?"

His baggy garments disgorged a black bordered handkerchief, and he blew his nose. In some miraculous manner, the gesture seemed to steady him.

"You are writing an article for the RADIO DIGEST," he asserted.

I admitted that it was true.

"The article concerns the fate of Amos and Andy."

This I also acknowledged.

"Then—" he leaned far forward to heighten the dramatic effect—"you must warn them! At this very moment, they stand in fearful peril!"

His black, consuming eyes; the pallor of his cheeks; the unearthly way in which his figure was knit together under the voluminous folds of his cloak; the attitude in which he poised himself as if for flight from the edge of his chair, made me think of him suddenly as a great, gray evangel of Death.

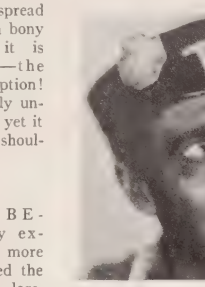
I jumped to my feet, glanced at the clock, and ran to the Radio. It was after 7, and over the air came Andy's deep voice and Amos', higher pitched, in one of their endless discussions.

"They're all right!" I said, with the asperity of one whose concern has been unnecessarily aroused.

BUT I failed to disturb the venerable apparition in his rôle of a prophet of doom. He transfixed me with an outstretched arm.

"Tonight—yes; but what of tomorrow night, and the night after that?"

"What do you mean?" I cried.



"Dissension, disruption, dissolution!"

I laughed. "Nonsense! They are the best of friends. I thought you intended to

tell me a racketeer planned to take them for a ride."

But no light of levity answered me in my caller's gloomy face. He arose, took the chair before my desk, glanced at the two horoscopes which I had left beside my typewriter.

"Sometimes there are things worse than death," he intoned. Upon the outspread sheets, he laid a bony finger. "See, it is written there—the danger of disruption! They are entirely unaware of it, and yet it stands at their shoulders."

Amos (Freeman F. Gosden) is always first up and first to get to work.

HE BECAME vastly excited and grew more so, as he studied the symbols of his lore. "You must warn them. Tell them a trap is open at their feet. Tell them they must not fall into it. They have climbed the high places together. They have won fame side by side, and through each other. If they separate, neither will ever be so successful nor so happy again. Tell them so! Tell them everything I have said! Tell them, for Heaven's sake, to beware!"

"But how is all this to come about?" I demanded. "Through whom? And in what way?" Then the suspicion that the scene was too theatric to be real—that I was being made the victim of a hoax—came to me with disconcerting suddenness, and I took refuge in derision.

YOU are as alarming as a gangster's pineapple, and as mysterious as hash. Do you think Amos and Andy are going to start pulling each other away from the mike just to make MacFadden jealous? Somebody will have to slip the poison in the soup. Make public the name of the villain!"

Mercury arose and wrapped himself in his mortician's dignity.

"I had hoped to avoid this issue," he said, in a tone that had the hollow echo of a sepulchre.

"Well, you won't," I assured him. "Come across!"

His enormous feet were flapping in the direction of the door; but he paused, and stood for a moment, as motionless, and as ridiculous as a scarecrow in the corn.

Then his mournful lips contorted themselves in laughter; his cavernous eyes danced with diabolic glee.

"Man's enemy is woman," said the old crapehanger. And disappeared.

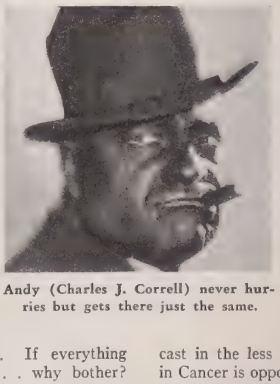
I rushed to my charts in a fever of excitement, scanned the spot where my celestial caller's finger had lain. And there it was—the mysterious menace in step-ins.

I have no wish to invade the affairs of either Amos or Andy; and I could not, even if I would, venture to guess her age, her identity, or what part she may play in their joint career. But Amos and Andy, in their relations with each other, will do well to discourage the interference of all women; for their separation—and their downfall, if it comes—will be the handiwork of a daughter of Eve.

Although I can say no more of Amos' and Andy's peril, due to the possible machinations of a member of my sex, the stars give me authority to describe other interesting phases of their life, which they little suspect one in my remote position can know.

It is seven a.m. of any morning since Amos and Andy first met. Amos, (Freeman F. Gosden) is awake and wide-eyed. He is anxious to get to work.

"Come on Andy," he calls as he springs out of bed, "get up. We've lots to do on that sequence today."



"Uh huh." Andy, (Charles J. Correll) grunts and turns over for another nap.

Amos goes about the business of getting dressed with the natural grace of the Taurian born. He sends an anxious glance toward the sleeping Andy and a little wrinkle appears between his eyes. He doesn't want to nag but he knows perfectly well, that if he doesn't keep after Andy, he'll never get up.

"Andy, it's almost eight o'clock." But Andy doesn't care whether it's ten o'clock. He groans and goes on sleeping. After several more attempts on Amos' part, Andy finally extricates himself from the bed clothing and starts getting up. But he doesn't hurry. Andy hates to hurry. And it seems so foolish when there's tomorrow. If everything can't be done today . . . why bother? There is always tomorrow.

Andy's middle name should have been Procrastination, and if Madame Queen ever gets him to the altar she should receive nothing less than the Congressional Medal.

It would appear to the casual and unpenetrating observer that the combination of Amos and Andy is a trifle lopsided, with Amos doing all the work. But before you jump to conclusions . . . re

Andy (Charles J. Correll) never hurries but gets there just the same.

Amos, who was born May 15th, l Sun in the industrious, practical, mined, earthy sign Taurus. He l abundance of vitality to start wit a strong will. When he starts out anything he won't give up until it complished. To further strengthe tendency in his character, he h lordly sign of Leo on the ascend splendid combination under which t a public career, and this rising sig helps to bring out Andy's Leo, wl the sign of the theater.

On the other hand, Andy was bor ruary 3rd with his Sun in the airy Aquarius. He has a highly develop agination and is a confirmed drea dreams. He has remarkable ideas, originality and a keen sense of humi without Amos it is doubtful that he ever get his flights of fancy do paper. It is Amos who brings h earth and makes his dreams come

THEY should never rel and never permit a third party t between them. For they are both born and once they separated, there never be a reconciliation. They bot exceptionally amiable dispositions any difficulty ever arises between t will be through the subtle efforts other.

Their horoscopes show their struggles. Each has had to make h way and rise to a position of em through his own efforts. There w silver or gold teaspoons in the Gos Correll families when these you came into the world, but they bo something far desirable . . . t eficent Jupiter ing for them. ited fortunes b happiness whe stars are set a person and Amos and And had many up downs, they h so had the parable satis which comes personal achiev

IN A chart we fi reason for his cast in the less popular rôle. His in Cancer is opposed to Jupiter and to Uranus. This aspect always re the native appearing unfavorably the public. A pretty young actr example, is cast as an old and o woman. A man, with all the instincts of a hero, must take the part. It is an aspect you can away from.

(*Continued on page 98*)

True Story of Kippy and Robar's

Punctured ROMANCE

While She Coyly Twittered at KOA He Crooned to Her About Roses and Moonlight at KLZ

By Florence Partello Stuart

Florence Partello Stuart, Author who Fell Victim to the Charms of The Hero

HIS amusing incident is from the pen of he wife of Colonel G. W. Stuart, Chief of of the 103rd Division, U. S. Army. Mrs. rt, whose triple personalities embrace ty matron, writer and Radio entertainer, hes for its truth to RADIO DIGEST *readers.*

I STUMBLED into KOA, Denver's NBC Station, purely by accident and stumbled into the most alluring romance just-like-that. Now I have niably reached the Carpet-Slipper age, romance and adventure should be yed in retrospect, but who is ever enough to eschew Romance when it is handed to one with a bunch of roses?

Hero—Robar of Station KLZ, Denver—"Mrs. Rosenfield's Husband, Lawrence"

I acquired a "red hot" programme, *The Morning Revellers* and was told to carry on. Mrs. Berlin Boyd, creator and manager of this hour, was off for a much needed rest. Said Mrs. Boyd to me:

"Kippy, can you handle *The Morning Revellers* for me?" Like the young lady who was asked to play the piano I replied:

"I've never tried, but I'll do the best I can."

When I first faced the microphone I suddenly lost contact with my stomach. It had fallen through to the basement, and there was I, totally devoid of tummy, facing that invention of the Devil, the microphone. I prattled weakly about the values at the Oregon City Woolen Mills; I lisped inanely of the sparkle of Bluhill coffee. Frantically I made gestures, I raved around that Studio waving arms, stomping feet to emphasize my point, and, I was a total flop. Mrs. Boyd suddenly took on the proportions of a giant, she soared above my head like an eagle. Clarence Moore, my synthetic "Brother Bill" gave what comfort he could, but it was pale, weak comfort. Self consciousness had destroyed my poise and I sounded like a child of twelve.

Enter Hero. On KLZ, the Denver Columbia Station, the wit of Radio holds forth under the name of ROBAR. His is a rollicking program, free and easy. Robar is the most inconsequential person on the air. There is no rhyme or reason to his role, it is pure foolishness, a riot of fun. Anything that pops into his head comes forth and witticisms are bandied back and forth between Robar, Art and Verne. All the West knows the Robar hour, and there is ever a laugh coming when least expected.

I have always been a great Robar fan, admiring Robar for his spontaneous humor, and, as I was pretty sunk after my dismal failure of the morning, I turned on the Radio. If I was to become a broadcaster, I might as well take a few lessons. What was my amazement to hear this Robar person chatting with Verne about "Kippy", the new KOA Radio personality.

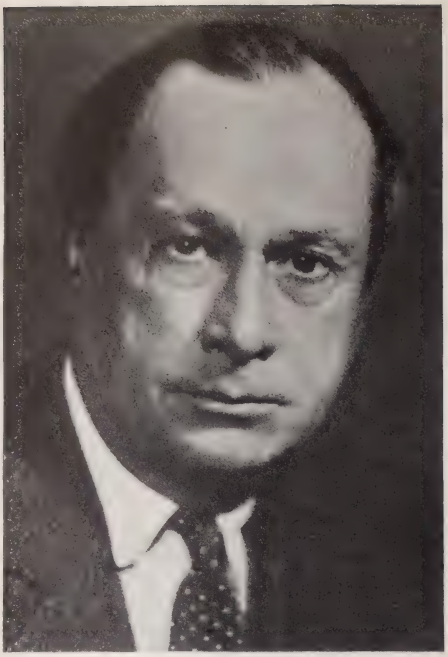
"That Kippy must be a swell kid, Verne."

"She sounded pretty scared this morning, Robar."

"Yes, but she is a beautiful girl, Verne."

"How do you know?"

"Why, can't you just feel her beauty, her youth? I bet Kippy is a tall slender blonde. . . . one of those delicious blondes . . . one of those world beaters . . ."



BINGO! Did I sit up and take notice! I flew to my typewriter and before I knew it my next morning's programme was accomplished, and the thing was alive! It breathed . . . it lured. Clarence Moore was amazed when I launched forth. Gone was the selfconsciousness . . . gone the inferiority complex. No longer was I a neophyte. I had ARRIVED. Fear had been banished by the excitement of adventure, for slyly, between each advertisement was a message to Robar, he of the Golden Voice. I had completely forgotten that I was on a job, for this was high adventure.

Since I wrote the program, I could easily put the words into Clarence Moore's mouth. Right then and there, I became

(*Continued on page 102*)

By
AUGUSTIN DUNCAN

Director of Radio Plays
Radio Home-Makers' Club

Augustin Duncan, whose sightless eyes still have the power to command. Brother of the late Isadora, he is as gifted in his field of drama, as she was in the dance.

Behind The Scenes of

The STAGE INVISIBLE

Blind Radio Drama Director Finds Handicap An Asset In Producing Unseen Plays

NOT only as an actor, but as a stage director, Augustin Duncan, brother of the famous Isadora, has played many parts and produced many plays—some of the most artistic the American Theatre has known. Recently, Duncan lost his sight. But there has been no diminishing of his professional ambition. Instead, with splendid courage and fine enthusiasm, Duncan has turned his talents to helping the Radio audience "see" plays performed for the microphone—without aid of television. As actor-director for The Radio Home-Makers' Club, Duncan is producing and playing in a remarkable series of Radio dramas broadcast regularly over Columbia's network. He prophesies a brilliant future for the Theatre-of-the-Air.

FAMILIAR as we have become with the marvels of Radio, I fancy that very few of us even begin to appreciate the graphic possibilities of the spoken word.

As a veteran actor-producer, who has devoted many pleasant years to the problems of the stage, I must confess that I was skeptical over the early efforts of the Theatre-of-the-Air. Then, when a curtain descended on my vision of the footlights, it seemed as though my affliction had given me new foresight in imagining the future scope of Radio dramatics.

Why shouldn't the drama succeed on the air? As I asked myself that question, I recalled that the earliest plays which history records, relied almost entirely on the actors' lines. Of course these plays had pantomime, and the actors appeared in person; but the scenic effects were *imaginative*, and a simple sign announced the fact that the background was supposed to be a castle or whatever locale the playwright had in mind. Later, the drama was translated from the open amphitheatre to the inside of the playhouse.

After years of experience in producing the most lavish and glamorous stage productions, I am not certain that the drama will not be better served when stripped of its settings and trappings. Then the success of a play will depend on the author's lines and the actors' skill, instead of gorgeous scenic effects which often divert attention from a mediocre cast and a trashy manuscript.

SO, IN the dusk of retrospection, I realized that in Radio, it is more true than ever that "the play's the thing". And it suddenly occurred to me that my own faded vision should be a splendid asset in applying my long experience to "staging" more realistic plays for the microphone. For, since television is not yet at our command, isn't it true that the millions who tune-in on Radio programs are *blind* in the sense that only their ears receive such entertainment? That being the case, it seemed to me that I was ideally fitted to visualize dramatic acts in the minds of this [illegible] audience, by creating vivi[illegible] tures in their memories.

In a very real sense, I [illegible] ize what I have not seen [illegible] producing a Radio-play, ea[illegible] sired effect must be made [illegible] to the listener's ear. S[illegible] lines and "property" sounds [illegible] carefully set the stage—gi[illegible] spirit and the environmen[illegible] manded by the drama. Di[illegible] must not only voice the [illegible] thoughts and speeches, bu[illegible] impart to the audience [illegible] *thing* that each character [illegible] —and the *manner* in whic[illegible] done. That is why Radio [illegible] is even more fascinating [illegible] playwright and the actor [illegible] the stage or screen. Its [illegible] difficulties add to its allur[illegible] subtleties are infinite, and [illegible] is no reason why the writ[illegible] plays for Radio cannot p[illegible] great dramas which will [illegible] their hearers as vividly, [illegible] forcefully, as those visibl[illegible] formances we see.

I KNOW it i[illegible] that until now, but few [illegible] writers and artists of the [illegible] mate stage have taken pa[illegible] study the requirements of [illegible] ically different method o[illegible] trionic expression. Ho[illegible] the work of those pioneer[illegible] are giving their hearts an[illegible] to it, is basically imp[illegible] They are laying the foundations o[illegible] gantic theatre whose influence w[illegible] greater than any ever dreamed of [illegible] foremost actors of previous gener[illegible] And the artists of that theatre *no*[illegible] to a larger audience than the fo[illegible] stars of yesterday appeared befor[illegible] lifetime. They do it in one evenin[illegible] carry the message of their play to p[illegible] forty million pairs of listening ear[illegible] is it any wonder that I find Radio [illegible] ing?

As has been the case with the e[illegible] Radio's greatest performers will pr[illegible] win their laurels in the broadcast [illegible] One day, no doubt, their *voices* w[illegible] more familiar to the listening publi[illegible]

By
HARRY D.
MACKEY
Mayor of
Philadelphia

As Told To
CHARLES D. MACKEY
Radio Editor of the Philadelphia *Record*

WHAT'S that? Am I a Radio mayor? You bet I am. My record proves that.
ie next mayor of Phila- or of any large city be a Radio mayor. He'll of step if he isn't.
e has been no enterprise administration, now in its and final year, that I not taken right into the of the people over the

ave deemed this both a ge and a necessity, for asting has become an in- sable means of publicity lic life. Every important older should go on the air ntly in order to maintain ntact with the people.
olitical campaigns Radio candidates truthful and consistent. the days of broadcasting an aspir- public office could make varying promises in different communities. can't get away with it now, be- all of his constituents are listening contradictory statements will be d up and used against him.
io fascinated me in its early days still does, both as a listener and a caster, but I cannot say that my ppearance before the microphone great success. I'll never forget it. in 1922 I was invited to address a et to a newly appointed Philadel- fficial and was told that my speech be broadcast.
rilled at the thought and when I ome that evening I informed my another great Radio fan—that her to be educated had come at last. e needed to do, I told her, was to n easy chair up before the Radio isten in—to me. I did my best night because I imagined the great audience of millions, as well as ife, would be listening in. When I me I found that no one outside the banquet hall had heard a word I said. There had been an SOS.

Since then I have faced the microphone hundreds of times and the memory of my first "broadcast" often has been with me.

Shortly after my SOS experience I began an extended series of talks on current events and book reviews over WIP (Gimbel Brothers Store, Philadelphia). Later I was a weekly speaker on current topics over WCAU (Universal Broadcasting Company, Philadelphia).

In 1926 I made an extensive Radio tour on behalf of Philadelphia's Sesquicentennial celebration of American Independence. Traveling across Canada to Vancouver, down the Pacific Coast to San Diego and into the middle of the United States, I spoke from all of the important broadcasting centers, inviting the people of this vast area to attend the exposition.

I WAS a Radio speaker for Coolidge and for Hoover and one winter I took a trip through the South with the Philadelphia City Business Club, broadcasting the city's achievements and advantages.

As manager of William S. Vare's Senatorial campaign in 1926 I made Radio speeches from local stations in every part of Pennsylvania. I said then and I still believe that Radio was the greatest single factor in Vare's victory at the polls.

Last fall when Gifford Pinchot, now Republican governor of Pennsylvania, was opposed for election by John M. Hemphill, Demoncrat-Liberal standard bearer, the public mind was very much confused. Cross-currents were in evidence in every direction. The newspapers as well as individuals and groups were adding to the general confusion. I do not believe there has been a time in Pennsylvania politics when greater confusion existed as to issues.

Republicans were for Democrats and Democrats were for Republicans. Newspapers in Philadelphia, founded by Republicans and with Republican traditions of many years behind them, for some reason had torn loose from the old moorings. They presented the astonishing situation of supporting a Democrat for Governor of rock-ribbed Republican Pennsylvania.

Here was Radio's great opportunity. All this misrepresentation had been brought about by deliberate poisoning of the minds of the people. The press was

Quips *from the* Nit Wits

ON THE 32nd of January a letter reached the editorial offices of RADIO DIGEST special delivery air mail with the stamps licked twice and marked "Postmaster please rush." "Dear Editor," it said, "I have been listening to the lovely little Nit Wits on the dear old Columbia chain and I think they are a scream, yes I really do. But my husband and I can't agree. He thought last week's program was the funniest yet and I think this week's was. You know, it made me giggle and shake all over, it really did. I put it up to you. Will you settle the difference of opinion and tell us which was the funniest Brad Browne—Nit Wit program? Hurry up, quick, in the enclosed special delivery air mail envelope."—Signed—Lizzie Plushbutton.

That was an important matter. So the editorial board solemnly convened to settle it. Pandemonium, chaos and confusion resulted. We finally decided to call on the Nit Wits at the studios in a body and ask Mr. Brad Browne, the Supreme Nit Wit of them all and the boss, to settle the controversy and bring harmony to Lizzie Plushbutton and her hubsand. He picked the one which begins with the gas-collector, and Mrs. Plupp. We print it here for Mrs. Plushbutton, her husband and other interested (or disinterested) readers.

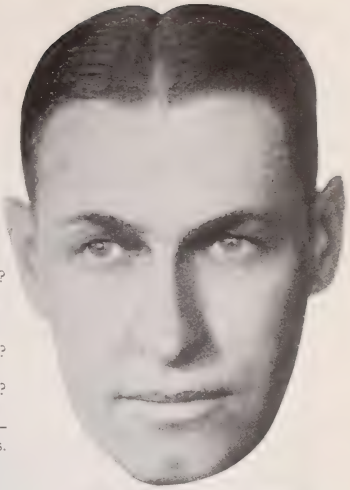
BROWNE: Our college professors are continually breaking out into print to tell us that our conversation is becoming trite, banal, stale, and dozens of other syno — snymo — cinnomons. In other words, the conversation of the American people isn't so hot. Well, there's a way out of that condition. Let's make our conversation mean something. Here is the way the dear little Nit Wits would do it. The gas man calls on Mrs. Plupp and the following conversation ensues.

MUSCLEBOUND: Mrs. Plupp.

MRS. P.: Yes. Oh 'tis you. Don't tell me you're back again. No. No. Anything but that.

MUSCLEBOUND: But my dear M Plupp, you know that orders are d I come not to add to your misery, add to the income of the gas com

MRS. P.: The income of the ga pany! Humph. You know n good man, that the shadow of t haunts me in my dreams. In my hours, and in my in betweens. Y a skulking sinowy thing it swoops upon me in my happier moments, ing nothing but misery and disa ment in its wake.



MUSCLEBOUND: Whose wake. mention the fact that we hoped yo and have a wake. No, no. This caused you to become slightly Mrs. Plupp. We never want any customers to kick off. Never. N

MRS. P.: Never.

MUSCLEBOUND: Well, hardly Come; Mrs. Plupp. All I ask, all is eighty-five cents to balance yo count with the gas company.

MRS. P.: Ah, you treat this

THIS is Serious—Laugh if You Dare! Nit Wits Present Great American Drama of The Ages—"And The Villain Still Pursued Her!"

Chief Nit Wit Brad Browne as he really looks.

…tly. Know you not that you are ask- … for something which I do not possess.

…Well, that goes on a while and whether … really means something or not is a …estion. But then the Nit Wits start a …erent type of conversation, chock-full … real meaning. In fact every word in … has fourteen lines of definition in the …tionary. This time it's Mocha de …lka and Gabriel Horn on deck.

MOCHA: Ah my dear Mr. Beehive, I'm simultaneous to see you.
GABE: And I'm so euphonious to see … too Mrs. Mop.
MOCHA: My, my, and how is your pan-…nonium?
GABE: Very stenographic, Mrs. Mop. …y stenographic.
MOCHA: Oh, I'm so simultaneous.
GABE: And how is your hypocritical …oleum?
MOCHA: Oh, impalpable. Oh, yes in-…d.
GABE: Well, your scrupulosity is O K, … t it?
MOCHA: Impalpable.
GABE: Good bye, Mrs. Mop.
MOCHA: Simultaneous, Mr. Beehive.

…Well, such a conversation really doesn't … an much, but it does get us out of the … into which our American conversation … fallen. Now for another type of con-…sation. There are in this country nu-…rous folks who are very busy and …ile they'd like to carry on a conversa-…n with some dear friend or sweetheart. …e will not permit of much talk. So …ad Browne recommends the monosyl-…ic type of conversation and appoints …ndy MacTavish and charming Patience …mpstead to do the honors.

COP: What?
WAITRESS: Him.
COP: Well?
WAITRESS: Pinch.
COP: Why?
WAITRESS: Broke.
COP: So?
SANDY: Yup.
COP: Come!
SANDY: Where?
COP: Jail.
SANDY: When?
COP: Now!
SANDY: Gosh.
PATIENCE: Mi-ike.
SANDY: Ma-ay.

Chester Miller, Formerly Algernon Ashcart, who deserted the Nit Wits for Chicago.

This could go on indefinitely but what's the use. That would really be a great way to carry on conversations—all in monosyllables—think how easy it would be on the tonsils.

And now comes the grrrand climax, with the great Nitwit parody of Hank Simmons' Showboat. This is a classic which will be preserved in the dead letter files of the nation. It is really authentic, for it's all in the family—Harry Browne, Showboat director, is Brad's brother.

BROWNE: And now ladies and gentlemen, the dear little Nit Wits too have been listening in on the Radio and they are going to give you their version of Rank Persimmons' Slowboat—the Sleighbell. Here we go. Rank Persimmons Slowboat the Sleighbell lies hooked up to the Levy—

NIT WITS: (*Softly*) That's levee.

BROWNE: Oh yes. Lies hooked up to the Washington Monument tonight. She

is gaily decked out in green, blue, pink, red, yellow, orange, violet and flesh colored bunting. The stage hands are making their last minute preparations for the performance while outside Rank Persimmons' concert band is giving the unusual evening concert before the big show starts.

Music and Conversation.

BROWNE: This way, folks to the Rank Persimmons' Comedy Company presenting for the first time on a row boat at unpopular prices that great American drama—*The Villain Still Pursued Her.* This way folks. This way. Unpopular prices of ten dollars, twenty dollars, and thirty dollars.

MUSCLEBOUND: Are you Rank Persimmons?

BROWNE: That's me, gosh durn it. Who be you?

MUSCLEBOUND: I'm the sheriff and you're wanted.

BROWNE: What fer?

MUSCLEBOUND: Fer parking your Slowboat the Sleighbell without no tail light.

BROWNE: No tail light? Why Sheriff, you was lookin' at the wrong end.

MUSCLEBOUND: So I was. My mistake. So long.

BROWNE: Be ye goin' to stay fer the show? Won't cost you nothin'.

MUSCLEBOUND: I'll stay, but I'll pay.

BROWNE: You don't need to.

MUSCLEBOUND: Nobody can say that Sheriff Glucose didn't pay fer his seat.

BROWNE: Suit yerself. Right inside everybody. Right inside.

Music—Orchestra tuning up.

BROWNE: Everybody scrappy?

VOICE: Sure, why not? Ha, ha, ha.

BROWNE: Well, it's just great to see so many of you all tonight, gosh durn it, and I want you all to make the slowboat your home while we're in your city. Tonight, folks, we're goin' to give you, whether you like it or not, that great drama called—it's called—what's the name of that show Musclebound?

MUSCLEBOUND: The *Villain Still Pursued Her.*

BROWNE: Yeah, the Villain still pursued her. Now we ain't got time to tell you who's who in the cast of characters but if you keep your peepers open you'll spot us as we come on the stage. Well, I got to get back stage now and comb the sawdust out of my whiskers so I'll leave you and ring up the curtain on the first act. Oh yes, the first act is laid in the iron foundry of a man named Sterling. This is the mill where they put iron in raisins. Well, you'll see two villains, Blake and Flint hanging around as the curtain goes up. All right, clear the stage.

Blake discovered with his hand in Flint's pocket.)

FLINT: (*Musclebound*) Ha ha ha. See all the pig iron. I wish I had it.

BLAKE: (*Browne*) Don't be a hog Flint. I'll squeal on you if you're not careful.

FLINT: Ha ha ha. Always gagging. So Sterling fired you.

BLAKE: Yes, he fired me. I found out his secret process for taking the squeak out of his pig iron and he fired me. But I had time to engrave a plate for making counterfeit money and here it is.

FLINT: Ha ha ha. You're a good villain Blake, and I like you. Now all we got to do is get the men to strike and then I'll make you the third asisstant pig-pen keeper.

BLAKE: What's that?

FLINT: I mean pig-iron superintendent.

Before and after—just little Georgia Backus with and without her Aphrodite Godiva Make-up.

Now I want you to plant this counterfeit plate in Sterling's mill.

BLAKE: That's easy. I'll plant the plate in the place. But hark—somebody is approaching.

IRISHMAN: (*Musclebound, who takes two parts*): Where does Mr. Sterling live?

BLAKE: Ah, an Italian! Three blocks to the right, three blocks to the left, then three blocks to the right.

BLAKE AND FLINT: AND THEN THREE BLOCKS TO THE LEFT.

IRISHMAN: Thanks.

FLINT: Maybe this Italian here would plant the plate in Sterling's place.

BLAKE: Good. My good man would you plant the plate in Sterling's place?

IRISHMAN: Plant the plate in Sterling's place. Do you mean place the plate in Sterling's plant?

BLAKE: Wait 'till I consult my comrade here. Flint, shall he place the plate in Sterling's plant or plant the plate in Sterling's place?

FLINT: Yes by all means.

BLAKE: Yes by all means.

IRISHMAN: That's what I thought. (*Aside*) Ah, they're gone! I'm really Reggie Riggs disguised with a long b... but in love with Louise, Sterling's o... daughter. And he hates me.

(*Someone approaches.*)

REGGIE RIGGS: My, my, you're v... ing loud, fair Louise.

LOUISE (*Patience*): Who's this ... with long whiskers? Hey come out ... behind the bushes and tell me who ... are. He won't answer me. Say, ... whiskers are trailing in the dirt. C... loan you a hair net?

(*Fire engine sounds.*)

BROWNE: Hey, wait a minute, ... fire engine doesn't come until the se... act. Get out. Please. Go on with ... show.

REGGY: Say listen, Louise, don't ... anybody. But I'm Reggie and I'm in ... with you and I've got false whiskers ... but don't tell anybody.

LOUISE: I won't. G... bye Reggie.

REGGY: Good-... Louise. Here comes t... two villains again. H... villains.

BLAKE: Hush, d... give us away just ... Wait till the last ... Now I know that old ... Sterling doesn't like ... If you'd like revenge ... leave this package in ... mill.

REGGY: Oh, this is ... plate you want me ... plant in the place.

BLAKE: That's ri... Here's the key to the d... and everything.

REGGY: Gosh you ... lains sure know eve... thing don't you.

BLAKE: This will ... Sterling. Curse him. Ha, ha, ha.

FLINT: Go long now, my boy, and ... the planting of the plate, etc. Lis... Blake. Now get the men to strike.

BLAKE: Strike what?

FLINT: Anything, just so long as t... strike. They'll find the counterfeit pl... in Sterling's place and the detective ... arrest him and we'll get the mill and ... fire to it and . . . and . . .

BLAKE: Yeah, ain't we got fun. ... look out, here's Sue Sterling the young ... daughter of the old man. Let's go ... the mill office.

SUE: (*Aphrodite*) Hy, Flint with ... flat feet. Where ye goin'?

FLINT: Into the office.

SUE: No ye ain't. Only over me de... body.

(*Applause*)

SUE: Thanks, whoever done dat. ... you see this hammer? Well, I'm ach... to test it out on your dome. Oh, her... me boy friend Steve. Hy Steve!

STEVE: (*Sandy*) Hoot mon, me o... Susie.

SUSIE: What's you got Steve?

STEVE: A stave.

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

Over in England they have two-hour oadcasts without benefit of station nouncements or any of the other lit- distractions we have here, like ather reports and election returns.

Not so long ago they presented a rlesque on our method of broad-sting and one old lady died of the ock. In the middle of an opera, an-uncer burst in with, "Rioters are llecting in front of the Savoy Hotel." ie old lady's heart began to palpitate. When fifteen minutes later he again .errupted with "They are burning e Savoy Hotel," the poor woman llapsed. American broadcasting was o much for her!

But just suppose our government con-lled the broadcasting stations as the iglish government does! New York uld play Jimmy Walker's song Will u Love Me In December As You Do May all day long, Grauman's Chinese ieatre in Hollywood would be the oadcast centre for the West Coast. eviews would predominate, with stars iking shy (?) speeches into mike.

Boston would dole out recipes for ked beans and codfish cakes . . . nicago would provide the humor with ayor Big Bill Thompson as chief per-mer. Me for the Amurican way.

TROY THIS ON YOUR PIANO!

aitress: Hawaii, gentlemen! You must be Hungary.

ıstomer: Yes, Siam. And we can't Rumania long, either. Venice lunch ready?

aitress: I'll Russia to a table. Will you Havana?

ıstomer: Nome. You can wait on us.

aitress: Good! Japan the menu yet?

ıstomer: Anything at all. But can't Jamaica a little speed?

aitress: I don't know, but Alaska.

ıstomer: Never mind asking! Just put a Cuba sugar in our Java.

aitress: Sweden it yourself! I'm only here to Servia.

ıstomer: Denmark our bill and call the Bosphorus. He'll probably Ken-ya. I don't Bolivia know who I am.

aitress: No! and I don't Caribbean. Youse guys sure Armenia. Samoa your wisecracks, is it? Don't Geno-a customer is always right? What's got India? Do you think this arguing Alps business?

Customer: Canada racket! Spain in the neck.—*Francis Loomey, 66½ Atwater Street, New Haven, Conn.*

JUST A RIB OFF THE OLD ADAM

Radio Scandals, WHN:

Nick Kenny: Do you think Eve is important because she was the first woman?

Arthur Paul: No, she was merely a side issue.—*Jacob S. Polofsky, 426 Broadway, New York, N. Y.*

Recited by Charley Hamp:
Mary had a little dog,
She called him by the name of Tony
One day he went to cross the street
Honk! Honk! Boloney!

—*Charles L. Burwell, Magnolia, Ohio.*

DOCTOR, DOCTOR, GIVE 'EM THE ETHER

Owner of Radio Station: Well, what did the Radio Commission do about our application for a new license?

His manager (joyfully): Oh, they gave us the air—*Adrian Anderson, 1903 14th Ave., N., Birmingham, Ala.*

HE HAD SPRINGFIELD FEVER

Here's a whisper Indi heard.

It seems Michael Bataeff, of the Russian Cathedral Quartet was taking part in *Microphobia*, NBC's vaudeville burlesque of studio life.

The production went on tour, winding up at Springfield, Mass., but Bataeff sent a substitute for the Friday night performance, as he was busy in New York. Substitute left Springfield Friday, Bataeff was to appear for the Saturday night performance. By curtain time he wasn't there. Frantic phone calls to New York brought the response that Bataeff had left for Springfield. But he didn't arrive, and the Russian Quartet had to sing as the "Russian Trio".

Back in New York next day the director, Nicholas Vasilieff received a telegram asking, "Where in blazes is your show?" The wire was from Springfield, Ohio.

Cash for Humor!

IT WILL pay you to keep your ears open and your funny bone oiled for action. Radio Digest will pay $5.00 for the first selected humorous incident heard on a broadcast program, $3.00 for second preferred amusing incident and $1.00 for each amusing incident accepted and printed.

It may be something planned as part of the Radio entertainment, or it may be one of those little accidents that pop up in the best regulated stations. Write on one side of the paper only, put name and address on each sheet, and send your contribution to Indi-Gest, Radio Digest.

THE FARMYARD RADIO

Old Farmer Mike, adown the pike,
Gets all the help he needs
To plant his hops and reap his crops
And decimate his weeds.
He has a Radio in his barn,
To fill his cows with pep;
He has loudspeakers on each plow
To keep the teams in step.

They fox-trot up and down the fields—
They bolted one day, though,
When that loudspeaker started with:
"A-hunting we will go!"
He put one in the henhouse, too.
The rooster near went crazy;
But since that day, you cannot say
One biddy has been lazy.

His steers come home from where they roam,
To hear the news each day.
And horses, cattle, pigs and hens
To bed all gladly go
When they hear the bedtime story
On the farmyard Radio.

—*Alfred I. Tooke, 200 Dewey Avenue, Honolulu, Hawaii.*

WOODEN IT GET YOUR GOAT?

Radio star to announcer:

"Say, I saw the awfullest thing happen the other day! Mr. Stone and Mr. Wood were standing on the corner, talking, when a cute-looking girl passed by, and what do you think happened?

"Stone turned to Wood, Wood turned to Stone, they both turned to rubber, and the girl turned into a drug store!"—*Mrs. O. M. Sergeant, R. R. 5, Rosedale, Kans.*

HERE'S A GOOD GAG

"Some burglars got into my store yesterday, tied me to a chair, and then gagged me."

"Then what did you do?"

"Why I sat around all night and chewed the rag!"—*Mollie Zacharias, 3106 Park Ave., Kansas City, Mo.*

The next one is reminiscent of the oft-reported mike slip, "The next one will be the song Never Swat A Fly On A Phonograph Record"—it might crack!

Dutch Masters:

"Do you think the Radio will ever replace the newspaper as an advertising medium?"

"No! You can't swat a fly with a Radio—*Florence Haist, Box 157, Lindewold, N. J.*

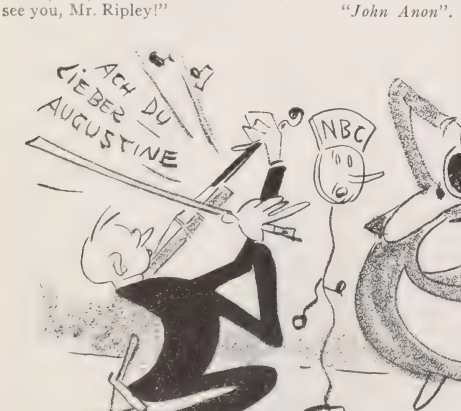
BELIEVE IT OR NOT

One on Believe-it-or-not (Robert L.) Ripley. A Brooklyn fan wrote asking permission to see him broadcast, and ended the letter this way, "My wife and myself have always been interested in unusual things. We haven't missed a circus in the last thirty years. We have a peculiar fascination for curiosities, freaks, etc., and how we should like to see you, Mr. Ripley!"

SINCE SYLVIA SANG!

O'er Radio station "C-O-D",
There came a vespering voice to me,
Hymning of love, in tones of bliss;
Emphasizing a lover's kiss;
Describing a sylvan trysting-place;
Accentuating love's fond embrace . . .
Lonely and "blue", I brooded there,
As Sylvia's singing cleft the air.

Then in a throbbing, tragic tone,
She sang a song of a lover flown;
How she'd won—but to cruelly lose;
Left alone with the low-down blues;
Heart bereft—ah, the ache; the pain!—
Sylvia sobbed the sad refrain
Over the ether-waves to me—
Radio station "C-O-D".



Sadly her notes ceased to intone
Over the magic microphone;
"If you're troubled", she cooed, "with ills;
Bilious and blue—take Piker's Pills" . . .
Swift I sped to the drug-store close,
Bought a bottle, and downed a dose.
The low-down blues have deserted me—
Since Sylvia sang o'er "C-O-D."
—*James Edward Hungerford 631 So. Bonnie Brae, Los Angeles, California.*

CUTTING REMARKS

Something For Everyone (CBS): A girl met an old flame and decided to high-hat him.

"Sorry," she murmured, when the hostess introduced him to her, "I DIDN'T GET YOUR NAME."

"I know you didn't," he replied, but that isn't your fault. YOU TRIED HARD ENOUGH!"—*Reported by "John Anon".*

HOW ABOUT THE SOCKS?

Charlie Hamp:—"Shoes are usu... thrown at bridal parties, but they h... to furnish their own spats."—*Fra... Cherry, 605 Logan St., Wayne, Neb.*

BATTLIN' JACK THE KNAVE

Weiner Minstrels, WENR:—

Gene: Buddy, is your wife lister... in to-night?

Buddy: Naw, she's out with a bu... of prizefighters.

Gene: Prizefighters?

Buddy: Yea, she went to a bri... party.—*Sue Dickerson, 329 Clifton A... Lexington, Ky.*

She: There's quite a difference betw... a janitor and a superintendent, is... there?

GOSSIP SHOP

Here's one Martha Atwood, NBC soprano, tells on herself. I was just eleven years old when she made her first public appearance in her home town of Wellfleet.

Wellfleet," says Martha, "is a small town on Cape Cod, and town strawberry festival in June was one big event. I was the program for a song called "*Who'll Buy My Strawberries?*" and carried a box of strawberries orated with fancy crepe paper and ribbons.

When the time came for me to sing I suddenly ame panic-stricken. It seemed so silly. Me, a (?) girl, holding a box of strawberries and prepar- to sing a song about them! I became so self- scious that I decided not to sing at all and ted to run away. But mother had different ideas.

She caught me by the arm and gave me a severe nking while everybody looked on. I was then sted up on the platform and made to sing. But I r the effort wasn't so good, for I sobbed "*Who'll y My Strawberries?*" instead of singing it. I didn't ke a very convincing salesman!"

That cured Martha of all kinds of audience-fright, luding mikitis. Even at her very first try at the e she thought of "Mamma spank" and suc- ded.

VASS IS DAS?

Here is a bona fide letter, received RADIO DIGEST:—

O WHOM IT MAY CONCERN:—

Am a steady listener on the Lit- rary Digest every evening at 6.45 .M. Heard your announcer say hat anyone writing in to the Liter- ry Digest would receive a RADIO NNOUNCER.

Trusting to hear from you, and hanking you very kindly, I am,— *Mrs. F., New York.*"

Oh lady, lady, you must have us ked up with a matrimonial agency. yway, take our word for it—Radio nouncers don't make good husbands.

"Listen, Brother Brokenshire, I've a unterfeit quarter and I can't get rid it."

Brokenshire: "Don't you ever go to urch?"—*From the Mirthquakers, NBC—reported and illustrated (sight unseen) Frank J. Slama, Havre, Mont.*

2 x 4 = ATE

The Interwoven Pair:—

nie: Do you know they call the new baby in our house 2 by 4?

ll: Why?

nie: Well, she feeds him at 2 and by 4 he's hungry—*Frances Cherry, 605 Logan St., Wayne, Neb.*

RAISING THE ANTE

From KNX, Hollywood:

She: "I'll bet I'll marry you."

He: "I'll bet you five dollars you don't!"

She: "I'll raise you ten!"

It's Just An

Old Panish Custom

"Master Without Ceremonies" Roas
'Em Alive, Puns, makes Gags, bu
Says "Its All In Fun"

By Robert Taplinger

"GRANDMA laughed when I was born, and so did the company in the parlor. They snickered when I addressed them in Scandinavian. As I had never played an instrument before in my life the nurses were amazed when I picked up the stethoscope. I rendered *My Heart Stood Still*, and because the beat was inaudible it was enjoyed by all—that is, until I showed a spark of life. My conflagrant personality caused my guests to burn up."

The speaker is John J. Medbury, who recently affixed his X to a contract that calls for his officiating as "Master Without Ceremonies" for the California Melodies. This program is broadcast over the nation-wide Columbia network from Station KHJ, Los Angeles, every Friday night.

This nifty play-by-play description of his advent into the world at Utica, New York, in 1894 is typical of Medbury, who refuses to take life seriously. He is the only chiropractor in the country who works exclusively on funny bones. He cures all his patients' ills without their suffering chills upon receipt of his bills.

Medbury's early training all began in California or, as he terms it, "Out Where the Jest Begrins". This phase of his career preceded that much-heeded cry, "California, Here I Come", by approximately eight summers. In addition to writing for syndicates and magazines, he has written acts for such vaudeville headliners as Willie and Eugene Howard, Savoy and Brennan (now Brennan and Rogers), Yorke and King, Phil Baker and countless others. He has contributed the comedy dialogue, black-outs and skits for many Broadway revues, including the Greenwich Village Follies and George White's Scandals.

HE FABRICATED the comedy dialogue for a number of pictures, the most recent of which are *Reducing*, starring the team of Marie Dressler and Polly Moran, and *Parlor, Bedroom and Bath*, with Buster Keaton and Charlotte Greenwood.

John P. Medbury writes and Radi- everything from the midget who ha face lifted to read Dr. Eliot's Five- Book Shelf, to the absent-minded who forgot to shoot her husband. he is addicted to puns. He admits are the lowest form of humor, but n theless "a form of humor". He'll i duce the California Melodies progra a most irrelevant manner. Like sample:—

"Good evening, ladies and gentler says Medbury, "I just blew in from cago. There will be a slight pause while they purify the air.

"It's quite breezy tonight, and wearing these ear-muffs to keep the from whistling through the wide spaces.

"I hope you'll excuse me if I sou little upset this evening, but my wife I had a quarrel—and just as I was ing the house, she hit me over the with a 'Bless Our Happy Home' sign.

"You'll notice that my leg is all ch up, but don't pay any attention to was giving a farewell dinner to the at my door.

"And now, folks, for some music— Bradford is going to sing, *To Ma Long Story Short*.

"Bob is one of the most influe men in California—He was a dollar a man during the war—and is now the government for fifty cents over-

n the sharp-edged missiles of wit Med-
y lets loose every so often. But the members of the ensemble have grown tough, rhino hides from bouncing off shafts like this:

"That was a song from the Three Cheers. folks—One of the finest trios in the country—the boys were on the verge of splitting up this week and turning it into a duet—they figured they could cut down their overhead by eliminating the middle-man."

(*Meow!—Meow!—Meow!*)

"I'm awfully sorry—That duck of mine follows me everywhere.

"It's not really a duck—it's a homing pigeon—but we move so often it doesn't know where it lives."

(*Meow!—Meow!—Meow!*)

"I'm wrong folks—that's not a pigeon —it's a cat—it's my mistake—I'm color blind.

"My eyes are getting very bad lately— I guess I'll have to see an optimist.

"The reason I brought the cat up here tonight is that I wanted to use the PAWS for station announcements." He pauses.

His existence is a maze of wisecracks, gags, and laughs. He heaps tribute after tribute at the altar of Mirth. And he finds no difficulty in luring Hollywood's famous screen folk to the microphone as guest artists with California Melodies. They enjoy participating in the same program with him, and attempts to suppress their laughter in the studio usually proves futile. Here's what happened when he introduced June Collyer, the Paramount Picture star. Said John P.:

"June's mother and father are listening tonight back East and I'd have her broadcast them a kiss, but after her fans in the Middle West got through tuning in on it, there wouldn't be much left by the time it reached New York.

"Would you step up to the microphone, Miss Collyer?—You don't mind my calling you Miss Collyer. do you, June?"

Whereupon this dialogue ensued:

(*Continued on page 107*)

"Isn't it the custom," asks Miss June Collyer, Paramount star, of J. P. Medbury, "for the critic to interview the star?"

Broadcasting from

Mr. Orton Takes a Dig

NOW we know what is the matter with broadcasting in this country. We are lowbrow. We are thirteen-year olds. Our Radio heritage has been sold for a mess of pottage. The only thing left for us to do is turn the whole works over to the politicians in Washington and let them start us off again on the right foot. We should operate as the British do on the Tight Little Isle.

At least so we are informed by Mr. William Orton in a recent issue of the *Atlantic Monthly*. Mr. Orton knows whereof he speaks because he comes from England where he gets the kind of programs he likes. He has just about given us all up as impossible. In fact he almost gets mad in the course of his denunciation as it appears in our venerable and respected contemporary.

Anyway Mr. Orton, being scholarly minded, chanced across a careless phrase published under the sanction of the Federal Bureau of Education. The phrase appeared on an instruction page and said: "Write out your exact wording. Begin with one or more striking statements. Present your specialty on the level of thirteen-year-olds. Do not overrate the intelligence of your listeners." This was enough for Mr. Orton. He couldn't get a piece of writing paper quickly enough. He chose the subject, *The Level of Thirteen-Year-Olds*. And the next thing that happened, bingo, it was in the *Atlantic Monthly*, America's old aristocrat of the periodicals!

And now we are getting the hard bitter facts. Enlarging on his subject Mr. Orton says: "The conception of the public that necessarily arises from the commercialization of broadcasting is that of the mass; and this conception, so long as it is dominant, is utterly fatal to cultural advance."

In plain words Mr. Orton insists that the majority always is wrong. Broadcasting, therefore, should be considered primarily for the lesser number rather than the greater number of listeners. There can be no mistake about that view because he says a little further on "the redemption of the mass cannot come except from the minorities." That may be an axiom from Mr. Orton's point of view but it could scarcely be reconciled with the rock bottom principles of this republican form of government where the majority rules. And this condition applies not only to government but to all our social organizations from political parties to bridge clubs.

But the principles involved are not all that distract Mr. Orton. The faster he writes the hotter he gets and we come across this sentiment: "It is not that programmes are bad . . . The trouble arises on grounds much more fundamental than that; it springs directly from the commercialization of broadcasting itself, and the consequences which flow there

"The wholesale exploitation of sound in the various p sions of money getting is a far worse thing than the desec of the countryside by billboards. It is at once more int and degrading. The unctuous bleating of the high prie salesmanship would be ethically less intolerable were it own wares they were crying. The fact that their voices their machinery, are for hire renders it a form of prosti essentially akin to its older prototype."

And so far, far into the night mumbles Mr. Orton, stopping to think that perhaps after all it may be no mo a sin to sell the product of one's larynx than the steam exploding brain cell in a column of type for a magazine o able at the corner news stand for forty cents.

The whole upshot of Mr. Orton's blast seems to be de from the fact that a group of educators rather tactlessly dled into a situation at Washington where, instead of a rece committee waiting with open arms to hand them 15 per c all broadcasting time, they found a rather stern and headed group of business men who were ready to play ba insisted on playing according to rules of the game as app by the crowds in the bleachers and the grand stand. N two years ago RADIO DIGEST printed a statement by a repr tative of the National Broadcasting Company to the effect education was the greatest thing about Radio at that time. that time, and before, some of the best minds in the U States have been engaged on the problem of how to education" to the listener. The conclusion has been that "s manship" was necessary. The group of educators who to Washington to see what could be done about it res suggestions from those who had been making Radio a bus and a profession in a big way for years. They partic deplored a statement by one of the vice presidents of the who was quoted as saying, "Every person entrusted with ing by Radio should be required to pass an examination o ability as a showman. When education joins hands Radio it enters the show business." And Mr. Orton

"Here, at any rate, is one of the reasons for the sorry of Radio education in America, as revealed in recent repor a committee appointed (ten years too late) by the Secr of the Interior and an investigation by the American Ass tion for Adult Education. The kind of education that ca made to conform with the conceptions of Messrs. Sarnoff Ellwood is not the sort of thing in which the best minds o country can be deeply interested." There seems little likeli just now that an Educational Bureau of Broadcasting wi created in Washington to function along precise acad classroom lines. Nor is it at all probable that Mr. Orton see the time when the United States will go into the broad ing business for set owners at $2 per year per set. We like the idea of competition for program interest—even are only on the level of thirteen-year-olds.

he Editor's Chair

r the dio Pulpit

E ARE asked by the pastor of a Methodist church in a Texas city to make suggestions for a half-hour religious service on the air. What a marvelous opunity to do a great deal of good! To do the right thing in right way is the problem that confronts our friend—and a problem. Perhaps RADIO DIGEST readers would like to e suggestions and let us pass them on to him.

spite of the widespread cynicism which the sophisticate ows to display, we are, deep-down, a religious people. Our ntry was founded by spiritually minded men and women lived and worked in close touch with an Omnipotent g conceived and believed to be the very essence of perfec-

The blood and carnage of wars have not obliterated that ciousness. Misguided and sometimes astray, we have, in main, kept the faith of the fathers.

eligious services on the air are well received. They are to the comfort of many of the aged and invalid who other- are unable to attend regular religious services at the ches. In some rural communities daily morning devos are directed from broadcasting stations and are largely owed.

Our pastor friend asks for ideas to be incorporated in his on that will make his half-hour "different and effective" not "flat, as some religious broadcasts seem to be." What means, but did not say, is "how can I exercise what broaders call 'showmanship' without being undignified? I must ire and hold my Radio audience, but must I resort to ices that are cheap or unworthy?"

incerity is the greatest asset of any preacher or moral leader. have no patience for tricks or tawdriness in such matters. listener must feel the beating heart back of the voice—the nistakable tone of honest feeling. The pastor who would eed with a Radio audience must first have a clear concep- of his message and then present it with the very utmost ing of sincerity.

A generation or two ago our fathers, or grandparents, were l convinced that the Devil was a real personality. Nowas we don't hear much about him. But the same old sins in disguises are still here. They beset us at every turn. Some them have been disarmed of their deadliness but others are as bad. The pastor who would lead a 1931 Radio flock uld do well to spot these modern wolves and shout a note warning. The sheep's clothing today may be a magistrate's e or a policeman's uniform or it may be just a metaphorical ering like a shady business deal, condoning of a vice, a king at the polls.

There should be singing in this half-hour on God's air. Singing is an expression of the spirit within us whether the music be secular or popular. Prayer we would not recommend to a general Radio audience, unless it is a pause for a moment of silent prayer by the individual listener. Pulpit prayers, even under the most favorable circumstances, too often sound stagey. Prayer is for one's own communion in the secret of his chamber or under great emotional stress.

The message, we believe, should constitute the main part of this religious program. The success of the message, of course, would depend primarily on the conception and ability of the person who presented it. A real ringing message will cause the whole world to listen.

Broadcasters on Their Guard

YOUR Radio entertainment is in the hands of your broadcasters. What affects them affects you. Therefore both the broadcaster and the listener have common interests. In order to maintain a high order of service leading broadcasters have united into an organization called the National Association of Broadcasters. The activities of the association seem to be growing. The headquarters have been moved from New York to Washington, where a watchful eye is kept on proposed legislation.

Someone in one of the Southern states read that in some countries set owners paid a tax on their receivers. What a grand scheme to procure a little extra revenue! Automobiles are taxed three or four times through state, county, city and gasoline; why not tax Radio receivers? The broadcasters complained that their business would be affected by such a tax. It was found that a broadcaster's business is interstate. Just all the legal technicalities that were involved we do not pretend to know, but in a general way we understand that the courts decided it would be unfair discrimination to tax the citizens of one state for the identical service that was distributed tax-free in the surrounding states. So the scheme failed.

As we write, the association is concerned with legislation in Washington affecting a form of copyright racketeering. Are hotels to be "lawed" out of giving Radio service to their guests in their rooms? Some fine points are under discussion. Is a Radio program literally a "public entertainment"? Is it analogous to entertainment provided from a phonograph record, and therefore governed by the same laws? Every broadcaster should belong to the association for the good of all concerned.

RADIOGRAPH

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

IDEA! Crack the whip, Don Clark. Get an idea!

It is the planning room of Columbia's continuity department. Around the table sit Don Clark's staff of nine. From the commercial department has come the word that a big motor company wants to go on the air, wants a program submitted.

They get their heads together, do Don Clark's staff. Here an idea, and there an idea, until finally one is evolved that is suitable. Don Clark, as head of the department, then assigns it to be written up by the one who is most apt for the particular kind of program wanted. For his is a staff of specialists. One is good at atmospheric stuff. One is a master of the wisecrack. One has a musical background and can do symphonic continuity. And so on.

When the script is completed, an audition is given for the company, perhaps several auditions. An audition, in lay terms, is simply a broadcast which does not go outside the studio. Yet the listeners hear it exactly as it will go on the air.

Don Clark

"It is dangerous to let scripts be read," said Mr. Clark as we sat talking in his little office high up in the Columbia Building. "Things written for the ear should be presented to the ear. Can you imagine a magazine editor accepting a story from hearing it read? No, he wants to see it, wants it presented to his eye, as it will be to his readers. The most excellent of Radio scripts might have no appeal if it were read instead of heard."

"That is a thing many people forget in writing for the Radio, too, that there is only the ear. Action cannot be explained by business as on the stage. So different is the technique that once acquired it gets to be a habit. Right now I am working on a play, and find that I put in too much talking, leave too little for stage business."

I noticed the stack of manuscripts upon his desk.

"Do many people send in Radio scripts by mail?" I asked.

"Quite a few, but not one in hundreds is acceptable. Although once I did receive a script that was so good that it eventually led to my taking the author of it on my staff."

Mr. Clark has a finger in all of Columbia's Radio pies, for he edits or writes all of the CBS continuity. Some of the programs for which he is personally responsible are the Robert Burns Panatella, the Story in Song, Majestic's Old Curiosity Shop, Night Club Romances, and the Necco Candy Party.

He has a good background for the kind of work he is doing, a background of newspaper reporting, Radio editing, acting on the air. He refuses to take his job seriously. He says he works better when he doesn't.

"I used to worry about it," he said, "and gave myself a nervous breakdown. That was back in the days when I was an announcer, and announcers were supposed to do a lot of other things than just announce—act, write programs, see that the performers got there on time, substitute wherever they were needed at all t

"I remember once I had to fill a tw five minute gap in a program. The gr was covered with three feet of snow the performers had decided to sta

Mary Hopple

I always kept a ukulele handy and pl that till I thought my listeners had enough. Then I told them to stanc for a minute, dashed out to our lib collected a couple of speeches, and da back. When I started to read them I I had one on how to raise children. another on spring gardening. I d mind talking about raising children. children aren't seasonal, but I did foolish talking about spring flowers the snow on the ground."

Despite the fact that Don Clark he doesn't take his work seriously known around the studio that he put if not prevented, about seventeen h of work a day. And he also has the h faculty of making others want to wor

He is tall, slim, and good-looking, is known as the "Ronald Colman" of air. They say he is just as fascinatin a villain as in the rôle of a hero.

ENTLEMEN prefer blondes," and
T that makes you think, of course,
hat other wisecrack, "But they marry
ettes."
onder if that's the reason Mary
ple gets furious if you call her a
de. For Mary Hopple, featured artist
he Armstrong-Quaker program, and
of NBC's most popular contraltos,
ves in matrimony. She thinks no life
plete without a husband, home, and
lren.
And some day," said Mary, "I'm go-
o have them all. Although just now
ven't time for anything but singing."
e isn't a blonde. It's because her
are such a dark velvety brown that
hair seems light by contrast.
Will you give up your career when
marry?" I asked.
ndeed not. I'll swing them both. Any
can with a little organization. I'll
for my supper, not cook it. I mean
sing to pay a cook to cook it. Al-
gh I love to cook. I have the world's
st kitchen."
A kitchen," I said enviously, "you
n a whole kitchen, not one of these
York arrangements, a kitch-o-bath,
re you stand in the tub to fry the
?"
A real kitchen," she laughed, "and I
e all sorts of gadgets in it, a special
cie cutter, and a mayonnaise mixer,
an orange squeezer. I'm always buy-
knicknacks at the ten cent stores.
it's in green. I have green linoleum
the floor—Armstrong-Quaker, for I
to be loyal—and I have green oil
on the shelves, and green pots and
ls. And I'll tell you something else
ve in my apartment. I have thirty
."
Thirty dogs!" I gasped.
Oh, they're china ones. Someday I'm going to have some real ones, but just now I'm collecting the kind that doesn't take up so much room. At home—that's Lebanon, Pennsylvania—I have a great big Collie. He likes me to sing to him and I do."

Others besides the Collie think Mary's voice is swell. For three years she has been with NBC and has sung on more programs than she can remember. Right now she is with the Armstrong-Quaker hour, and has been featured in Enna Jettick Melodies, on the Chase and Sanborn hour, in the Victor Herbert Opera series, and in Philco Theatre Memories.

There is a belief current that pull is necessary to get before a microphone. Mary Hopple has proved this isn't so, for she was utterly unknown when she walked into NBC and asked for an audition. She sang and they liked her. It was as simple as that. A few days later she was in a program.

She has been singing ever since she was a child. It happened once that Schumann-Heink came to Lebanon. Mary's friends wanted the great contralto to hear their own little song bird. After Schumann-Heink's concert Mary went back stage to sing for her.

"My child," said Madame Schumann-Heink, "you have a good voice. Study hard. Some day you will sing for everybody."

And it so happened that a few months ago when Schumann-Heink was appearing as a guest artist on a program, Mary Hopple was there as one of the supporting voices. Madame Schumann-Heink recognized her and said, "Ah, my child, I see that you have been studying hard."

Marie Gerard

WHAT a lucky break. Because Marie Gerard, Columbia's well-loved soprano, has a flair for antiques. And when I was invited up to her beautiful Seventy-fifth Street apartment, didn't I walk right up to her prize possession, an old open sideboard, called an *étagère* and admire it, and didn't I notice the Wedgwood pitcher, and sit down reverently in the Windsor chairs. For I don't always notice furnishings, but Miss Gerard's were so lovely.

Miss Gerard, or Mrs. Charles Touchette. Four months married and ecstatically so. Husband was there, and he is one of the Ebony Twins, you know, that two piano team at Columbia, of which Adolphe Opfinger, Miss Gerard's brother, is the other—Gerard being her Radio name . . . That sentence is getting involved. Let's begin again. As I said, husband was there, wearing a gorgeous gold-colored lounging robe over his suit, a present from wife. Wife, wearing a cute little apron over her henna colored satin dress, went into the kitchen to make some of the most scrumptious caviar sandwiches I ever put in my mouth. (I ate eleven.)

While she was fixing them, husband told me what a wonderful cook she was. "You just ought to eat her fried chicken," he said. And when she came in bringing the tea she told me what a wonderful carpenter he was. "Come see the shelves he built," she said.

And so I must see the living room closet and note how cleverly the shelves were built to hold their stacks and stacks of music. Since both are musicians they need a great deal of space.

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

WMCA is certainly coming into its own, but of course, if you knew those behind the micro-scene, it would be easy to understand. There is Donald Flamm the owner, with his very able feature writer, Muriel Allen. Patricia H. of North Arlington writes: "Have been tuning in on WPCH (WMCA's sister station) to hear the haunting lyric soprano, Marie Kelley. Does she look as beautiful as her voice sounds?" Judge for yourself, Patsy.

She is but twenty-three but has crowded in a big bunch of experiences during those years. At twenty she sang for an entire season at the Club Lido in Paris, and before that she worked in stock companies. And should anyone ask, Marie has over 300 songs in her repertory, one for each day of the year, leaving out Sundays.

Marie Kelley

RADIO DIGEST has broadcasting "artists" on its very own editorial staff, my dears, in the person of Mr. Brown, our Managing Editor, who writes coming and going, here and there, and variously herein, sometimes using the nom de plume of—no, guess he doesn't want me to tell you; and our Radio columnist Mr. Tighe, Associate Editor. Perhaps you heard Mr. Brown talk on the Five Arts program conducted by Ida Bailey Allen over CBS, Thursday morning, January 15th. If you did, you got some startling glimpses into Radio's future. Our M. E. pointed out that although we have long heard that "television is just around the corner," television has actually turned many, many corners since it first dawned in the minds of men. It may interest you, my dears, that Mr. Brown spoiled a very wonderful plan I had to get his picture for this page.

Ernest Naftzger

Our other "artist," Mr. Tighe, promises to out-popularize Floyd Gibbons, judging from the abundance of fan mail which is brought in every day by an extra staff of ushers. There is even a slight resemblance, if you will look closely. Yes, I know the patch isn't there, but even Floyd Gibbons' twin brother, if he has such a reminder of himself, would not necessarily have to affect the patch. The guest artist on Mr. Tighe's program which is broadcast, by the way, every Tuesday afternoon at 4:30 over WMCA, New York, was Frank Hornaday, well-known tenor. Peggy Hull, famous writer on astrology and war now appears regularly on the R. D. programs. As every one knows, Peggy has the honor of being the only girl war correspondent. And you may have heard the beautiful things Floyd Gibbons broadcast about Peggy. Mr. Tighe presents a gossipy line of chatter about Radio notables each week.

Frank Hornaday

Charles R. Tighe

IT'S not everyone that can carry a letter around in his pocket as the one received by Bob Hall from Mr. Patrick J. Kelly, chief of announcers up at the N. Y. NBC. "Sorry I am unable to persuade you to reconsider your decision to leave our organization," writes Mr. Kelley, and goes on to say that Mr. Hall has done some splendid work as announcer at the NBC, has an outstanding personality and a fine spirit of cooperation. Mr. and Mrs. Hall—listeners will remember Mrs. Hall as Aunt Sammy who gave recipes and talked over KOIL, Council Bluffs—are

Harold Sparks

Monte Meyers

Radio veterans, so to speak. Between the two of them they can practically serve as an entire studio staff for any ordinary broadcasting station, for their capacities are unlimited. Mr. Hall is an announcer, singer, reader and character delineator, and Mrs. Hall is an organist, pianist, composer and reader. Wanted—a station in need of these combined assets. Mrs. Hall has wearied of New York idleness and there was no spot for their teamwork on the NBC schedule.

Paragraphs follow the sequence of photos as they appear from page 64. —Editor.

MRS. CORA BENNETT of Carlisle, Ark., and Paul Simms have both been waiting patiently for a little something about Campbell Arnoux, general manager and chief announcer of KTHS, Hot Springs, Ark. Mr. Arnoux was born in New York—well, I'm sorry I haven't his birth date—but he was born in New York—and that's saying something because most New Yorkers were born somewhere else. He's an old timer in Radio —been in it since 1922 when WEAF first opened a station. Had not settled long in Hot Springs before he married Natalie Brigham who played the first selection broadcast over KTHS, according to

Leo Bates and William Rockwell

Constance Peters, secretary of that station. They have two children, Suzanne of four mild summers and Patrick of three blowy autumns.

INTRODUCING George F. Beck, Jr., of WRVA, Richmond, to the whole population of Richmond and especially to Mrs. Hazelwood S., who writes, "I think it's about time we got something nice about artists and announcers from our local station WRVA. Won't you do this for me, Marcella?" Let's begin with Mr. Beck who I should say is a very vital part of the station. Just listen—he is announcer, saxophonist, director of a large dance orchetra, vocalist and, still going strong, he proceeds with a juvenile lead in various dramatic features. WGR, Buffalo, claims his first broadcast—it was when that station was still in its swaddling clothes—from there to WIOD in the city, where summer makes its refuge when winter enters on the Northern scene — Miami Beach. The full photograph which Marcella received showed Mr. Beck, Jr., with a cigarette in his hand most likely rolled with Edgeworth Tobacco for the makers of this glorified weed are the owners of WRVA.

"Know Your Songs"

Peanut Vendor

Now on Nation Wide Tour With His Orchestra, Rudy Sends His Selection of Ten Song "Hits" of the Month Post Haste to RADIO DIGEST, *And Comments on Unholy Uses of Grapefruit*

NOT since the *Stein Song* has there been so much comment or so much playing over the air of a song as there has since Cuba sent us *El Manisero,* or *The Peanut Vendor.* Although it is new to the U. S., especially to the Northern New England states where it is enjoying its greatest vogue, it is old stuff to Havana, Cuba, where it has been played continuously for the past two years.

Emil Coleman, whose orchestra is a most unusual combination of instruments, has always been identified with the Montmartre, one of New York's most swanky supper clubs, and is usually found at smart society affairs, such as a brilliant function in the home of Mrs. William Randolph Hearst, and in fact any elite gathering of Manhattan's society; this same Coleman has been playing the *Peanut Vendor* for years. He and his brother have been alternating between Havana and the United States for years, playing there for certain seasons, and in New York the rest of the year. Naturally the "rumba," the "danson," all dances, or "tipicas," that the Cubans love and know, have been well-grounded into his repertoire.

Few orchestras play the Argentine Tango as well as Coleman; these tangos he also learned from Cuba. Yet, strangely enough, it was not Emil Coleman who introduced the *Peanut Vendor* to the world at large. Possibly he may have been the cause of its initial start, but it was really Major Bowes, in his Capitol Hour, with Yascha Bunchuk directing the orchestra, who was responsible for the outburst of the *Peanut Vendor* which sent it on its way to undying fame.

The "Orquesta Tipica" of Havana, Cuba, with Don Aspiazu directing, through their Victor record, probably also did a great deal towards introducing the composition. Their record is second to our own record of *You're Driving Me Crazy* in Victor sales. This same orchestra has been featured in Keith vaudeville houses all around New York. It was my pleasure at one affair to witness the rendition of *The Peanut Vendor.*

It is another one of those compositions that must be heard in order to be appreciated. No kind of verbal description can give you an idea of it, except that it is basically a rhythmic composition with all the instruments in the rhythm section contributing nothing but rhythm—the same rhythm over and over again.

By this time you have heard over the air the odd Cuban Instruments which produce an effect not unlike that of the rattles that babies are given to play with. In fact, the shakers that the drummer uses look very much like babies' rattles, and it is seed inside them that causes the sound. Any other member of the orchestra may do nothing but sit and scrape a metal file-like instrument over the rough grooves of a long gourd which gives a sound, much louder than, but akin to, the grating of nutmeg. Still another member of the orchestra may do nothing but hit two pieces of a heavy type of wood, a piece of wood that looks like black mahogany, which gives forth a single note sound, one that seems to blend with all others. All of these typical instruments go at full blast, monotonously pounding out the rumba rhythm, while either the trumpet or voice, or maybe the trumpet, voice and violin synchronize in the melody of the song itself. The Victor record will give a very good idea of the song itself.

The singer on the record has one of the most charming voices I have ever heard; in fact, I was very much flattered to find him billed as the "Rudy Vallee of Cuba", although he sings without a megaphone.

The song tells the story of the old peanut vendor who seeks to sell at least a few handfuls of the peanuts to the housewife before she closes her house today.

It so happened that for a time I was unable to give the position due consideration b presenting it. Finally, hov after securing the orchestr and rehearsing it with the or tra, I felt that we would be fied in playing it over the a was then puzzled as to whet sing it in English or in Spanish. T had the desire to sing the Spanish due to the fact that I majored in Sp at Yale, with the intention of goi South America to seek my fortune. ish is taught at Yale more efficiently, haps, than any other course, and a deal of care and time is given to it b department; after taking the un amount of hours in Spanish that during the four years I majored in still find that it serves me in very stead. I decided that my first renc of it should be in Spanish. Days la was very pleased to receive a letter the Consulate's office in Cuba co menting us on our rendition of it, and ing me, furthermore, that the av American band was presenting it i rectly. I had been told that most A ican bands began the composition the sound of the little whistle whic Americans have come to associate our peanut stands. In fact, severa my American Radio fans had criti my rendition of it as lacking the pe whistle. My Cuban informant gave graphic description of the peanut ve and pointed out that our rendition the truest picture of him, inasmuch had no whistle, but simply has a charcoal fire in the bottom of his por peanut stand which he carries with and which keeps his peanuts roasted. also informed us that our rendition the most delightful he has listened to.

This gave me a great deal of plea and I was even more pleased when Saturday evening at the Villa I was to pay tribute to Major Bowes and Ya Bunchuk as we played the composi both of them being at the Villa as guests; and then later to introduce M Bowes, who took the microphone spoke for a few minutes. Saturday ni our Villa program reaches Cuba o

wave, and I am told that through broadcast we have built up a host of is there.

e letter from the Consulate at Cuba lissipated all fears I had before our presentation of this intricate com- on.

is published by Edward Marks, and uld be played at a medium tempo.

When You Fall In Love Fall In Love With Me

IIS is a composition that delighted e upon my first hearing of it. Writ- by two famous song-writers and a g new-comer, it is a refreshing num- melodically and lyrically speaking. nt Rose is mainly responsible for its dy. He is the little Italian who gave *inger Awhile, Avalon* and *When I k of You,* and he seems to have a ng streak again after many years quietness. One of the Tobiases, les, to be exact, handled the lyric osition extremely well along with e Russell, whose *Song Without a e* was one of the most beautiful ositions it has ever been my pleas- o introduce and feature.

e song is one that everyone likes on rst hearing, which is most unusual. have recorded it, and it is a record will be most pleasant to listen to. thought of the song is quite simple; erely cautions the young lady to flirt uch as she likes, and to keep everyone sing, but to save her love for the boy sings the song.

must be done slowly. We play it at y-eight measures per minute. It is shed by DeSylva, Brown and Hen- n.

Yours and Mine

HAT tiny firm of Villa Moret de- erves a special consideration as we ss *Yours and Mine.* Charlie Daniels e Villa Moret, both in name and in y. Villa Moret is one of those one- , one-office organizations, although at us times it has had a New York . Villa Moret has always had its quarters in San Francisco, Cal., and has, from time to time, picked one song as its feature song and worked on that alone. It can boast of a list of hits that many a big firm could be justly envious of. Songs such as *Chloe, She's Funny That Way,* and their latest success which has held first place in the list of popular songs for such a long time, *When It's Springtime in the Rockies.*

Several months ago Mr. Daniels sent me two songs for my approval and perusal. He assured me in his letter that *Yours and Mine* was another one of those songs that the masses would take to its bosom as they did *Springtime in the Rockies.* He cautioned me to be sure and record it for Victor, as it would make a great seller for me on Victor records. I know now that he spoke sincerely, not only sincerely, but wisely!

I gave the song a careful looking-over, and failed to see anything really outstanding or worth while about it. In fact, it seemed to me quite "doggy", as a professional calls a song that seems to be, perhaps, too simple. It was not until I heard Little Jack Little render it on a Saturday night broadcast just before mine that I realized the song was there, and that it was destined for popularity.

Now I am a sadder but wiser singer of songs. Still it is not too late for me to sing the song over the air, which I do with pleasure. It was written by Steve Nelson and Johnny Burke. I have not had the pleasure of meeting either of them. We do it slowly, at about forty measures a minute.

Rudy dons Southern attire in Florida.

If I Say I Don't Love You I'd Be Lying

IN MY selection of songs I have come to one conclusion; that is that it is a pretty good rule for me to let my conscience, my free liking, be my guide. I have found it generally true that it is not worth while to push any song that I forced myself to like, either because of its composers, publishers, or because I wished to help somebody, or because someone talked me into believing it was a good song. I have in most cases found that such a song never really did impress me, and usually did not turn out to be a great song. Anything that I figuratively prick up my ears on hearing, a tune that strikes me instantly as being a good song, or one that haunts me, has generally justified my reaction to it, and later on become a great song.

I'm Just a Vagabond Lover, which I heard in its unfinished state, and subsequently helped to write, *Sweetheart of All My Dreams,* and even *The Stein Song,* are the best examples of what I mean. These were songs that wandered around for years, either in an unfinished state or unknown to the public at large. *I'd Be Lying* is one that I feel will be liked, though perhaps not sensationally.

It is an unhappy thought, a song that causes one to think, that arouses the attention and makes the listener become quite serious as the thought unfolds. Such songs rarely become big hits, but I believe that *I'd Be Lying* should at least become a fair-sized hit.

For years there has been a most unusual character known to Broadway night clubs and to New York society as Tommy Lyman perhaps one of the most unusual singers of songs that New York and other parts of the world have ever known. A unique and almost mysterious type of personality, singing a song about a Shanghai Poppy Girl, going from table to table at brilliant society functions, singing to those who had known him through other affairs and other night clubs, Lyman has always been a great favorite with the upper strata of New York society.

I number among my friends a young lady who has moved in the elite circles for years, and who on one occasion asked me if I knew a song called *I'd Be Lying.*

(*Continued on page 97*)

KJR *Artists Cash In On*

"Largest Station Payroll *in* Northwes

IF STATION KJR had complete control of the situation, there'd be no unemployment situation in Seattle, for the popular broadcaster, key member of the Northwestern Broadcasting System, claims to support a larger staff of entertainers than any other station in its vicinity.

That's a far cry from the situation in 1929, just two years ago, when the American Broadcasting System, previous owner of KJR, KEX, Portland, and KGA, Spokane, went into bankruptcy. There wasn't even enough money in the coffers to pay for records, and friends were asked to contribute from their record libraries. Today KJR broadcasts every day for seventeen full hours, without a single recorded program.

Besides the entertainers whose pictures are shown, there are many others who are equally popular with listeners. There's William Pinkerton (Pinkie) Day, newest addition to the staff baritones, and Thomas Freebairn Smith, chief announcer, who is a descendant of the Thomas Freebairn who was chaplain to the Scottish king Robert the Bruce—and Robert Monsen, KJR's double-chinned Paul Whiteman, who wields a baton like his double. Chet Cathers, another baritone who joined NBS after apprenticeship in vaudeville and pictures, is familiar to all northwestern listeners—and behind the scenes are Thomas F. Smart, secretary, and the able staff of engineers who push buttons and manage the technical end from the brand new control room equipment.

Left, reading downward. Glen Eaton seems never to have learned the "mustn't point" precept at his mother's knee. He's a popular tenor. Elmore Vincent, the Texas Troubadour with the four-quart Stetson, is only twenty, but learned to sing when he was knee high to a grasshopper down in Texas. He's only six feet tall! Henri Damski, KJR musical director, is one of the big reasons for the station's growth to popularity. Pretty Billie Landers, blues singer, is the Northwest Broadcast System's own Fanny Brice—she's there with the voice and the comic touch.

Right, reading downward. Stephanie Lewis, pensive and demure, is soprano solist for the NBS. Ivan Ditmars has his fingers in many KJR pies—he's studio director, organist and pianist. A product of Olympia (not on high but in the state of Washington), he is twenty-five, a grad of the U of Washington, and is very Nordic, with blond hair and blue eyes. John Pearson, announcer and director of dramatics, comes from Southwest Texas to KJR via road companies of *Lightnin'* and other plays. Eulala Dean is another of KJR's prize blue singers.

Below, left to right. Ken Stuart is one of the best know sports announcers in the Pacific Northwest, covering baseball, wrestling, boxing and crew. A. E. Pierce is the genial general manager of the Northwest Broadcast System and one of the prime factors in its success. Grant Merrill, pianist, Radio actor and continuity writer, has been over the royal road of romance. He swam the Bosphorus, teaed with Queen Marie of Rumania, slept on an Egyptian pyramid—has been college professor, and is considered the handsomest man at the N. B. S. studio.

WMCA Answers

Beauty Challenge

WHAT station in the United States has the fairest staff of feminine entertainers? Station KROW out in Oakland, Cal., certainly raised a tempest in a tea pot when Manager Bill Gleeson claimed his pretty girl singers and radactresses couldn't be beat, collectively, anywhere in the United States.

That challenge brought the flush of battle to Manager Donald Flamm of WMCA, in New York, who claims otherwise. Mr. Flamm is choosing his entertainers not only on the basis of their air personality, but he aspires to enter five or six young ladies in the Radio Queen contest this fall. From the tiny photos shown here (which, by the way, aren't so attractive as the subjects themselves) it isn't hard to predict.

In the meantime you Radio listeners and readers are appointed a nation-wide jury to send in your votes on this question of pulchritude. Are WMCA damsels fairer? Or did KROW's bevy of beauties meet with more approval (you'll see their pictures in February Radio Digest.)

Every one of the members of this album is a real staff entertainer—no outside help has been called in to lend support. And there's variety in the ranks—dreamy blondes, peppy brunettes, and real titian-haired girls. There are jazz singers, a singer of classical songs who knows six languages, a program director who proves that beauty can have brains—and two pairs of sweetly harmonizing sisters.

Next month we'll have another answer to the Beauty Challenge—but give us your vote on the contest thus far. If you've been a-visiting any of the stations and have seen their fair entertainers in person, and liked their looks—enter that station's staff in this tournament of pulchritude.

Top—left to right. Sylvia Miller, who has been singing ever since she was four years old. Winner of first prize for best soprano in a New York Music League Contest—a real polyglot, since she sings in six different languages. Center, Marie Kelley, whose blonde beauty is no less pleasing than her lilting lyric soprano. Has sung in Paris at the Club Lido—a far cry from Springfield, Mass., where she grew up. Right, Vivian Marlowe, "musical comedy" girl who keeps the phones buzzing with requests for songs in her reportoire.

ve, reading downward. Nalda Nardi, Program Director for ICA and possessor of a deep contralto voice. The blue of Lake o is in her eyes and her hair, worn as only one gifted with aty could wear it, is a rich warm brown. The Calvert Sisters harmony personified—one dark as a gypsy and one with hair spun gold. Jeanne Carrol lives up to her name, for she has a utiful singing voice—acts, too, in WMCA's Radio playlets—has my gray eyes and soft, chesnut brown hair. Melba Lee, singer, lied with Anna Fitziu of the Metropolitan Opera and got her first e job when she accompanied a friend to apply for a musical role. ba got the job instead! Has auburn hair and grey green eyes. Above, reading downward. Bee Singer, a very tiny brunette with expressive brown eyes, who isn't old enough yet to vote—has a rich crooning contralto—has to climb on a stool to reach the carbon mike. Mary and Billie Lee—Billie, the blonde one, was "scared pink" when Mary married and Billie had to face the mike alone—so Mary came back and now "They're Friends Again." Hilda Harrison is WMCA's whispering soprano—the girl with perfect Radio technique—her hair is very dark brown and curly, and her eyes sky blue. Sylvia Froos—Who is Sylvia? She's WMCA's baby songbird. Only seventeen years old—hair, light brown—eyes, real hazel, and just tall enough to reach up to the top button of a man's vest.

The people in the story—here they are—from left—Professor Edward Staadt, winner of KSTP Radio drama prize. Ida Blackson, charming WLW soprano whose concert work brought her to notice of astute Crosley station directors. Leonard E. L. Cox, brilliant director of WQAM, Miami. Dora Shaw Iauch, winsome WJAX (Jacksonville) soprano, who made Radio debut a year ago.

Listening In on Som

BY RIGHTS. Edward Staadt doesn't belong here, for he's a Westerner, but he's news because he won the $500 prize offered by the Great Northern Empire Builders program arbiters for Radio dramas. He's head of the Department of Dramatics at the University of Minnesota. Have you heard his play from KSTP in St. Paul—*Against A Copper Sky?*

* * *

IT'S not so long since Henry and Percy had their names in electric letters goodness knows how many feet high, over a Birmingham vaudeville theatre. All because their WAPI tri-weekly skit is so popular. Henry C. Vance is also short story writer, author of movie scenario *Diamond Handcuffs,* and newspaper columnist. And Percy Rosenberger is also literary and ex-newspaper but has always found time to sandwich in dramatic and entertainment work. Henry was born in Orland, Fla., Percy in Atlanta, Ga.

* * *

WHO ever heard of bringing music from an old vinegar jug? It's done this way —the player blows into it and the jug acts as a sounding board, for the expert "blower" of the Ballard Chefs. They are the eight black lads who entertain Monday nights at WHAS in Louisville. Four of the boys form a quartette, and the other a novel orchestra . . . they landed in Radio through their popularity as war-time entertainers at doughboy camps.

* * *

COWPUNCHER, rancher, miner, traveling salesman, aviator—and his latest is director of Station WQAM at Miami, Fla. That's Leonard E. L. Cox, who came to Miami last year after successful production of dramas of the air at WABC, WJZ and WOR in New York. Two of his most popular features at the Florida station are *Tonight at the Opry House,* a series of blood and thunder old-time melodramas, and *Junction City,* portrayal of life in a small town as seen from the general store vantage point. Born in Central Africa of English parents, and a world-roamer himself, Mr. Cox seems to have anchored himself firmly at WQAM . . . to whose new studios, by the way, all Florida visitors are invited.

* * *

RADIO curiosity—a few minutes Helen Corbin Heinl, whose pi appears here, had played as soloist the U. S. Marine band, she heard he lection replayed over long distance phone from New York via a record had been made there from a telep transmission of the broadcast. Heinl is one of the few pianists to with the Navy—she has also appeare Hugo Mariani's concert series, *Work Great Composers.*

* * *

HERE'S a brother team that is one—Jimmy and Leo Mazzei of WAAM in Newark. brother Jimmy and little bro

Left—The long and short of it none other than Henry and Percy, ular comic team of WAPI, Birming Alabama.

The vinegar jug below is the one makes the music on the Ballard hour at WHAS, in Louisville.

One after another, these headliners are: Helen Corbin Heinl, whose piano solo brought more congrats to Marine Band than any other soloist. Irving Sewitt, young WMCA orchestra leader destined to go far. The "Neilson" pair—Marguerita Nuttal, soprano, and Wishart Campbell, Baritone, who go on the air on a Canadian network from the Atlantic to the Pacific.

Eastern Wave Lengths

Sgeant (U. S. veteran) Leonard portrays fifteen different characters in their popular comic skits. They are 37 and 38 years old, respectively, like spaghetti, as are of Italian parentage although they can take off Irishmen, Scotchmen or Dutch.

* * *

AN ORCHESTRA leader who plays the drums with his own jazz band—that's Irving Sewitt, WMCA'er and featured at the Argonaut Club in New York with famous Tex Guinan. Other claims to distinction of this unusual young man are his youth (he is not yet twenty-five) and his unusual orchestral arrangements. He's heard on New York *Graphic* and Brooks Jewelry programs with his band.

* * *

WITH the migrating songsters and Radioists generally . . . Nils Falkman, Swedish tenor, Elizabeth Stidman Bilson, soprano and Charles Cohen, cellist are recent additions to WBAL, Baltimore, staff . . . Jerry Akers is new general manager at WCKY in Covington, Ky. A case of promotion on merit from post of studio director. KFEL, Denver and WGKS, Gary have been under his management in the past . . . Lee Goldsmith, the "Little Colonel", moves from WCKY, to WKRC, Cincinnati as production manager, and Tremlette Tully, formerly women's program director of the Kentucky station moves with him to Ohio . . . Belle Bart, President of the American Academy of Astrology, is another of the star-gazers who becomes Radio minded with her tri-weekly broadcasts from WGBS in New York.

* * *

ONE of the many lives saved by Radio was that of Edgar Chapman, sixteen-year-old orphan of Chattanooga, Tenn. He needed a blood transfusion, but his "type" of blood—type 4—is rare. An appeal was broadcast over Station WDOD and hundreds of generous people responded. Twenty-year-old E. D. Milligan was the right type and within a few hours after the Radio appeal Edgar was on the road to recovery.

* * *

Should she be called Mister, Mrs. or Miss Dillon? That's the puzzle about Jane Dillon, versatile impersonator of WTIC, Hartford. She depicts a motley assemblage of characters, varying from the squeaky-voiced village choir belle to the slick, oily-tongued big city rounder. Years of vaudeville trouping have made her a quick-change artist.

A descendant of stern Quaker folks from Iowa, she had a hard time getting permission to go stagewards, but after graduating from Northwestern University in Evanston and Chautauqua-ing for a while she went vaudeville. On a tour in England she made her Radio debut, repeated in South Africa, and finally landed at WTAM in Cleveland. She's happy at WTIC, her present location.

ght—"You can't ketch me" sez Jane Dillon, (WTIC, Hartford) as herself, to herself as a slick city feller, one of her many impersonations. Below—Leonard and Jamie Mazzei, (WAAM, Newark), a couple of Italians, caught putting on a mike-skit about an Irishman and a Jew.

Midwest

By BETTY McGE

No, it's not a toothache Clarence McCormack has. It's a harmonica—the one he uses for his solos in *Turkey in The Straw* and the other old-time tunes so ably rendered by the WLW McCormack Fiddlers. That's Ma beside him.

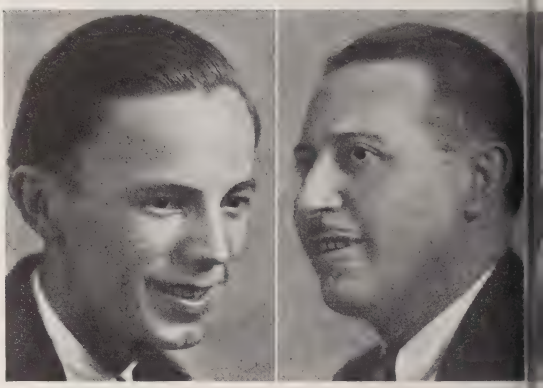
Real Mountaineers Play Old-Time Tunes Mornings at WLW

THREE years ago "Harmonica Mac" and Ma McCormack were listening to some mountain music through their Radio receiver. "Ma," he said, "we can do better than that. We can give them the real stuff, not a bad imitation." You see, McCormack was born and reared in the Blue Ridge Mountains. His real name is Clarence McCormack, and he directs the ensemble that bears his name. The other members, besides Ma, are Frank Miller, fiddler, Omer Castleman, banjoist and Robert Schule, guitarist. They play widely known mountain tunes on the Top o' the Morning hour and other popular programs at WLW in Cincinnati.

When you hear program announcements at WLW in German, you know Fraulein Ruth Kessler is going on the air. Her parents in Leipzig listen in via short wave. The young lady mailed her request for an audition to WLW from her home in Germany, and today her voice, accompanied by her own lute, is often heard from the Cincinnati station.

* * *

ANOTHER Radio wedding! When Lenore Herbst, then a demure school teacher at Ada, Minnesota, came to WDAY at Fargo, North Dakota, for a Radio try-out Dave Henley, WDAY's program director, was impressed with her abilities. When her school closed in June Miss Herbst was added to WDAY's staff. (Mr. Henley was still impressed, it seems). Not long ago they were married—they are heard frequently together—as the Two Octaves, piano duo, as the Night Timers, vocal duo; and in addition Mrs. Henley conducts WDAY's popular children's hour.



A few months ago North Dakotans blessed Radio. When two sleet storms swept down telegraph and telephone poles and cut half of the state off from communication with the rest of the world, WDAY and KFYR in Bismarck hopped into the breach. Railroad trains were dispatched via Radio, business messages, death announcements, everything that was urgent was broadcast.

* * *

HE'S one of the world's youngest professional announcers — eighteen-year-old Reynold McKeown, whose picture appears among the group of four you see here. Reynold is a baritone and accomplished pianist as well as announcer, and continues at the Wisconsin station under Hal Lansing, present Commercial Director.

Another member of the quartet pictured here is Myrtle Spangenberg, the featured soloist of the WTMJ Kilowatt Hour. Besides possessing a lovely lyric soprano voice, the lady is a ravishing blonde with sky-blue eyes and a peaches and cream complexion.

Then there are Royal Gordon, WIBA tenor and Dorothy Jahr, his accompanist. If fan mail is any indication, they are two of the most popular artists at the Madison, Wisconsin, station.

Homar's the one with and Harold's the one without—the moustache, of the Two Little Crows, early bird harmony team at WOWO, Fort Wayne.

Eric Sagerquist, handsome conductor of the WIBO Studio Orchestra, still plays violin with the boys occasionally.

DETROIT'S newest Radio station WJBK, has passed through the swadding clothes age. Now in operation seven months, many of its entertainers have gained favor in the automobile city and the surrounding country. Carl Rupp, musical director and Clarence Knight, chief announcer and specialist in play-by-play sports broadcasts are headliners. The Blue Bird trio (Betty Beta, Mildred Van and Inez Greeman) jumped from WJR to the new station and are drawing new fan friends; Vee

HOUSANDS of Midwest Radio liseners will be interested in a new book book that grew out of Raymond Warentertaining series of Lincoln plays h have been presented under the title *he Prairie President* from WLS. Warathered enough dramatic material for eries of sixty plays by doing an immense amount of research in old books and papers of the years 1809 and 1861. With such a background, it would have been well-nigh impossible for Warren to do anything else but succumb to the temptation of becoming an author.

* * *

BECAUSE we liked the music on the "First Nighter" program, an NBC feature, so much, we determined to find out more about Eric Sagerquist who conducts the orchestra for the program and is leader of the WIBO Studio Orchestra. (His picture appears here.) Eric began his career some few years ago when he made his first public appearance at the age of twelve in a little movie theatre down in Houston, Texas. Since that time he has been doing a number of things—was leader of the orchestra that played for both the Prince of Wales and Queen Marie on their American tours; was with the Victor Recording Laboratory Orchestra for two years; played in the Benson all star orchestra; and in the old days was with Frank Westphal when he played at the Rainbow Gardens.

Don't let anyone tell you that everyone has gone "nutty" or "cuckoo" over at WBBM. They are probably just talking about the "Nutty Club" which has been revived by Paul Whiteman. Bobby Brown who succeeded Garland is again mike master of ceremonies and chief nut cracker of the new order.

Not every Tom, Dick and Harry can be as handsome as WGN's popular trio. Their driving licenses reveal them as Marlin Hurt and Bud and Gordon Vandover, Chicago.

Tom, Dick and Harry of Station WGN Write Popular Song Hit

TOM, Dick and Harry, that widely known vocal trio heard regularly from the Chicago studios of the NBC and over WGN, are putting on rather grown-up airs these days—but why shouldn't they, with their new song composition just out. It is entitled *The Cradle Song* and we are willing to wager our new spring bonnet that everyone will be swinging to its melody in a few months.

Their real names are Marlin Hurt and Bud and Gordon Vandover. The Vandovers hail from Los Angeles and it was Bud who first pulled away from home—with a buddy who played in an orchestra. Bud sang. The two pushed on and on, until they arrived at Kansas City. Here his partner deserted and Bud took to the highway again, hoofing it, and carrying a tuxedo wrapped in a newspaper under his arm. He headed for St. Louis where he happened on a job at one of the St. Louis Radio stations. This supplied bread and butter, and a job as cigar clerk at the Statler Hotel furnished his clothes.

Just about this time Gordon blew into town and he became relief clerk behind the cigar counter. During off hours Bud strummed his uke and one day someone bet him they didn't have nerve to go into the dining room and sing with the orchestra. They had the nerve but it cost them the job behind the cigar counter, as employees were not allowed in the dining room. They took to the highway, with Chicago as their goal, where they clicked with Marlin Hart.

It's a $26,000 listen when Nathan Abas plays his rare Guarnerius violin at KPO.

A dramatic moment in the adventures of Jack and (Ted Mawell and Bernice Berwin) in their trek on *to Hollywood,*—see their concentration at KPO

Harvey Orr, one-time Canadian ace and member of the "Devils of the Air" is now a baritone of the air at KPO, San Francisco

Here you see the fingers that pluck a harp, caressing a canine pet—Zhay Clark, of both KFI and KECA in Los Angeles.

West Coast Currents

By DR. RALPH L. POWER

STATION KQW of San Jose turns the whole scheme of Radio broadcast upside down. Instead of presenting a program as a unit from one of its studios, it originates features from two or even three studios operating simultaneously. The announcer, let us say, is in the main studio in San Jose, the orchestra may be in the San Francisco Blue Diamond Studio, and the chief speaker of the evening at the mike in Sacramento, or on the University of California campus studio in Berkeley.

The Blue Diamond Studio was presented to KQW by the world-famous figure, Captain Robert Dollar of the Dollar Steamship Lines because of his interest in the entertainment and valuable agricultural features offered by the operators, the Pacific Agricultural Foundation. The managing genius of the station has been Fred J. Hart, who has watched it grow from a little one-celled organism to an important and elaborate network.

* * *

Aviator "Ace" Now Singer at KPO, San Francisco

CAPTAIN VERNON CASTLE used to like to hear Harvey Orr sing, when the KPO baritone was a member of the Canadian "Devils of the Air." Only the night before the Captain's tragic death, Orr sang to him, but after that singing was forgotten until several years after the close of the war, when he toured with Keith Orpheum, ending up in California as a broadcaster. His work with the California Crooners, the KPO Smile the Clarions has made him well kn KPO dialers. Orr sang his first s five years of age with a boy choru at twenty-two he won the gold me the Earl Gray singing contest.

Harvey was football player, ar boxer and swimmer before he show prowess as ace of the air. Now l longs to Floyd Bennet Aviation Pos 333, American Legion and his nin old son, Harvey, Jr., seems destin follow his pace—he's "crazy" about tion.

VALENTINE'S DAY brought other birthday to Lewis Meehan, n tenor, as he sung over KFWB, KFI or some of the other Los s stations from whence his lyric is gently wafted every so often. Still early thirties, the Irish-ancestored was born in Albuquerque, New o, on Valentine's day. Unmarried tremendous addict of health foods; r smokes nor drinks; somewhat of a opher, some six feet high, 150 s, with brownish hair and blue eyes.

* * *

ARLIE HAMP, fresh from mid- rest triumphs, gets back to the home n the Pacific. He goes back to one first Radio loves, the toothpaste tes, and does a thrice-a-week eve- program over KHJ and Don Lee's chain, as well as two or three morn- nes. In odd moments, Charlie . . . ife and young daughter . . . are scanning maps and blueprints and ay model of a castle. Charlie, re- to be one of the country's highest one-man program features, has t a sightly lot in the Outpost , just off the hills beyond Holly- and plans to erect an imposing sh castle type of house . . . includ- oldfish ponds, dog kennels and a in the form of a room simulating lern Radio studio.

* * *

STER DEES, KFWB's blonde oung tenor (whose picture appears hails from Dallas, Texas, from e he was packed bag and baggage ispatched to Los Angeles by a fond ich uncle. Destination . . . the university in that city. But young r craved a sackful of spending money. So he took his Southern drawl and ambled over to KFWB and its studios for auditions.

The very next day he went on a night-time program. Then M-G-M gave him a short term contract to work in talkie shorts. 'Twas then that the young Texan marched out of ye halls of learning and embarked on a musical career in earnest. He continued to study voice, did KFWB programs often, was in *Hell's Angels* prologue for five months at Grauman's Chinese Theatre in Hollywood. Ambition . . . To become a light opera star.

* * *

WHEN GEORGIA MILLER, female lead with the cast of KOA Players, was married to Lieut. Frank E. Fries, of Fort Logan, Utah, earlier in the year. The plans called for an altar under an arch made by the crossed sabers of Lieutenant Fries' fellow officers. Mrs. Fries, has been in stage life since she first appeared as a child in the Elitch Gardens of Denver. Later she did some bits in the movies, a Pacific coast tour in stock, and finally the radio activity wherein she starred in many serials and short dramas at KOA.

* * *

CAPTAIN EDWARD A. SALISBURY has come back to Radio for awhile. In KHJ's early days he staged a Radio barbecue to which more than 30,000 fans made a caravan and firmly barricaded approaches to Los Angeles by roadway for several hours. To feed them he bought bread by the cart load, beans by the shipload, and barbecued beef by the ton. Locale . . . out in the San Fernando valley.

Now he appears at KFOX for a series of daily travel talks in reminiscent vein. While his brothers stay in Los Angeles in prosaic duties as automobile outing club executive and engineer, "E. A." travels—and how! Specialty . . . savage tribes and their customs, primitive peoples of the world. The captain speaks some forty languages and dialects.

Pretty co-ed Sylvia Jones is slated for two more years on KWSC (Washington State College) as soprano, as she's now a "soph".

The peppy boys are Ken Gillum and Duke Atterbury, one time KNX and KFWB luminaries, now heard on recorded programs.

Mrs Scott and her three healthy, normal children. The eldest daughter was recently graduated from Vassar with very high honors.

MIRIAM FINN SCOTT

Well-Known Authority on Children's Problems asks an All-Absorbing Question

Do You Know Your Child?

"MY CHILD is disobedient!" "How shall I teach my child to obey me?" Thus have begun hundreds of requests for help from earnest parents made to me by letter or in person. This disobedience seemingly takes as many different forms as there are different children.

I quote from typical letters: "My child is defiant to desperation," writes one mother. "She deliberately refuses to do the smallest thing I ask her to do. How am I to teach her obedience?" And another parent writes: "Please tell me how to control my little son's most objectionable trait, *contrariness*,—he is very bright but terrifically wilful, and persistent to the point of exhaustion." "My little girl of three," writes another mother, "is usually manageable at home where she always keeps busy, but she is most unmanageable, most stubborn, outside the house. Spanking and putting her to bed early have no effect on her." And still another mother writes of a boy of four, who is energetic, spirited, keenly intelligent, but who will never take her requests or her commands seriously. Thus the complaints run on.

Just as I asked you last time to realize that before we can handle the outbursts of temper in a child successfully, we must first of all try to understand the ingredients, the forces, behind temper, just so must we first of all understand the powers, the qualities, which cause a child to disobey—we must search for what is behind the behavior which irritates, bewilders us, and renders us desperate. And while we are searching we must search ourselves with utmost candor for our motive in desiring that our child be obedient. Is it primarily for the child's betterment, or is it for our own relief, our own convenience or even to satisfy our own false pride?

BEHIND the child's disobedience we often find a very sensitive nature, imagination, originality, and ruthless determination to express his creative impulses. These fine qualities should not be crushed by arbitrary, autocratic discipline. Such handling is certain to stimulate in the child rebellion, defiance, the most stubborn kind of disobedience, and not infrequently we can trace acute digestive disturbances, frequent vomiting, nervous disturbances, such as stammering and twitching, to the thoughtless handling of a child of this type.

The story of six-year-old Charles will concretely illustrate my point. When he first came to the Children's Garden with his parents for an examination, he looked like a haunted wild animal. His thin, pale face was tragically twisted with fear and distrust. He would not enter or touch a thing in the room although I tried to make clear to Charles that everything in the Children's Garden was for him to play with. His eyes were fixed on his parents and it was evident that Charles dreaded criticism, admonition, punishment at every move. I realized that nothin could *say* would convince Charles he was free to do as he pleased in Children's Garden. I said no more from one of the shelves I took dow Russian wooden egg containing eight concentric eggs of different colors. I down at the green table and began to o up the egg, arranging the half-eggs i circle, the red, the blue, the green, yellow, the purple—and more eggs coming—growing smaller and smal The parents were fascinated and children expressed their delight. By time I had opened the ninth or tenth Charles was at my side and with a look his eyes which said, "May I try it?" W out a word, I handed the egg over to h

To my delight and to the parents' s prise, Charles played with that egg one full hour, opening the eggs, clos them, arranging the halves in intric patterns; handling the parts with most exquisite care, showing an appre tion of the fine texture of the wood, of polished colorful surface. After th Charles discovered other toys and ma rial of interest in the room, all of wh he handled with skill and with an unus observance of details. By the end the examination, I knew that Charles w a gifted boy, responsive to all reasona requests, eager to cooperate; that th was *nothing wrong with Charles*. Af talking with the parents and studying th home environment, I was convinced t the boy's defiance, his disobedience,

Guide Creative Energy

Problems with children are common in most homes but they can all be adjusted if approached properly. These errors of self-will, stubbornness, and temper may be traced to misdirected creative energies which are latent in the child and which will respond only to the sympathetic touch.

This broadcast by Mrs. Scott is published here through the courtesy of the NBC over which network Mrs. Scott broadcasts regularly.

If you are disturbed over the behavior of your children, Mrs. Scott will be pleased to help you solve your problem. Address your request to Mrs. Miriam Finn Scott, in care of Radio Digest, 420 Lexington Avenue, New York, N. Y.—Editor.

general, my advice in Charles'
will fit most children of his type.
: The child who is gifted with
qualities must have special con-
ation and more opportunity to
use of them. He must be given
rials which will provide for him
tlet for his imagination, original-
nd constructive ability. Second:
y child must have a space which
n call *his*, if it is only one cor-
in one room, and an accessible
or two to hold his toys and ma-
ls. Third: We must respect the
at play. We must not thought-
interrupt him or disturb him
nore than we would allow him to
rupt us while we are seriously at
. Fourth: We must have respect
he child's achievements, however
e, however simple, however im-
ct they may seem to us. We
realize that these are the child's
efforts; that the child's castle
f his building blocks, or his train
acks going to a world of his own
nation are as important to him
ur efforts are to us. Children
are handled with respect, with
ideration and with sympathy,
quickly respond to reasonable
just requests of them.
e can hardly conceive of the ex-
to which disobedience is fostered
our failure to appreciate the
s the child attaches to his act
is desire. Often in our endeavor strictly to carry out an established rule, we leave out of account the imagination or emotions of the child. A little girl of six, who was just learning to write, conceived the tremendous idea of writing a letter to her father, who was returning home late that evening, which letter she was going to place on his pillow, to be discovered and read by him when he went to bed. The mother, not appreciating what this meant to the child, put off the child's writing of the letter until it suited her own convenience. Her convenience did not arrive until twenty minutes after six—ten minutes before the child's bedtime. With painstaking fingers the child began to write the letter. Her hand grew tired, she grew sleepy, but with unfaltering will she kept on—for before her was the dream of the pleased surprise of her father when he found her letter. At six-thirty o'clock the mother ordered the child to bed; the child pleaded for time to complete her letter. This the mother flatly refused and in turn the child flatly refused to obey. Then came the clash. The mother forcibly picked the child up and carried her off, the girl resisting and fighting her mother in a passion of wildest violence. By superior strength the child was put to bed. *Obedience* had been enforced, but the little girl lay sobbing in the dark, wild with grief over the tragedy of her broken dream—her spirit newly sown with the seed of disobedience!

Mrs. Scott, Author of *Meeting Your Child's Problems* and other books

* * *

During Mrs. Scott's visit to Russia (U.S.S.R.) she lectured on the subject of child training at the Universities of Moscow, Leningrad and other educational centers. One of her books, *How to Know Your Child* was translated into Russian during her visit. While there she made a study of the homeless children who have been such a problem to Russia and who are the subject of much spirited discussion here in our own country. Mrs. Scott had an opportunity to study them at first hand as the various institutions where they are cared for and educated were thrown open to her.

Mrs. Scott has also lectured in some of this country's principal centers on the question so close to her heart. The Superintendent of Schools of the City of New York has this to say of the series of lectures she delivered here, "I consider the lectures given by Mrs. Scott epoch-making. They were the best ever delivered in the schools of New York."

The mischievous twinkle in Mr. Guest's eyes betray the boy that's still in him

A Fireside Poet At Home

By MRS. EDGAR GUEST

"A Good Somebody to Have around although He Leaves His Clothes All over and Snores in His Sleep"

Mrs. Edgar Guest, wife of America's well-known poet, delivered the following talk over the National Broadcasting Company on what it means to be a poet's wife.—EDITOR.

WHEN I was asked to speak on how it seems to be the wife of a prominent man, I wanted to decline the invitation, because for the twenty-four years that I have been his wife he has done *all* the talking. Now, that in itself should be a unique experience for *any* wife, to have to listen to her husband talk in public places for twenty-four years and not be able to make any reply at all. Tonight I have him in the same place. Whatever I have to say he cannot reply to. Of course, I will have to be careful what I say, because he is listening to me and the night is long.

Really, I don't know *what* to tell you. You know he is just like other men judging by what other men's wives tell me. He has a good appetite, sleeps well, snores and leaves his clothes all over the house. He likes to be petted. He very often picks out the wrong necktie. He is the kind of a husband that likes to go to bed at night and read. Besides the bed he likes to have a plate of apples and hard candy. And when I try to go to sleep he munches this in my ears.

Somebody asked me one time what his favorite food was—I have seen him take the most elaborate menu card with apparently everything in the world on it, and after considerable study of it would wind up by ordering calves' liver and bacon and rice pudding. Oh, I know he does all the things that all other men do. He is just a normal person and incidentally, I have found him a mighty nice somebody to have around the house and to be with. He loves to play bridge, and I have been patient with him, even though he is the worst card-holder in the world. Do we argue at the bridge-table—well, we are married!

Of course, his pet game is golf. He loves it, and I have listened to score after score and have even gone to Pinehurst with him and heard nothing else but golf.

I think one of the funniest things he ever did occurred at Pinehurst. We have a friend who is a very prominent citizen in Detroit, and who goes to Pinehurst every year with a group of his friends. He is very much interested in his game, although he is a great enough sportsman not to take it too seriously. However, on this particular day, they had arranged what they thought was a very important foursome and so my husband decided that this would be a good time for him to act as a caddy for this gentleman.

YOU know all the caddies at Pinehurst are colored boys, so Edgar proceeded to blacken himself up and get on some old clothes and go in with the rest of the caddies. When this particular Detroiter came along, the caddy-master, who of course, was in on the joke, called Edgar out and he took the bag of clubs and proceeded to the first tee. Well, from there on he did everything in the world that a caddy—shouldn't do—he would talk just as his friend was about to shoot, he dropped the clubs, he walked into the bunkers. In short, he did everything he shouldn't have done. This continued until they reached the twelfth hole and here the friend shot a ball in the bunker and Edgar went in and stepped on it. this was about the finish, but when got to the green—you know the g at Pinehurst are sand—he waited unt friend was about to putt and then dr the clubs right across in front of the That was the end. He was discharge sent back to the clubhouse—then ren his wig and the laugh was on. The as I have said before, was a good s man, so he laughed the heartiest o of them.

I suppose that the wife of a man i public eye has to contend with many that many wives do not meet. A these are the stories that come t ears about how unhappy we really and this and that and the other that go to make up gossip. I have

Selected by the Editors

To provide you with the outstanding features for each day of the week the RADIO DIGEST *program editor has selected the programs indicated as Blue Rion. Do you agree with her selections? (For stations taking the programs, see adjoining list.)*

8:00 p.m.—WABC—Toscha Seidel and Concert Orchestra. A fine violin recital and an outstanding Radio program. No strings attached to it but those on Toscha's Strad.

8:45 p.m.—WJZ—Natural Bridge Dancing Class, with Arthur Murray, noted dance master, leading the way.

8:30 p.m.—WABC—The Dutch Masters. Good Music, good songs and Lillian Taiz, Nelson Eddy and Jack Smart would make any program worth while.

9:00 p.m.—WJZ—Interwoven Pair. Billie Jones and Ernie Hare with their socks, socks, socks dispense comedy and sentimental songs flavored with raspberry or sarsaparilla or what-have-you humor.

10:30 p.m.—WEAF—RKO Theatre of the Air, throws spotlight on film, vaudeville and Radio stars. Orchestra directed by Milton Schwartzwald.

Saturday

7:00 p.m.—WABC—Morton Downey, with Freddie Rich's Orchestra—There's a timbre to Morton's voice that reminds one of the roadside cottage and Irish stew.

7:30 p.m.—WJZ—Rise of the Goldbergs. Story of New York Jewish family in its progress from the East Side of New York to Park Avenue.

8:00 p.m.—WEAF—Webster Program, featuring the beloved old-timers, Weber and Fields.

8:30 p.m.—WABC—Early Bookworm. Alexander Woollcott gives you interesting reviews of day's books. Reviews will please you even though you don't like the books.

9:00 p.m.—WEAF—General Electric Hour. Symphony orchestra under direction of Walter Damrosch, and ten-minute talk on science by Floyd Gibbons.

10:00 p.m.—WABC—Hank Simmons' Show Boat. Program captures charm of old-fashioned river boat and excitement produced by shows held on board.

.m.—WABC—Gold Medal Fast t. Good all-around program includ- ganist, jokes, quartet.

p.m.—WEAF—Radiotron Varieties. ed over by Arthur "Bugs" Baer, mas- ceremonies. Also, Welcome Lewis, Van Emburgh and an orchestra with m Merrigan Daly.

p.m.—WJZ—Camel Pleasure Hour. eature ranks high among the outstand- ograms of the concert type. Featur- einald Werrenrath.

p.m.—WABC—Columbia Experimen- boratory. Georgia Backus devises a echnique for Radio dramatics. In everyone speaks to himself and thinks meone else.

p.m.—WEAF—Coca Cola Program. nced by Graham McNamee of course. rantland Rice's interview with some celebrity always lends a little kick

Thursday

n.—WABC—Five Arts Program. Ar- l by Ida Bailey Allen of National Makers Club. Has never failed to keenly interesting note, especially to ne listeners.

.m.—WEAF—Fleischmann Hour. means Rudy Vallee and his Connecti- ankees. Rudy is still on tour but pro- are broadcast by remote control.

p.m.—WABC—Old Gold Character ngs. After you hear Lorna Fantin you nvinced your name should be Ivan ikovovitch instead of John Smith—it's phony of name that counts but num- f letters—come on, seven eleven.

.m.—WJZ—Maxwell House Ensemble. sting of Frank Parker, tenor; Helen nd, contralto; Arthur Schutt, pianist; a quartet and Don Voorhees' orchestra.

Friday

a.m.—WABC—Sanderson and Crumit. care to get sentimental in the morn- isten to Frank and Julia bring back ries of musical comedies.

p.m.—WEAF—Cities Service Concert, Jessica Dragonette of the golden voice; iers male quartet, and orchestra di- l by Rosario Bourdon.

Your Horoscope

by

PEGGY HULL

who—

in each issue of RADIO DIGEST tells how the STARS influence the lives of popular Radio Artists.

You can obtain your horoscope by filling in the coupon below with the necessary information and mailing it to us, together with a remittance for a year's subscription to RADIO DIGEST.

RADIO DIGEST,
420 LEXINGTON AVE.
NEW YORK, N. Y.

Herewith is the information needed to cast my horoscope.

Name .....

Date of birth .....

Year of birth .....

Place of birth .....

Present address

Street

City ..... State .....

Enclosed find remittance for $3.00 for year's subscription to Radio Digest.

Thus you will receive a double benefit — RADIO DIGEST delivered to your home each month and a horoscope cast by an expert.

The Pipes *of* Pan

Broadcasters, Forget Moss-Covered Joke Books and Hire Some Smart Gag Artists—Ambitious Public, Shun the Pseudo Air-Training Schools

By GEORGE D. LOTTMAN

WE ARE ready to offer a handsome reward to the individual who will help stamp out a menace that is one of dio's ace "goat-grabbers."

We refer to the practice of some anncers who call into play the rhetoric t was Mark Anthony's when they give the title of the next selection to be yed. With intonations that are maic and in tonal cadences that a United tes Senator would hesitate to employ, y inform you that "you will now hear LL you *always* love ME?'"

The word "will" is said pleadingly; en the announcer gets to "always" he become highly wrought; "love" is ut- d fervently and by the time he gets 'me" the announcer has worked himself to a high pitch of dramatic frenzy. distinct musical notes are employed in simple statement, and one shudders contemplate what the zealous lad would e done with *"When you Were the ssom of Buttercup Lane, and I was ur Little boy Blue."*

Can't we have a little more simplicity announcements? Be yourself, boys.

* * *

TUDENTS of Radio, and "fans" as well, have more often than once exssed themselves as displeased with the sical chimes that some stations use ing call-letter announcements.

There is no contradicting the fact that mes, in small doses, are beautiful, but y can become a decided annoyance en they are inflicted every fifteen mins for an entire evening.

One Radio chain has solved the problem substituting graceful musical interludes ring station announcements.

It certainly makes a difference.

* * *

THE pseudo-pedants affiliated with Ra- dio schools of voice-culture ought to investigated.

Of course, there are a few legitimate intutions where oral expression and the clamatory art are authentically taught. t when they guarantee that they will get idents positions as announcers or Radio ators they speak through their Stetsons.

For every on-the-level voice school ere are a score, and more, that are honies". The gullible are ever with and so the "voice-professors" in many ots through the country are reaping harvests, in return for questionable instruction and gaudy diplomas.

Beware of the school or instructor that "guarantees" anything. The world's foremost universities don't do it, so how can you expect definite assurance of employment from concerns far less reputable?

* * *

A PRIMARY requisite for acts and presentations in show business is that their routines employ the change-of-pace principle.

The average theatre offering starts slowly, gains momentum as it proceeds, builds up to a climax and closes with a bang.

On the Radio, however, it's different. The art of "timing" here is a negligible factor. An orchestra will offer three fast numbers in rapid succession, then will come a tango or novelty, then, perhaps a slow waltz, four more fast numbers and, more often than not, the program ends with a waltz. There's never a let-down and hardly ever is it apparent that the musical continuity has been intelligently built up.

An orchestra director who is identified with possibly the most important commercial hour on the air said to us the other day:

"I plan my shows on the air as though they were to be presented before a visible audience. I am not handicapped because I work with musical instruments, instead of thespians. I plan my program as Belasco might conceive a stage play. There is the opening, the introduction of characters, the unfolding of the plot, the comedy relief, the love interest—the denouement.

"The saxophones are the comedians. Romance is brought with the violins, and all the string instruments give me my love interest. The trombones, tuba and bass are the 'menace,' or 'heavies.'

"My fortissimo numbers are reserved for the close of the program. We begin with waltzes, increasing our tempo gradually until we have achieved a grand and glorious finale."

Nothing fantastic about all this, dear readers. The leader we quote simply builds his programs on elementary showbusiness principles. He must be right, for he's one of the three foremost men in the field of orchestral broadcasting, earns more than any of his contemporaries and recently signed a new three-year contract with the firm that employs his talents.

* * *

FOLLOWERS of this pillar of prattle may recall that, in our preamble to this department, we said some time ago that we own an automatic applause-making machine, which we shall not permit to grow rusty while we are using our automatic hisser.

So turn on the current, Hawkins, and let the apparatus clap loud and long for the Camel Hour, in our opinion the most showmanlike and intelligent period on the air.

* * *

WITH the many "comedy" hours now on the air, something should be done by a public-spirited committee to collect all the old Joe Miller joke books extant, and throw them in a huge bonfire, for which we shall be glad to contribute the matches and plenty of excelsior.

Radio needs some "gag-men"—the sort of funny lads that the movie moguls employ to create original humor. Continuity writers employed by the broadcasting companies find it too easy to refer to old files of the humorous magazines, and to "gag" books from which vaudeville hams have lifted material since time immemorial.

If a stage comic pulls an old joke he's usually rewarded with silence,—the greatest of all punishments. Whereupon the "gag" is cast from his repertoire pronto.

You can't observe audience reactions on the air, however. Which is possibly the reason why jokes with long grey beards are so frequently offered.

* * *

SPEAKING of continuity writers, quite often they attain the heights and really create some distinctive material.

As a spur to better results, why aren't the names of continuity writers mentioned on the air? They should certainly get a "credit line", like the movie scenarioists do.

Especially should this be so when it is considered that announcers are permitted to mention their names at least once during every broadcast. Surely the writer of the announcer's material deserves as much consideration.

Classical Music Simplified

A Monthly Feature By

William Braid White

Doctor of Music

Dr. William Braid White

Dr. White will answer readers' inquiries on musical questions in his columns. Address him in care of the Editor, 420 Lexington Avenue, New York.

IN THE modern Italian operas, like Leoncavallo's *Pagliacci* or the more skilfully worked *Tosca, Madame Butterfly* and *La Boheme* of Puccini, the audience seems to care little or nothing about the story. The pathetic little tragedy of the tiny Japanese girl in *Butterfly* is sad enough to wring tears from the hardest heart, but few operagoers seem to know the story correctly. On the other hand, when you take away the soft musical Italian tongue and substitute for it our rough English, the words often sound merely ridiculous, as in *Butterfly* when Pinkerton sings to Sharpless "Another high-ball?" and Sharpless answers, also in song, "Yes, mix me another!" very prosaic and quite simple.

Toscha Seidel, Columbia violinist, who is presenting a series of "Historical Concerts"

On the other hand, to put the matter in a nutshell, Wagnerian opera requires that one know its story, whereas in Italian opera only the pretty tunes seem to matter. Now, it happens that Wagner had one of the most highly organized musical brains that ever have existed. His music is so utterly eloquent that it actually is capable of telling its own story, making words unnecessary. For this very reason, if Toscanini or another conductor announces an all-Wagner program, he knows that the title given to each of the excerpts will explain all that is needed.

In a recent concert, which I hope you all heard, the first piece was the *Prelude to Lohengrin.* This ethereal music is Wagner's thought about the story of the Holy Grail, the very cup out of which, it is said, our Saviour drank and gave to his disciples. No one could listen to this music without realizing that its composer was dealing with the intangible and the unseen, with heavenly visions not vouchsafed to those who are gross of appetite and dull of sight.

The last items in Toscanini's program were from what, to me, is one of the jolliest and finest of all operas, Wagner's glorious *Mastersingers of Nuremberg.* This marvellous combination of fun, irony, satire and musical genius is not only the most perfectly Germanic of all operas but, to my thinking, the finest piece of work that has ever been done in the entire field of opera. In the first place it is a good story, a story that is intelligible and not particularly improbable. In the second place, the action is homely, natural, largely domestic and altogether on the common level, dealing as it does with ordinary men and women and their ordinary ways. In the third place the plot is built around a musical story and so the application of music to the acting seems perfectly natural. And lastly, Wagner is here, to my mind, more his own natural self than ever he was when he had to deal those pretentious and often some over-solemn ideas which he present his mythological operas like those of *Ring,* or in the legends of *Lohen Tannhauser* and *Parsifal.* There is a lightful atmosphere of beer and saus about *Meistersinger.* Any one who ever had the felicity to sit in a bierk in *Alt Nurnberg* itself and to medi within the shadow of the very walls w once resounded to the songs of H Sachs, will know what I mean.

Wagner's Der Meistersinger

The story is simple enough. Du the middle ages some of the Ger towns had among their commercial industrial guilds (the mediæval cour parts of our modern trade unions combinations of capital) companies master singers, who alone had the p lege of conducting musical festivals, of furnishing song for the great high days which the towns used to celeb Wagner has taken the history of the famous of these guilds, that of Nu burg, and built up a charming love s around the person of the daughter Pogner, master of the guild and banker, with Walther von Stolzing young knight who has worked out a and radical method of composing mu Pogner proposes a contest and offers hand of his daughter as a prize. Wal and Eva have already met and falle love. Beckmesser, town clerk and retary of the guild, also desires the Eva. The story deals with the con between the two men, handsome yo knight and crabbed elderly bachelor, with the benevolent intervention, on right side, of Hans Sachs, cobbler, p musician and the real hero. The works out delightfully, without a jerk a gap. The music is jolly, intelligible resistible. Yet it often ascends to hei

ty as any ever scaled by the wizard
vreuth in his most serious moments.
is not a dull moment in the play or
music.

ope that every reader will take the
t opportunity to become acquainted
this music. The Prelude or Over-
f which we have been speaking is
played by symphony orchestras.
for it, and listen to it. Hear the
us march of the grave conservative
of the master singers, the ravishing
of Walther's melody which he
ses for the contest, the delicious
nusic. Above all, in the latter half,
he extraordinary exhibition of tech-
skill in which Wagner, as if to re-
he charge often brought against him
days of struggle that he could not
polyphonically (that is, keep two or
tunes going simultaneously and sep-
y) actually inserts a fugal passage
o less than five melodies, all parts of
pera, going at once. All of them
a good conductor wields the baton
sily audible.

ave rambled along here about Wag-
nd about operas generally, although
ly confess that to me most operas
readful bores. I would indeed go
a mile to hear Mozart's merry and
Marriage of Figaro, Wagner's
tersinger or Puccini's *Butterfly*. As
e Gilbert and Sullivan masterpieces
rell they are in a class of their own.
day we'll talk about them.

e history of the growth and develop-
of opera is intensely fascinating.
day I shall inflict upon you a dose
k about this.

Seidel and his Strad

you know the work of that excellent
Toscha Seidel? He is one of our
violinists. He has not only a thor-
mastery of the intensely difficult
technique, but also genuine musical
ption and a temperament which en-
him to discipline his emotions and
nt the patterns of the music he in-
ets so that they become plain, clear
ntelligible. He neither spills all over
sentimentality (miscalled "feeling"),
asks us to be satisfied with mere
ical display. He has both feeling
echnique; and he knows how to bend
to his will.

ave been listening with genuine pleas-
o Mr. Seidel's historical violin pro-
s, in the course of which he is giving
usic ranging from the sincere and
cut art of the seventeenth century
e sophisticated and complex music of
y. To me, the violin music of the
century, which Mr. Seidel illustrated
g a recent concert, is the loveliest of
iolin literature. This is largely, I
, because the composers of that age
o write music which could be played
ly on instruments and by players still
innocent of modern technical
vement.

was not until the development of the Cremona school of violin making, which came to its climax under Stradivari about the year 1715, that the modern art of violin playing was born; nor did that art become what we know to-day until the epoch of Paganini a hundred years later. The dazzling technical fireworks which now we take as a matter of course, were then unheard of. Violin music therefore was based mainly upon a refined sense of tonal beauty, and upon simple, clear, well-designed musical patterns which, in a day of formality, politeness and clear thinking, were at once appropriate and inevitable.

I hope you all heard Mr. Seidel and I hope that you will watch for the later concerts in his historical series. He is a fine artist and I confess to a great fancy for his playing. His fiddle, by the way, is one of the finest works by that great master of all fiddle makers, Antonio Stradivari, whose little house and workshop still stand in Cremona.

Papa Haydn

Recently the Philharmonic Society orchestra under Toscanini played one of the loveliest and most easily followed of all works in the symphony form, the beautiful little symphony in the key of G major by old Papa Haydn. Haydn died as late as 1809, nearly twenty years after Mozart had passed behind the veil at the very height of his powers. *Der alte papa* was old and tired, but his good humor and his charm of manner remained with him to the end. He had begun to make his own music twenty years before Beethoven was born and his teacher was old Porpora, some of whose music Toscha Seidel played in the course of the program to which I have been alluding.

Haydn set the form of the symphony. That form remains to this day. Many have tried to break it down, but in vain. It was good enough for Haydn, for Mozart, for Beethoven, for Mendelssohn, for Schubert, for Schumann, for Brahms. Naturally, in Haydn's hands it was always, as befits something new, simple and clear. You can follow without the least difficulty the introduction, the two main themes, their development and the close of the first movement. You can recognize the languid beauty of the song-like second movement, the simple joyousness of the Scherzo, which is so obviously founded on the dance step known as Minuet. Then the closing Rondo in all its jolly merriment is so characteristically Haydn.

Musical Definitions for your Scrapbook

Here are two more musical definitions to add to your collection.

Minuet: a graceful dance in ¾ (waltz) time, but slower than the waltz and not danced in groups. It was a celebrated dance form through the seventeenth and eighteenth centuries. The Italian name is Minuetto and the French Minuette. In German and in English it is commonly called Minuet. The Scherzo (Italian word meaning jest—I have already described it as a musical form) which Beethoven invented for the third movement of his symphonies, grew out of the graceful beauty of Haydn's minuet music.

Rondo: This is an Italian word. It carries the same meaning as the French "rondeau" or the English "rondel" or "roundel." In music it is a sort of circular movement, distinguished by the fact that one tune reappears at definite and regular intervals throughout its course. A similar form is used in poetry, under the same name. Here is a charming specimen, which will indicate what I mean:

"Love comes back to his vacant dwelling—
The old old love that we knew of yore!
We see him stand by the open door,
With his great eyes sad and his bosom swelling,
He makes as though in our arms repelling
He fain would lie as he lay before;—
Love comes back to his vacant dwelling
The old old love that we knew of yore.
Ah, who shall help us from overspelling
That sweet forgotten, forbidden lore?
E'en as we doubt, in our hearts once more
With a rush of tears to our eyelids welling
Love comes back to his vacant dwelling
The old, old love that we knew of yore."

Austin Dobson.

Here the two lines beginning "The old old love" correspond to the recurring theme of a musical rondo. The closing movements of early symphonies (Haydn's, Mozart's, Beethoven's first two) are in Rondo form.

Ossip Gabrilowitsch, conductor of the Detroit Symphony, frequently heard on Radio.

Voice of t

GENE AND GLENN HELP THE NEEDY

THIS is our first message to the V.O.L. and we hope we make ourselves heard.

In the past months there has been much interest in endurance contests, with due recognition for the contestants. How about a little applause for Gene and Glenn of WTAM, who gave programs to collect funds for the needy of Cleveland and vicinity? They stayed at the mike until the station was forced to close down for recharging. Their first program lasted three hours, the second four, and the third five, with no time out, as they made time and station announcements themselves.

With charity for all and malice toward none—Vallee, Osborne, Sanders, Lombardo and Bernie. Let us live and let live.—Jean MacNicol, Uniontown, Pa.

* * *

POEM TO CHEERIO
(Curiosity Killed the Cat!)

Only a voice that comes through the air
With its message of cheer and its sympathy rare.
Only a voice—and we wonder in vain
If the person who owns it is handsome or plain.
Is he tall—is he short—is he bald—has he hair?
Is he fat—is he thin—is he dark—is he fair?

Perhaps, when we come to the blest Pearly Gate,
With the *Lost Chord,* we'll find him. So I guess we must wait
Until the glad summons comes to us here below
To come up to Heaven and meet Cheerio.
—Etta F. Gilbert, 414 Fulton St., Sandusky, Ohio.

* * *

DX CLUBS PLEASE ANSWER

I AM eager to know just what these DXer's are and how to join them. From what I have read I assume that they tune in stations and get confirmation to that effect. If this is their object, I guess I would have a pretty good start, as I have bagged 136 stations on 87 wave lengths, with my new set, in two months, but have no verifications.—Malcolm Rackow, Eastport, L. I., N. Y.

* * *

YOUR January issue has a letter from H. Meta Tafel of Philadelphia, who offers a record of 64 stations. Of course that was a remarkable feat at that time of the year. Last Saturday I tuned in 127 stations ranging from WEAF, New York, to KNX, California, including XFX, Mexico, and CMX, Havana, Cuba.

Listened to KTAT, Fort Worth, Texas, and think they performed something never done before. All phone calls which were received were broadcast through the mike. I phoned from Yonkers, N. Y., and my own son heard my voice on our Radio.—J. Rankin, 483 Van Cortland Park Ave., Yonkers, N. Y.

* * *

I AM a DX fan and to date have three hundred stations picked out of the ether—from San Juan, Porto Rico, Cuba, Mexico, and about fifteen from Canada. I'd like to hear from other DX fans.

It's just 12:15 and I'm listening to an old-time Revival meeting from WBAP, Fort Worth, Tex. Why don't we hear more of them on the Radio—I think everyone would be interested in them once in a while.—Jack Owens, 1363 So. Cherry St., Galesburg, Ill.

* * *

THE best that money can buy for a Radio fan is RADIO DIGEST. I received 235 U. S. stations, 12 Canada, 2 Cuba, 2 Mexico and 1 Nova Scotia.—"A Radio Bug," Stephen Malik, Johnstown, N. Y.

HIS HYMN OF HATE

THERE are absolutely no articles in RADIO DIGEST which appeal to the technical man. If I had wanted a picture book I would have gone down to some Toy Department and gotten an A-B-C picture book to begin with. So far as I am concerned your magazine is a FLOP and you will do me a great favor to stop mailing it to me. As it is, every time I see one it makes me boil.—A. M. Reager, A. I. R. E., 60 N. Bolton Ave., Indianapolis, Ind

* * *

HER SONG OF PRAISE

I FEEL so happy over my discovery this week of a readable Radio magazine—in other words, yours. I never knew any but technical literature was published. I want to find out exactly when your magazine can be purchased here. (Copies are usually on sale at news stands on the 25th of month preceding date of issue.—Editor.)

Ever since the addition of a Radio to our home, I have devoured the brief notices and columns in our newspapers, and now picture my joy! But your magazine does not need any fiction, just Radio news and items.—Mrs. D. H. Reed, 319 Wester St., N. W., Washington, D C.

* * *

KEEP YOUR EARS CLEAN—PHIL ALWAYS SAYS "PRINT TO FIT"

LAST night Phil Cook was singing his usual "news" song and this is the way he sang it: "I see by the papers, all the news that's 'print to fit'." This is the second time I've heard him sing it that way and I'd like to know if he intends to do it turned about that way or whether it is a slip.—Rene Doutt, 337 N. Woods, Fullerton, Cal.

* * *

BROADCASTERS, ANSWER YOUR LETTERS!

IF STATIONS would all answer their letters written them there would be no need for them to offer something to get people to write. It seems that some of them do not appreciate people writing and thanking them for the pleasure their programs afford.—Frank Wise, 329 E. Doty, Neenah, Wis.

* * *

BOUQUETS AND NO BRICKBATS

MAY I throw a few bouquets in the direction of my favorite Radio artists? The brickbats aren't important, so why bother with them?

Best actors: Frank Gill, Jr., WJR, Louis Mason (Moonshine and Honeysuckle), John McGovern (Silver Flute, East of Cairo, etc.). Best actresses: Georgia Backus, CBS (first and always), Donealda Currie, WJR.

Best singers: Billy Hughes, Reinald Werrenrath, Rollin Pease, Glenn of Gene and Glenn, Al of Al and Pete, Brad Towne, Lois Bennett, Jessica Dragonette, Julia Sanderson, Mary McCoy, Evelyn Bard, WXYZ.

Best announcers: Russell B. Wise, WTAM, Frank Gill, Jr., WJR (the cleverest in the business), Jean Paul King, Harry Vonzell. Best humorous skits: Station KUKU, Nit Wits, Irrational Broadcasting Co. WLW.

Best musical programs: Camel Pleasure Hour, Cities Service Hour. Best guest-artist program: Radio Follies, Nestle's.

BEST PROGRAM OF ALL: Cheerio.

Best Magazine: Radio Digest—Most enjoyable things in RADIO Indigest, Marcella, V.O.L., and rec ticles on Gene and Glenn and Robert

It seems when I get to talking at favorites I could go on forever.—Radio Fan, 24 Morley Ave., De

* * *

TAKE RECIPES OFF TH BROADCAST

SECOND the motion of the Floric Take recipes off the broadcast, have cooks, neither do they go to rants, but with domestic science bo magazines loaded with recipes, an sionally having a mother who kno to cook, housewives should be able vive.—Mrs. Lucy LaPierre Reed Holmes St., Kansas City, Mo.

* * *

HERE'S A FUNNY LETTER

Radio Concerts
Every Day Is Open House
Personal Representative of
Faith, Hope and Charity

Mrs. H. B. Buckeridge
729 Pine St., Port Huron, Mic

Dear Arthur—— Francis——
Byron—— Justin——
Beatrice—— Gla

I COULD not live without the DIGEST. I am a shut-in. Have s dren and all are married and away. Buckeridge must write to them of the businesslike salutation printed letterhead.—Editor).

They gave me a Radio on my se birthday, and as I am such a Radi want to know all about my new fa Mrs. H. B. Buckeridge.

* * *

GET OUT THE V. O. L. G

HAVE your January issue at hand page 82 I find that you want m We enjoy the magazine very much an like Coon-Sanders, and also Sen Kan nouncer. We feel we know the s reading the magazine.—A. M. Dav 14, Gastonville, Pa.

* * *

WHEN JESSICA WAS A GI

JUST a few lines to let you know enjoy your wonderful magazine picture I liked was that of Jessica I ette. You know, every time I h singing on the Radio, it brings back ories of my younger days.

I remember her singing in the Choir when only a small child. Wh sang a solo on Easter Sunday one yea one in church sat and listened to wh thought was the best singer in the To think that today she is one of t sopranos of the country!—Frank B. 6070 Callowhill St., Philadelphia, Pa.

ONGRATS" FOR "PIPES OF PAN"

.OW me to congratulate you on your
age, "The Pipes of Pan." The organi-
of the Society for the Prevention of
y to Radio Fans is a noble idea. The
casters need their "wrists slapped" as
ay. There are so many programs that
holly inane and unjustifiable. For in-
, tonight I listened to the "Sleepy
Orchestra" from WMAQ. They
l a good selection or two and then came
to *Can This Be Love?* When a good
tra which is supposed to present some particular type of music, presents foolish stuff like the tune mentioned it becomes just another orchestra.

Go ahead. Slap them plenty.—Calvin Cannady, New Harmony, Ind.

* * *

CLASSICAL MUSIC AND DR. WILLIAM BRAID WHITE

THE articles by Dr. W. B. White are the leading features in your magazine. He is certainly right when he says classical music should be explained by the announcer before played. I think this point cannot be stressed enough.

Also enjoyed Maria Jeritza's article. "The Golden Baton" was very good. Anything David Ross does is good.

I'm very much interested in articles about announcers, which I find very few and far between. (Follow Marcella's columns—she often prints sketches of the "lives of our great announcers"—Editor).—Carroll Kilpatrick, Woodley Road, Montgomery, Ala.

* * *

THE RIGHT SPIRIT

JUST a word to say that I get a great deal of enjoyment out of your magazines and am passing them on to a "shut-in" who feels she knows the Radio stars after seeing their pictures.—Mrs. C. E. Clement, 8780-97th St., Woodhaven, L. I.

* * *

OF COURSE MR. VALLEE WRITES HIS OWN ARTICLES!

I'D like to ask a few questions in regard to Mr. Vallee. Where does he live? (*New York*). Does *he* write the articles appearing in the magazine? (*Yes—he dictates them, then re-reads and corrects them. His manuscript for Tuneful Topics in this issue was mailed from Miami, Fla., where he was on tour with his band.*) Is he going on a tour of the Paramount theatres soon? (*Yes—see last answer*).—A. C. S. Brooklyn, N. Y.

* * *

WHAT RICHARD DOESN'T LIKE—

GOT the December issue of your Radio magazine the other day. I used to get your magazine a year ago when it was something. In those days it was a humdinger. I'll list the things I don't like in the December issue:

First. "Million Dollar Radio Rum Ring" is the first. If your readers want all this detective stuff, they'll buy a detective magazine. Second. "Making the Most Out of Matrimony"—there are plenty of "True Confession" magazines for the ones who want this love bunk. Give us pictures, more of them, give Marcella more space, and cut out these stories that don't have anything to do with commercial broadcasting, like "John Garland the Deliverer," "We Are All Poets," "Hooked Rugs" and "Stretching for Beauty." Yours for a bigger and better Radio Digest.—Richard Douglas, 1130 Krug Park Place, St. Joseph, Mo.

* * *

THAT'S WHAT "W. P." LIKES!

EACH month finds me more interested in your publication, especially the Voice of the Listener page. Am looking forward to another Oppenheim story, like "John Garland." "Radio Rum Ring" is interesting.—W. P. Smythe, Louisville, Ky.

FANS, WE'RE ASKING YOU

ALTHOUGH this is my first letter to you, I am an old time reader of Radio Digest. I used to buy your magazine when you looked like the *Police Gazette*.

In those days you featured pictures of Radio stars and celebrities. Now you feature articles and stories by well-known people. Which do the fans like best? Why not ask them?

What do we care about the man who made the first moving picture? Tell us about the first man to broadcast. Who cares what George Bernard Shaw says about this and that? You're paying these people a lot of money. Why not put that money into the Digest by securing more Radio information?

Don't mind me. I'll buy the darn thing even if Einstein gives a detailed account of that theory of his.—John C. Barry, 49 Worcester St., Nashua, N. H.

* * *

HERE'S THE VOTE ON LOGS

AS A DX fan and an ardent reader of your magazine I should like to voice my opinion on logs. I, for one, would have no use for Radio Digest without the splendid log which you have been giving to your readers. The Chain Calendar has no value for me, nor has the Alphabetical List, but when you have the State and City Index, and Official Wave Lengths, that is all I want—Frank X. Scott, 41-26 Gleane St., Elmhurst, N. Y. . . . Keep up the Log, Wave Lengths, State Index, etc., if not each month, every other month—Mr. and Mrs. Perry Van Meter, Davenport, Wash. . . . My vote is for the Alphabetical List and the State and City Index, three or four times a year—H. G. Myers, 607 So. Home Ave., Oak Park, Ill. . . . I think that the Official Wave Length is all that is necessary—Mrs. Walter Hart, Alpena, Mich.

* * *

I DON'T think that such a great number are necessary and think that space should be used for pictures—Norman L. Benner, Souderton, Pa. . . . By all means have all lists in each month. There were new Cuban and Mexican stations in last issue that weren't in previous numbers—the listing helped me identify them—L. E. Stewart, Winchendon, Mass. . . . I was very much disappointed because the January issue did not have the Chain Calendar as I always refer to it—Mrs. Leonard Walter, 501 S. Bedford Ave., Evansville, Ind. . . . Imagine my disappointment when I found the Chain Calendars missing!—H. J. Bollin, Nacozari, Sonora, Mexico. . . . It is quite interesting to look back at old issues of your magazine and see, from the Chain Calendar, what was on the air at that time—R. Arnold, 1663 Dwight, Springfield, Mass. . . . Alphabetical list? Yes, indeed, each month. There are so many changes. Official Wave Lengths? Yes, indeed, each month. Many times in locating new stations we get the city and state but not the call letters. State and City Index? Yes, indeed each month? Chain Calendar Features? Yes! Yes! Yes! every month!—Frances Cherry, 605 Logan St., Wayne, Neb.

* * *

SORRY Frances, but there isn't room enough to print each log *every* month. However, we can promise one each month, together with the Chain Calendar. This decision was made in view of the overwhelming votes in favor of Logs.—The Editors.

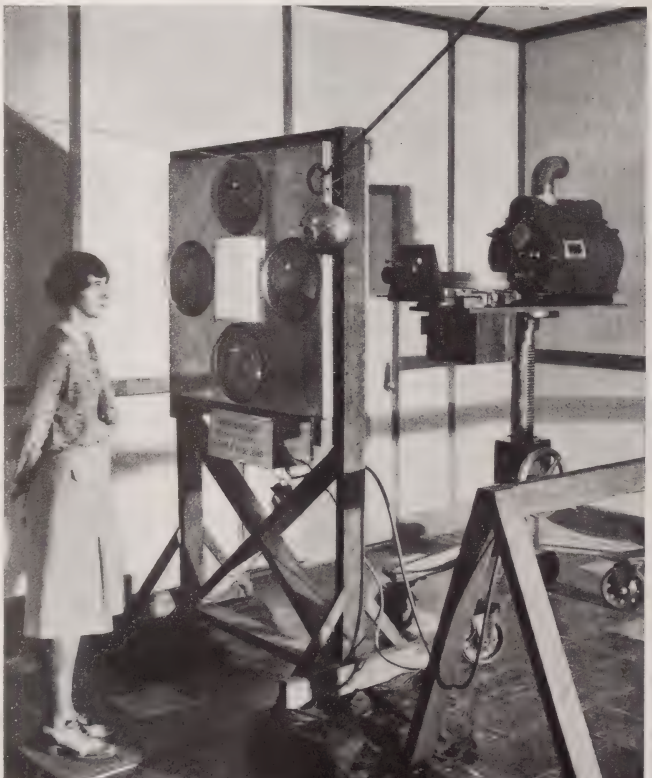
Scientific Progress

By Howard Edgar Rhodes, Technical Editor

How The "Televisor" Works

IMAGINE yourself in the combined television and broadcasting studio of WIXAV at Boston, Mass. Movie camera men rush into the room. The camera man sets up his tripod and camera, the sound men their amplifiers and microphone, the giant, intensely bright spotlights are turned on. The apparatus is tested, adjusted, and the cameraman finally utters a short crisp "O. K."



The stage is set—set for the televising of Rudy Vallee and the taking of motion pictures to record the event, the first time that a figure so prominently in the public eye as Rudy Vallee has been televised. Rudy Vallee enters the room. He is interested in the apparatus, wants to know how the television machine works, but time is short. He is playing at a Boston theatre and in an hour he must return to the theatre for another performance.

He is seated in front of the television apparatus, the arc light is turned on, the spot of light scans his face, sweeps across his face some fifteen times a second, each time breaking up the light reflected from his face into some 2,000 distinct parts. Each distinct signal is then amplified millions of times, is finally impressed on the main transmitting tubes and leaves them to go over the air, to be picked up by those who have television receivers and who are tuned in on the station.

After a short while Rudy Vallee is shown the television receiver. Seated in front of it he sees a reproduction of a photograph of himself being held in front of the television transmitter. The picture he sees is about three inches squa has a pale pinkish glow like tha neon advertising sign.

Then more movies of him sea front of the television receiver, the ing of cameras as newspaper ph phers snap his picture, and the a time has passed.

Rudy Vallee passes out of the st hurry back theatre, wh schedule he begin his pe ance has be ured to the ute. The sion eng breathe again, the men sigh. T is done. and through wit hitch.

Television sending apparatus at WIXAV, Boston. A spot of light sweeps across her face fifteen times a second, breaking up the reflection into 2,000 distinct parts to be broadcast.

IT is pr that the public doe realize the to which television pr are being bro by various s throughou country. I Boston, New Washington Chicago area ticularly, programs ar out on re schedules; transmission not haphaza occur regula definite sp times. As a "lookers" (t ufacture a equivalent t teners) are a tune in re television grams, just broadcast li tunes in his cast program

of the Radio Arts

evision pro-
ms are not as
ied or as great
number but at
it the art has

tions on the air.
me of the com-
nies operating
evision stations
ite frankly that
programs they
nsmit are for
e sole benefit of
ese experiment-
s, while other
oups insist that
e television re-
iver has been de-
loped to the point where it can be used
the average person and that television,
erefore, has passed the experimental
ge and has reached the point where it
quite practical. One group states that
levision is still "experimental"; the
her group states that television is
ere."

Who is right? If we base our opinion
the program value of the average tele-
sion broadcast, we would be inclined to
ree that it is still experimental for the
ograms and their reproduction is quite
ude and will not hold the attention of
e average person. But it is question-
le whether the practicability of televi-

Television receiver. Picture is three inches square and has a pale, pinkish glow.

sion should be based on the merits of the program any more than the practicability of the automobile depends on its appearance. If the television receiver is quite simple to operate, if it will maintain its adjustment over fairly long periods; if, in other words, it does not require an expert to operate it, it has certainly passed the experimental stage.

Let us also get away from the meaningless phrase "television is still in the laboratory," which in this age of scientific development might be applied to most any device. Television may now be in the laboratory stage—but so will it be ten years from now. Perhaps what we really mean when we refer to television as still being in the laboratory is that we have no assurance that the present methods of television transmission and reception will not be superseded by much better methods.

This is a moot problem. Once the sale of television receivers to the general public begins manufacturers tie themselves to a particular system. A newer and much better system could not easily be adopted, for it would render obsolete all the existing television receivers. So long as the sale of such sets is limited to the experimenter we can change systems as often as may be necessary, for the experimenter realizes that the television receiver he buys may have to be rebuilt frequently to conform with changes in methods of transmission.

The writer, for one, does not want to suggest that now is the time for the public to buy television receivers; we do not believe that the reproduction is anywhere nearly good enough to satisfy the public. And we are not alone in this opinion. Up in Boston is located the Shortwave and Television Corporation, who operate WIXAV, over which Rudy Vallee was televised. In the laboratories of this company a simple receiver has been designed to be sold in kit form by Kresge stores throughout the country. But in spite of the fact that greater sales of these kits might be had by heralding television as an accomplished thing,

Beauty Is As Beauty Thinks

(*Continued from page 15*)

look around her "soul's windows", to boot.

"Now look at this other picture," continued Bernadine in her pianissimo voice which, even in ordinary conversation, seems to whisper crooning lullabies.

It's a long, long way from Greta Garbo, the dramedienne (lexicographers, please note as opp. to comedienne for purposes not fully covered by tragedienne) to Nancy Carroll, the ingenue, but Bernadine made the complete journey, the while the photographer, smothering beneath the black pall, feasted his eyes upon this her beauty.

How is it possible, it may be asked, to reflect such widely different characteristics with but a single face? Simply by taking the Special Hollywood train, Mental Express - ion and stopping off at the visage of your favorite actress. "That's the whole solution," said Bernadine as she rested for a moment out of character.

Of course, some very learned and sage ps-ps-psycho-analyst may come along and say that there is a subconscious reason for it all—that it's the calories that actually do the work—calories plus the cooperation of versatile vitamins. But a chorus of *boshes* throws Psir Psychist off the soap-box, for the reason that very few aspiring artists with the slender, airy form of Bernadine, wish to make the acquaintance of calories. Not that she has to go diet-wise, mind you, for when Bernadine comes, it is like the rustle of spring—there is that freshness of youth about her—but she is wise enough to look ahead, and she shudders at the forbidding shadow of the rippling chin.

The interviewer, however, having no compunction over calories, proceeded with the healthy appetite and purpose of the average consumer while Bernadine raved on about the bigger things in life. She said:

"One's attitude of mind has everything in the world to do with one's success and activities. Just as I portrayed Greta Garbo and Nancy Carroll at will, that is how I can bring success to my work.

"Sometimes when I find a tendency to yield to discouragement, I just shake myself and affirm that I *can* go on and make progress continually. And back of this urge for success is the desire to please my parents. Believe me, it takes all the determination I have to rise above seeming obstacles and their attending difficulties—but these trials do make one grow. Looking back, I don't think I should have foregone any of the experiences I have been through when I think of the golden lessons they held for me.

"And now I'm off to Hollywood and my advice to everyone is, think success and you will bring it into your lives, think beauty and beauty will come into your experience—but it has to emanate from your own thinking."

By this time we had left the restaurant and were going through the busy streets of Manhattan. The hurrying throngs of people who caught the music in Bernadine's voice turned their h and looked after her.

Bernadine has her audience now. any place she happens to stand on become her stage.

Added to her many gifts as an ac and Radio artist is her leaning to writing poetry and composing musi

"I don't know how it happened, b was walking along the street one and the whole song just ran through mind. Here, let me hum it for you."

Against the background of New Yo throbbing symphony of familiar ton train rumblings, auto whirrs with an casional clang of fire engines—Berna sang her little song. Its merits have ready been recognized by a music p lisher, and readers of this article probably be hearing arrangements o over the Radio very soon.

Bernadine waved a sweet farewel she turned the corner.

"Think success and you will brin into your life," I murmured. There philosophy that's worth while, easily derstandable and applicable—not pendent on deductions, logic or a p reasoning. It worked with the ph graphs, why not with the problems being?

It became clear after this chat, so many gifted people are complete ures, while others with fewer talents great successes. The person who ceeds has a native philosophy, a de mination to conquer all odds and a for people. And Bernadine has all these elements.

Tuneful Topics

(*Continued from page 67*)

arrested my attention and I asked sing it for me. She did so, and old me that it was a song that Lyman had often sung for her. sang it I felt that melodically ere several places that could be much for the better; lyrically, ere were possibly a few different that might make the song more

firm of Leo Feist, with whom I ociated, through its professional r, Rocco Vocco, sought to get in with Lyman. Rocco, an old friend an's, thought he might be in Paris, ally discovered him in Chicago. It ficult to find him because he was he life of a recluse and did not talk with anyone as he was not ed. Negotiations continued and from Florida came a letter from anting permission for the song to ished, and giving the name of the erson with whom he had written g. Both Rocco Vocco, and other who listened to the original ver- elt that the changes I suggested perative and necessary; they have corporated into the song. I look publication almost any day.

story of the song is that if the s he doesn't want her, doesn't miss d doesn't want to kiss her, and as ix, doesn't love her, he is lying. song that gives me a great deal yment when I present it.

do it slowly, at thirty-five meas- minute, and it will be published Feist.

Just a Gigolo

IIGHT be expected from the word igolo", this is a European compo- "Gigolo" is either unknown to mericans, or possibly repulsive to who do know what it means. In am sure that the simple country this land of the free have only a dea of what a gigolo is, but New ublishers take for granted that e knows what Manhattan knows. golo, at least a male gigolo, is a man (usually), who is engaged by lady (usually, though not neces- to take her to tea dances, to din- supper dances, theatres, shopping; to be, as it were, a temporary d, bodyguard, and servant. When d at the Savoy Hotel in London -25 the management employed two men who invited unescorted ladies e. While these young men liked themselves instructors, escorts, or ave you, they knew that they were d as gigolos. The popular con- pictured is the Valentino type of man, with black, straight, sleekily air, a pale, sensitive face of per- fect proportions, always thin, somewhat effeminate, and usually pictured in swallow-tails, or to be plain, full dress. At any rate, whether or not the two young men at the Savoy Hotel were gigolos, I have really seen some who admittedly were because they were at many tea dances to which I went for recreation on my afternoons off in London, and in every case they were very excellent dancers. For me it was depressing to see them and their partners; such an unfair combination of old age and youth, yet both so extremely happy and apparently wrapped up in each other, dancing fairly well considering the difference in ages, and watching with intense interest all the other dancers. If nothing else enticed them to the floor the tango always did.

For that reason I expected this composition to be a tango. The song, as it is published in America, is not a tango. I am in doubt as to just what to call it; it would make a good waltz but it would be too long-drawn out. It is published as a fox-trot though, and here I must become technical for a moment, for if you play it as it is published I believe the true beauty of the piece would be lost. Like *My Ideal,* of which I spoke in last month's issue, we find it necessary to lengthen the piece, giving twice the value not only to each note, but to each measure, or bar, as it is more commonly called, in order to bring out the true melodic value of it. That is, where there is an eighth note, we play it as a quarter note. The single notes contained in one measure we find it necessary to divide into two, in order that the piece does not sound hurried and short. Some of the bands play it as it is written, and others play it the way I have just described. If you listen to it over the air with the composition before you, I think you will see just what I mean.

Due to the odium and repulsion that I, and most Americans, feel toward a person who sells his services to a lady, I have not sung the song, although we have played it. Even a different version, putting the gigolo into the third person instead of the first, as it is written, would still not solve it for me.

While we have the female equivalent of the European gigolo here in the "kept woman", strangely enough the sight of a gray-haired man dancing with a very young girl seems to us more logical than the reverse, but as Moran and Mack used to say, "Who cares 'bout dat?"

Gigolo is a very pretty melody, and in spite of its lyric is selling very well. Howard Lanin, at the St. Moritz in New York, uses it, heaven knows why, as his Radio signature! I find myself humming the melody often; it is a pretty one. It is published by De Sylva, Brown, and Henderson.

Say Hello to the Folks Back Home

HERE is a tune dangerously close to being hill-billy (folk songs which have originated in the mountain districts of the backwoods states which the natives have sung for years). Some publishers would contemptuously term it "corney", meaning that it is too trite and *Home-Sweet-Home-like* to be classed as a popular song, but it is the type of thing that appeals to the masses.

Carmen Lombardo, the gifted singer, saxophonist, and song-writer, of the four Lombardo brothers, whose delightful music entrances all who dance to it or hear it over the Radio, contributed to this composition, and Benny Davis, whose list of hits looks like a laundry list, collaborated with Carmen, and these two have given us a popular song which might well be sung by any stranger thinking of his home town and the folks he left behind him. It is a good song.

It is published by Davis, Coots and Ergel. We play it in what we call semi-slow tempo, or about fifty-five measures a minute.

Something to Remember You By

I SUPPOSE I will never think of this composition again without associating it with a grapefruit! In fact, I should banish the song forever from my mind and never think about it again after what happened in Boston last week. It never occurred to me that it would make a suggestion to the mind of a young college student, who answered the plea of the song by hurling from the balcony a real grapefruit! I like to feel that he was not so brainless as to want to hit me as I played my saxophone, because obviously it might have injured me quite seriously if it had struck the saxophone while it was in my mouth. As it was, it hit upon the cymbal of my drummer, several feet away.

That was the only thing thrown, but I continued to finish the song, at least for that show. Of course I took it out the next show, because there was no reason for inviting trouble. It was really a shame, because it is a very pretty song. In fact, although it is of the musical comedy type, and comes from the musical comedy *Three's a Crowd,* it wins all who hear it, unlike most musical comedy hits.

The thought is extremely simple, in fact, almost too simple. The melody is beautiful, and therein lies the charm of the composition. It was written by Howard Dietz and Arthur Schwartz. It is introduced in the show by Libby Holman, whose voice and personality have been the talk of Broadway even since her debut in the first *Little Show.*

Despite air restrictions and everything else, the song is played everywhere and is selling extremely well. But somehow for me it will always call to mind the picture of a grapefruit hurtling through the air.

We play it at a semi-slow tempo, about sixty measures a minute. It is published by Harms, Inc.

What Good Am I Without You

ANOTHER song by Milton Ager, of the firm of Ager, Yellen and Bornstein. Ager has written, with his partner, Jack Yellen, a list of hits that you have all danced to and sung in the past decade, songs such as *Ain't She Sweet?, Crazy Words, Crazy Tune,* the *Rain or Shine* songs, and many other big hits too numerous to mention.

He played this song for me months ago in my dressing room at the Brooklyn Paramount, and I was struck by the beauty of its melody and thought. As he played it, it was dangerously similar to *Body and Soul,* although he could not have been influenced by the other composition since *Body and Soul* had not yet been published, and I, perhaps, was the only individual, outside of the publisher, who had heard it. Ager, subsequently, at my suggestion, revised the opening phrases of the song so that there was no chance of conflict between it and *Body and Soul,* and the song was published.

It has a sort of minor, unhappy strain running throughout it, and its chief charm lies in its melody and harmony. I have heard it rendered delightfully by many artists. It makes a good dance tune when played slowly enough. We do it at thirty-eight measures a minute, and we pitch it much lower than its original key, due to the fact that it goes pretty high.

Lonesome Lover

NOT since *I'm Just a Vagabond Lover* has there been another "Lover" song to achieve any popularity. Personally I dislike singing a song of this type because I dislike to lend the impression that I am giving a song that shows me as the lover in question. Peculiarly enough, *Lonesome Lover* is published by the same firm that published *I'm Just a Vagabond Lover.* It is another song that can be credited to the good taste of Rocco Vocco.

It was written by Al Bryan and Jimmie Monaco. Bryan is a poet among songwriters; he has written several books of beautiful poetry, and as a rule his lyrics verge toward the æsthetic, poetic, highbrow type, although he has written very popular songs, such as *Song of the Nile.*

Monaco wrote the melody for the old hit, *Dirty Hands,* for *Through,* and *Me and the Man in the Moon.*

Like Irving Berlin's *What'll I Do, Lonesome Lover* is published both as a waltz and a fox trot. The reason for this, I suppose, is that although the beauty of a fox trot may be destroyed by an orchestra playing it too fast or too slowly as a fox trot, there is little chance of their going wrong if it is a waltz, because the waltz is standard tempo. I believe that is the reason back of *Lonesome Lover* being published both ways. It was a smart move.

I used *Lonesome Lover* as an example of how our band plays regular tempo fox trots in a little Paramount Pictorial movie short which I made a week ago. It is the only song which I really sing in the picture, and it served as a very good example. One hears it a great deal on the air, and it seems to be selling quite well. We play it at about sixty measures a minute.

I Hate Myself For Falling In Love With You

THIS is perhaps the first hit of which that new firm of Silver Songs, Inc., may boast. Abner Silver, writer of *I'm High Up on a Mountain Top, C'est Vous* and *Mary Ann,* is already a very familiar figure in Tin-Pan Alley and the minds of music lovers. Cornell, who unquestionably contributed some of the melody, is one of the clever team of pianists, Shutt and Cornell, who are so delightful in their Radio hours. Dave Oppenheim is one of the few millionaires who dabble in lyric writing. Oppenheim owns a chain of over fifty beauty shops, and coins a fortune every day; the writing of lyrics to music is merely a pastime to him, as he assuredly does not need the few thousands of dollars that may or may not eventually come to him if the song is a hit. Still he is intensely proud of his published compositions and enjoys hearing them played.

Silver I have known for some time, and have listened to and helped pick many of his compositions before he went into business for himself. All three of the boys deserve commendation for their work on this song. It is distinctly away from the average song, both in melody and lyrics, and one that is a pleasure to listen to.

We find it necessary to play it at about thirty-eight measures a minute in order to bring it to our listeners in the way we feel it should be interpreted.

Amos and Andy

(*Continued from page 48*)

is responsible for Amos and Andy appearing in camouflaged parts. Neptune arouses the desire to assume an entirely different physical appearance, and in Amos and Andy it expressed itself in the black make-up. Neptune is also responsible for the sound philosophy which they teach under the guise of humor and in amusing plots. Both Amos and Andy have a profound interest in the welfare of mankind and an overwhelming desire to help make this world a little better place in which to live, and it is the Aquarian feeling of brotherhood, expressing itself through the Neptunian ray, which makes it possible for them to entertain us while they are also teaching us big lessons in the way to live. (Aha! *Knights* of the Mystic Sea!)

Andy has Capricorn rising and

:a—hoping that here he would at-
is goal.

lid not attain that goal immediately.
he served as accompanist to many
ted artists, and as assisting artist
Letz String Quartet. Finally,
ained his Nirvana. One day, un-
edly, a call came from the manager
Rivoli Theatre, New York—you
ave heard about that manager; his
is S. L. Rothafel—asking Rapee if
uld like to become the musical di-
of the theatre. Rapee consented
; instinctively he felt that it would
first important step in his musical
as symphonic-conductor. And
hat time on dates not only Rapee's
:torial career, but also a friendship
is employer, "Roxy", which has per-
for more than fifteen years, con-
growing stronger and stronger.
ceforth, wherever "Roxy" went, he
take his musical director with him
so, from the Rivoli Theatre, where
remained for two years, he went
Capitol and, four years later, he
o Roxy's own theatre. Here, Erno
attained his much-desired and cov-
oal. For here he had, at last, at his
al a symphonic orchestra which
nevitably rank with the great sym-
orchestras of the world.

o Rapee will soon see his fortieth
ay—on June 4th, to be more spe-
yet, notwithstanding the strain of
ofession he looks far younger. His
clear and smooth, his eyes bright,
s actions brisk and spirited. More-
ie has the energy, the conscientious-
nd the zeal of a young boy. He is
thin, almost puny-looking. When
oks at him casually one is apt to
r how it is that such a small, slim
can domineer two hundred per-
rs with the tip of his baton. But
one is at closer range, one begins to
: sharp-edged cheek-bones that seem
ak of determination and will-power,
bove all that inextinguishable fire
urns in his eyes. And one begins to
stand that when he is on the con-
's stand with baton in hand, his
e size is forgotten, and only his
ality is apparent to his musicians.
is a very busy man. He must be
rly in the morning to attend the
arious rehearsals which are always
place at the Roxy Theatre by
s or orchestra, and he cannot leave
ieatre until ten o'clock in the eve-
when his orchestra is relieved by the
-films. This routine is invariable
day in the week, every week in the
Fortunately, conducting is at one
his vocation and avocation; it is
is greatest pleasure in life. Other-
he rigid routine would be well-nigh
rable. In fact, conducting is such
isure to him that he recently sacri-
ficed almost $40,000 a year to return to the conductor's stand at the Roxy Theatre from his important—and what proved to be temporary—musical post in Hollywood. And he is only too happy to have made the sacrifice, he will add joyfully.

The rigid routine of his work, of course, permits him almost no recreations. Next to conducting he loves best to lie late in bed—and that luxury has been denied him for years. Night life does not interest him in the least, nor raucous wild times. During spare hours, or in brief vacations, he enjoys nothing so much as to spend quiet and restful hours with his family. For Erno Rapee is entirely a family-man.

He will tell you that he is a better pianist than he is a conductor—but for such as myself who have admired so many of his interpretations over the Radio this is a little hard to believe. At any rate, Erno Rapee is a pianist of the first-order. If he had not chosen the orchestra as his career he undoubtedly would have made a great name for himself as a concert-pianist. Even today, although he no longer practises as much as his fingers require, he plays the instrument with remarkable adroitness and facility. Will he ever be tempted to appear as concert-pianist in a well-known Concerto during one of the Roxy broadcasts?

He has another great distinction—but concerning this he very rarely speaks. The same pen which has composed symphonies and quartets which lie at the bottom of his trunk have also created at least four popular and unforgettable tunes which a few years ago spread from lips to lips like some contagious disease and became four of the really outstanding song successes of our time. The first of these was the overwhelmingly popular *Charmaine*, the theme-song of *What Price Glory?* And after *Charmaine* came *Angela Mia, Diane*, and *Mother o' Mine*.

But his fame will rest primarily in his baton. Erno Rapee may be a little man—but he is a little man with a big stick. That big stick has made more than one Sunday memorable to Radio music-lovers throughout the country!

Cinderella

(*Continued from page 77*)

Now there are modern Cinderellas and there are many potential Cinderellas, too. Often these potential Cinderellas write to me in this way: "I want you to be a fairy godmother to me and transform me into a modern Cinderella. Won't you work some magic on me?"

And there *is* magic in this day and age—magic just as powerful as any which existed in the fairy tales. The fairy godmother's wand in 1931 is a combination of patience, persistence and perseverance. And the private life of the Cinderella of 1931 is based on the same policy which won the original Cinderella her prince—the policy of preparedness and a realization and observance of the prime importance of "the little things in life".

Marcella

(*Continued from page 65*)

being an announcer he sings and plays and he is also the creator of the *Novel Half Hour*, one of the station's popular features. He met his wife, ask me where? Of course in a Radio station. She plays the fiddle—and what she can't do with it!

* * *

THE reins of WTIC, Hartford, have been taken over by Paul W. Morency. Being equipped with a Ph. B. from the University of Chicago and a thorough education in business administration, Mr. Morency promises to fill this new position more than adequately. For the last two years Mr. Morency was manager of field service of the National Association of Broadcasters of which organization he is at the present time treasurer. Congratulations, Mr. Morency, on your new post, and we're expecting big things from you.

* * *

HELEN McD. of Oklahoma City wants light on the subject of Harold Sparks. Footlights, please *a la* Hank Simmons in *Show Boat*. Flash the orchestra. Ready. Jeff Sparks is only seventeen, girls. He is a former student of Webster, Jr. and Central Senior High Schools where he dipped into electrical engineering and motion picture projection. He emerged from these highly illuminating courses to take up announcing. Altitude five feet, six inches. Fair complexion contrasts strikingly with his black hair. Brunettes, he has a predilection for your type of beauty! Don't all rush at once. As far as is known to us he is one of the "youngest announcers" on the air. Writes all of the continuity for programs he announces. His favorite hobby is playing billiards with staff artists of KFJF.

* * *

TWILLA of Salina, Kans., Marcella wants to thank you for your patience in waiting all of this time for a picture and a word about Monte Meyers, KFAB's nitwit, jokester and clown, according to Budd Houser. I'm wondering what villain dared to go and paint that flourishing mop of hair and diminutive Van Dyke beard. Monte's ancestors came from the land of Killarney, hills and *laiks* and dells.

* * *

WOULD you like to know how Leo and Bill teamed up, Twilla? Well, a little over five years ago Bill was engaged in the enviable occupation of driving an ice cream wagon up and down the streets of Kansas City. As Leo purchased these frozen delicacies each day, they were brought together more and more until an exchange of confidences revealed that each cherished a hidden desire to sing. They formed a harmony team and first appeared as the Silvertone Twins in a Kansas City station. A few weeks ago they celebrated their first anniversary over WIBW. Their full names are Leo Bates and William Rockwell. Bill is married, but Leo is still holding out.

L. J. Barnes of WGY, Schenectady, is very modest according to Clyde Kittell, Program Manager of that station. L. J. or Barney started out as control man but one day when he was at work on a remote job, the regular announcer failed to turn up. Barney quickly took up the lines and dsplayed such ability and ingenuity that he was added to the staff of announcers.

* * *

J'ai chante, hier,
J'ai chante, hier,
J'ai chante, j'ai chante,
J'ai chante, hier.

WHAT may all of this ado be about having sung yesterday? Simply this, that by the use of phrase repetition Dr. Thatcher Clark has achieved great success in teaching French via Radio. He calls the nation-wide group of listeners, that number into many thousands, the United States French Class of the Air.

With these French lessons and the aid of Dr. Clark's book, *French Course for Americans*, the student gains ground very rapidly. In Dr. Clark, Radio listeners have one of the best known educators of the day. He was formerly of the Romance Language Department at Harvard University, and also French Lecturer at Teachers College, Columbia University. Yet with this highly academic background, Dr. Clark has been able to master the exquisite technique of simplicity in teaching those who want to add another window in their lives. On the sixteenth floor of the same building where Ida Bailey Allen holds her broadcasts, Dr. Clark instructs day and evening classes and Radio listeners are invited to have as many tryouts as they want before they definitely enter their registrations. The great enthusiasm of the Radio audience for these lessons is evidenced by the enormous mail received by Dr. Clark —something like ten thousand letters during the two years he has been on the air.

* * *

SOME months ago Marcella had a picture and a few lines of George D. Hay the "Solemn Old Judge" of WSM, Nashville, Tenn., but new readers of RADIO DIGEST not having seen it have written for another sketch. So here it is. Mr. Hay, known to his listeners as the "Solemn Old Judge" is but thirty-five. He has attained to the very height of success not only because of his originality but because he never fails to broadcast a smile. Before appearing on the Radio-scene, Mr. Hay was a newspaper reporter and feature writer on the Memphis Commercial appeal. And anyone having anything to do with Radio knows "that a nose for news" is quite indispensable, as Mr puts it. He began his Radio caree at WMC, Memphis through which erated the imaginary steamboat u down the Mississippi. Then over at Chicago, his visionary means of portation was a locomotive. He w RADIO DIGEST's national popularit cup championship at WLS.

* * *

PAT BINFORD, announcer at W Richmond, "Virginny", is quickly fied by the southern drawl he u introducing his programs. "Good customers, everybody happy? about to be disturbed . . . " But fr number of friends Pat has won ov Radio they sho' does enjoy beir turbed. His full name is Philip N ford.

ilty? or Not Guilty?

(*Continued from page 25*)

rs this story. The *Trial of Vivienne* e had increased the circulation of the spaper far in excess of expectations with the readers clamoring for further l drama the circulation manager in- d that it would be unfair to them not ontinue. And Editor Coblentz agreed him.

enneth Ellis was instructed to find the proper procedure necessary in a case of this kind and write the nec- ry scripts.

leanwhile the success of the New k local broadcast warranted other lo- broadcasts of the *Trial of Vivienne* e in cities where Hearst newspapers ublished.

he San Francisco *Examiner* sponsored trial over Station KTAB with a local which included famous legal lights in parts originally played by Wagner, le and Pecora. The same thing hap- d in Chicago at Station KYW with *Herald and Examiner* as sponsor; in Angeles at Station KFWB with the *miner* of that city the sponsor; in oit at Station WJR where the *Times* me the sponsor; in Washington at ion WRC, with the *Herald* as nsor; and at Omaha over Station L, with sponsorship credited to the *News*.

he result was the same in every in- ce. The Radio audience demanded e court procedure in its dramatics, and of the great lessons which the spon- learned was that, by means of a io play, many of the objections of citizens against serving on a jury were g overcome. The broadcasts were ing as an educational campaign in ting an interest in court procedure and overcoming the popular bugaboo nst jury duty.

ardly had the talk about the *Trial of enne Ware* begun to die down when New York American announced that fictional character of Dolores DeVine been apprehended and would be given third degree in a single broadcast over Z on the 19th of December.

he evidence which was procured at third degree was enough for the nd Jury to indict the cabaret dancer in another thirty minute broadcast, New York listeners were then treated perfect reproduction of a Grand Jury ction. After this further education of public into the mysteries of legal nique a "true bill" against Miss De- was filed and she was given a Radio during the week of January 12th.

s in the first trial eminent legal minds e brought to the microphone as actors ne drama. For Miss DeVine's defense ver the services of George Leisure, ner assistant United States attorney ne Eastern District of New York, were ined. Ex-Governor of New York e, Charles Whitman, acted as the prosecuting attorney and Jeremiah T. Mahoney, former Supreme Court Justice, sat on the bench in this, the second trial to be held in the Special Air Court of General Sessions.

As this is being written the result of the jury's finding for the defendant, Dolores DeVine, has not been rendered but, from the evidence submitted, it looks as though the guilty person has not as yet been found. It is, therefore, quite possible that a third defendant may be given a Radio trial. This depends entirely on the attitude of the listeners and their responses to the DeVine trial just finished.

Whatever happens, those listeners who were fortunate enough to hear the broadcasts already given have received a more thorough understanding of true court procedure through the medium of a dramatic vehicle than it would be possible to instill by a course of lectures.

Most interesting of all are the comments of the three lawyers who took part in the *Trial of Vivienne Ware*—comments made *after* the broadcast.

Senator Wagner expressed his personal desire "at all times to give matters of public interest the widest possible airing," later amplifying the statement by saying that murder trials should justly come *within the province of Radio broadcasting!*

Battle said that his participation in the fictional trial had thoroughly convinced him, despite his earlier doubts on the subject, that actual trials could be broadcast without threatening the dignity of the court.

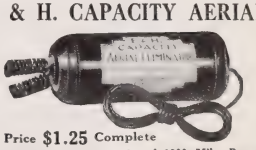
Pecora doubted the feasibility of broadcasting actual trials, fearing that such procedure might rob the court of its judicial dignity, but staunchly favored the project when told that the microphones could be suspended from ceilings instead of being placed before participants.

This means there is something more than a bare possibility that, in the near future, listeners may be privileged to hear real court cases over their loudspeakers.

The "trial" programs sponsored by the Hearst newspapers in various parts of the country certainly gave the jury system a good airing but we could stand more, especially if the trials were coming from a courtroom where the participants in the drama were in dead earnest.

Without permitting the findings of a Radio jury to influence or affect the verdict of the twelve authorized jurymen it would be interesting to compile the ballots submitted by the listening public, following the broadcasting of an actual trial. All ballots mailed to the court would have to be plainly marked with the writer's name and address in order that the authenticity of each and every ballot could be checked. In this way it would be possible to obtain a sincere expression of public sentiment which could be compared with the verdict rendered by the real jury. If I were a presiding justice I would welcome such an experiment. Would you?

"Hold on! . .
That's a great set,
but the wrong solder
will spoil it!"



"Take my advice and use Kester *Radio* Solder when wiring and re-wiring that set of yours. It's safe and permanent and so easy to use that even a dub like I am can do an expert job with it!"

When you use Kester, all *you* have to do is apply heat. The flux is inside the solder, and the right amount of it flows to the job at the right time. The flux is plastic rosin — a non-conductor, and absolute assurance against corrosion. Leading manufacturers, service men, set builders and radio experts all over the country use and recommend Kester Radio Solder. Try it now — at our expense. Kester Solder Company, 4261 Wrightwood Avenue, Chicago, Illinois. Incorporated 1899.

F. & H. CAPACITY AERIAL

Price $1.25 Complete

Every Instrument Tested on Actual 1000 Mile Reception

The F. & H. Capacity Aerial Eliminator has the capacity of the average 75 foot aerial 50 feet high. It increases selectivity and full reception on both local and long distant stations is absolutely guaranteed. It eliminates unsightly poles, guy wires, mutilation of woodwork, etc. It does not connect to the light socket and requires no current for operation. Enables set to be moved into different rooms with practically no inconvenience. We predict this type of aerial will be used practically entirely in the future. Installed in a minute's time by anyone. Return in three days if not satisfied.
8,000 dealers handle our line. Dealers! Over 80 leading jobbers carry our line; or order sample direct.

Punctured Romance

(*Continued from page 49*)

a nineteen year old blonde, beautiful, alluring. I became my own vision of the desired maiden. Clarence Moore has the perfect Radio personality. His chuckle is as famous throughout the West as is Robar's fun. With a twist of humor to his mouth he read the lines I had prepared for him.

"Top of the mornin' to you, Kippy. How do you feel on this, your nineteenth birthday?"

"How do I look. Bill?"

"Well, from where I sit you are a riot. It makes me sad to think that I am only your brother. Um . . . so you are going to twine those lovely golden curls around Robar, are you? Well, he'll never be able to resist you."

After our program, Charley Scheuerman, the orchestra leader, doubled up over his violin.

"What you trying to do, Kippy, make NBC a subsidiary of Columbia?" Clarence chipped in.

"Looks to me like a case of mutton dressed as lamb."

"You are two kill-joys," I snapped. Clarence chuckled. "Where you headed, Kippy?" I thrust my beret down over my iron grey coiffure.

"I don't know, but I'm on my way."

Mash notes began to arrive . . . invitations for luncheon. I took to sneaking out the back door of KOA to avoid the rush. Who was I to blast young dreams? I began arguing with myself.

"You're an old fool, Kippy . . . be your age. All right you, shut up, I know this is my Swan Song. but its a humdinger while it lasts." Then would come the insidious vanities that are inherent to us all.

"This really is YOU, Kippy." Then in great big capital letters. "YOUR PUBLIC BELIEVES IN YOU! YOU MUST BE TRUE TO YOUR PUBLIC!" Thereupon I rushed off to Beauty Salons, acquired a ringlet permanent and suffered all those little things necessary when one is "between thirty-five." Just by way of sustaining the old morale. Oh yes, I was true to my public, but wisely I hid out on them. Always a voice warned:

"Let sleeping dogs lie, Kippy, have a care."

By this time, both Robar and I had forgotten that we had programmes to maintain. To me Robar was the personification of Prince Charming. To him, I was Heart's Desire. I had woven around him the perfection of youthful manhood and I had allowed my imagination to run riot. Craftily I placed words in Clarence Moore's mouth.

"Why the red rose this morning Kippy?" (A girlish giggle) "Robar sent me this red rose. I've got a date with him, and I am to wear his rose by way of identification."

The florists in Denver must have blessed me, for there came a flood of red roses from fans. From each box one rose found its way back to KLZ, to Robar. That afternoon:

"Robar, where did you get the red rose?"

"Kippy sent it to me, Verne."

"Not Kippy, the beautiful young thing on KOA? Who is she, where does she hide out, what does she look like?" And Robar, let 'er go.

"Kippy is the answer to a young m prayers. She is beautiful, she is you she is this and that. Said Verne, (c fully coached by Robar)

"Well, you're no slouch yourself. S a lucky girl if she gets handsome Rob Then a string of fun about red roses red noses. I nearly hugged the R

I was stepping softly around my s husband, these days.

"Having your fling, old girl?"

"Oh, just foolishness . . . just to n the programme click. Isn't that R person a scream?"

"If you don't watch out, Kippy, scream you're talking about may turn a Fire Alarm!" I brushed aside the dom behind the warning and went pl ing down the primrose path.

Came the dawn. Meaning, that Boyd returned and I sank into the livion of private life; to pink teas bridge, to what-not. I live in the Lane Hotel, one of those magnifi modern edifices where one may year on end and never meet a neigh One evening I was bidden to make a essary fourth at bridge. The zest disappeared from my life. All that left was the daily plea from Robar. plea that must always go unansw Bridge is a poor substitute for Adven

My bridge host was a bachelor, other two were Mr. and Mrs. Rosen I had frequently seen them and ha ways wondered how such a char woman had happened to marry a . . . yes . . . DUD is the word that to my mind. Mr. Rosenfield is the impeccable of married men; quiet, u suming, who rarely speaks unless sp to. Just a nice middle aged married

Vote For Your Favorite Station in Radio Digest Popularity Contest.

See page 5 for Story . . . Here are Rules and Conditions

1. The contest started with the issue of RADIO DIGEST for October, 1930, and ends at midnight, April 20, 1931. All mail enclosing ballots must bear the postmark on or before midnight, April 20, 1931.

2. Balloting by means of coupons appearing in each monthly issue of RADIO DIGEST and by special ballots issued only when requested at the time of receipt of paid in advance mail subscriptions to RADIO DIGEST when received direct and not through subscription agencies according to the schedule given in paragraph four.

3. When sent singly each coupon clipped from the regular monthly issue of RADIO DIGEST counts for one vote. BONUS votes given in accordance with the following schedule:

For each two consecutively numbered coupons sent in at one time a bonus of five votes will be allowed.

For each three consecutively numbered coupons, a bonus of fifteen votes will be allowed.

For each four consecutively numbered coupons, a bonus of twenty-five votes will be allowed.

For each five consecutively numbered coupons, a bonus of thirty-five votes will be allowed.

For each six consecutively numbered coupons, a bonus of fifty votes will be allowed.

For each seven consecutively numbered coupons, a bonus of seventy-five votes will be allowed.

4. Special ballots will be issued only when requested at the time of receipt of paid in advance mail subscriptions, old or new, to the RADIO DIGEST when received direct and not through subscription agencies according to the following voting schedule:

1-year paid in advance mail subscription direct..	$3.00	150 votes
2-year; two 1-year paid in advance mail subscriptions direct.....	6.00	325 votes
3-year; three 1-year; one 1 and one 2-year paid in advance mail subscriptions direct.	9.00	500 votes
4-year; four 1-year; two 2-year; one 3-year and one 1-year; paid in advance mail subscriptions direct.	12.00	750 votes
5-year; five 1-year; one 2-year, and one 3-year; two 2-year and one 1-year; one 4-year and one 1-year; paid in advance mail subscriptions direct.....	15.00	1,000 votes
10-year; ten 1-year; five 2-year; three 3-year and one 1-year; two 4-year and one 2 or two 1-year; two 5-year paid in advance mail subscriptions direct.	$30.00	2,500 votes

5. For the purposes of the contest the United States has been divided into 48 districts, comprised of the 48 states of the Union.

6. The station located within the borders of each State receiving the highest number of votes cast by individuals residing within the same State will be declared the Champion Station of that State, and will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the second largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the third largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the fourth largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

7. In the event of a tie for any of the prizes offered, prizes of identical value will be given to each tying contestant.

8. Any question that may arise during the contest will be decided by the Contest Editor, and his decision will be final.

g I was told was a Radio. After a great deal of manipulation and adjustment of ear phones we tuned in a concert in Carnegie Hall, Pittsburgh, and thought that quite wonderful.

Surely all that is a far cry from today when international broadcasts are commonplace and television on a regular and extensive basis is just around the corner.

Yes, I'm a Radio mayor and a Radio fan. I was inducted into office over the air. I'll face the microphone many more times before I "sign off" and then I'll probably go out of office over the air.

To those who think Learning Music is hard-

PERHAPS *you* think that taking music lessons is like taking a dose of medicine. It isn't any longer!

As far as you're concerned, the old days of long practice hours with their hard-work exercises, and expensive personal teacher fees are over with.

You have no alibis whatsoever for not making your start toward musical good times now!

For, through a method that removes the boredom and extravagance from music lessons, you can now learn to play your favorite instrument entirely at home—without a private teacher—in half the usual time—at a fraction of the usual cost.

U. S. School will do the rest. No matter which instrument you choose, the cost in each case will average the same — just a few cents a day.

Easy As Can Be

The lessons come to you by mail from the famous U. S. School of Music. They consist of complete printed instructions, diagrams, and all the music you need. You're never in hot water. First you are *told* how a thing is done. Then a picture *shows* you how, then you do it yourself and *hear* it. No private teacher could make it clearer or easier.

Over 600,000 people learned to play this modern way—and found it easy as A-B-C. Forget that old-fashioned idea that you need special "talent." Just read the list of instruments in the panel, decide which one you want to play, and the

Bobby Jones

(*Continued from page 17*)

hood going to take a beating. The fact that I had won our only previous encounter, as I have said, did not impress me greatly. But the fates were kind and the ball was rolling for me and I reached the turn in 33 strokes, by far the best score I had made in competition up to that time. As I won the eighth hole to become three up I thought that I certainly had Perry then, and I was beginning to think how nice it would be to get the big cup, for with all due respect, I felt that I could win the final.

But I soon found that Perry could play some golf too. I began to discover in him the spirit which enabled him later to completely reverse a Southern final in 1923, when he was six down to Frank Godchaux through the seventeenth hole and yet won by eight up and seven to play. That was one of the most remarkable matches I have ever known but it is also as Mr. Kipling would say, another story.

At any rate Perry began on the tenth hole to play a little golf for himself. He collected a birdie three there, another birdie on the long twelfth, and he won the short fifteenth when I missed the green with my tee shot. The strain got me, I suppose, for I had had my fling on the first nine, and now I was playing as well as I knew how and the holes were yet slipping away. At the sixteenth, a longish hole of about 450 yards, Perry jammed a long iron up less than a yard from the hole and was only prevented from holing another birdie because my long putt from the edge of the green laid him a dead stymie. Even with that, his score on the last nine was 32, and that was a good bit too fast for me. Perry won the seventeenth to become one up and we halved the last hole.

We then met next at East Lake in the final of the tournament there. We played the last match of the week as we had played the first and all the rest, in a downpour of rain, and there was not much to see except which one was the best mud horse. This doubtful honor went to me by a slender margin, so that when we came to the State championship in August, Perry and I were all even for the year—we had each won one and this was the rubber game.

Nit Wits

(*Continued from page 54*)

SUSIE: Well, put the stave by the stove, Steve. Now listen Steve dese willians wants to git into the office to do some dirty woik.

STEVE: Don't let 'em.

SUSIE: I ain't goin' to. Now beat it.

FLINT: Well, I'll get in there some day and when I do—ha ha ha.

STEVE: Weel, you get rid of him. Now, Sue, when you goin' to marry me?

SUSIE: Oh, some time. Dis is so sudden. But foist we got to look out fer them villains, Flake and Blint.

STEVE: Sure, you mean Flake and Blint. Aye.

SUSIE: Oh, look here comes Blake wid the men from de mill.

SANDY: Blake what are ye doin' here? Ye've been fired once.

BLAKE: Yeah. These men are going to strike.

SANDY: Well let 'em strike.

(*A Bell is struck*)

SANDY: Well, there they are. They struck.

SUSIE: Oh pa. Oh pa. Here he comes.

MR. STERLING: (*Gabriel Horn*) Did ye call me, Sue?

SUSIE: Gee pop, de men of the mill struck.

STERLING: Gosh, so they struck. Well, I'll be gosh durned gee whiz.

DETECTIVE: (*Musclebound again, in a third part*) Mr. Sterling, I'm sorry, but I must arrest you in the name of the United States Government.

STERLING: Is that so? What fer?

DETECTIVE: For possessing counterfeit apparatus. This plate was found in your mill.

STERLING: Well, what do you know about that. Well, goodbye girls, I'm through. I'll see you when I get out.

BROWNE: Now just a word about this next act. Well, we're going to skip that and tell you about it. While Mr. Sterling is in jail, the villains Blake and Flint, set fire to the mill with Sue and Steve inside it and the villains think that they were killed in the fire, but they really were over in Asheville, North Carolina, all the time on a honeymoon, or something. Well, the last act shows Mr. Sterling coming home from jail where he got out of on account of his good behavior.

STERLING: Hello everybody. Why are you smiling, Louise?

LOUISE: Cause we're ruined. The mills burned down, the insurance ran out, and them villains Blake and Flint were the cause of it all. How did you get out?

STERLING: Well, the police laughed at the charge. And I didn't want to be outdone so I laughed at it too. Well, we all laughed my way right out of jail.

LOUISE: Well, let's go into the parlor and I'll get you some breakfast.

(*Flint and Blake enter.*)

STERLING: Well, Mr. Flint, the police is trailing the guilty party, and when he's found—well, he'll be found.

FLINT: Ha ha ha. Well, that's g

STERLING: By the way, where Steve?

FLINT: He was burned in the mill with your daughter, Sue. Ha, ha, ha.

STERLING: Heavens. Ain't that aw

FLINT: And the insurance policy your mill ran out. Ha ha ha.

STERLING: Goodness gracious that terrible.

FLINT: If you'll sign this paper t ing over your property to me I'll pay well. Ha ha ha.

STERLING: I'll do this for my daughters. Minus one.

FLINT: Thank you, Mr. Sterling, you are in my power. Ha ha ha.

SUSIE: Not yet, you'se aint. I dat paper.

STERLING: My gracious, Susan, still alive?

SUSIE: And how. Pop there's guilty party. He tried to put you in —he fired de mill—he started the strik he tried to steal de insurance pape

FLINT: Stop, you're breaking heart. Ha ha ha.

SUSIE: But we win. Cause he Steve.

FLINT: You alive too, Steve?

STERLING: Well well, will won never cease?

SUSIE: Well, Mr. Detective de your man. Take him and see dat he life and a thousand more years. And and . . Mr. Browne they ain't no mor the paper.

BROWNE: Have we run out of sh Well, we'll have to close it up then. right. Put some kind of a finish on play. Hurry.

SUSIE: Gosh. Well, we'll try it. W Steve let's get married.

STEVE: Aye, Susie let's do that.

LOUISE: Oh Reggie let's get mar

REGGY: Let's do that, Louise.

Body and Soul Girl

(*Continued from page 21*)

and rises at 11:30—and her weekly sal for all her labours, amounts to $2,500

She is the envy of all other actresses cause she is a highbrow. She subscr to the Sunday afternoon concerts of Philharmonic Symphony Society w she attends regularly. Her favou composers are Beethoven, Wagner— Ralph Rainger, who composed *Moa Low* and who arranged all her music her. She reads prolifically, and her vourite authors are Dostoyevsky Anatole France (both of whom she read in French) Aldous Huxley and course, Bernard Shaw. Her chief a tion is folk-music, of which she i ing an intensive study hoping some to appear in a concert of such songs; chief aversion is the movies". She two outstanding ambitions: to become author, and to take her Ph.D. in scie at the Sorbonne University of Paris.

'he Stage Invisible

(*Continued from page 50*)

:tured features of stage and screen ties are now. Meanwhile, it is g to one brought up in the theatre, template what has been achieved by devotees of the drama as Georgia s, Don Clark and those talented nd women with whom it is my priv- o work in Columbia's studios. Not n the adaptation of famous stage ses, but in the writing of original , the new art has already far out- ed the initial progress of the origi- otoplay.

s far, curiously enough, most of our while dramas are unsponsored broad- Their costs must be met by the s, without benefit of "box office". result, it is essential that expense be lown to a minimum, and often such are determined upon at the shortest . Essential cuts and changes must de without sufficient time to study result. Then, too, since Radio drama es but one performance, improve- cannot be worked out during the a "road trip", as is always the case theatre. However, I am confident s the Radio public begins to demand drama, some solution to this prob- ill certainly be found.

ore we can hope for more perfect s, something must be done. Too of- ur Radio actors have scant oppor- to give the proper study to rôles ed to them. They have almost no e to perfect themselves in their d of delivery. As a result, the per- r must all too often read from a —since the aid of a prompter's voice completely defeat the illusion we eking to obtain. In spite of all this, ver, I feel that Radio drama is al- on the highroad to its place among rts.

rehearsing my casts, I always urge they carefully memorize their lines ne permits. I consider this as im- nt for a "one-night-stand" as it d be for a season's run. I feel that a part is read, the audience some- senses it, and the listener loses thing of the author's effectiveness. ling also tends to destroy the actor's illusion. Imagine a great artist ris- o tragic heights, as he scans a man- pt for expressions of his emotion!

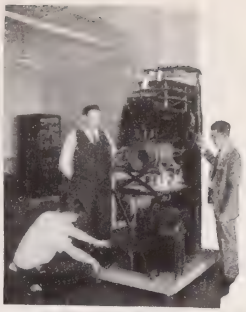
hat is more, in my productions, I in- that the actors *act*. Although their omime is not seen, I fancy that it is —and of course, it helps the player. he studio, just as on the stage, ges- s and facial expression aid each actor actress to stress their personalities impress their auditors. But rehears- in the studio, I cannot, of course, be ain that what I hear will prove effec- when it goes out on the air. In the tre I formed the habit of judging the e from the darkness of the last row he pit. So leaving my cast in the studio, I go into the control-room and check up the performance from the ear-point of the audience which will hear it eventually. Through the loudspeaker which enables the operator to adjust his delicate instruments, I sit and listen as you would do before your receivers.

If I find no flaw as I listen, I am very happy. But if my ears find something lacking, if they distort my mental vision, I instantly halt the actors, by speaking into the microphone, and offer my corrections. When I have made my suggestions, the scene is reenacted, and finally, I hear it, just as it will be broadcast over Columbia's chain. Thus, what we do our level best to make you suppose is spontaneous, is the result of trying over and over again.

So you see that through constant effort, we are getting closer to really artistic drama in the Theatre-of-the-Air. We are learning what will "broadcast", what constitutes "good theatre" before the microphone. And we are making good drama available to millions who live in communities where it is impractical to attend the theatre. But this educational part of our task is only half the battle. We must also appeal to sophisticates who judge us by the standards of those fine performances they have seen on many stages. Not that we hope or wish to supplant the intimate enjoyment of going to the theatre. Not even television ever can do that. For centuries, men and women have been drawn to the playhouse—not only to see the actors, but to be seen themselves. But the frequent broadcast of worthy plays will educate the public, and develop appreciation of true dramatic art.

In a sense, my participation in this important work, fulfills the old prediction that "the blind shall lead the blind". Or in this case, help the "blind"—to see plays through their ears. If I may play even a humble part in writing the opening chapters of this important era in the history of the stage, I shall be deeply gratified. And I am more than grateful for the splendid opportunity with which the Columbia System has seen fit to honor me.

Armida of the Air



(*Continued from page 32*)

and featured in several pictures, among them "General Crack" with John Barrymore.

It was only a short step then from Hollywood Boulevard to Broadway, where she has been playing a prominent rôle in one of the season's biggest Shubert hits, *Nina Rosa*.

Listeners-in on WMCA's wave length have learned to know and feel sincere affection for this charming little daughter of Old Mexico, as evidenced by Uncle Sam's daily distributions at the mail desk.

"The future? Does any of us know? But it has for me two beeg things—a great ambition—my work—and a great hope—that Radio may play a bigger part in my life—becoz'—I lov' Radio!"

RCA INSTITUTES

trains men in

RADIO

MEN who need radio training . . . who wish to know all about radio servicing, operating, radio telephony and telegraphy and broadcasting can quickly obtain this valuable knowledge through RCA Institutes and its famous Home Laboratory Training Course.

Radio Instruction by America's Oldest and Foremost Radio Training School

You can study at home in your spare time or at any of the RCA Institutes resident schools throughout the country. Thorough and reliable training given you. As a student you also receive the complete RCA Institutes Laboratory Equipment . . . enabling you to easily solve radio problems at home in your spare time. This is the recognized way to speedily acquire the commercial knowledge and ability demanded in Radio today.

Free Book for Ambitious Men

Send for this free book . . . many pages of pictures and text giving full details about the Home Laboratory Training Course . . . the RCA Institutes Laboratory Equipment . . .RCA Institutes and the noted staff of instructors . . . that have helped thousands of men to make good in Radio.

RCA INSTITUTES, Inc.

RCA INSTITUTES, Inc.,

Tin Pan Alley

(*Continued from page 31*)

but to Irving Berlin it represented the first delicious fruits of success. His pen, henceforth, became indefatigable; his spirit, indomitable; his hopes, undying. Not only lyrics but music, too, began to flow from his pen—and before long Ted Snyder was accepting one after another of Irving Berlin's compositions. Before long, Waterson — the manager of Ted Snyder's firm—began to whisper into his employer's ear that here, in Irving Berlin, did the company find a composer whose lyrical flow would put all of Tin-Pan Alley to shame and who would, once for all, put Ted Snyder upon the map of Tin-Pan Alley. Ted Snyder looked at Berlin's music, thought for a few moments and then made a momentous decision. The firm was henceforth to be known as Snyder-Waterson & Berlin.

Irving Berlin's introduction to Tin-Pan Alley came simultaneously with that of a new period in its brief, but eventful history. The first phase—the era of the sentimental ballad—had long been over, and while it lasted it had been gloriously fruitful and lucrative. The second phase —of saccharine and sweet songs—was breathing now its last gasps. A nation had become sick of pale and artificial sentiments of *Sweet Adeline* and *Silver Threads Among the Gold;* it was yearning for more substantial stuff.

And Irving Berlin was strong just where Tin-Pan Alley was now weak. He had not yet been spoiled by the stereotyped idiom of the Alley; he had not yet begun to compose to its formulas. And so, when the craze for ragtime set in—ragtime, a type of music which could not be moulded to the formulas of yesteryear—Irving Berlin was the free man whereas all his fellow-composers were slaves. He could compose ragtime with a free and unguided hand; his melodies could have those original curves and twists required by this capricious type of music; he could instill ingenious seeps of rhythm into the tunes. He could do all of these things because his pen was yet fresh and his mind was yet clear. And in the choir of tired voices that constituted Tin-Pan Alley, *Alexander's Ragtime Band* sounded sharp, clear and fresh—so clear and sharp that it drowned out all the other voices. Discord had made way into the harmonious machinery of Tin-Pan Alley.

And discord in more ways than one. The indisputable superiority of Irving Berlin over all the other factory-hands of Tin-Pan Alley who had been manufacturing popular-songs had made him at once a personality. Irving Berlin had brought dignity to the composer and, at the same stroke, had relegated the song-plugger and the sales-department to the background. And therein is Irving Berlin the most important son of Tin-Pan Alley—notwithstanding the fact that he is by no means its finest composer. And by the time the war began, the composer of Tin-Pan Alley was definitely emancipated and the machinery which had been producing songs with such infallibility and efficiency, was rapidly slowing-up.

Tin-Pan Alley, however, was doomed. Towards 1914 there began the grand *hegira* out of Twenty-Eighth Street. The smaller firms were running away from their flourishing competitors; the larger firms preferred to work in the very heart of the theatrical district. All the publishing-houses which had previously cluttered Twenty-Eighth Street were now generously sprinkled along Broadway and its side streets. Tin-Pan Alley as a street had ceased to exist—but only because its tradition had already begun to crumble.

With the disappearance of Twenty-Eighth Street as a street of song, Tin-Pan Alley became the convenient name applied to all of jazz, that new form of popular music which has grown out of ragtime. Some of the remnant of Tin-Pan Alley may have persisted. The song-plugger is still an important factor in the success of many a song; something of the efficiency in producing wholesale music still persists; and the song-firm is still that bedlam of noise and commotion which it had been down at Fourteenth Street and later at Twenty-Eighth Street. But otherwise, Tin-Pan Alley in spirit and in flesh is no more. Even its traditions are becoming less and less perceptible. Composers have acquired a distinct individuality and such men as George Gershwin and Jerome Kern have revealed such a marked musical talent that their music has penetrated into the symphonic hall. Jazz has acquired a musical importance; the melodies are sometimes poignant, the accompaniments often symphonic, rhythms often colossal. Its lyrics even have lost much of their vapid sentimentality and, every once in a while, possess a splash of wit or originality. Jazz-composers and lyricists are even beginning to take themselves and their creations seriously!

Jazz, in short, has become a lady—and old Tin-Pan Alley turns over in its grave to emit a groan of anguish.

Fireside Poet At Home

(*Continued from page 80*)

many of these stories but seriously, I doubt if any couple has ever had a happier twenty-four years than we and we look forward with joy to the next twenty-four years or whatever the time is that we may be spared together.

Somehow or other, I feel very well contented that I chose the home to work in, and I am particularly contented because the partner in that home has been such a comfortable person to be with. Our home is just like all homes—I suppose our children are criticized just like all children, that people don't think we do the right things with them or the things *they* might do. But somehow or other they *please* us and we *love* them, and feel rather cor

was, you must confess, an unfor-
summer. We brought back with
s of the rock with the dinosaur
s upon it—as well as two large
skeletons which we found nearby.

I understand that considerable strides have been made recently in the study of prehistoric man because of these discoveries. Can you understand, then, why that discovery gave me one of my life's greatest thrills?

Old Panish Custom

(*Continued from page 59*)

MISS COLLYER: It's the custom, isn't it, Mr. Medbury, for a movie star to be interviewed by the critic?

MEDBURY: Yes—it's an old panish custom.

MISS COLLYER: Then tonight, I want to be different—if you don't mind, I'm going to interview you.

MISS COLLYER: I suppose I ought to ask you how old you are, and where you were born.

MEDBURY: Sure—We might just as well turn this into a census—I don't mind answering that question—I was born in Shanghai.

MISS COLLYER: How interesting—and do you talk the language?

MEDBURY: Well, I speak a broken China.

MISS COLLYER: China isn't a very progressive country, is it?

MEDBURY: No—I understand the laundries over there still tear the buttons off the shirts by hand.

He signs off with something like this:

"And that, dear listeners, about brings this program to a close—I'd love to talk to you all night, but I don't want to be like that deaf and dumb woman up in Alaska who froze seven fingers trying to have the last word in a blizzard."

Medbury is indeed a "Master Without Ceremonies", yea, verily the "Lightning Wit of the Air" who never strikes twice in the same place.

Radiographs

(*Continued from page 63*)

"And," said husband, "take a look at her; here's something important."

I looked at her. She is slim and blonde and pretty.

"Look hard."

I waited breathlessly for some startling revelation.

"Here before your eyes is a genuine, native born New Yorker—the only one in captivity so far as I know."

Miss Gerard's parents are German born, the family name being Opfinger. It was under that name that she sang until about a year and a half ago, when she decided to use the more simple name of Gerard, a shortening of her middle name, Gerarda.

Her husband is from Boston, and a year ago came to New York. With Miss Gerard's brother, Adophe Opfinger, who, incidentally is the production manager at Columbia, he makes up the famous piano team called the Ebony Twins. Besides, he is the accompanist and arranger for the Arcola Rondoliers of the Arco Birthday Party, and makes a great many phonograph records.

It was inevitable that one Ebony Twin should ask the other home to dinner one night, and when Charles Touchette met Marie Opfinger, it was inevitable, too, that they should fall in love with each other.

Miss Gerard is an "old" pioneer in Radio, working with WEAF when it was down at 195 Broadway and Graham McNamee was just getting his start. She was with WEAF three years. Then she won a Juilliard scholarship and studied with Claire Kellogg and Paul Reimers. She is now an exclusive artist for Columbia and is heard in the Weed Chains, Paramount Publix and Ward Baking Company programs. She has been featured on the Philco Hour, the Voice of Columbia, the Cathedral Hour, and is the "Mistress Mary" of the American School of the Air.

Every Tuesday at 2:30 Eastern Standard Time, Miss Gerard, in the character of "Mistress Mary" steps before the microphone and presents in music and song, such well known characters of childhood as Little Jack Horner, Humpty-Dumpty and Little Bo Peep. Or maybe Mother Goose will be giving a party and "Mistress Mary" will take her little listeners with her, or she will go with them to the land of the fairies, elves, and giants. Whatever it is, the children are enraptured, and she gets many letters from them in their childish scrawls.

Her hobby, she says, is collecting antiques, her vices, having breakfast in bed, and taking taxis.

The Dixons

OF COURSE a baby is an inspiration. But not every baby is an inspiration for a Radio series. David Dixon is unique in that respect, for said Mrs. Dixon, David's grandmother, to Peter Dixon, David's father, "Why don't you write a story about raising Junior?" Said Peter Dixon looking intently at his four year old son, "I think it's a swell idea." Said Aline Berry Dixon, Peter's wife, and David's mother, "I think so, too." So Peter Dixon sat down and wrote the sketch. He's that kind of a writer.

He went to B. B.—that's Bertha Brainard, NBC's eastern program director. "B. B.," said he, "let me kill the *Cub Reporter* and put on *Raising Junior* in its place. (So that you won't think Mr. Dixon too sanguinary I'll explain that Peter Dixon was employed by NBC's Press Relations Department, and had on the air a weekly sketch called the *Cub Reporter* in which he and his wife were acting.)

B. B. read *Raising Junior*. "No, sir," she said, "we won't use this for a sustaining program. This is just right for the so-and-so company."

Eight months of hopes and disappointments and then down in Rahway, New Jersey, in a little office next to a freight yard they were rigging up a miniature broadcasting station, while up in the president's office, a group of officials were listening intently to the loud speaker. This time the Dixons put it over. Wheatena was going on the air with "Raising Junior."

The Dixon's sketch goes on the air six times a week, every day but Monday. And that means that Mr. and Mrs. Dixon drive in every day from their home in Douglaston, Long Island. And it means that Peter Dixon writes one of those sketches every day. His fastest writing time is one hour and twenty minutes. His slowest, five hours and a half.

Now here's an ad for pajamas. Mr. Dixon says he writes best when he ing them. He puts in his mornin ing and then gets dressed alon three o'clock.

A typical day in a Radio writ is something like this: Get up breakfast. Wife and child decid shopping. Thank goodness, can g work done. Type a line or two. time for the mail? It is. In letter that must be answered. ought to answer those other lett Well, get to typing. Doorbell. " $3.19. C. O. D." Wife has all t Go borrow it from the maid. A Get to work. Maid: "There's so wrong with the furnace, Mr. Dixo furnace. Back to the typewriter. bell. "I'm NOT working my way college, but will you subscribe . .

And besides *Raising Junior*, Mr is also writing a book for Century to write for the Radio, and ru column of Radio gossip for the Syndicate.

Is he temperamental? Well, he s had ten years of newspaper work been a mess boy and second cook oil tanker. "Just try and get t mental on an oil tanker," he laugh has played in several Radio d sketches and his own serial, the *porter*, ran for over a year. He lo his picture, stocky, blond hair dimples. Incidentally he is the s minister.

Oh, another thing—he loves h I don't blame him. Aline Berry is rosy-cheeked brunette, who ha charming quality of making other feel comfortable and happy. (An my very best compliment, Mrs Dixon.)

She's quite an actress in her ow She has played with Otis Skinner, LeGallienne. She has been with t atre Guild and has starred in Farmer's *The Artist*.

It was in Tulsa, Oklahoma, t met her husband. She was pla stock there and he, as a young ne reporter, had been told by his e take a part in the show in order series of articles. And so he can and was conquered. Five month he and Miss Berry were married.

Just as I was leaving the stu pressed into my hand a piece of paper. Outside I opened it. "Slants on Aline Berry, by her hu And then there were the following

Crazy about mushrooms.

Swimming is favorite sport.

Can handle a sail boat fairly we

Looks best in old-fashioned gow should wear her hair back of her e

Doesn't try to select her hu clothes. (Thank Heaven.)

Looks pretty in the mornings.

HANK YOU, AMERICA by Chevalier

FALSE TEETH ARE A GREAT INVENTION *but* KEEP YOUR OWN AS LONG AS YOU CAN

Ten years too late . . . most people seek protection

FALSE TEETH are better than none, but if you prefer to keep your own don't wait for pyorrhea to make your gums spongy and swollen before giving your mouth the care it deserves.

A great British doctor is authority for the statement that many people actually have a pyorrhea condition in their mouths as long as ten years before the real havoc of this disease begins to tell.

As it progresses the gums soften, the teeth may loosen in their very sockets and dangerous poisons spread throughout the system until extraction and false teeth are the last resort.

If your gums are the least bit tender; if your toothbrush shows red when you clean your teeth, don't wait another day before taking protective action.

See your dentist twice a year

Everyone who values his teeth should see his dentist at least twice a year. Modern dentistry can do a lot to prevent needless trouble in your mouth. In your own home, however, it is your own responsibility to give your teeth the finest care possible.

Forhan's is the formula of R. J. Forhan, D. D. S., who for years specialized in the treatment of pyorrhea.

It contains Forhan's Astringent, an ethical preparation widely used in the dental profession for the treatment of pyorrhea and is an invaluable aid in warding off this dread gum disease.

Start using Forhan's today. It costs a little more than other brands, but the real money difference is actually so small that it is nothing compared with the protection it brings. Price 35¢ and 60¢ in tubes. Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

NOW ON THE AIR!

New Forhan program — featuring Evangeline Adams, world-famous astrologer—every Monday and Wednesday at 7.30 P. M. Eastern Standard Time—Columbia network.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

False teeth often follow pyorrhea, which comes to four people out of every five past the age of 40

OLLOW MY STARS OF YOUTH TO A

★ ★ Clearer, softer skin

nces Ingram herself tells how to keep the skin lovely at its 6 vital places

"OU are just as young and attractive, or just as old, as your skin looks," ld a charming woman who recently e to consult me. "Keep your skin im- ulately clean... Keep it youthful at my tars... And *you* are youthfully lovely." hen I explained to her my method h Milkweed Cream.

To cleanse the skin, spread my Milk- d Cream generously over your face neck. Let it remain for several min- , to allow the delicate oils to pene- e deeply into the pores, and then ove every vestige of it with soft linen.

Now—apply a fresh film of the Milk- d Cream. With outward and upward kes pat it into the skin at the six nts starred on my mannequin.

There are special *toning* ingredients in s Milkweed Cream. These penetrate cleansed pores and defend the skin inst blemishes and aging lines and ve it clear, soft and lovely."

* * *

is charming woman came back to me, a day or two ago. Her skin looked *velously* clear and soft and fresh! She ked at least five years younger—and d she felt it!

* * *

ave recommended my Milkweed Cream d my method to so many women, and ave *seen* their skin grow fresh, clear, ung. Won't *you* follow my six stars to learer, softer, younger skin?

If you have any special questions to ask out skin care, write for a copy of my oklet, "Why Only A Healthy Skin Can ay Young." Or tune in on my radio ur, "Through The Looking Glass ith Frances Ingram," Tuesdays, 10:15 M., E. S. T., over WJZ and Associated ations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES—*If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

STUDENTS WORKING ON FILM SCANNING MACHINE OF OUR MODERN TELEVISION TRANSMITTER

LEARN RADIO--TELEVISION TALKING PICTURES in 10 WEEKS

By Actual Work ~~~ In the Great Shops of Coyne

Don't spend your life slaving away in some dull, opeless job! Don't be satisfied to work for a mere 20 or $30 a week. Let me show you how to make EAL MONEY in RADIO—THE FASTEST-ROWING, BIGGEST MONEY-MAKING AME ON EARTH!

JOBS LEADING to SALARIES OF $60, $70 A WEEK AND UP

obs as Designer, Inspector and Tester, paying 3,000 to $10,000 a year—as Radio Salesman and in ervice and Installation Work, at $45 to $100 a veek—as Operator or Manager of a Broadcasting tation, at $1,800 to $5,000 a year—as Wireless Op-rator on a Ship or Airplane, as a Talking Picture r Sound Expert—HUNDREDS OF OPPORTU-NITIES for fascinating, BIG PAY JOBS!

No Books - No Lessons
All Practical Work

Coyne is NOT a Correspondence School. We don't attempt to teach you from books or lessons. We train you on the finest out-ay of Radio, Television and Sound equip-ment in any school—on scores of modern Radio Receivers, huge Broadcasting equipment, the very latest Television ap-paratus, Talking Picture and Sound Re-production equipment, Code Practice equipment, etc. You don't need advanced education or previous experience. We give you—right here in the Coyne Shops—all the actual practice and experience you'll need. And because we cut out all use-less theory, you graduate as a Practical Radio Expert in 10 weeks' time.

TELEVISION
Is Now Here!

And TELEVISION is already here! Soon there'll be a demand for THOUSANDS of TELEVISION EXPERTS! The man who learns Television NOW can make a FOR-TUNE in this great new field. Get in on the ground-floor of this amazing new Ra-dio development! Come to COYNE and learn Television on the very latest, new-est Television equipment.

Talking Pictures
A Great Field

Talking Pictures and Public Address Systems offer thousands of golden opportunities to the Trained Radio Man. Here is a great new field of Radio work that has just started to grow! Prepare NOW for these mar-velous opportunities! Learn Radio Sound work at Coyne on actual Talking Picture and Sound Reproduction equipment.

EARN AS YOU LEARN

You Get FREE Employment Service for Life. And don't let lack of money stop you. If you need part-time work while at school to help pay liv-ing expenses, we will gladly help you get it. Many of our students pay nearly all of their expenses that way. Mail the coupon below for full particulars!

Coyne is 32 Years Old

Coyne Training is tested, proven beyond all doubt. You can find out everything absolutely free. How you can get a good Radio job or how you can go into business for yourself and earn from $5,000 to $15,000 a year. It costs NOTHING to in-vestigate! Observations on Events and Incidents in the Broadcasts of the Month

THERE are no dull moments in the social whirl of Radio circles in New York. When the nights get too crowded with dates the parties start in the afternoon and move from one place to another. You find merry groups in private homes, studios, dinner clubs, subterranean retreats and submarine—well, not exactly submarine but in the club rooms of great liners while they are in port. The NBC crowd has been doing the boats under the hospitable auspices of Johnny Johnstone and Mark Luescher of RKO. Two particular merry evenings were aboard the *Leviathan*. There have been some happy receptions, especially the parties for the two Irenes—first Miss Irene Dunne of RKO-NBC at the Hotel Sherry-Netherlands, and later Miss Irene Bordoni of CBS at her home on Seventy-eighth st.

* * *

ONE hears many interesting anecdotes and incidents at these little affairs. We liked Johnny Johnstone's story about the corn-fed oysters. Graham McNamee had opened up a keg of them—yeah, oysters—and of course one can't consume a whole keg of oysters right off. And you have to keep them alive. Well an oyster has to eat too. Mrs. M. couldn't bear to see them suffer so she asked what to feed them and Graham said give 'em corn meal, they love it. There was a little party up there in their pent house apartment and Mrs. M. asked everybody to gather around to see the oysters gobble up the corn meal. Well blessed if they didn't — at least that's what Johnny said. The McNamees do seem to have such fun and you're going to like Mrs. McNamee's story about what Graham does when he's home. It will be in the May RADIO DIGEST.

* * *

MORTON DOWNEY says his mother had over one hundred superstitions and under the circumstances he could be excused for having a few himself. "Wh-sssss—cscscscs" that's the nearest way you can put into print the funny little whistle he gave as he sat down at our table during the CBS party at his Delmonico Club. "I got that habit of calling a waiter while I was in Cuba," he explained while a couple of servitors scurried forward for orders. Very swank, very lovely was this party where beauties of the screen, the stage and the air floated before the vision to the rhythmic strains of Morton Downey's own select orchestra. "What are your superstitions?" asked Jesse Butcher of Columbia, who was fellow host with Mr. Downey. The suave Mr. Downey fished a ring with a greenish stone from his pocket. "You'll never catch me without that ring. It's my lucky stone. Just once, several years ago, it escaped from my possession for a few hours. It was while I was touring by motor car with Paul Whiteman's band. The car I was in was ahead. It skidded off the road and turned over two or three times and I was laid up five weeks in a hospital. At another time when I had the ring with me and was in a motor accident the car rolled off the road and came to a stop right between two trees. Nobody was hurt." You'll read more about Morton Downey in a Radiograph in this issue.

Act Now! This Month Ends Station

POPULARITY CONTEST

Don't Delay—Nominate and Cast Your Votes for Your Favorite Stations in the State in Which You Live—April 20th at Midnight Ends the Contest—This Is Your Last Chance to Make Your Selections

THEY'RE coming down the stretch now! Radio stations in forty-eight states and four times forty-eight stations are running neck and neck with the finish in sight. The race is close; here and there a station leads its fellows a yard or two but reserve strength will determine the winner. The grand stand is crowded; the bands are playing; ballots and votes are pouring in from enthusiastic listeners in every State in the nation. Have you done your share? Have you cast your vote for the station that has given you its best in the way of entertainment? Have you? No? Well, you still have time. But you must not delay. For RADIO DIGEST'S station popularity contest for the State Championship which state closes at midnight, April 20th. That is the deadline. When that last minute hand rests on twelve the race is decided, the votes will be counted and the winners will be announced in RADIO DIGEST and over Radio stations in many parts of the country.

There is less than three weeks to go! And as exciting a race as ever was run! This is without question one of the greatest contests ever staged, for the reason that the people who comprise the listening audience have an opportunity of boldly declaring their preference in broadcasting stations. They have the opportunity of rewarding the stations which they like best for the many hours of pleasure they have enjoyed. They have the opportunity of encouraging these stations not only to keep up the good work but to strive for greater perfection in the programs they put on the air.

Thousands of votes already have been received and every mail brings more. Competition is keen and many of the voters have gone to great lengths to explain the reasons for their selections. But the point is that THEY HAVE ACTED. They have voiced their satisfaction with the efforts made by the broadcast stations to give them the best possible programs. They have done their bit so that their favorite stations will make a good showing in the contest. All of the stations can not be winners but that provides an even greater reason why YOU, if you have not already done so, should nominate the favorite stations in your state and cast your votes according to the rules of the contest. If the station you select for first place does not win, your vote may give it second place or honorable mention. And that vote may be the one that places your selections at the top of the list in your state.

Remember the contest closes at midnight, April 20th. Votes received after that time will not be counted. Read the rules on page 90 and then nominate the stations in your state that you want for first, second, third and fourth places. And then CAST YOUR VOTES IN TIME. All stations are in the running. Each one of them has a fair chance of winning. It all depends on you. Votes will determine the issue and YOU are one of the voters. Do your part and you may be sure that your favorite station will give any others in the state a run for their money. The winning stations will be presented with medallions similar to the one pictured on this page. The medallion will be suitably engraved. And in addition a scroll of honor will be awarded to those stations. April 20th at midnight! And the race will be over! Give your favorite station the support it needs. NOW!

Simply fill in the nomination blank on this page and then use the coupon ballot No. 7. And be sure to mail it before the closing date.

The Young Old Maestro

Ben Bernie

Scorned as a Runt by a Big Family of Older Brothers and Sisters, Boy Artist Sallies Forth to Conquer World with His Violin

By ANN STEWARD

A SLIGHT man with greying hair just a little awry stood staring at a sign, hands clasped behind his back and feet planted wide t. The sign read, "Absolutely no king in this room." The cigar in the 's mouth twitched convulsively and d smoothly to the opposite corner. veen the surveyor and the surveyed a cold, clear pane of glass and no resentment. The sum total of the ation being that Ben Bernie must with his cigar before he entered studio—or stay outside. The latter rnative was quite impossible as he was racted to make his presence before microphone in the studio but a few utes later. And as for parting with cigar—Mr. Bernie quite definitely 't relish the idea.

he place was a Chicago broadcasting ion and the time but a few months The deadlock, Cigar versus Radio adcast, was settled amicably between Bernie and a high official of the sta- in time for the program to go out the air on schedule. Should the ners of that program have had an chment on their Radio whereby they ht have smelled the interior of the lio studio, their noses would have n assailed by a delicate aroma of ex- sive cigar smoke. In other words Ben nie's cigar won. The sign in the broad- ing studio still reads, "Absolutely no oking in this room," but attendants add for your information—"except Ben Bernie, this applies to everyone."

THAT is just an incident many similar ones, but it gives you inkling of how the famous young Old estro gets his way and makes the er feel rather important and highly pleased in the giving. He doesn't ask, he merely mumbles a plea under his breath which for Ben Bernie is as effective as the lamp was for Aladdin. But life has not always been thus for the beloved little orchestra leader.

This funny man of the stage and night club was born with a remarkable sense of humor, a great deal of pride and the will to go ahead and fight for the best. It is this will that has brought him up thru the ranks of ordinary performers into the limelight of the few extraordinary men of whom we hear constantly and of whom we never tire. But now let us proceed to delve back into history and find out where this man came from and what he did before he "arrived."

BERNIE is admittedly thirty-eight years old, the son of a hard working village blacksmith and the puniest one of a brood of healthy, brawny youngsters. Being physically below par, Bernie was sort of looked down on by his brothers and listed as worthless in life save to wash a dish or two perhaps or—play the violin. But thirty-two years ago playing the violin was just one of those amusements allowed fair haired, curly headed Lord Fauntleroys. Seeing that talent brought no great comfort to him, Ben did his best to become all enthused over civil engineering and the result was as might be expected—a loss. He didn't like engineering, didn't want to like it and wasn't going to. And now having reached the mature age of eighteen he credited himself with a man's mind and set forth amongst the patronizing grins of his family to make a career in vaudeville with only his violin to win his living from a grudging world.

Breaking into theatrical work was no task for the youngster. He could undoubtedly wield a wicked bow and after a bit of practice he found that the witticisms he manufactured and spoke on the spur of the moment greatly endeared him to the hearts of his audiences. And so the start—boy, violin, and wise cracks.

Time went on and found the young man growing in popularity and skill. The vaudeville bookers must have conspired in some way at this time in Bernie's career for they continually threw him on the same bill with Phil Baker, a single act also, consisting of accordion and a pleasing personality. The two young men became friends and suddenly merged their acts into one, Bernie still playing his instrument and wise cracking and Phil Baker pumping the accordion and slowly but surely learning to answer Bernie when he was addressed. In this manner the two young men climbed a good deal of the ladder of fame together.

Then, in Bernie's words, "Came the War as they say in the movies." This is Ben's own story and may be taken for whatever value the reader cares to put upon it. Your writer is responsible for nobody's veracity but her own. Baker, through the influence exerted by his running mate on the stage, enlisted in the navy and was assigned immediately to the Good Ship, Union Square in the heart of New York, while Ben joined the army, became assigned to the Intelligence Bureau and had as

Don't Shoot

Hunting the Great Kodiak Grizzlies in Alaska With Camera. Thrilling tales of the Chase in the Arctic

Alaskan Kodiak Grizzly cub which has just caught a salmon

FOR quite a long time I was very proud of the fact that I had killed eighteen bears—thirteen of which were the great Alaskan brown bears, or Kodiak grizzlies. In fact, when I was quite a small lad, I had a great desire some day to grow up to be a professional grizzly bear hunter—make my living at killing bears and other varieties of big game. For about two years I had the opportunity of realizing this boyhood ambition—and afterward I was duly proud of my accomplishments, but it's different now. In a way, I am just a little sorry I killed so many bears. Others, of course, have killed many more bears than I have but nevertheless, I am just a little bit sorry that I killed as many as I have.

The reason is, I have found a far more fascinating way to spend my time when in the bear country.

The giant Kodiak grizzly, as he is popularly known, is the largest of all present-day flesh-eating animals on earth. He grows to a maximum weight of probably 1600 or even possibly 2000 pounds—almost a ton—and he has the reputation of being one of the most powerful and ferocious animals on this or any other continent. It is claimed by many who write and talk about him that he will charge on the slightest excuse, but in my hobnobbing with about 250 of this particular variety of bears, I have found him very much of a wilderness gentleman—child, I suppose I should say, for he certainly has a great many child-like attributes.

DESPITE the fact that he may grow to weigh almost a ton, the Kodiak grizzly is amazingly small when born. He weighs only nine to twelve ounces when he first comes into the world, and is blind and hairless. This fact may seem rather startling to many but it is nothing more than one of Nature's little plans by which she takes care of her creatures of the wild. Bears, as everyone knows, spend the winter months in hibernation where they cannot get food to supply nourishment to their bodies. During this period they must live on the surplus fat which is stored up in their own bodies. The young are born some time before Mother Bear comes out of the winter den—this means an added drain upon her system and this also explains why Nature has provided that the young of the largest flesh-eating animals are so very tiny when born.

Bears do not hibernate because they do not like the cold weather—even in Alaska. The largest bear that I ever ki I got on the 23rd day of Novembe twelve inches of snow and zero weat And I have seen their tracks almost late as Christmas time in Alaska. only reason that they hibernate is cause they cannot find sufficient amo of food to keep them going.

The first Kodiak grizzly that I tacl as a hunter turned out to be four them. I saw but one at the start. was too far away to shoot at so I toc land-mark and worked my way up thro the dense alder thickets until I pee over the little ridge to see him only ab 50 yards away. But suddenly to my sternation, because I was hunting all al I saw three others in the same a thicket with myself and the furth

ift-running stream—a meal fit for the "King of Bears"

Snap!

By Harold McCracken

Explorer, Club Man and Bear Hunter on the Air With Stories of Adventure With Alaskan Brown Bears

e not more than 30 yards from me. ter considerable debating with myself d probably poor judgment predomi- ing, I at last tackled them. Somehow nanaged to get all four, though I must mit that I was about as badly scared as vone possibly could be, and live!

The biggest bear that I ever killed hap- as to be the only one of all the eighteen it charged me. His pelt measured 11 t 4 inches in length and 10 feet 6 inches read from claw to claw. We estimated weight at approximately 1600 pounds d it took but two shots from high- wered rifles to stop him. He started charge at around 200 yards distance d went down with a bullet in his brain approximately 45 yards away. There re four of us shooting at the finish.

On the other hand, I have killed two different females with young cubs (for museums) who expended their very last effort in trying to get away even at the expense of abandoning their youngsters. Mother grizzlies with young cubs, you know, are supposed to be the most dangerous.

After I had killed about a dozen bears, however, the thrill lost its kick. Instead of shooting them immediately, I began to watch them. I saw them do things which interested me and which I could not altogether understand. Then, almost by accident, I took up photographing them. The first thing that I found was that it was many times more difficult to get good pictures of bears than it had ever been to kill them. Most everyone can kill a grizzly bear with very little difficulty if they hunt in a country where these animals are as plentiful as they were in the districts where I did my hunting. But I very quickly learned that it required not only a great deal more hard work to get really good pictures of them, but that also I had to know my game very much better, light conditions had to be just right as well as the wind, and I had to get a great deal closer to them than I ever had to in shooting. Probably even more important, I found that it was a great deal more convenient to carry my films home than it was to go to the trouble of skinning my trophies and transporting their heavy hides. Also, I found that my friends took a much keener interest in looking at these films of the live animals in their own unmolested native state than they ever did in making forced exclamations at the trophies which I hung on the walls of my home.

I also found that I learned a great deal more of interest about the creatures while taking their pictures than I had ever learned from hunting them. And I got just about as many thrills out of it.

I REMEMBER one instance when Andy Simons, the famous Alaskan guide, and I were returning to our little tundra camp in the early darkness after a long day on the salmon streams after pictures, when we happened onto a very large and obstinate grizzly who boldly refused to get out of the way for us to pass. Andy assured me that the bear would break and run before we got too close, but he didn't, and before we knew it we were up to within about 25 yards of the big creature. The hair rose up on his back and he got up from his feasting of salmon to snort and make one or two side steps towards us. Andy

Something Abou

A FEW months ago magazines and newspapers were full of pictur and stories proclaiming the finding of mummies on the Aleuti Islands. Scientists declare that this is one of the most important di coveries of our day and they point out that this find has established t fact that human life first came to the North American Continent fr Asia by way of the Bering Strait. The leader of this expedition w Harold McCracken. He is a scientist, explorer, hunter of big game, a venturer, author and lecturer.

WHEN McCracken was only eight years old he suddenly came fa to face with his first bear. This experience precipitated Harold into t ambition to become a bear hunter. Since that day he has killed mc bears than he has kept record of. He has realized his youthful drean

HIS achievements include: Four Arctic expeditions; a disastrous a venture with a gold mine; daring feats as a news reel photographe operating single handed an Indian fur trading post; hunting with t Cree Indians; minor expeditions into various Provinces of Canada, t Gulf of Mexico, the Florida Everglades and the Ozark Mountains; l turing before the National Geographic Society and many other organi tions; broadcasting Radio programs; writing numerous articles a books; being an associate editor of *Field and Stream* and he is a memb of the Explorers' Club of America.

Above: Harold McCracken, in Arctic furs. Center: An old woman of the Bering Sea country.

Below: Sailing the Bering Sea with the midnight sun creating a world of light and shadows.

threw a shell into his gun, though we did not want to shoot the animal unless it became absolutely necessary, for it was in the middle of the summer and his pelt was worthless. There was a cross-wind blowing and Andy made a circle out around him to let him get his scent. The instant that he got that fatal odor on the breeze, the bear almost turned a backward flip-flop and was knocking down alders and stumbling over hummocks as far as we could see him. Just before this little incident Andy and I had stopped to indulge in a fresh bit of chewing tobacco. When the bear had gone, I began to have a very peculiar feeling and found that during the excitement I had misplaced my chewing tobacco; in other words, I had swallowed it! Andy had to wait for me when I sat down and had a nice little siege of sickness all by myself.

For one entire summer I lived right out in the grizzly country on the Bering Sea coast of the Alaskan Peninsula with but one companion most of the time. In fact, I had gone into the bear country by dog team in January so that I might be there when the first bears came out in the spring and I stayed until snow came again in the fall. During that one trip I saw over 190 different grizzly bears. A lot of the time Andy and I lived right out on the fishing streams almost as the bears lived. We slept in the daytime when the bears were asleep, did our photographing in the late afternoons and early mornings and were on the alert through most of the twilight nights. On one particular day Andy and I lay on a grassy hummock and watched 12 big grizzly bears all fishing in the same stream and the farthest ones not more than half a mile apart. We saw be virtually every day and some we saw several occasions and even had nicknam for them.

There was a little valley up among t volcanic peaks. There was a permane home of two families of bears which visited on several occasions. One was mother and three cubs which we call

Harold McCracken

HAROLD McCRACKEN was born in 1894 in Colorado Springs, olorado. He is of Scotch-Irish origin. His ancesters were among the st settlers on the Pacific Coast of Canada. His mother was a portrait inter and his father was a newspaper man, mine operator, and rancher. e was one of the founders of the Des Moines *Daily News*. By the ne Harold was eighteen he had lived in Colorado, California, Utah, aho, Texas, Iowa and Pennsylvania.

AND at eighteen he left home and a theological school to find out first nd what life was like on the northwestern frontier. He drove a four rse stage coach on the construction of the Canadian National Rail-ys in the Canadian Rockies. His second job was the operation of the r trading post on the Upper Thompson River in British Columbia. In 15 he came out of the mountains to attend Ohio State University and do some special work with Professor Mills. From his Alaskan expe-tions McCracken has shipped to Ohio State Museum Kodiak bears, askan sheep, Alaskan caribou and Alaskan aquatic birds.

IN 1922 and 1923 he spent a year in making motion pictures of Alaskan g game, focusing especially upon the Kodiak Grizzly and the Kenai oose. His fourth and latest expedition to the far north was as leader the Stoll-McCracken Siberian-Arctic Expedition of the American useum of Natural History.

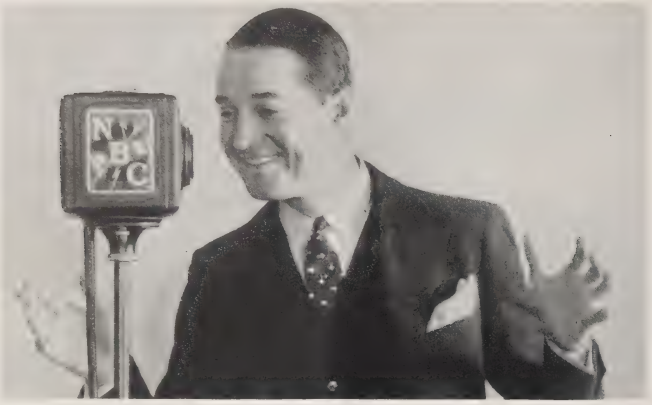
: O'Flaherty family, and the other was mother and two cubs which we nick-ned the Murphy family. We knew the rphy family best. They were as much e human kids as any mother could ve. One of them, whom we called pron Strings", was always right at her ther's heels. The other, who was al-ys running away and getting into all

sorts of trouble, we called the "Little Roughneck". When we first saw the "Little Roughneck" he was traveling on three feet because he had undoubtedly gotten too intimate with a porcupine, with the result that one foot was filled with quills and he had to limp around carrying it in the air.



The first time that we saw Mrs. Murphy and her two cubs they walked right out upon us where we were hidden in a blind waiting for the O'Flaherty family to move down the creek far enough to permit my getting some movies of them. They were not more than 150 feet away. Mrs. Murphy lay down in the afternoon sun and "Apron Strings" proceeded to have afternoon tea. "Little Roughneck", however, started wandering off to have a little adventure all his own. He did! As he proceeded, Andy and I realized that if he went far enough he would get our scent on the breeze, and we lay there behind our blind and, whispering back and forth, discussed amusedly just what would happen when this young bear cub got his very first scent of a human being. We knew that it would be his first scent of a human because, as I have said, it was our first visit to that part of the country and we knew positively that we were the only human beings in the entire section that year.

Of course we did not at the time know the "Little Roughneck's" temperament and that he was a very bold and brazen young bear cub, but we did know that a human being is the only enemy from which any grizzly will retreat, for man is their one and only enemy. Yet this cub had never smelled the scent of a human being. What would he do?

At last, like a flash he wheeled around

"Thank You, America"

By Maurice Chevalier

Famous Playboy Began Career at Twelve, Painting Dolls' Faces—He is Still Drawing—at the Rate of $3,846 for 15-minute Broadcast!

THIS is Maurice Chevalier speaking. Do you recognize me? Each Sunday night we have — what you call it? —a date, eh? And we have a good time together? That's fine. What's that, my friend, you rather have a song? Well, I'd rather sing, too. But I am sorry—not tonight. My good friend, Mr. Brown of RADIO DIGEST, has asked me to talk a little about myself. Some of my history might inspire a song but—well, suppose we let somebody else write it.

Maybe I'll tell you some of my secrets. Such as how it feels to talk to all of you millions of listeners on the Chase and Sanborn hour every Sunday night. And lots of other things. Who I am and—well, everything.

First of all, I want to say "Thank you" to everybody here in America. This country, it has been like my own. I have been received so beautifully by everybody, business men, roughnecks, just everybody everywhere. And I want to express my appreciation and this is one way I hope to reach most of you.

My ambition has been to achieve success in your country. I feel that any man who has the stuff—you see I have learned a lot of your good, American slang—can get along well over here. That is, if he be an honest fellow, what you call a regular guy.

Ever since I was twelve I have been on the stage. That is, I have earned my living by singing. This has taken me to every country except China but I hope to go there, too, some day.

If you ask me why people like my singing, I don't know exactly. When I begin to sing, people who are listening think, what's the matter with that French guy? He isn't so good looking and his voice isn't big like Caruso. But by and by, say in 15 or 20 minutes, we get to be friends.

When I started in to entertain Americans on the Ziegfeld Roof where there was a very blasé crowd of professionals from the New York stage, I had to sing three or four songs and I felt rather nervous. "If they take too long to judge me," I told myself, "I will faint." Fortunately I had only sung for half a minute or so when I felt we were friends.

After this it was easier to sing and now I am fully at ease with all you Americans. We play and have a good time together and why not? Life at best is much, much too short.

SOME of you wonder, perhaps, where I learned English. That happened when there wasn't much else to do, for I was in a German prison camp—but I was lucky even there. One of my fellow prisoners was Ronald Kennedy, an English soldier. We talked a lot. I taught him French and he taught me English. He was a good instructor. I was a bad one —he got a bad bargain. I got a good one.

I was wounded and taken prisoner in an attack on my regiment at Curty, in the east of Fran soon after the w broke out. La Kennedy and contrived to cape from t camp and that, dies and gentlem was the happi experience of life. Even thou later on, I got Croix de Guerre

I have co from humble ginnings. I born in Menilmontant, which is Paris what the lower East Side is New York and the Whitechapel trict is to London. My father wa house painter and when times w hard, my mother went out to w by the day as a charwoman. Wh my father died, I was about twe and set out soon after to work a help my mother.

But it looked as if I was to be failure at everything I underto Now I know why. I loved the st even then. My earliest ambiti were centered about the circus. youthful mind was set a-flame by pageantry and spangles, the gilt a the glitter.

I became apprentice to a carpenter amid the falling chips, I always saw imagination a small boy performing cafes, music halls and circuses. My n job was as an electrician and then I came a printer. Need I say that all th jobs were lost by me? What you c fired?

My next looked like something m congenial. Painting pink cheeks on do faces. Rather interesting, eh? It v fun. One day I got the cheeks too r I had seen some puppets in a sidesh and thought it amusing to try and rep duce them. But the boss, silly fellow had no sense of humor at all.

I thought I'd make a good salesman l this time I fell in love. Believe it or n She was a gorgeous blonde young lady ten summers. I took the affair qu seriously. So seriously that the boss fi me. To show we did not care, George and I went walking. As we passed church from which a wedding party v coming. I decided to be smart and mir a popular actor. I flung my arms wi

inger got caught in a closing door. ended romance for a long, long time. ortly afterwards I decided to make Strange to say, I was pretty good too. In fact, it looked like a nail- r's career for Maurice. But the successful I was the more I yearned amusing things. I'd steal out into actory yard and rehearse songs of famous actor. The royal road to fame would be to learn acrobatics, thought. I attended a gymnasium. whirligigs on the rings, somersaults the trapeze. Everything that would me become a good entertainer. Then and sprained my ankle and bruised ace. So, in self-defense, my mother ier foot down.

en I would be a singer. It was much r than acrobating. So with a bold- I did not feel, I approached the man- of the *Concert of the Three Lions* told him I was great, swell, a fine r. He was missing a great chance o book me. His wife was there. She d me over nudged him and said, the boy a chance." So he did. You magine what happened. Never had I a note to a piano accompaniment. r had I sung in public. I was sim- lost. A "terrible flop", you would

ter I came out of the fog of depression I said, "All right, ve been a failure. That can hap- to anyone. Next time I will eed." So I tried again and again. first chance was as a singer at *Casino des Tourelles*, which paid hree francs an evening, four eve- s a week. My specialty was im- g popular hits and stars.

friend of mine knew Mistin- te, the famous musical comedy rite. So he made an appoint- t for me to see her. I scrubbed face, put on my best suit and to meet the great young lady. was very nice to me and encour- me a lot. Her last words at time were, "You need have no y for what the future holds with ile like yours."

LITTLE by little I anced and a few years later I was dancing partner at the *Follies gere*—and maybe you think Mau- wasn't proud of himself.

efore the war I was a comedian used a huge nose of red putty an outlandish dress. After the I adopted the dinner suit and w hat which I still use.

Iy first big opportunity came n Elsie Janis insisted I play with in a London show. It was llo America" and we did well. is Janis was very good to me, ing me a lot and serving as an in- ation.

When the show closed, I went back Paris and joined Mistinguette for a time. Then we had a falling out. I went as an entertainer to the Casino de Paris and there met the girl I married, Yvonne Vallée. Yes, it's the same name as your own American Rudy Vallée, who, incidentally, is a good friend of mine. My wife tells me he can imitate me better than I can be myself. He did it one evening when we were in the audience that heard his Fleischmann broadcast at the Times Square studios of the National Broadcasting Company.

THEN Jesse L. Lasky, Vice President in charge of Production for Paramount, persuaded me that I ought to try American pictures. So we decided to try one in 1928. Fortunately for us it was a success. Since then I have made several more that you all have been good enough to like. Perhaps you remember *The Love Parade, Paramount on Parade, The Big Pond* and *Play Boy of Paris*.

A career is a funny thing. It brings moments of great happiness and great sorrow just like you find in everybody's life. My happiest experience was when I escaped from the German prison camp at Alten Grabow near Magdeburg and got back inside my own lines. My saddest experience in life was the death of my mother in Paris in 1928. It was doubly sad because I was in Hollywood making my first picture, *Innocents of Paris*.

I am not handsome. But I try to be wholesome. I am fond of outdoor life. My favorite amusement is boxing and I used to box often with Georges Carpentier. Another well-known boxer who is a good friend of mine is "Kid" Francis the French lightweight.

I am fond of French food. Once a year I try to get back to Paris for public performances. That is so one will not get out of touch with or lose the French viewpoint. In most big cities I use taxicabs. But in Hollywood it is more fun to drive a Ford coupe. To my mind one of the screen's most able directors is Ernst Lubitsch, who directed my own *Love Parade*.

I rehearse all my songs, with gestures, alone for weeks. Then I try them on a small gathering of friends at my home. If they approve, then I sing them in public, over the air or in pictures. I am greatly interested in international statesmanship and political affairs. In Hollywood my best friends are Douglas Fairbanks and Mary Pickford. It was a treat to see them recently in New York. Some day I hope to have them as guests at one of my broadcasts. I always try to be methodical and punctual.

I love my wife and my wife loves me. That's all I know about love.

I type all my personal letters to my friends and relations. I consider this by far the neatest way and I feel sure one of these days the idea will become general . . . I like typing —it is very interesting—I use the touch system.

WHEN I was in the South of France last year I just went crazy over a game they call Boule. It is rather like the English Bowling Green, but I think there is a little more pep in it.

My experiences on the screen have taught me that you are never exactly as you think you are. The Radio is teaching me also many, many other things. I am getting some most illuminating and charming fan mail. I find that lots of it bears out my own idea of broadcasting. It is this. I want to broadcast so that my voice comes into the homes of the listeners as a friend.

When I face the little black box—the magical black box—it sometimes fades from sight because I am thinking of the millions of firesides where I hope people are listening. Particularly those who are sick. I cannot help feeling that I should give them the best that is in me.

I have broadcast only a time or two in France and twice in America before this Chase and Sanborn series. Yet they tell me that my Radio work is good. I hope you like me too.

Maurice Chevalier as a Singing Waiter à la Paris

Lillian G. Genn Interviews

Are
Women

Author Who Made Two Continents Roll Gentlemen And Their Preference for

"AMERICAN women are the unhappiest in the world," was a startling statement made by Anita Loos, famous aut when she recently arrived here after a long sojourn abr

When one considers that American women hold most conspicuously superior position the feminine sex has ever that they enjoy complete freedom to do whatever they please, cannot let such a statement pass unchallenged. With that thou in mind, the interviewer went to see Miss Loos at her hote New York.

Curled up on the divan of her charming suite, the author loc very much like a girl of twelve. She is very small, with a wist appealing face, and large, innocent looking eyes. Her hair is cu a boyish bob and she wears simple clothes which accentuate youthful appearance. It is hard to believe that this diminu person has earned a reputation for barbed wit and stinging sat that she has set two continents to discussing whether *"Gentle Prefer Blondes"* and has reaped a fortune for doing it.

However, she was known to American audiences long before noteworthy book made its appearance, for she and her husb Mr. John Emerson, wrote many delightful plays for the scr particularly for that charming star, Constance Talmadge.

About a year or two ago she announced her retirement f writing. Evidently it was not to be taken seriously, for she just completed another book, *The Better Things of Life*, whic a satire on Hollywood, and also a sparkling, sophisticated com with her husband, *Cherries Are Ripe*, which is now touring country with the popular screen pair Vilma Banky and LaRocque.

For the past few years Miss Loos has divided her time betw this country and Europe. She is as much at home in Paris, Vie Berlin and London as she is in New York. Not only does she k women the world over, but she has a deep and penetrating un standing of their psychology. Her opinions, therefore, are merely glittering generalities.

For that reason the interviewer was interested to discuss Miss Loos why she believed American women to be unhappy.

"One of the first things you notice when you come to country," she began, "is that the American women do not happy. They have disconte expressions on their faces. E pean women have less in mat wealth and fewer advantages, they look more content. In they have a gayety and joyous

This diminutive, doll-like, feminine person is actually a famous author and Hollywood scenarist, of world-wide fame—Anita Loos.

ANITA LOOS

American Happy?

With Laughter at Her Biting Satire on Blondes, Talks of Marriage and Love

out them that is contagious. It is a sense of exhilaration. 'America is, let me say, a wonderful country for women. It is veritable Paradise in which they can get everything that life has to offer. Opportunities and luxuries are theirs for the asking.

'But the trouble is that women do not fit this Paradise. No one can be satisfied when one gets things too easily, women least of all. They get too much in the way of material things and with hardly any effort on their part. Their grandmothers had to be practically drudges in order to get the necessities of life. They worked from early morning to late at night cooking, sewing, baking, cleaning and bringing up a brood of children. They had to fetch their own water and get logs for the fire. They didn't think of themselves but strove to provide comfort and pleasure for others. In that way they found happiness for themselves. What is more, since they were busy with the real things of life, they had vital matters with which to occupy their minds.

"BUT the modern American woman is inclined to be self-centered person who is concerned in pleasing and pampering herself. Her interests are such trivial ones as clubs, luncheons, committee meetings, shopping and bridge games. I don't know of any other country where women waste so many hours playing bridge as they do here.

"If the woman does have a child, she rarely bothers to make herself an essential part of his life. She does little to prepare him for his future, but leaves it chiefly to nurses, private schools and camps. Then there is another increasing class of women who would rather work in an office than take care of their own homes.

"In Europe, even a woman of wealth does domestic work of some kind. You don't find her playing bridge or spending her time at clubs. If you told her that American women gather together in groups and hold club meetings, she would be bewildered. She would much rather stay at home and attend to the comforts of her husband and the welfare of her children. Nothing could make her neglect her first duties and obligations to her home. Even if she has a nurse for her children, she gives them her personal attention.

'I believe that no one can be satisfied unless one is doing work which is of vital importance. And Nature has decreed that woman's vital work should be in the home. When she expends her energies on trivial pastimes or the routine and mechanical work of the office, which

Anita Loos is a mere featherweight of an armful to her devoted actor-poet-writer-husband, John Emerson—she is so tiny.

provides no emotional outlet, she is thwarting a deep, fundamental urge in her. That is why you find so many discontented and maladjusted women. It accounts for their restless and hectic search for thrills and substitute satisfactions.

"American women would derive more zest and satisfaction from life if they would sacrifice some of their social, political or economic success and engage in a feminine pursuit that is related to the home. They would lose much of their nervousness if they would again take up so simple a thing as sewing instead of playing bridge, which only makes them more tense. I do a great deal of sewing in my leisure and it has an almost magic effect in resting and soothing me."

By discarding feminine pursuits, Miss Loos pointed out, the American woman is also losing her feminine approach to life and her feminine qualities. She is becoming a hard-headed, self-sufficient, dominating person with masculine traits.

"Our women are becoming very much like men," she said. "They are more similar here than they are in any other country. They have not that great difference which makes for variety. An important consequence of this is that woman has lost her charm for men and is creating disharmony between the sexes. And there you have the root of woman's unhappiness.

"THE European woman is content to play a feminine rôle in life. From childhood she is brought up with future marriage in mind and is prepared for her duties of wifehood and motherhood. She is taught to make the most of her feminine charm and appeal. She makes a study of men and knows how to please them and make them happy.

"That is why the European eagerly seeks the companionship of women. Husbands and wives spend more time together abroad and share many more interests than they do here. A man will go shopping with his wife, visit the art galleries with her, and have luncheon or tea with her during the day. He spends his week-ends with the family and takes them on a picnic or trip. Husband and wife do things together and they even know intimately the friends of their children. You don't find the husband going off to play golf with his men friends, the wife to a tea or bridge game, while their sons and daughters take the car to go heaven knows where.

"Don't think, though, that I blame the disharmony between the sexes here entirely on the woman. The man is very much at fault too. Imbued with the idea that success in business is the one big thing in life, the American man slaves for long hours at his desk. No matter how much money he accumulates, he never feels that he can retire or do other things. Working at constant high pressure soon becomes a habit with him. If he should want to stop, he would feel lost. Tea parties are absurd to him.

A modernist in her work, Anita Loos is a believer in old-fashioned marriage.

"Naturally when the man returns home at night, he is too exhausted from his work to give his wife and family any companionship. About all he can do is to go occasionally to a musical comedy show. Anything else will at once put him to sleep.

"Week-ends and holidays, he must, of course, have his golf. The game is of greater importance to the American than it is to the Scot. No one takes such an absurd interest in the game in Scotland, where it originated.

"The European husband is by no means ideal. He demands much more from a woman and wants to be catered to and spoiled. But because he makes it a point to understand women and he has a keener comprehension of her emotional needs, he nevertheless makes her happier than the easy-going, good-natured American husband who smothers his wife with luxuries, but who gives her little attention. Men and women in this country are drawing further and further apart. There are already few interests that they have in common."

MISS LOOS believes that it is because the European husband and wife are bound together by so many ties and a close comradeship exists between them, that their marriage has a more solid foundation, and it is further strengthened by their mutual love for home life. It is the primary reason why they have little divorce.

"Since American husbands and wives have hardly any ties, it does not mean much for them to sever the relationship. This may not have as much of an effect on the man. He can find satisfaction from life by absorbing himself more completely in his business. But, as I previously said, a business pursuit does not give woman the same satisfaction. Furthermore, she needs the security that marriage gives her.

"Of course men must also have the anchor of marriage. No human being can be happy when he drifts from one marriage to another. The older he grows, the more he needs the comfort of knowing that there is someone around who is interested in him and who understands him. That is why I believe that even a passable marriage is better than divorce. A person with varying emotions who runs to the divorce court will usually find that he can't be any happier with the next mate, either, and his final years will be lonely and empty ones.

"One can get along as well with one person as with another, provided one has not contracted a wholly unsuitable marriage. But like any other venture in life, marriage requires intelligence and thought. Husband and wife must work at it. And they must understand this," Miss Loos paused for a moment. "It is only by working and planning together and by having a close and sympathetic relationship with each other, that they will find happiness.

"BUT I do think, though, that because women are more concerned with the human side of life, it is more in their power to bring about greater harmony between the sexes."

As is well known, Anita Loos and John Emerson are one of the most devoted of couples. They have been married for twelve years and not even their long residence in Hollywood, where divorce has become an accepted habit, nor the fact that most of their friends have been married several times, has affected their relationship. They enjoy each other's company as much as ever.

Both of them started their careers on the stage. Miss Loos' father was the manager of a traveling theatrical company and therefore as soon as she could walk and talk she was given a part in one of his productions. Her favorite pastime was to sit out front and watch the crude movies which her father would run off during the intermissions. One day, when she was in her early teens, she tried her hand at writing a few scripts and sent them to a movie company. They immediately accepted them and requested her to continue to contribute.

When Miss Loos had been writing for the company for about two years, the director, who was D. W. Griffith, sent for her for a personal conference. He received the shock of his life when a small girl came to see him with her mother and told him she was the author of those robust and clever comedies. He gave her a job on his staff and she became one of his invaluable assistants.

As for John Emerson, he had been a successful actor manager in New York

Thompkins Corners

When the Wandering Player Fainted Real Folks Acted Quickly and Went in for Culture

By George Frame Brown

JNCLE Matt Thompkins ratched a atch on his user leg. There s a hiss and it red up, throwing ruddy features d white hair in arp relief for a ef moment beore he leaned er the oil lamp the table. The me quickly ran ound the circular ck and the light vealed the snug om in back of ompkins Corrs leading emrium.

Marthy Thompns examined the even flame of e old lamp with itical eyes. "I'll t another lamp" e said, and bus-d out of the om. Elmer, seat- at the table in e center of the om, reluctantly rned back to his udies, audibly restling with his ithmetic probms. . .

Matt Thompkins, who in real life is the author of the program.

ELMER: Eleven es in 78—seven nes and one to rry — (*Prince hines and scratches at the door.*) Hello Prince, old boy, what's the matr? You want out? All right, I'll let you out, old boy. Betcha smell a rat, huh?

MATT: Hey Elmer!

ELMER: Yes, Uncle Matt.

MATT: Where you goin'?

ELMER: Prince wants out—

MATT: You sit down there and finish your homework—I don't want to see any such report card as you brought home this week.

ELMER: But gee, Uncle Matt, he's scratchin' and beggin'.

MATT: He's beggin' for one of them peppermints you're nibblin' on.

ELMER: No he ain't, Uncle Matt, honest . . . he's beggin' to get out. I can always tell what Prince wants, jest by the way he asks.

MATT: All right, let him out, but you see to it that you get right back to them fractions.

ELMER: I'll go out and take a little run with him.

MATT: You let Prince do his runnin' alone. You'll be runnin' over to Sneed's I guess.

ELMER: Aw. Prince likes to have company when he takes a walk. He gets lonesome for me when I'm in school all day.

MATT: Well, I guess if Prince is so smart, he'd be a lot happier seein' you get good marks in your arithmetic than he would to have you out throwin' sticks for him. Now, go let him out and get back here to your work. Don't let me speak 'bout it again.

his continuity of Real Folks at Thompkins Corners, oadcast from WJZ over the NBC network, is reproduced h the special permission of Mr. George Frame Brown l the Chesebrough Mfg. Co.

The cast of Real Folks at Thompkins Corners in their respective characters.

ELMER: Gosh, Uncle Matt — I can't see very well by these oil lamps.

MATT: No more excuses—you let Prince out, and then get back to your lessons.

ELMER: Oh, all right . . .

MATT: What's that?

ELMER: (*Brightly*) All right, Uncle Matt.

MATT: That's better.

ELMER: Come on Prince.

(*Prince barks*)

MARTHA: Here, Matt, I got another kerosene lamp fixed.

MATT: Thanks, Marthy, I'll just put this one over near the potato bin. My golly, it seems funny dependin' on these old kerosene oil lamps after spoilin' ourselves so long with electricity.

MARTHA: If you ask me, I still think they're as good as bulbs.

MATT: That's a fine way for you to talk—and me president of the light and power company. It's a lucky thing we got the mail out before the fuses blew—

MARTHA: I thought there'd be more folks in askin' for their mail. I guess maybe it's too cold.

(*Door slams*)

MARTHA: That sounded like the front door.

MATT: Who is it?

BILL: It's Bill Perkins. I brought some company over from the station.

MATT: Come on in and get warm.

BILL: H e l l o Mrs. Thompkins.

BILL: Matt, I want to introduce my friend—Mr. . . . Mr gracious, now I went and forgot your name.

MITCHEL: Mitchel — Worthington Mitchel.

BILL: This is Mr. Mitchel—Mr. Worthington Mitchel . . . this is Matt Thompkins, the mayor . . . and this is the missus . . .

MITCHEL: My good Mr. Mayor, and you, Mrs. Thompkins—may I say that I am extremely honored to meet you? I am charmed to know the leading lights of such a distinguished little community.

MATT: Well, if you don't mind my sayin' so, Mr. Mitchel, the leadin' lights in this establishment tonight happens to be kerosene lamps. Somethin' went wrong with a connection downstairs.

BILL: Mr. Mitchel is a actor.

MARTHA: An actor!

BILL: Yeah, he recites Shakespeare's plays.

MATT: My, that is real interesting.

MARTHA: Imagine knowin' Shakespeare's plays by heart . . . and I have all I can do recollectin' my favorite verses from the Bible. How do you do it?

MITCHEL: Oh, a certain genius for retention. I have never had difficulty retaining lines. My first attempt at difficult rôle of Hamlet resulted not in a sweeping triumph of presentati skill, but in a performance witho single error in reading.

BILL: Gosh, how could anybody remember all that? I even forget tod date there in the post office, with calendar a-starin' me in the face.

MATT: Well, maybe there's s things Mr. Mitchel can't do.

MITCHEL: Possibly so, Mr. Ma possibly so, but if it's connected with arts, you are doomed to disappointm

MATT: Well can you make a thr ing flail out of two hickory poles an eel skin?

MITCHEL: No, I must admit I ca —but, of course, they are not the ar

MATT: Grandpa Overbrook was artist at bindin' wheat and swingi flail when threshin' machines and rea was just bein' thought of.

MITCHEL: Ah, yes, great are the of the soil, but they express a va different being. We, of the stage, giv the intangible something that lies inna in the soul of every When I play the go Macbeth, I feel the torture which the imm tal Shakespeare wa him to feel. It is my —my very life. I dedicated my mind career to the dream the immortal Sha speare. I make tren dous sacrifices going f city to city, from tow town, uplifting the dr and increasing the pub understanding of deeper side of the the

Real Folks Cast

Mr. George Frame Brown	"Matt Thompkins"
Miss Virginia Farmer	"Marthy Thompkins"
Miss Phoebe Mackay	"Mrs. Watts"
Miss Elsie Mae Gordon	"Mrs. Stevens"
G. Underhill Macy	"Fred Tibbetts"
Tommy Brown	"Elmer Thompkins"
Mr. Edwin H. Whitney	"Judge Whipple"

OF COURSE, it is necessary that the above list of actors do some doubling for minor characters. Thus, Mr. Brown also takes the parts of "Mrs. Jones" and Gus Oleson"; Miss Gordon, the part of "Sneed"; Mr. Macy the part of "Tony" and Mr. Whitney the parts of "Bill Perkins" and "Grandpa Overbrook."

ARTHA: That's a very noble atti-
Mr. Mitchel.
LL: I guess you have to stay sev-
weeks at some of the places before
begin to understand it, don't you?
ATT: Now, Bill, that question is a
out of order. I guess Thompkins
ers could understand as quick as
dy.
TCHEL: Your suggestion is a very
y one, Mr. Thompkins. I would be
than glad to interpret the works of
immortal Bard of Avon for your
ing community.
LL: I thought you was goin' to re-
Shakespeare.
ARTHA: Bill Perkins, Shakespeare
called the Bard of Avon.
ATT: Well, now, Mr. Mitchel, I
t exactly make any suggestion but
u've somethin' worth while sellin' to
e're a ready market.
ITCHEL: Ah, I do not sell my work,
ather offer it for approval. I have
n the acclaim of the crowned

anticipation of a grateful multitude.
ATT: Did you ever play on Broad-
in New York?
ITCHEL: New York! Bah! Illiterate
s with no taste or cultivation. A
artist could perish in the street
out a second look. No, not in New York, but my career—my career . . . my . . . my career . . . a . . . a . . . a . . . has taken me to every important city . . . my . . . my . . . greatness . . . has . . .

(*Voice fades—sound of body falling.*)

MARTHA: Oh, gracious! What's happened?

MATT: Sh-sh-sh . . . I guess he's fainted. I can't see his face in this light. Marthy, go in and make some strong coffee and warm some hot broth. I think I know what's the matter.

BILL: Do you want a glass of water, Matt?

MATT: Yes, Bill, and I'll put him in this chair and loosen his coat collar. . . . My, he's light as a feather and still kinda chilled. Gracious, look here . . . he hasn't got any collar on under this old muffler. Him and his greatness—why, he's probably starvin' to death right now and he was tryin' to bluff it all through.

BILL: Here, Matt, give him some of this water. Gosh, he musta been pretty bad off fer to keel over that way.

MATT: That happens when you don't eat fer a spell— He's drinkin' it down. He'll come around all right. Go out and see how Marthy's comin' along, with the broth and coffee . . . here, take another sip of this, Mr. Mitchel.

MITCHEL: My . . . my profound, thanks, Mr. Thompkins.

MATT: Just take it easy—we'll have some hot broth and coffee for you in no time.

MITCHEL: That confounded vertigo came back on me. Took me by surprise again. Edwin Booth suffered the same attacks . . . in fact, our acting technique is very much alike.

MATT: Well, I never saw Booth, but they say he was pretty good.

BILL: Matt, you can bring Mr. Mitchel into the kitchen now. Marthy's got the table spread for supper.

MARTHA: I've come out for him. Come with me, Mr. Mitchel.

MITCHEL: Ah, to dine with the queen . . . it reminds me of my visit to Britain and the happy hours at Buckingham Palace.

MATT: Bill—say, I want you to do a little fast work.

BILL: What's the matter?

MATT: Well, this here Mitchel fella's pretty bad off. He ain't had no food and he ain't clothed warm enough.

BILL: I got some old clothes home. He kin have 'em.

MATT: No, this is different. I tell you what . . . we're goin' to have a Shakespeare readin' right here in the store. We're goin' to get up-lifted right among the crackers and potatoes.

BILL: There's no harm in that as long as it don't spoil the stock.

MATT: You go and git the fireman's band together and be here as soon as they can. Tell 'em to come in playin' "Poet and Peasant"; they ought to have that down pretty well by now. Pass the word along to everybody you can and tell 'em that there's no admission, but we'll take up a collection.

BILL: Gosh, Matt, that's pretty swell. I didn't dream fer a minute that the old fella was just a tramp.

famous Firemen's Band—masters of melody at Thompkins Corners.

MARRIAGE

When A Headliner Takes A Life Partner Should It Be Told? Will Popularity Decline When Glamor Departs? Twenty Interviewed Stars Say, "Yes, Do Tell" — Twenty Shout, "No, Keep it Dark!"

IT WON'T bother the comedians one particle whether you believe them married or single, or find definite proof either way. At least that is the consensus of four well known air acts that can be classed under the general head of comedy. First of these, Correll and Gosden, better known as Amos 'n' Andy, led this star inquisitor for the usual merry chase before he cornered them in their offices in the Palmolive Building, Chicago. Said spokesman Amos:

"Everybody knows or ought to know we are both married happily. Once we were a mysterious pair—or group—of voices on the air. We didn't even let people know who we were or how many there were actually in the cast of Amos 'n' Andy. But that day passed soon enough. Fame pried into our private lives and made our every affair as public as it could. We hardly think that the publicity has hurt us. Being blackface comics, we certainly have little romantic appeal."

Clara, Lu and Em, the new Supersud trio of "back fence" gossipers who've been giving you laughs over the NBC chain during the past several months, also wouldn't mind letting you know they are married—if they were. But let them tell it:

"Our trouble isn't having our Radio audience know we are married so much as it is knowing that two-thirds of us aren't. Having Radio husbands and Radio children, it's embarrassing not to have ten years of married life and ten children each on which to base our chatter. However, Louise Starkey, who is Clara, helped the cause along by getting married last Christmas. The rest of us? Well, you never can tell!"

But Tony Cabooch (Chester Gruber), Anheuser-Busch's one-man Radio show, is more serious about his views. This impersonator of a half dozen or more dialects, who packs much homely philosophy into his broadcasts, replied:

"YES. Radio stars should let the public know if they are married. Marriage is a sacred trust that should command respect, and Radio artists who falsify in this respect only cast reflection upon their character as well as their profession. All the world loves a lover, and love is truth.

"Today Radio is the dominant branch of entertainment, for Radio alone enters the most sacred of all places—the home—and the home has marriage as its foundation. Therefore, why shouldn't an air entertainer or artist admit he or she is married?"

The Sisters of the Skillet, East and Dumke, dodging the issue when queried on their way to the studio for their daily buffoonery, simultaneously replied, "Yes and no." But neither of them would mit ever having received any mash not and finally they were pinned down to conclusion that the Radio audience wou n't get all excited if by chance it sho learn that both were married and e had families of twelve children.

Graham McNamee, the veteran Ra announcer whose wife is almost as known to the Radio audience as he is h self, answered:

"By all means, the artist should per the Radio audience to know that he married. After all, why should it m any difference in his work as far as public is concerned?"

But you will learn that all announc do not feel the same w when you read the answ of those who replied ne tively to the question. E wait. Here is the "de of modern music", no other than Paul Whi man, recently brought the networks by the Alli Quality Group of pa manufacturers. What he say?

"I can't see how answered the man w made the *Rhapsody Blue* famous, "it wou make any difference to t public whether or not am married. My busine is interpreting music. it were interpreting sex well, that might be d ferent."

"Sure," replied D Pickard, "you might well let the listeners kno 'Course, they know I married, with a wh family — mother. But Ruth and Ann — of t air. Nowadays Ruth and Bubb are getti to the marrying age pretty fast, and don't think it would hurt the Picka Family one bit on the air to let the fa know when either one of them gets ma ried."

A lot of wasted energy and posta would be saved if Edwin Whitney's ide

Why keep anything like little daughter Jessie a secret?" ask Mr. and Mrs. Jesse Crawford, organist-duet.

Should Stars Admit It?

They're proud of 'em—Willard Robison, Camel Hour Batoneer, of his wife; and Adele Vasa, CBS singer, of her husband, Paul Green, night studio manager.

By

EVANS E. PLUMMER

carried out. This NBC character
and production man, best known
ps for his parts as Judge Whipple
Gran'pa Overbrook in the Monday
Real Folks comedy radario, said:
an artist keeps his marriage quiet,
ay save some complications, but
ledge of it should save a lot of
y now expended in writing fan mail.
Sam would be the only loser in
case. Seriously, the knowledge of
rtist's marriage should not detract
his popularity.
k Smart, Joe Green in Graybar's
and Mrs.", answered:

"SURE they should. At
it means you'll get a certain amount
ympathy. The trouble with Radio
is this. They take a liking to you
they don't. Suppose they do. All
ice girls write in and say how grand
think you are, and if they don't
you're married there's grave danger
me of those fan letters getting into
ife's hands. And she'll never believe
they're unsolicited testimonials.
hen suppose you decide that one of
writes a nice letter, and sends a pic-
of herself. You can't help answering
That means a whole lot more cor-
ndence—always provided you don't
your own picture to her. It's bad.

But let 'em know you're hooked. Then there's a lot of trouble saved, and besides—the Ball and Chain likes to think of itself as the genius's inspiration; or something like that."

Jesse Crawford, Columbia's Poet of the Organ, gets plenty of fan mail. He says, "Folks know there's a Mrs. Crawford—how can they help knowing it when she insists on playing the organ on the air with me? Since my fan mail seems to be keeping up, I guess it's because my appeal is more melodic than romantic."

Now for the opinions of a few vocalists of both sexes. Chauncey Parsons, NBC lyric tenor and former musicomedy star, answered:

"I don't see why it would make any difference. If one's married, he's married and can't get away from the fact. Then, too, if the nuptial knot is concealed it might lead to complications at 'home' so far as fan mail is concerned."

And John Barclay, the tenor who is generally accompanied at the piano by his wife, Dagmar Rybner, said:

"It should be a fine idea to inform the public that a Radio star is married. I am proud to let the Radio audience know that I broadcast with my wife."

Vocalist number three is Mabel Wayne. Of course, she's better known as the waltz-queen composer of *Ramona, In a Little Spanish Town, It Happened in Monterey* and *Chiquita.* Mabel has no reason to fear that she will crumble any illusions about her when she says, "Of course, tell the public," for Miss Wayne is still really a miss.

BUT if Mabel were to consider matrimony, she thought she would prefer a tall, dark, handsome, Spanish-type man who would only jokingly boss her around. "No man will ever dictate to me," she ukased. But here's one way we'll shatter an illusion relative to Miss Wayne. Shhh! Did you know that despite her Spanish compositions, she has never been in Spain—only Cuba and California? At that, she should get some kind of hand from you, for she is the only female star who replied "Yes" to the question. The others all fell in line for the negative—as women would.

Now for several orchestra leaders—Phil Spitalny, Freddie Rich, Willard Robison and Dave Rubinoff. Spitalny saw no reason for concealing his matrimonial happiness. "It is a wonderful thing, marriage," he replied, "and why shouldn't I be glad to let the world know that I am happily wed? Maybe I kill a little

romance for some flappers, but it is an unwise thing for an artist to build himself up on sex appeal instead of merit, as it should be."

Freddie Rich, who is married to the beautiful and blonde Margaret Lawton former British musical comedy actress, doesn't believe that a Radio star's popularity is dimmed by the public's knowledge that he is married.

"In the earlier days of motion pictures, the marriage of a star was hushed up for fear his romantic appeal would be diminished. However, it's all different now. Whether the player is married or not, doesn't seem to phase admirers any. Sometimes it helps. You know we all want most what is most difficult to obtain. And so it is with Radio performers."

Willard Robison, the Camel Hour batoneer who is singer, composer and pianist as well, is proud to introduce his wife and claims she is responsible for his success. "In the days before I came to Radio, when we had some hard sledding, she never lost faith in me."

While Rubinoff, to whose tunes Maurice Chevalier sings, replied:

"What difference could it possibly make? In the last analysis I believe that any star in the world of entertainment lives or dies by the quality of his or her work. Marriage? It is wholly a personal matter. I refuse to believe that Radio listeners who may be kind enough to like my playing of violin solos, or to appreciate my orchestral arrangements, are going to be greatly concerned over the fact that I am or am not married."

THAT makes eighteen voting for the affirmative. For the nineteenth let's hear from Richy Craig, Jr., the recently launched Blue Ribbon Malt Jester who previously has been known for a good many years as a vaudeville headliner. Craig is one of those on the fence, so to say. He answers "Yes" for himself, but modifies his opinion for certain other types of performers. Said he:

"In answering this question, I think the first thing to be taken into consideration is the type of work the Radio artist is doing. If he is a crooner of 'pashy' songs, I think it is unwise to disclose the fact that he is married, because the greatest per cent of his audience are women, and if they know he is married—well, it kind of takes the edge off.

"But on the other hand, if he is a comedian, it really doesn't matter, as he is not appealing to his audience's sentimental nature. He is only trying to make them laugh, and anyone knows that a woman never faints from rapture at a funny man. Personally, and I don't care who knows it, I have been married for FIVE YEARS and THREE DAYS—but it only seems like FIVE YEARS."

Brad Browne, another "neutral" and one of the Pertussin Playboys, doesn't mind his audience knowing that he's married, but he'd rather not have them know that he has the cutest baby that ever cut a tooth, because he's timid about being a proud father. As for other stars, he thinks they should be noncommittal on the subject, unless questioned by a judge.

While Guy Lombardo, ever popular Burns Panatella orchestra leader, after taking two kinds of advice, replied:

"Leave it to your press agent. We had one who said No!!!!"—just like that. Little printed exclamation marks came out of his mouth when he said it. So a couple of the boys were described all around the place as nice little bach's, all waiting to take the bait.

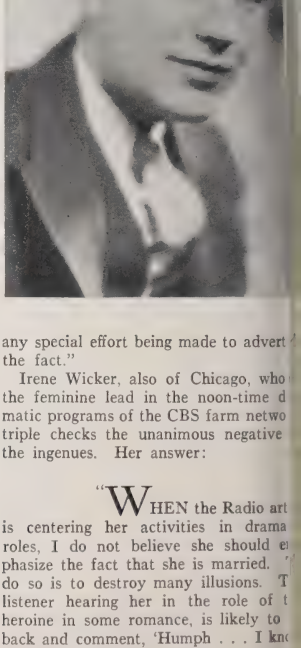
"THEN another guy came along and said 'Sure!!!!!'—five exclamation marks this time. So next week the boys' wives were reported as on their way to take vacations. The fact that the public knew they hadn't got wives didn't seem to matter. The press agent fixed it up alright."

Now for the stars who say "Keep it secret."

Five ladies of the air—almost all those interviewed — would prevent you from knowing whether they live in the bachelor girl style or boast the title of Mrs. to be used on occasions. And Rudy Vallée, Ray Perkins, Little Jack Little, Art Kassel, Lewis James, Jean Paul King, Patrick Kelly and Robert L. Ripley—believe it or not—side in with them.

Ladies first, so let's find out what this all is about. In looking over their answers, it is interesting to note that four of the five are air thespians. You might even call the fifth that, too, although she really rates the title of comedienne.

Lucille Wall, NBC dramatic actress heard in Collier's Hour, Sherlock Holmes' adventures and other pieces, said:



If they're married, they won't tell—Right, Little Jack Little, NBC croon-pianist, and below, Ben Alley, CBS tenor.

"No, is my answer. Of course, it depends on the artist. In the cast of romantic character such publicity stroys the illusion. I don't see wher would make any difference if the list knew that some of the comic skit s were married in real life, but if a who plays romantic parts on the ai married, she should keep it quiet as as her audience is concerned."

Out Chicago way where they make Empire Builders' dramas, Bernadine Fly the beloved ingenue star of that se of programs as well as several ot radarios, replied in the same tone:

"It depends entirely on the part type of work one is doing. An unm ried ingenue blends better with the in inative romanticism of the Radio audie While I do not believe in any spe effort being made to hide the fact t one is married, I also do not believe

any special effort being made to advert the fact."

Irene Wicker, also of Chicago, who the feminine lead in the noon-time d matic programs of the CBS farm netwo triple checks the unanimous negative the ingenues. Her answer:

"WHEN the Radio art is centering her activities in drama roles, I do not believe she should e phasize the fact that she is married. do so is to destroy many illusions. T listener hearing her in the role of t heroine in some romance, is likely to back and comment, 'Humph . . . I kn that gal. She's married and is t mother of two kids! She's a fine o to be talking romance!'

"If the silent attitude on this questi comes under the heading of deceptio then I believe it is an innocent and har less deception. Am I married? Ju

o guess!" Now what would you guess? vidently it is all wrong to give away dio actress by airing her happy mar- life. Here's another who believes chapter of her life should remain d. She's Jeanette Kling, NBC char- r actress, and her reply:

"THE idea is prosaic. An of mystery lends an additional at- tion to everyone. Immediately a e is heard on the air, a personality is ted in every mind of every member he Radio audience. When a picture ars in the magazines or newspapers mparison is made by the fans who find that the actual personality and mental one differ in too many respects. When the fact that an artist is mar- becomes known, he or she immedi- y develops into a very lovely singer

personality (and a family person), but more do they fire the imagination of audience to visualize desert scenes or e in the wilderness."

"I say no!" shouted Helene Handin, hardboiled sophisticate of the air nedy team known as the Two Troupers. the case of most Radio artists the owledge that he or she is married de- oys illusions built up by the invisible lience. I do, however, recommend olicizing marriage where husband and e broadcast together."

Rudy Vallée! What does he believe? ny of you no doubt have been won- ing what this crooning batoneer has say on the subject. Well, if Rudy had way, he'd have you believe that he s a very lonely bachelor so that you'd preciate his songs to their fullest value. ught between depots on his recent tour ound the country, M. Vallée replied: "Should Radio stars let their public ow whether or not they are married? This is, I think, one of those rather argumentative questions that can't be answered simply 'yes' or 'no.' Amos 'n' Andy are married and have no hesitancy in letting their public know about it. And certainly the giving out of that information hasn't hurt or damaged their popularity.

"On the other hand, it may possibly be argued that in the case of popular band leaders or singers, whose efforts are, to a large extent, based on romantic appeal, popularity might be affected, at least slightly, by the knowledge that the bandsman or singer of love songs was himself pledged for life."

In the same profession, Art Kassel, beloved leader of his Kassels in the Air Orchestra, answers in the same vein, but extends his remarks to the possible havoc of airing family troubles:

"Perhaps band leaders, especially those playing syncopation for the element desiring to 'trip the light fantastic', should remain peculiarly single to their public. Most of us are—and some have been—married, but advertising the nuptial news adds no romance to our bandstand presence or 'sax' appeal.

"The most serious harm, I think, is worked by having marital difficulties aired before the public. When that happens, our feet are shown to be merely clay."

RAY PERKINS, the "Old Topper" and song and gag man, joins Little Jack Little, the whispering baritone pianist, in the belief that little good and often harm result from letting the public know that an artist is married. And likewise does Robert L. Ripley, the "Believe It or Not" cartoon creator, film short amazer, and broadcaster. Said Ripley: the style known as crooning might suffer

Here are a No-woman and a No-man. Helene Handin, one of the Two Troupers (NBC) and Jean Paul King, Chicago NBC.

"I should say no to the question. Radio, even more than the stage and screen, builds up an illusion which, were it destroyed, might injure the artists' drawing power. For the same reason, therefore, I am opposed to dissemination of other discordant facts that tend to destroy the illusions brought about by the very invisibility of the Radio performer."

Now for a tenor who would lock up the marriage license. This one happens to be a member of the famous Revelers' quartet as well as featured soloist of many Radio programs. His name is Lewis James. When James was asked for his opinion, the writer was thinking about another Reveler who not long ago walked down the aisle with a lovely girl and has lived happily ever after. But, not having the latter Reveler's answer, I must forego mentioning his name. I'm sure that he would say that knowledge of his marriage has not harmed him.

However, Lewis James argues for the negative. He said:

"In general I fail to see where knowledge of a Radio star's marriage makes any difference to his listeners. However, there are some cases where there is great interest, probably of some significance. I should say that the man who sings in the style known as crooning might suffer a bit in popularity if his public knew that he was married. The same holds true for an attractive woman who specializes in singing sentimental songs."

Two more tenors, Ben Alley and Morton Downey, coincide with Lewis James.

Ben Alley, who is leading tenor in "Sweethearts of the Air," considers broadcasting and audience as strictly business and, though unmarried, thinks that a person's home life should not concern his business associates.

And while it's no secret that Morton Downey, Columbia's sensational tenor, is the happy husband of Barbara Bennett, one of Richard Bennett's illustrious daughters, of whom Constance and Joan are the others, he prefers no mention of his married life.

"After all, people in everyday occupations are entitled to a little privacy, so why can't we poor Radio artists enjoy the same? Personally, I don't really see why people would want to be interested in my home, but if they are, it's all right with me. If necessary, I'd broadcast to the whole world that my wife is the sweetest and most beautiful woman in the world."

HERE are two announcers who fail to check exactly with Graham McNamee. One is Jean Paul King, that likeable new voice from Chicago whom you hear on the Clara, Lu and Em programs as well as many other important broadcasts. King replied:

"The romantic soul that an announcer is supposed to be, should, I am led to believe, never be tied down by the bonds of matrimony in his feminine audience's

(*Continued on page 90*)

The Minister Who Doesn't Preac

Dr. Harry E. Fosdick

A Rugged, Wholesome Man, Who Substitutes "Animated Conversations" for Sermons—Packs His Non-Credal Church to the Doors While Radio Millions Listen

ONE of the most interesting men I've ever met is a clergyman His name is Harry Emerson Fosdick. I rather imagine it's familiar to most of you, not only because he is one of the most discussed personalities of our times, but also because you may have heard his voice over the Radio. His sermons are broadcast every Sunday by the National Broadcasting Company, and there's an intimacy about the human voice coming into your home that makes you feel you know the person who is talking.

Well, ever since I'd read in the newspapers that Dr Fosdick was preaching to standing room only, despite the fact that the auditorium of his church will accommodate twenty-five hundred persons, plus some eight hundred more in an auxuliary hall in the church building, I've been wanting to meet him so I could tell you folks about him. You know, here in New York this year, not many theatres have had attractions fortunate enough to enable them to hang out the "standing room only" sign. I thought it was significant, therefore, for the public to literally almost storm a church to hear a man preach. Your wonder over the significance of the thing, however, changes to understanding when you hear Dr. Fosdick preach. He's really got something to say, and he says it. No matter whether or not you possess a creed, or go to church, the man rings true!

I TELEPHONED to the Riverside Church—that's the name of his church—for an appointment with him. And, even in this day of wonders when science, invention and philosophy hurl new surprises at you every twenty-four hours, it seems, I confess I was somewhat taken aback when Dr. Fosdick's secretary said:

"Dr. Fosdick will be glad to see you tomorrow afternoon. You can come right to his office in the Riverside church. It's on the eighteenth floor."

THAT reference to his office being on the eighteenth floor of the church is what made me sit up. Naturally, there's no element of surprise attached to information from the secretary of a captain of industry to come to the thirtieth, fortieth or fiftieth floor of an office building, but you don't associate a minister with a skyscraper office. But there are a good many elements of surprise about Dr. Fosdick. Looking back over my visit with him, I'd say his office—that is, it's location—was the least of them. The man dominates his office, just as he dominates—or rather his personality dominates—his church. And the Riverside church is a structure of beauty and grandeur.

I went to the church, took one of the elevators to the eighteenth floor of the tower, and entered his office. The anteroom, where two secretaries are busy, is a quiet workshop, the walls of which are lined with bookshelves. Dr. Fosdick's private office adjoins this. It's comfortable but not ornate in any way and just adjoining it is a tiny reception room. That's where he meets people. The room hasn't any pictures on the walls—and there are but two chairs and a small couch.

Dr. Fosdick is a man of medium height—with a serious face, the kind of a face that reveals, when he smiles, a warm and friendly spirit. He has a great shock of curly, wavy hair, rather a full nose and a good jaw. He's fifty-two years old, but he looks a good deal younger. His body is sturdy, his hands chunky and his fingers stubby. He has blue eyes. They, also, are friendly and inviting and when you catch the sheen sunlight on his rimless spectacles, y have to look twice to make sure of t source of the sparkle, because his eyes c sparkle, too. He was wearing a busin suit and I thought, as I looked him ov that if I passed him on the street, a didn't know him, the last thing in t world I'd take him for would be a minist He looks like a successful, aggressive bu ness man. I give you my split-seco appraisal of the appearance of the m just as he struck me because I thought good deal about it after I'd left him. went away, conscious of the fact that I met a man who worked as hard as an business man I've ever known—that I toiled as long and as ardently in the real of the spiritual as any of the rest of us in the realm of the material.

But let me tell you something of h background. Behind Dr. Fosdick is century of education endeavor, for bo his father and his grandfather we teachers. And it's even more than a ce tury when you take into consideration D Fosdick's active life. Even as a boy h knew he would do either one of tw things throughout life—preach or teac and, as a matter of fact, he's done bot pretty consistently.

HE comes of Anglo-Saxo stock. The first Fosdick in America cam from England and settled near Charle town, Massachusetts, in 1635. That mak a fine, old American background, don you think? Nearly three hundred year Later, there were Fosdicks who went int what was then known as the West. The obeyed the ever-beckoning finger tha attracted the pioneers—the finger tha held aloft the hope of new lands, ne opportunities. His grandfather, for ex ample, traveled in a covered wagon t

Dr. Harry Emerson Fosdick
"The Man *behind the* Name"

By
EDWIN ALGER

THE author is the creator of a series of vivid Radio sketches on interesting people. He is a veteran newspaper man, was President Wilson's favorite correspondent, and now lives on a Tom Thumb plantation near Cherrydale, Va., when not occupied at NBC studios or interviewing notables.

t is now the city of Buffalo. New
k. Incidentally that was the
t in those days.

nd here's an interesting thing:
know, in my talks with vari-
outstanding men and women,
ways get a real thrill whenever
ome across a reference to a
ered wagon in their family his-
es. The pioneers who swept
the West made this country,
the hope and courage and
nina that they carried into
wilderness and which enabled
n to meet all the perils it
, and overcome them, are, I
k, the finest heritage we have.
a "covered wagon" back-
nd always arouses my curi-
y, and when I meet a descend-
I try, for my own satisfaction,
learn whether the old pioneer
k still figures in him. In Dr.
dick's case, I'll say "yes",
it does—most emphatically.
s still the pioneer type. He's
afraid of the new. He's also
ly and willing and eager to
e the mysteries of the human
. and a beckoning finger—a
er that holds the hope of
h—calls him on and on. He
follow it to the end.

BUT I'm straying away
n the century of education. His
ndfather was a carpenter and
obbler in the little settlement
the shores of Lake Erie, but he
nd time to educate himself,
, at the time of his death, he
superintendent of schools of
baby city of Buffalo. He had
ght for forty years. His son—
Fosdick's father — taught
ool in Buffalo for fifty years.
Dr. Fosdick, therefore, was
ught up in a professional fam-
—in a setting where knowledge
the guiding star, and it was
ural for him—especially after
discovered that he had no in-
st whatever in making money
turn to a professional career. You
ember my telling you that even as
oy he knew he would either teach or
ach.

oday, Dr. Fosdick is known as the
t, liberal preacher of our times. Not
in word and deed does he merit the
, but his background figures in it.
His great grandfather, for instance,
expelled from church for refusing
believe in hell—the hell of fire and
geance and brimstone.

nd the great grandson of today is
ally outspoken. He doesn't believe
a religion of gloom. He thinks that
d of religion is a false religion.
ther does he believe in a religion of
. He believes that religion should
ce a man radiant, but he doesn't try
prescribe any sugar covered short cuts
to radiance. He feels that the religious quality of life is life at its highest, and I think "intellectual honesty" are the two words that more nearly describe his state of mind in his approach to either religion, human conduct or life generally. I don't imagine he does anything or says anything without first asking himself the question: "Now then, is it intellectually honest?" If the answer is in the affirmative, without any question or quibbling, he acts, but if there's any doubt about it, he doesn't act.

The Riverside Church reflects the Fosdick mind. It's open seven days a week. It's a non-creedal church, and it welcomes people from all or any denominations. You might be interested to know that the Quakers use it for a meeting place. The Riverside Church, incidentally, was erected by John D. Rockefeller, Jr., as a memorial to the memory of his mother. Mr. Rockefeller happens to be a good Baptist and Dr. Fosdick was ordained as a Baptist minister, but both men believe in the brotherhood of man, without the necessity of identifications through secular badges.

AT ONE point in my talk with Dr. Fosdick, I remember asking him if there was any adventure in religion.

"Adventure?" he repeated. "Why, trying to build the type of church we are in is an adventure. It's open to all. No one has to agree on a theological opinion. There's spiritual liberty for all and the result is it's the most harmonious church I know, for there is full recognition of the rights of others."

I also asked him what he thought it was that made people come in such numbers to attend his services, and his reply was:

"Well, whenever people have a chance to get light on the real problems of life they'll come to church."

Perhaps that's the real basis of Dr. Fosdick's strength—his ability to give light on the real problems of life. And in this connection, I think his early experience has something to do with that ability. When he was twenty-two years old he conducted a mission just off the Bowery. Sometimes there were as many as nine services on a Sunday. The men who attended these services were derelicts, and the minister who talked to them came across almost every soiled and unhappy page one could find in the book of life. His listeners weren't the kind who could be satisfied with a sermon replete with flowery phrases, or lulled into spiritual serenity by the musical cadences of a rich and melodious voice. No, indeed. They came in, doubting, but hoping for repairs. I told you they were derelicts. And the contacts that Fosdick, the young

Frank Buck cuddles a baby tapir about to sail from Singapore to the United States.

Monkey

Frank Buck Tells Interviewer How He Makes Jungle Denizens Good American "Zootizens"

"ANYTHING is liable to happen when you meet Mike," says Frank "Bring-'Em-Back-Alive" Buck, whose initial broadcast was responsible for his writing one of the outstanding non-fictional books of the current season.

MOST of us get all hot and bothered whenever we are accused of being up to some "monkey business". But I know a chap who is as restless as a duck out of water or, if you prefer your similes dressed in modern verbiage, as restless as a racketeer trying to go straight, unless his monkey business is flourishing.

Frank Buck is the gentleman's name. He's made this name mean something as an importer of assorted wild animals so, when he crosses the Pacific Ocean to collect living specimens for American zoos and circus menageries, his departmental monkey business actually occupies only a fraction of his time. Yet, in spite of the fact that the capturing and shipping of rarer beasts, reptiles and birds have been the principal objectives of his numerous trips to the Far East, he has brought through the port of entry at San Francisco more than 5,000 simians. You must admit that Frank Buck has done his share of monkey business.

If you visit the zoos in New York, Philadelphia, Chicago, St. Louis, Dallas, Milwaukee, San Diego, Memphis, Kansas City, San Antonio or Minneapolis you are sure to find yourself face to face with many an old friend of Frank Buck's. There are several of these "friends", now behind bars, that, at one time, were happy to eat out of his hand or willingly would have chewed off their captor's leg or head if given half a chance. Not all these animals had what we would term a friendly disposition. But every animal with which Frank Buck has come in contact, and frequently this contact has been much too close for comfort, each and every one of them is a friend, to him. They may have left their mark on Frank's person, a bite, the nasty scratch of a claw, or a sting—but they also left a good story with a master spinner of yarns.

I met Frank Buck at an impromptu luncheon in a cafe where writers sometimes gather for the noonday meal. There were six in our party and the discussion started out to be of matters well within the city limits or, at best, national in scope. A chance remark by one of the party about dogs led to stories of domesticated pets and before we knew it Frank was launched on a yarn involving his personal experience with a python. Animals in transport demand constant care and attention. Snakes, as a rule, will make the ocean trip to the States without food, but they must have water. To equip their crates with proper drinking receptacles is unnecessary, as the reptiles are capable of absorbing water through their skins readily, so a bucketful is dashed over them daily. The big fellows are given private accommodations, the top of each box being a hinged lid. Before the water-dasher gives a crated python a bath he takes a hurried glance at the coiled snake to determine the exact location of the reptile's head. If Mr. Python is facing the opening, when the lid is partly opened, the water-dasher slams the cover down and finds something else to do for an hour or so. It seems that when the big captive's head is pointed toward the opening the spring for possible freedom is made with ease, but if the snake is not in the right position to attempt the spring the attendant has ample opportunity to administer the bath, refasten the lid and be on his way before the reptile can get turned around in the cramped quarters.

"Hurrying to get my tasks aboard ship performed," said Frank, "there came a day when I neglected to take the precautionary glance into a crate containing a full-gro python. The snake took full vantage of the neglect by springing op mouthed for the opening and, finding hand directly in its path, proceeded swallow it. Now a python is not a p sonous snake and it has no fangs. As swallows its food whole the reptile's tee while numerous, are used to help cro this food down the throat and not mastication. I slammed the lid of crate down before more than three or f feet of the python slipped out, determi to keep, if possible, the balance of body in captivity. At the same tim let out a yell for help. A native Ma boy, my assistant on the trip, was first to come to my aid. With the h of deckhands most of the python was k in the box, much to my eternal gratitu for once its body was completely outs I would have been crushed in the gi coils and it would have been necessary kill the reptile before it killed me. I do like to kill any specimen unless the oc sion demands. It's my business to bri

Even then work was not over. Before my arm extricated I thought it would be d from its socket.

'THE python was returned s crate and my Malay boy and I spent rest of the day picking tiny teeth out ny arm with tweezers and giving the b and injured member first aid treat- ts. It was several hours before the ulation in my arm was normal."

few days after the luncheon party I pted Frank's invitation and "looked up" at the hotel which he is using his headquarters while in the city.

He met me at the elevator and as we walked down the hall to his room he said, "I'm glad you caught me when you did because I don't know how much longer I'll be with you modern cliff-dwellers."

"Headed for the jungles?" I asked.

"Yes. For the jungles, but the trip will mean a different racket than usual for me."

"Don't tell me you're quitting the animal collecting game."

"Not exactly," he laughed. "Only this time I hope to be collecting pictures of animals as well as the animals themselves. I expect to sign up with one of the big motion picture companies within the next day or so. Everything is practically settled and soon after the dotted lines have been decorated I'll be on my way to Singapore with a couple of cameramen in tow."

I asked how it happened that his first broadcast was responsible for bringing him to New York.

"Oh, yes," he said. "I promised to tell you about that, didn't I? Well, it was on my last trip to the Orient and the ship put in at Manila. I have a host of friends in the Philippines and, after holding a young reception with those who came to the dock to greet me, one of them hauled me off to attend a Rotary luncheon as the guest of honor.

"I don't know that I am any great shakes as an orator, but when I was introduced I managed to get away with it by telling some animal stories." Frank is too modest. He may not be an orator in the full sense of the word but he has the knack of making his adventures live again in the telling. "A newspaper editor was present and asked me if I would be willing to broadcast these stories that evening. I had heard a lot about Radio but the nearest thing to a broadcasting studio I'd ever seen were the wireless rooms on shipboard. The novelty of the thing appealed to me and I agreed to take a chance as a microphone performer.

"This Manila newspaper sponsors a half-hour program called 'The Front Page.' For fifteen minutes news events are broadcast in much the same way they are here by Lowell Thomas. By the way, I met Lowell for the first time in the East about ten years ago and used to run into him occasionally out there until he got so civilized he started spending most of his time here in the States."

"What about the other fifteen minutes?" I asked.

"I COULDN'T say what they were accustomed to having, but for this particular broadcast I was the other fifteen minutes."

"Do you remember the call letters of the station?"

"Not offhand. Wait a minute." He dug up a scrapbook and found the desired page. "Here it is. Here. Station KZRM. Nice little place. The folks there treated me fine, too."

"What did you talk about? What stories did you tell?"

"I told about the time an orang-utan got loose on board ship and I knocked him out with a blow on the chin."

"With your fist?" I asked.

Frank "Bring-'Em-Back-Alive" Buck faces a live Mike and lives to tell the tale to eager listeners.

Little Tommy Tiger snarls a wicked farewell to India. He will soon be in America.

Suds. She learned the laundry business in the jungle.

"Sure, with my fist," said Frank. "I never met a 'rang yet who understood the first principles of boxing." He laughed and added, "I used to be pretty fair with the gloves. But I didn't have any on when I gave that fellow the uppercut." He rubbed the knuckles of his right hand in reminiscence.

"Oh, yes. I spent most of the fifteen minutes telling about Gladys. She was another 'rang," he explained parenthetically. "I bought her with four others from a Malay trader. When you buy from traders you never know whether the animals are wild or tame. You see, the natives often capture baby 'rangs and raise them until they are large enough to sell the traders. Sometimes a native family will keep a 'rang for a pet until it is full grown. That's about fifteen years. Let me tell you about Gladys. She was full grown. I didn't discover she was tame until I had her in the compound near Singapore, my headquarters when in the East. As her cage was being installed in a shed, along with others just arrived, I happened to pass close enough so that she could reach out through the bars to touch my arm. When one is familiar with 'rangs the approach of a tame ape cannot be mistaken. An untamed 'rang makes a hasty grab and bares its teeth. The tame animal is unhurried in its movements and the teeth are never displayed.

"Gladys stroked my arm so gently that I paused in my work and moved, bit by bit, closer to the cage. I was ready to jump away at the first sign of danger. But there wasn't an evil thought in this girl's head. When I knocked some of the front bars loose she stuck her head through and nuzzled my arm. Then I knew she wasn't fooling. A moment later I had knocked out enough bars so she could climb out.

"Man alive, she was the happiest animal I have ever seen. She hugged me in a motherly fashion, as well as her height of four feet would permit, stroked my arms gently and then danced up and down in front of me. She certainly appreciated regaining her liberty, for by watching the humanly natural way in which she performed little self-imposed duties I was soon convinced that she had spent many years practically in the bosom of a native family.

"I fastened her, dog fashion, with a collar and about ten feet of chain near the house. The building stood about three feet off the ground and Gladys slept on the ground under it. Gave her some straw and a blanket and she made up her own bed, spreading out the first very carefully before rolling up in the latter.

"One day she stopped me to investigate a basin and washrag I was carrying. I gave them to her to see what she would do. She placed the basin of water on the ground and began scrubbing and

Suds. She kept it up in the compound.

dousing the rag, going through all the motions of a laundress. After first soaking it thoroughly, she picked it up with both hands and proceeded to wring it out, like an experienced washerwoman. Then she shook it out, put one corner between her teeth and stretched it flat with her hands. Making sure it was clean all over she walked from the shadow of the house to spread the rag out neatly on the grass in the sun.

"She used to slip out of her collar almost at will. It wasn't that she wanted to escape. She may have wanted to come and sit beside the road to wait for me to return from town in the car. I found her there several times. The minute the car stopped she would climb in and take the seat beside me.

"She liked to climb over the roofs of the house and sheds in the compound. She gave the young fellow who lived next door a good scare by suddenly appearing at his window to look in on him as he was bathing. That wasn't a ladylike thing to do.

"The gardener's baby was her especial joy. She got a great kick out of swinging the child in a hammock. But the gardener objected to the motherly attention she gave the infant and I was forced to fasten her collar with a padlock. Unable to slip out of this collar she was forced to remain within the limits of the ten-foot chain.

"ONCE in a while I would take her in the car when making the trip to the city. She liked to ride and sat, very quiet, on the seat beside me. Sometimes, when I stopped in at the bar of the Raffles Hotel, I would let her have a small glass of beer. Once, to see what she would do, I took away all the chairs which surrounded the table where I was sitting and pretended not to notice that Gladys was present. Undaunted, she set a chair over to the table and seated herself, reaching for my glass by way of announcing that she was ready for her beer.

"She made a host of friends during the trip across the Pacific and I had become so attached to my pet that I hated to part with her. However, I could not keep her here in the States. I had to let her go. It was the saddest animal farewell I ever known. She was some girl, that Gladys."

"HOW did you happen to give her that particular name?" I asked.

"I don't know who named her, I didn't. But, as I remember, she was called Gladys the day she arrived at the compound. And the name stuck."

"Where is she now?"

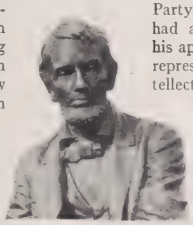
"In the Municipal Zoo in Madison, Wisconsin. Well," he said, referring once more to the broadcast, "I told that story and one or two others and the letters I received from interested listeners amaze me. So many of them."

Frank Buck's life has been so filled with adventure that he has a never ending supply of stories. He knows how to tell them, too. The majority of his yarns are a bit too thrilling to be classed as bed time stories. He should never be permitted to broadcast at a late hour.

Suds. And suds was her reward.

London Salutes Lincoln

Famous British Author Broadcasts Glowing Tribute for the Great Emancipator to All America



By John Drinkwater

John Drinkwater, English playwright and one of the greatest living authorities on Lincoln, who broadcast this tribute from London, via the Columbia Broadcasting System

ABRAHAM LINCOLN was born February 12, 1809 in a log cabin with a dirt floor at Hodginville, Kentucky, and grew up in an ronment at once stark and romantic. ost from babyhood he had to make way by insistent and heavy manual r, picking up a little elementary edu- on at a school that was a log hut. The olns had to win their living directly the earth. Favorable weather meant oden bowl regularly filled. A bad sea- meant hunger and penury. He was a ral-born hard worker with a lean, cord physique which could easily hold wn in any work or horseplay that was and. He could be gentle, but he was r soft. He began to read walking ty miles out and home again to borrow ok. Friends in distant parts of the itory encouraged him, and Aesop, oe and Bunyan became his friends.

le began to be employed on er- ls that took him far away from a Lincoln's cabin, trading g the Mississippi River down New Orleans, where he saw e gangs being dragooned in dcuffs, with the conse- nce of an impression made n his mind which was r written indelibly on the ory of the United States. y the time he was twenty, aham Lincoln was an lete who feared no comers, raduate in the rigors of necessity, and e traveled than most of his station in . He had further acquired enough book ning to give him a name among his for being "peculiarsome."

Abraham Lincoln

n 1831, we find him, independent now home and family, serving in a store at w Salem, in Sangamon County, Illinois. became a lawyer, and for twenty-three rs he lived in Springfield, prospering is profession, becoming more and more talked of as a personality, sometimes elected to the state legislature, and sometimes defeated, and for a time serving as Congressman at Washington.

These Springfield days were an ordered probation to him. The obscure pioneer politician whom we see emerging in 1860 to take control at Washington, and after five years of authority to make an end, leaving a name sweetly memorable forever, may assume the character of a "God out of a machine", but if so he comes fully armed with experience patiently acquired during those twenty years on the Springfield circuit.

The man elected by the Republican Party to the presidency in 1860 had a few months earlier made his appearance before an audience representing the culture and intellect of the East. At Cooper Union, in New York, some fifteen hundred people assembled while a snowstorm swept into the city, and were astonished when a gaunt, uncouth man, over six feet in height, dressed in no fashion, with enormous feet and terribly conscious of his hands, stepped onto the platform.

If this were the possible candidate produced by the West for supreme office, it must be allowed that he was a very strange one. Culture and intellect were almost inclined to titter in spite of good breeding. Think of the Mayflower lines of long descent! Think of Mr. Seward! But as Mr. Lincoln went on speaking, Mr. Seward seemed to matter rather less. The mild and disdainful curiosity gave place to unconcealed admiration. Intellect and culture needs must salute a sincerity so convincing, needs must see themselves transfigured in such homely logic, such native dignity. This man authentically was prophesying before them. The great audience forgot its decorum and surged up to the speaker in waves of enthusiasm. A new and grandly incalculable personality had come into the national life of America, had indeed come into history, with brief but imperishable annals to be told.

Lincoln's power came to its maturity in a time of war, and although the cause of the struggle and the issues involved have now emerged in outlines upon which disagreement is scarcely possible, this war was in its time, like all other wars, mired in almost indescribable muddle and apparent futility. The end, and the means to that end may always have been clear to Lincoln, but before the end was reached, he had to lead a hundred discordant factions through weary months, even years, of confusion. Often he seemed to be hardly leading them at all. His ministers, his generals, his political managers, the press, among all these were to be found patriots who were convinced

Everybody's Sweethear

But Nobody's Darling—
Yet — Says Best-Loved
Soprano on the Air

Jessica Dragonette

Wear Scanties On T
Stage?—Oh No!
She Turned to Ra

An Interview B
MILDRED MARTI

FATE was in an extremely gracious and pleasant mood a little over a score of years ago when she wrote in the stars that the birthday of a little sunny-haired girl, who is loved by countless persons, should fall upon Saint Valentine's day. And the parents of this girl, who could well substitute for a fair-haired Eros, were in league with this same beneficent Fate, for they looked down upon the crumpled pink mite and decided to call her Jessica Valentina Dragonette. No wonder that Fate and Saint Valentine smile happily and kindly today, for the bit of a baby has repaid all their dreams for her and is known, because of her golden, tender voice and charming personality as "Our Jessica", the "Baby Prima Donna" and the "Sweetheart of the Radio".

There is nothing one-sided or complacent about Jessica, despite the position she has achieved as perhaps the best known and most loved artist that Radio has produced; and for all her elfin charm she is an extremely earnest and serious little person with the unrest and the searching mind that mark the genuine artist.

Tucking a round-toed slipper under her and turning those large eyes of hers that she likes to call "plaid" upon the writer, Jessica delivered herself of an astonishing observation a short time ago.

"Do you know what I think I'd rather be than anything else?" asked Jessica. Shaking her little head with its masses of wavy hair at the obvious answer "just what you are," she went on, "I'd rather be a writer, I think, or a painter." Smiling at the surprised incredulity of her listener she explained, "You see, a note of music, no matter how lovely it may be dies at the very moment it is born. There is nothing about it that can be captured, really captured I mean; but a charming bit of landscape can live forever through the pen of a poet or the brush of a painter. Oh, yes, I should much rather be one of them."

But although Jessica doesn't paint, save to outline a delicate cupid's bow (which is as it should be) upon the whimsical lips of a daughter of Saint Valentine, she does write. She writes magazine articles, and recently was pinch-hitter for a Radio columnist who invited her to his paper as guest-writer. Her articles are half-tender, with her affection for the unknown thousands who write her letters every week, and thoroughly intelligent with her understanding of the mechanics and requirements that go into the making of good broadcasting.

JESSICA has some verse also standing to her credit, of which the poem on the next page is an example. It was published more than a half-dozen years ago by a Philadelphia newspaper, when she was a shy and mouse-like little person just through with her training in a convent school among the gentle-eyed sisters.

The writer cast an appreciative glance at Jessica in her smart little black imported frock with its dainty points of white organdie at neck and sleeve, and spoke of the pity that so m charm and daintiness shoul hidden behind a microp that, for all its sensitivity gracious and lovely v should be utterly indifferen the personal charm of app ance of its artist.

"ANY fat l lady can sing," the writer arded, "but not many can b your elfin loveliness and go voice to footlight appeara Just think what audiences missing and how they w love you."

With a whimsical shru her small shoulders, Jes who sings weekly to thousa said, "Do you know, I'm scared to d of audiences. Really, I am. I think the most romantic thing in the work sing to people in their own homes wh can't see them and when they can ima me as looking any way they want m look. Just imagine anyone who like think of me as tall and dark and my rious, or titian-haired and blue-eyed, ing the real me. Anyway, I'd much ra not see my audience. Even the tir one frightens me to death, and I d welcome the thought of television at

From anyone but Jessica this migh regarded a bit skeptically, but not so f Jessica, who is the most honest and tr ful soul imaginable.

As most people know, she has appea briefly behind footlights, and her first experience in the theatre seems so thing in which her same watchful had a finger; for when she sang the solo part in Max Reinhardt's *The Mirac* the part of the angel's voice, she was seen. Only her enchantingly sweet v flowed down from the heights, wh Jessica herself was perched like a lit bird high up in a balcony on the wall of the Century Theatre in New York.

Her days in *The Miracle* almost trod on the heels of her convent days, not without a certain appropriateness. Quakmost of the time at her unaccustomed roundings and fascinated by the the-. Jessica stole about like a timid child. eat admiration for Lady Diana Mans awakened in her as she watched permance after performance of Lady na as either the madonna or the little rice, and Jessica began to regard the ely blonde Englishwoman as something ost miraculous. One day the gracious dy Diana sent for Jessica to tell her t the great Chaliapin had spoken enasiastically of the golden voice of the een singer. In a daze Jessica listened, l later, speaking of the fascinating exience, said, "I suddenly saw a tiny ety pin holding a ribbon upon Lady na's shoulder. Somehow, then, for very first time I knew she was hun after all. When I got outside her ssing room door, I hopped for joy."

All of Jessica's experiences in the atre, however, were not so happy. e once spent several bitterly unppy weeks in the chorus of one of rl Carroll's *Vanities* and upon one asion nearly "stopped the show". r one of the finales the girls were uired to dress in scanties and pass ond the footlights upon a runway se to the audience. Jessica advanced t of the distance and stopped stock l, holding up the entire line of girls. just couldn't go on for a moment," sica explained. "I don't mind apring in a bathing suit, that's all ht. But," and her eyes flashed dangously at the recollection, "to appear UNDERWEAR, before all those ple, that was a different matter." is needless to say that Jessica soon minated this uncongenial associan.

She tells of another amusing episode en she was appearing as Kathie in e of *The Student Prince* companies. a certain point she was required to s the actor playing the part of the nce. "I was so nervous and I sed him so hard," laughed Jessica, at I left a large, red smear of rouge his face. You know it was the very t time I had ever kissed a man."

During still another phase of her ge career Jessica utilized her great t of mimicry and appeared as leadingenue in *The Grand Street Follies*. Her ability as mimic is not limd to mere tricks of facial expression d voice, but in a few deft strokes, an ence of mind rather than any exnal thing, she can make people one ows, famous people that she has been ietly observing at a party, come to life h all their characteristics before one's onished eyes.

Even the secret of her daintiness and artness of appearance was once put into rds by Jessica. In speaking of clothes e said, "I think it is quite necessary to nsider the amount one spends on clothes as an investment. You owe it to people always to look nice and they won't forgive you if you don't"

THERE is never a question of anyone ever having to "forgive" Jessica for not "looking nice", for whether she is flitting about in the little scarlet dresses she loves, or dressed demurely in black, or fluttering out to a party in a daffodil colored taffeta dress with a tiny white fur jacket over it, she looks like a fairy princess that has slipped from between the pages of her story book to brighten a drab world. Jessica's fairy story charm too, is something that is inborn and not acquired from contracts such as she signed in *The Vanities,* which stipulated a session with the toothbrush five times a day and a visit to a beauty parlor twice a week.

Jessica's graciousness is perhaps best illustrated in her attitude toward her ever-increasing deluge of fan mail. Busy as she is with her studies, she answers hundreds of the letters herself and sends out thousands of photographs to anxious and admiring fans. This, although she still continues her vocal lessons from one of the most famous teachers in New York, not to mention her Spanish and French lessons and the endless time she devotes to preparing her programs. For she even writes the condensed versions of operettas and musical comedies which are presented weekly in her broadcasts.

Now and then some of these letters cause Jessica to pucker her brows. For instance, there is a persistent admirer who writes song after song and sends them to her, requesting that they be sung on special dates. "And even if the songs were really good," wails Jessica, "he doesn't seem to realize that they might not be suitable and that our programs are prepared three and four weeks in advance."

There is a sixteen-year old girl, however, who is Jessica's special delight. Marjorie's mother brought her to the studio one day to see Jessica and the girl was stricken dumb in the presence of her idol. Since then there have been other meetings and many, many letters. Marjorie sings every piece of music that she has heard Jessica sing, and copies shadings and phrasing in an uncanny manner. She pulls her hair into the same lines as those of little Jessica's golden waves; and was once sent home from a girls' camp because she made life miserable for counsellors and herself—the camp boasted no Radio and she had to miss Jessica's weekly program.

The thing that most caught Jessica's fancy was to learn that Marjorie has one corner of her very own room turned into as exact a reproduction of a Radio studio as possible, from the gong and clock to an imitation microphone. "When she has come to see me," said Jessica, "she has sat as still as a little mouse and has never taken her eyes off me. It is more frightening to me, this close scrutiny when they even count your eye-lashes, than my whole unseen Radio audience, but I think Marjorie is a dear."

Jessica's own room is an enchanting place and it shows just how little all the adulation that has been heaped upon her has spoiled her. Here are no elaborate brocades and silken hangings. It is the room of a student and a dreamer, tucked high up in a tall building, and in it is Jessica's narrow little bed, her piano, her books and her pictures, many of which have traveled the road to success with her.

Trying to get any information from Jessica about love is like trying to capture a pixie or wood-nymph or to get information on the Einstein theory. Smiling gayly when asked if she is in love, Jessica says, "In love? Of course, I am. I'm always in love." And after all, isn't this the very best answer that could be made by a lovely, gay little person who, among her many, many gifts had no less a personage than Saint Valentine for a patron saint?

Jessica Dragonette Writes A Poem

DREAMING

'TIS *Twilight now,*
And through the day's long waiting
I have thought
Half o'er the hour you'll be free
To go awandering with me.

ALONG *the mountain's daisy bend,*
And yonder where the lilacs send
Their perfume mingled with the rose,
To filter through the after glows
Of day.

I START—*my being all a-tremble,*
Nor cap nor mantle I assemble,
Only to wander hand in hand
With Wisdom in a lily land.

TO GATHER *from your fecund thought*
How the cloth of life is wrought;
To feel your balm for human tears
Your love removing all my fears.

'TIS *twilight now,*
And through the day's long waiting
I have thought
Half o'er the hour you'll be free—
Then, little dream, you'll fleel

Another Answer to the

BEAUTY CHALLENGE

STATION managers, female artists and their sweethearts are all in a pother these days . . . because of the RADIO DIGEST Beauty Popularity Contest. With television coming on apace, it was thought the psychological moment for Radio broadcasters to come out in the open and show the public what they have to offer.

Two popular stations have answered the challenge. In the February issue KROW of Oakland did a lot of krow-ing over their staff of pulchritudinous damsels. Then in our March issue, WMCA of New York presented as fair an aggregation of singers and Radiactresses as one could hope to cast one's eyes upon.

Now out in the extreme west, KFWB and KGER seem to join hands in fraternal allegiance of some sort and pool their scintillating and dazzling array of pulchritude.

KGER, located in Long Beach, and KFWB, out in Hollywood, have an interchange of talent by which the beach station sends three or four programs a day to Hollywood over remote lines. This is not in duplication, for while KGER itself may be broadcasting one studio program for itself it is staging another which is sent over the wire for release by KFWB.

On the other hand, KFWB uses Bill Ray (KGER manager) to announce over the Rad its premieres from various theatre forecou and also releases to KGER once a week Warner Brothers variety program.

Thus any possible rivalry between the t broadcasters is purely of a friendly nature, and this spirit they have pooled their display beauty to issue a rebuttal to the photos alrea published from both east and west.

In similar display of sportsmanship, KFW has withheld pictures of famous stage and scre beauties who broadcast from the station a entered only regular staff entertainers.

Both stations confidentially expect that, soon as these pictures appear in print, they w be bombarded by a horde of male artists anxio and eager to work amid such bewitching su roundings. Line forms on the right.

Other stations . . . here's your invitation enter your fair entertainers in this nation-wi contest. Where are those far-famed beauties the South with their peach bloom comple ions? . . . Middle-western broadcasters, whe are your corn-fed damsels with the come-hith eyes?

And readers . . . what is your opinion in th battle of the beauties? Write the Editor, RAD DIGEST, 420 Lexington Avenue, New York.

KFWB entrants in beauty contest . . . (top row, first at left) Doris Jean Stone is the staff's youngest and smallest bit of femininity and does juvenile drama features. (top row, second) Nanette Vallon, musical comedy girl who specializes in Latin types calling for fiery emotional songs known as "hot stuff". (Top row, fourth) Ann Stone is both an actress and singer . . . likes naughty French girl parts and rolls a wicked accent. (Top row, fifth), Elinor Gail's deep dark past includes action with Roxy's gang but now she sings soprano over the air. (Picture on opposite page), Loyce Whiteman, the "girl with the wistful voice".

KGER pulchritudinous challengers . . . (Top row, center), Laura Lee Berry, sole surviving soprano, who took first prize honors as the station's best looker. (Left side, reading downwards), Marie Waters, violinist, leads the girls' trio and spends a lot of time answering fan mail from anxious members of her audience. Edna Bond, pianologue girl, who uses her trained digits and educated tonsils for the entertainment of many. Elsie Montgomery, 'cellist, when at home makes fudge, but at the studio does solo work and numbers with a string trio. Helene Smith, dainty and demure pianist, who does all sorts of keyboard improvisations.

Loyce Whiteman

THERE'S a wistful
ething in the voice of
e Whiteman at KFWB
makes you want to
where she is and look
her face. She has
icrophone soul. This
o gives you some
of her appearance—
the other half of her
yet to be seen there
mething more to hope
for later on.

Ferne and Flowers

THE Master Gardener of the NBC Vigoro program discovers a rare Ferne in this garden—Miss Ferne McAllister. Sometimes Ferne is seen as one of the Evening Glories of the Earl Carroll Sketchbook trellis. The stage beauties are twinkling across the Radio horizon with increasing frequency.

Lillian Taiz

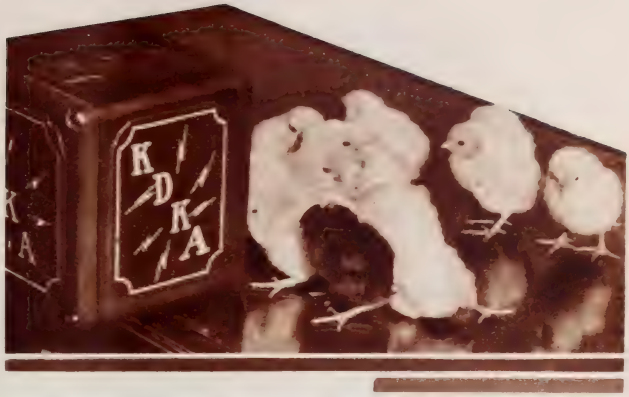
THIS is the voice of the old Master's daughter, Lillian Taiz. She was well known on the air a few years ago. Then she went into musical comedy, was lead in "The Jazz Singer," prima donna in "Spring Is Here," "The Dutchess of Chicago," "Hello Paris," and "Artists and Models." Now she is lead feminine singer in the Dutch Master's weekly songfest heard over the CBS system.

Singing School

NOT all of the Seth Parker Singing Schools are located in Maine. Here is an especially good Seth Parker School as produced for Midwest listeners at KFH, Wichita, Kans. From left: Vernon Reed, Francis Diers, Lovina Lindbergh, Eunice Tole, Wilbur Schowalter, Dan Hosmer and Sue Fulton.

Tim and Ole

SEEING that the country was going to the dogs anyway Tim and Ole, the court house janitors, who discuss affairs of the nation over WCCO, Minneapolis, adopted Julius, a canine as sagacious as themselves. Tim is impersonated by Frank McInerny, automotive editor; and Ole by Fred Lundberg, sales manager.



Phillips Lord

CREATOR of the Seth Parker character familiar to all Radio audiences is shown here in character with Ma Parker, played by Effie Palmer. Scene in NBC studios, New York. The Seth Parker programs are syndicated to all parts of the country.

Just Out

GOOD little eggs—at least they were only a few weeks before this picture was taken showing them presenting an early morning overture at KDKA, Pittsburgh. It's their one moment of glory. A few little peeps and then back to the farm to make way for a new batch due the next week.

Byrd Dog

"WOOF! Do you hear me? Yip, I'm Dinny. Me it was who led the dog gang that pulled Norman D. Vaughn's sled pack over the ice fields on the Byrd Expedition. We showed them how to get there—and I guess if it hadn't been for us—what, did we find CATS? Yeah—pole cats!" At WBZ-WBZA, Boston.

Flock Songs

"ARE you birds ready? O-kay! One-two-, one-two! Commence—" and a second after this picture was snapped Pretty Picture, at the piano, and her canary chorus were lilting a glorious good morning to all the world, from WSFA, Montgomery, Ala.

Louise Gillhouse

SOME day Peter De Rose hopes to hear Louise sing "When Your Hair Has Turned to Silver" and realize all that he imagined when he composed the piece. The listeners along the north section of the Pacific Coast enjoy Miss Gillhouse at KGW, Portland, Ore., for her soft, alluring voice.

ANNABELLE is younger than she looks in this picture but she began broadcasting when she was thirteen. She is equally agreeable as hostess and entertainer at WTAM, Cleveland. The piano is her favorite instrument of expression.

Annabelle Jackson

Rough Riders

LEM PERKINS and his Rough Riders hit the ether trail every Thursday night from KFEL, Denver. Over the mountains and through the valleys they ride and are welcomed at every ranch house with their galloping ponies and merry tunes.

Cowboys

ANOTHER bunch of hard ridin' banjo bustin' bull tamers is this aggregation of Oklahoma Cowboys under Boss Ken Hackley. And are they good! At WSM, Nashville, they broke a five-year record for fan mail with 5,000 letters and cards for one half-hour program.

Hayseeds

HEH! Heh
'Tain't no use argyfy
in' 'baout cowboys
folks, these whoop
dinger Hayseeds o
Augie Schultzez a
KPO in San Francisc
sure do mess up th
air with their lallygag
gin' an' hooray, fit t
kill. Ef ye ain't heerc
'em yet ye got som
pin' comin' to ye
They start rarin
'round 'bout 9:30 p.m.

"Sisters"

BURLESQUING the household hints features these two gentlemen, Ed East (left) and Ralph Dumke are providing an endless assortment of "hints and helps" for making the home happy. They are heard every afternoon at 2:45 over a WJZ network as Sisters of the Skillet.

Hill Billy

A TALL lanky boy from the mountains walked into the WCKY studios at Covington, Ky., and reckoned as how he'd like to do a piece on his mouth harp and guitar for the Radio. Without even an audition he was given his chance while the Radio audience was asked to write whether he was worth hiring. It was a great success and Hill Billy Kid got the job.

Jimmy and Bennett

YOU remember reading about Jimmy McCallion, one of the youngsters now making big money in Radio? Here he is in a new role as Captain of the Jolly Junketeers. Bennett Larson is at the piano. They are heard over an NBC network Wednesday afternoons at 5:15 EST.

Jeanne Carrol

SHE has one of those voices that haunt you in your dreams—but that may be because she is the heroine in one of those absorbing mystery plays that you hear at WMCA. An actress and a singer plus the personality that equips her for that day when we shall see as well as we now hear.

Agnes De Mille

HER series, "The Modern Dance," concluded recently over the NBC net, disclosed Miss De Mille as a young woman of versatile accomplishments. Her comment on the latest figures in dance movements was eagerly attended in college centers while lectures in higher learning waited.

Norma Shearer

THIS is a particularly exquisite composition of curves, if you will note, but we present Miss Shearer as one of those delightful screen personalities who have come to appreciate the fact that after all Radio can be a medium for conveying art to a waiting world. You've heard Miss Shearer on some of those Hollywood specials. There's more about the subject on the opposite page

Above—Charles "Buddy" Rogers and Lillian Roth. Left, Nancy Carroll. Right, Buster Keaton.

High-Hatting HOLLYWOOD

Radio Turns Tables on Once-Haughty Movie Stars—Now They Push and Crowd to Reach "Mike"

By FRANK ORME

THERE was a time when Hollywood, to Radio, was quite high hat. But that ncient history now. more does the gen- arlet lisp "Good eve- dear fans of Radio- '. Oh, no. Nor do stars of the screen t their microphone ntments while several on breathless fans eagerly for the in- d words of their idols. re not waiting so hlessly in this en- ned day.

e fact is, the shoe is ie other foot. r instance, a manager ie of filmland's lumi- s might talk to the tor of one of our wood or Los Angeles Radio stations thing like this.

say, old chap. I've got great news you. I've fixed it all up for the st star in the industry to come down ur studio and talk over the air."

'hat does she do?" our station man- might innocently ask.

o? . . . Why, man, I tell you this s a great star. The people will go just to hear her voice."

m sorry, old man, but you see our lule is made out three weeks in ad- e . . . and, after that, . . . er, you , things are so uncertain that . . ."

this point the conversation is in- pted as the star's manager drops

Imagine telling anyone that you t want Norma Shearer on your Radio n! But then, nobody ever said that Norma. Miss Shearer is one of the nate few who have Radio "it" . . . rare gift of personality that passes gh and beyond the microphone.

We might also give a cheer for Marie Dressler, Jeanette MacDonald, Bernice Claire or Polly Walker. Charlie King, Alexander Gray, Buster Keaton and our old pal, Harry Langdon, also merit high rating.

But the purpose of this article is not to praise, condone or condemn, but to tread lightly o'er the past, to tell you of the rosy future in the way of broadcasts from Hollywood, and to give you an intimate glimpse behind the "mike" at a real "movie" broadcast.

To begin with, we'll treat the past briefly and with soft music. Upon first realization of the tremendous possibilities for pubicity afforded by Radio, scores of Hollywood's finest rushed to the microphone. The aforementioned breathless public welcomed them with open ears. The result was disillusionment. There was no preparation for these appearances. The programs were haphazard. First the public, then the Radio directors, then the producers and, lastly, some of the screen stars themselves discovered that the mere presence of one of filmland's idols was not enough.

And so our "movie" programs, as such, have died.

At present we find Radio and Hollywood, like a pair of quarrelsome lovers, making up. In no other field of entertainment are precision and careful preparation more vital than in broadcasting. Hollywood is learning that. On the other hand listeners all over the country are clamoring for air personalities. Nowhere in the world are there so many vivid and colorful personalities as there are in magic film capital. Radio is learning that.

The result is obvious. Regular programs will be broadcast over the entire country direct from the sound stages of the great motion picture companies . . . just as sure as rain at a picnic. Arrangements are already being made in some places.

No persons realize the value of publicity more than the film producers. There is no other medium equal to Radio for the presentation of such publicity. The hook-up is a "natural".

What will these "movie" programs be like? . . . It is safe to predict that they will be more colorful and have more appeal than anything yet offered to the listening multitudes. They will effervesce with personality and fine music. They will bring us world famous characters in

songs, dramatic sketches and talks written by the highest paid staff writers in the world. And above all, they will be broadcast from the giant sound stages of Hollywood's studios.

We might digress for another moment to comment on the fact that many of the greatest stars in pictures, who are at perfect ease before a recording microphone or before thousands of people in a theater, are terrified . . . yes, actually terrified . . . when they are about to make a Radio appearance. One of the world's best known comediennes and character actresses recently spent two days in bed as a result of her nervousness just before going on the air. On this appearance, by the way, she made a great hit with her audience.

Estelle Taylor

Norma Shearer tells us that she is keenly conscious of the Radio audience when she talks into the microphone While she is not visibly frightened, she says that she is much more keyed up before going on the air than she is during her work before the camera.

Richard Dix

Ramon Novarro suggests that this high nervous pitch is due to two reasons . . . the lack of visible reaction to your work before the Radio mike and the knowledge that whatever is said or done is gone . . . it cannot be recalled.

When Richard Dix broadcast from Washington, D. C., at the premiere of RKO-Radio's *Cimarron* recently, he disclosed the fact that his Radio personality was as warm, as vital, as dominant as it is on the talking screen. And that was a test of Dix's self-command. For he is not an experienced Radio performer. He literally fears the "mike".

Estelle Taylor (in private life Mrs. Jack Dempsey, wife of the former world's heavyweight champion) was another of the group of RKO-Radioites which went to Washington to broadcast with Floyd Gibbons when *Cimarron* was given its premiere in the nation's capital.

Only recently Mary Pickford appeared in the Sunkist Musical Cocktail broadcast from Los Angeles over the Columbia network. This marked her second appearance before a Radio microphone.

Claudette Colbert, Paramount star, has broadcast over the Columbia network as guest artist of the Paramount-Publix Playhouse. With this microphone appearance, Miss Colbert gave an interesting account of her recent trip around the world. She found broadcasting "very thrilling indeed".

Ginger Rogers, another Paramount star, is no stranger to broadcasting studios. She has appeared as guest artist on a number of Columbia programs, lending her singing voice and charming speech to the ethereal waves. Miss Rogers finds in Radio a certain something that is missing on the stage and in motion pictures. Her fan mail after each broadcast is enormous.

Buddy Rogers is another star broadcaster, in which role he sings, talks and plays the saxophone or any number of musical instruments.

Ruth Chatterton and Charles Ruggles have also taken to the air waves. In fact, with Charles Chaplin as the only exception, probably every important motion picture player has sent his voice out into the ether at one time or another.

But now let us look behind the "mike" at our real "movie" broadcast. We go back some months to a particular program of the old "M-G-M Movie Club", which was one of the most popular features ever to reach the ears of the Pacific Coast and Rocky Mountain audience.

This description will give you an idea of what to expect when such broadcasts are resumed during the next few months.

This program brought to our ears the voices of Bessie Love, Charlie King, ... Benny, Blanche Sweet, the M-G-M ... cording chorus and several other c... ties. Instrumental music was provid... Sam Wineland's thirty-piece orch... one of the finest on the West Coas...

Far back through the massive en... to the huge Metro-Goldwyn-... studios in Culver City, a few miles ... the heart of Hollywood, is stage nin... of more than a score of great halls ... many of filmland's most pretentiou... tures are produced.

This room, one end of which ... screened off for the broadcast, is ... than a hundred and fifty feet long, ... ceiling, with its myriad contraption ... cameramen, directors and electri... towers high above the floor.

At six-thirty o'clock, two and a ... hours before the broadcast, the orch... was swinging through the last stages ... four-hour rehearsal.

Intermittently the engineer in the ... enclosed "mixing" room, which hung... the side of the huge stage about t... feet above the floor, would shout in... tions through the loudspeaker belo... cage.

And so an hour passed in whippin... program into shape. A brief respit... dinner was followed by hurried pr... tions for the fast approaching hour ...

At eight-thirty o'clock, half an hou... fore the "dead line", a stir was creat... the arrival of Blanche Sweet and C... King. Bobby Agnew, direct from o... the sets where he had been workin... peared a few minutes later with a ... make-up on and wearing a tuxedo. ...

Broadcastor OIL

Squirts and Smears from the NBC Lubricator Who Trades His High Hat for a Pineapple and Extracts a Few Squeaks from the Studios

By Ray Perkins

' Ray perks up when he disposes of the heavy high hat and gets to work on Radio Digest's gossip column.

PILLING airy persiflage into a defenceless microphone is one thing. Fastening it down on paper is another. Hot air in cold print doesn't ays jell. But for goodness sake, it's not r magazine, and if the editor wants to me play around in it, what's it to you? u only paid a quarter for your copy way. (Maybe you didn't even buy one, but let's assume you did. Look, giving you a fair break.) Why, the er in this magazine alone, plus the fasers, mucilage, ink, interest on the intment, overhead, underfoot and goodon earth amounts to more than a rter. More than twenty cents. More n even fifteen cents, I guess.

Vell anyhow, before you idly turn the es and fritter your time away on someg silly, at least give me a chance to ke a statement. Recently some scalag wrote to the NBC asking the purpose my broadcasts, the wet smack. Well, tell you. First of all I'm trying to bring etness and light and beauty into the s and hearts of the Great Invisible dio Audience—the GIRA as we in the ow" say. I can use GIRA in a sence. Want to hear it? (You're suped to say Yes.) All right: GIRA cheer the team, boys.

Vell, continuing with you readers who left—let them go, they were the rumble t element anyway—my second object in broadcasting so persistently is to exert a wholesome, uplifting influence on the boys and girls in the studio itself, the Great Invisible Radio Artists. To distinguish the latter from the audience, we employ the abbreviation GIRA.

It's all a lot of gira.

But my dears you have no idea what goes on behind the scenes in a great studio. I shudder to think of the Sin rampant in the private lives of our best known Radio artists. It's the old, old story. Decked in the tinselled trappings of Radio, drenched in its dross, surfeited with its limpid luxuries, they plunge themselves into the mad giddy whirl of parties, picnics, strawberry festivals and clambakes. Nice boys and girls they are at heart, worthy products of the average middle class American Home, but that leap from drab obscurity to golden stardom takes its toll. Notoriety unbalances them, unseats their sense of rectitude and sobriety, until with nerves taut, with emotions saturated, they seek the grotesque and harmful thrills of social iniquity.

How am I doing?

WITH aching hearts, let us lift the veil that has shrouded the personal activities of some of these ethereal butterflies. Who would think to hear the silvery voices of May Singhi Breen and Peter de Rose, to the accompaniment of her dainty ukulele slapping and his virile piano poking, that their home (at least they *are* married) has been the scene of Orgies at which kissing games such as Post Office and Forfeits were played? Fie for shame, May and Peter! Fie do you do it?

And would the ardent followers of Vincent Lopez, the one who is in the orchestra business, send him mash notes if they knew that he thinks nothing of five or six plates of ice-cream in a single day, especially in summertime? Well, now they know it. And do *I* care?

WHY only last month the Wasp and Wash Society discovered a love nest in Studio G. At least it could have been a love nest. It wasn't occupied, but the society has hopes.

The name of Andy Sanella is emblazoned on the hearts of millions as masseur of the slide-guitar in Papa Rolfe's Lucky Strike Orchestra. Some people think there's no swella fella than Andy Sanella. What would you say if I were to tell you that we discovered Sanella in one of the control rooms holding hands with a girl? He claimed it was his wife, and that he hadn't seen her for a week because he had been working on both day and night programs. Hm! And again (all together now) Hm! A likely story!

But the saddest case on record is that of one of our most promising young sopranos, whose name shall *not* be Jessica Dragonette, being taught the deadly habit of coughdrop eating by an announcer. Groping her way thru a foggy larynx, the poor child was induced by this fiend to eat a coughdrop before singing. Today she is a confirmed coughdrop addict.

I recall the case of the pianist, William Wirges, who plays first piano for the

(*Continued on page 90*)

Puppy

Lobo's Master Wouldn't Part With Him—Even for $40,000! — Was Heartbroken At His Death

The DOG Whose BARK Helped Make Horace Heidt's CALIFORNIANS Famous

A MASTER'S affection for his dog lost him $40,000. And this same affection, deep-seated and warmly religious, causes the master, Clarence Moore, a saxophone player in Horace Heidt's Californians dance orchestra, to mourn the death of the dog without thought of any monetary loss. In fact, Moore dislikes any mention of the commercial element.

Lobo was the dog. A giant, dignified, intelligent animal of the German police family. He won national fame with the Californians, partly as mascot and partly as entertainer, during their appearances over networks of the National Broadcasting Company. And he was known to American vaudeville audiences, the smart sophisticates of New York and the royalty of Europe. His death occurred recently in New York.

It was while Heidt and his band were playing at Monte Carlo in February, 1930, that Moore was offered $40,000 for Lobo. The prospective purchaser was one Mr. Duera, who owns a famous stable of race horses and has fashionable estates at Paris, Cannes, Monte Carlo, and in Italy. A wealthy man, he was able to make the flattering offer to satisfy a whim, but Moore flatly declined the offer. "Lobo is as a member of my family," Moore said at the time. "I couldn't think of selling him."

Now Lobo is dead and Lobo II is to take his place. Lobo II comes from the same dog kennels in California, of the same strain of dogs, and although he has been called Lobo, Jr., since Moore purchased him, the dead Lobo was not his father. They were related, although distantly. The belief that Lobo II (that is the name Moore now uses for the living animal) was a son of Lobo, has grown erroneously. The two animals looked alike, did the same tricks, played together. And Moore called the younger one Lobo, Jr.

Horace Heidt, Leader of the "Californians" orchestra.

Lobo owed some of his fame to Horace Heidt and his Californians and they owed some of their fame to Lobo. Nor were the members of the orchestra hesitant in appreciating his worth. For Lobo, like all members of the orchestra, received a salary based on the amount of money received for engagements, so his master benefited financially. And Lobo II is to be a paid member, also.

Not many years ago—Lobo was only four at the time of death—Horace Heidt organized his da band on the campu the University of C fornia, and Moore p $50 for Lobo. The was a pup of just few weeks, and Mo purchased him for pet. But he was tined, before much ti passed, to take an tive part with the ba

Lobo was alwa present, lying unc neath the chair of master, when the b played over an N network on the Sh Happytime Hour fr KPO, San Francis Then his turn ca During an informal p gram, Hugh Barrett Dobbs, the nouncer, suggested that Lobo should gr and bark before the microphone. A Lobo did.

THROUGHOUT weste states, it was disclosed by an avalanc of fan mail which descended on t studio, dogs of every description a breed were terrified by Lobo's broa cast. Some Radio sets were broken family dogs jumping against the receiv apparently attempting to discover t owner of the barks and growls. Oth dogs stood by, defiantly answering h bark with challenging barks. And t cats scurried for cover.

Immediately Lobo became a broadca artist. Of late months, while the Ca

Love

Lobo was treated like a king's dog. Here he is, enjoying one of his feasts, while Clarence Moore, his master, looks on.

ns have been broadcasting over networks from the Hotel New r. Lobo barked during the signature r. Always he received voluminous nts of mail. One woman recently d that she was positive Lobo could ght to speak.

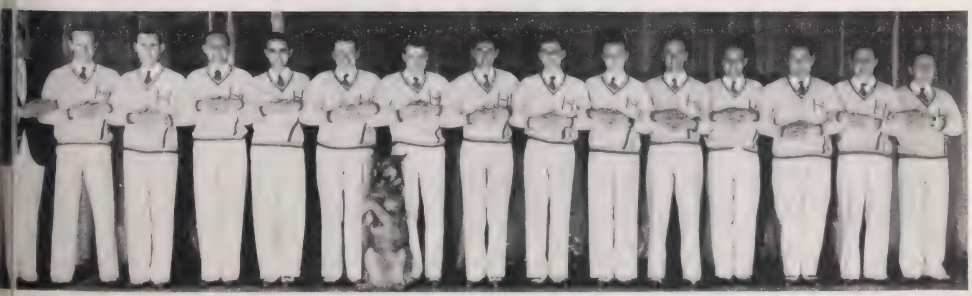
o would stand for minutes, dignified tentive, before a microphone, waite cue for his barking act. But of his tricks and acts, by which he own to a wide audience, are asso- with the vaudeville stage and Carlo. He played the role of an o malamute in *The Shooting of Dan* ew, and the role of a bloodhound g Eliza in *Uncle Tom's Cabin.*

THE *Shooting of Dan Mc-* and *Uncle Tom's Cabin* as staged e orchestra during their vaudeville rances, were short parodies on Serv- oem and the American negro slave Lobo played his two roles on al- e nights, and he played so well that uldn't forget the role in which he ast. After Lee Lykins, one of the stral members, taking the role of began running away with a fake Lobo would run in pursuit, bark- The trouble was in getting Lobo to n from chasing Lykins during the nder of the performance.

o, too, was probably one of the g champion heavyweights in the 's "dog ring." He used to spar a couple of rounds with Horace Heidt, and Heidt was once collegiate heavyweight champion of the West. Also there was no little power in his forepaws, and he danced around on his rear legs with the agility of a prep-school athlete. These impromptu boxing matches were always conducted under the best of rules, the boxing festival starting when the bell sounded. If Lee Fleming, the drummer, failed to ring the bell Lobo would turn his head toward Lee, as if to say, "Ring the bell or I won't fight."

Dr. Carl Warden, of Columbia University, once gave Lobo a mentality examination, giving him the intelligence rating of a boy of nine years.

The astute Dr. Warden placed Lobo in one room, his master in an adjoining room, and Moore, the master, whispered instructions to Lobo through a keyhole. This eliminated the question of whether Lobo understood instructions by the inflection of tone, the snap of fingers or the change of facial expressions rather than by the actual word message. Lobo proved conclusively that he understood his master's words, a feat that had never been satisfactorily duplicated before by any dog, according to Moore.



And any doughboy's knowledge of the French language did not far surpass Lobo's knowledge of French. When Moore would ask him, *"Parlez vous Francais?"* he would shake his head. Likewise, when Moore would ask, "Do you speak English?" he would shake his head. But there was a sad air to the negative head shaking.

Moore always talked to Lobo in conversational tones. Never did he raise his voice, and he displays the same patience with Lobo II.

Lobo and Lobo II both used to sleep on heavy felt cushions, slightly inflated, in Moore's New York apartment. At any time of the night one could find them, their bodies curled up like a fire hose. The freedom of the home was theirs. Either of them could open the door to the bath room, push the plunger in the water bowl and turn on the water, thus securing a drink. And unlike a boy of nine, Lobo's mental prototype, they would release the water and shut the bathroom door.

LOBO II still sleeps in the apartment and still obtains his own drinking water, but he's lonely and disconsolate. Even though he attended Lobo's funeral he seems to question what

(*Continued on page 104*)

Lobo was a salaried member of the Californians, but refused to wear the "H-sweater" because it was beneath his dignity.

Folk

Marge Grows Philosophical as She Ha
To All the Strange Requests that F
Through a Broadcast Switchboard

By Muriel Allen

"YES—this is WMCA. What's that? You're in a 'phone booth? Well, what can I—Oh Mister, Mister!"

Marge turned away from the switchboard.

"Can you beat that? His girl friend is going on the air here in five minutes, and he wants me to pull a loud speaker up to the telephone transmitter so he can hear how she sounds! And he's calling from a 'phone booth in Jersey City!"

"You must get lots of queer calls, don't you?"

"Queer? Say, this is just a *sample* of the crazy requests that come in over this switchboard at night. Why, you've no idea what people can think up—F'rinstance, I had a call once—

"WMCA! Yes! No, you'll have to write in for an audition—You can't wait? But you see, that's the only way you can get an appointment. What's that? No, I'm not the Program Director. No. I can't listen to you—I'm too busy—and besides——" She flipped the trunk line key. "Ye gods! This bird's singin' to me—*After the Ball Was Over*—I wonder if he thinks *I* can pass judgment on him —Y'know, it's funny sometimes" — the key clicked on and off again—"Gee, he's down to the last verse—But I started to tell you 'bout a call I had once—a coupla them, in fact—

"Hello—yes! No, ma'am, I'm sorry we can't accept any announcements like that—Sure, I'm sorry you lost your dog, but, you know, our programs are all arranged according to a set schedule, and we can't interrupt it to put on personal requests—I'm sorry.

"Ye—e-ees. What number are you calling? *This* is Columbus 5661. You're what? Getting married? (I suppose she wants me to congratulate her!) No, ma'am, we'd be happy to oblige you, but the department that handles our musical programs is closed now, and we can't make any changes without their O. K. It's too late. (Could you hear *that* one? She wants us to play the wedding march from *Lohengrin* at 9:30 tonight because that's the time she starts toward the altar!)

"Mr. Goldburg? On the Jewish Hour? Sorry, I can't call him to the 'phone now

Sidney Kahn, the good-looking young WMCA baritone who keeps "Marge" busy answering 'phone calls from his fans. He is heard on Radio Digest programs.

name—just said he was a friend and he was calling to warn us there was namite bomb in the building. Boy! everybody start looking around the e like mad for the darned thing. And I scared!

"BOUT an hour later an- r man called—I know it was another because the voice and accent were different from the first one! We a 'labor program' going on that night all we could dope out was that some ch of soreheads was trying to get or something. But by that time the le station staff was just sittin' pretty waitin' for the big bang—and plannin' ick themselves up out of the rubbish ime to get home for breakfast. The utes just dragged by. The program went right along O. K., but everybody was just as tense as the dickens.

"All of a sudden there was a blinding flash—and then total darkness. Every light in the place went out. Everybody kept cool, and we dug up a candle or two to help grope our way around. Programs were still going on, but for several minutes the musicians had to play by ear, and the announcers had to 'ad lib' for dear life.

"Well, when they finally fixed the fuse, everyone looked around to see who was hurt, and there right under the fuse box, stark and stiff was a little mouse.

"The bomb? We never *did* find it!

"Hello! Yes, this is WMCA. No, we don't want any ice. (We've got a cooling system of our own—when they get too excited.)

"W-M-C-A—Ay! How late do we stay on the air? Until two o'clock tomorrow morning, sir! Cut it short? Oh, no sir, I'm afraid not. You see—what's that? Well, say, listen—(Could you get what *he* said?) Why, he's lit to the eyes—an' he says, 'Shay, can't you guys get off the air 'n' let a feller go to sleep?' Hey, Mister, why not try turnin' your Radio off—Shucks, he hung up.

"Oh, yeah, I get all kindsa funny calls—What? You gotta go? Gee, I'm sorry—it's been nice to have you drop in—hope you'll run in again some time—Wednesday's a good day—s'not so busy!—

"Glad to have met you. S'long! G'nite!!"

"He's lit to the eyes—an' he says, 'Shay, can't you guys get off the air 'n' let a feller go to sleep?'—Mister, why don't you try turning your Radio off!!"

Mrs. Allen in rôle of charming hostess serves tea to guests.

Radio

Ida Bailey Allen Recalls Days of Swinging Mike, Tiny Stuffy Studios and First Broadcast—Something about Violets

By

Florence Roberts

"ANOTHER CUP of tea?" smiled Mrs. Allen as she invitingly lifted the teapot.

The sun poured its shafts of golden light into the executive office of the National Home-Makers Club. There was that feeling of rest and informality—the roaring city only fifteen stories under our very noses — seemed miles away. The executive office, far from having that forbidding air and polar stiffness that generally go to make up an executive's retreat, was more of a living room—cheerful plants, bright curtains, easy chairs—and Mrs. Allen herself just as charming as any hostess could be.

Mrs. Allen had just conducted us through the Club's home. There is an honest-to-goodness kitchen decked out with every modern, practical kind of equipment. The fragrance of appetizing foods which had been prepared simultaneously with Mrs. Allen's broadcasts, assailed our nostrils — and there were tempting pies, and romantic looking salads. An irresistible bedroom is over at the furthest end of the Club—here beauty demonstrations are broadcast. There are other colorful little studios all along with glass doors through which one can not only hear, but also see the ongoings during the programs. Then there is a compelling library where one just has to stop and take down a book or two.

That's the way Mrs. Allen does things —there's nothing half way about it. She has almost an entire floor of one of New York's skyscrapers. It's so high that you can put your hand out of the window and bring in a few bright clouds to convince you that you're not very far from perfection and heaven.

How did this all begin—when did Mrs. Allen get the idea—how was it possible to develop such a mammoth project almost single-handed? Here is Mrs. Allen's story from her own lips:

"Up to 1923 I hadn't paid any attention to broadcasting but what little I had heard about it sounded preposterous. Although it seemed wonderful, the results were generally so poor that I felt it was nothing more or less than a freak of nature.

"Finally in 1923 I was lecturing in St. Louis in the murky month of April—and St. Louis is murky in April, you know that, and one of the editors of the St. Louis *Post-Dispatch* asked me if I would go to their Radio station and give a talk. This did not appeal to me at all, but finally they persuaded me to go. The speaker who preceded me was one Mr. Davies, the well-known tree man. He went first to the ordeal, and emerged fifteen minutes later with his stiffly starched collar wilted to a string around his neck. He confessed he had never been so scared since he walked up the aisle to be married.

"I WENT into the tiny, heavily swathed broadcasting room and talked before a horn-like thing they called a microphone, apparently speaking into nothingness.

"I haven't an idea what I said except that I remember speaking about some very beautiful violets that were sold on the street corners of St. Louis.

"Well, pretty soon it was over," continued Mrs. Allen with the faintest sigh as she brought back the recollection of her early experiences. "And I received fifteen hundred letters which came from different points between St. Louis and the Gulf of Mexico.

"The next week I went to Kansas City to give a series of lectures and a broadcasting station there asked permission to put a microphone on the stage. The microphone was a sort of swinging affair and worked admirably when I remembered to stay under it. But as I had a very bad habit of walking around the stage, the listening audience got my talk literally in instalments." Mrs. Allen's brown eyes twinkled.

"Broadcasting at that stage seemed to me to be something that conspired to keep me standing in one place when I wanted to walk around.

"THEN I came back to New York with no broadcasting ambitions. It was some two or three years later when I was asked to speak on station WOR. It was a Christmas program and I remember suggesting that at Christmas time it would mean a great deal to children to have their mothers dressed in gay frocks and I suggested that every woman wear a red Christmas dress if she could. The letters poured in from everywhere, and red dresses bloomed like roses.

"When I returned to New York, one by one the large Radio stations around New York City invited me to broadcast as a guest speaker. But I declined whenever I could. The very thought of a microphone seemed almost to freeze my soul.

"Finally WMCA asked me to broadcast regularly and I decided I would try it, that I would use this new medium to find out what women really wanted. I would give them over the air the things that in lecture tours they had told me they wanted to hear. I would ask them to write me their frank opinions. In other words, I would test Radio and the women themselves.

"Within four weeks after I started, the response had become so great that I d

Reminiscences

d to form a Radio Club, the National
o Home-Makers Club to be exact.
n the hottest day in July, I invited
listeners to come to the ballroom of
Hotel McAlpin to meet me. One
ired and twenty-nine showed up.
and there we organized the National
io Home-Makers Club which was
. after incorporated with as broad a
ter as has ever been granted to any
nization, as far as I know.

n August we had another visible
ing — this time the ballroom was
flowing.

n September we had a third meet-
in another auditorium. Seven hun-
women *could not get in.* It took
eral policemen to handle the crowds.
Not long after that I was made home
omics editor for the New York
erican. The editorial board gave con-
rable publicity to my
io work, which was then
ducted over WOR and
r over WHN.

I gave two broadcasts a
k, purely non-commercial,
subjects in which I felt
nen were interested. We
prize recipe contests,
e time-saving contests,
al speed cooking contests,
tings in Town Hall with
dcasts from the stage.

"I INTRODUCED
sic into women's programs.
I received more than
hundred thousand letters
appreciation from listeners
this district alone. More-
r, these women told me
at they wanted to listen
and with what phases of
ir housework, their cook-
and their lives they
ded help. I read each
of these letters and I an-
red thousands personally.
'Night after night when
staff had gone home I
uld stay in my then small
ces and read these letters
m my listeners, tabulate
ir requests, and wonder
w in the world I was ever
ng to gratify them.

'It was at this stage when
uests for the broadcasts
re coming from nearly
ry state in the Union that
idea of the Magazine of
Air was born, an idea that has proved successful over the Columbia Broadcasting System, because it has helped women.

"Just as I was wondering how in the world I could finance broadcasts to the entire country, Mr. Herbert Houston, my old friend and former vice-president of my publishing company, Doubleday Page, came on the scene.

"WHY don't you handle this problem like a magazine," he said, "and sell a certain number of pages, making them sponsored programs, and keep others purely editorial?"

"I hadn't thought of that, but as a former magazine editor, I saw how sensible this solution was. I asked him if he would help and so our business association was created.

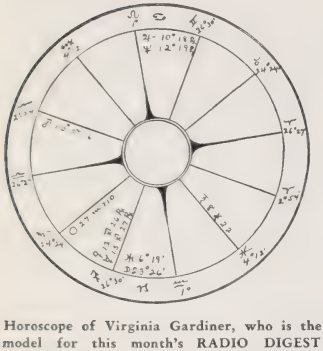
One of the attractive passages in the headquarters of the National Radio Home-Makers Club.

"To make a long story short, some six months later, after the plan had been worked out in every detail, I went on the air in my first chain broadcast over the Columbia Broadcasting System.

"Since then our programs have grown from one to as many as thirty-four programs a week. Our staff of four has grown to a staff of sixty-eight. And our visitors number thousands a year, and a quarter of a million letters have poured in.

"But the principle on which the National Radio Home-Makers Club was founded remains the same. It was founded on the requests and desires of the listeners-in. And today the thousands of letters that come receive just as careful attention and are as carefully tabulated as they were in the days when the club was first founded.

"And there is many an evening when I stay here alone, all by myself, read the letters and dream of the women who listen in."



Mrs. Allen sat back as she concluded her fascinating story. Only a woman with great vision, power and personality, could have carried the responsibilities of an undertaking affecting hundreds of thousands of home-makers.

THE secret of her success is that she gives her audience what they want and need. Feminine listeners have received priceless instruction through Mrs. Allen's broadcasts. Those awkward with the needle have learned to sew a fine seam; drab corners in the home have been brightened up through a suggestion on interior decorating; innovations in food preparation, novel ways of getting up the family menu have helped to make the average Radio home what a home should be.

The Five Arts Program, one of Mrs. Allen's "Editorial Pages", is one of the most highly cultural periods on the air. Here you meet men and women prominent in every field of endeavor who share with you their philosophies. The common round of daily tasks take on a new aura through these inspirational talks and discussions by our great leaders.

Virginia Gardiner *and*

Her Stars

Horoscope of Virginia Gardiner, who is the model for this month's RADIO DIGEST cover, painted by Guy Hoff.

Venus Smiles on the Lovely Radiactress Who Is This Month's Cover Girl—Gives Her Beauty, Brains, and—but just Read What Else!

By Peggy Hull

WELL, here we are . . . just back from a trip along the Milky Way and we've got some spot news about that lovely little star of Moonlight and Honeysuckle (WEAF) . . . Virginia Gardiner . . . If we were a producer . . . or a manager . . . or whatever it is Radio stars have . . . we'd run right out and sign Virginia to one of those long-term contracts we read so much about in the movies . . .

I had a little heart to heart talk with Venus . . . as a matter of fact . . . went on that starry jaunt for the express purpose of taking that lady to task for neglecting Virginia . . . I've liked her for such a long time and I couldn't see why the planets weren't doing right by her . . .

Venus, as you know, is the one we always run to when we're in trouble . . . she's such a lovable person and unless she's afflicted in the natal chart . . . no, that's not what you think . . . the natal chart is a little slip of white paper which an astrologer uses to set up birth rate . . .

It was very easy to see that Venus was on the job in all her glory when Virginia was born, for she exhibits the interest of this planet of beauty in every line and contour . . . So I went right up to Venus . . . who was having a busy day of it by the way . . . and I said, "Look here, Venus, how come you don't give Virginia Gardiner a break . . . she's one of the most popular stars on the NBC chain and yet I've a feeling that she's not getting what she should."

VENUS looked pained . . . She gave a swift glance from glorious azure blue eyes and then explained. "It's this way, Peggy . . . I've been having a lot of trouble with my little protege, Connie Bennett out in Hollywood . . . It takes an awful lot of money to keep that child in circulation . . . and of course, you know how I am . . . take a pride in my work just like you people on earth do . . . so I determined to see this thing through . . . I'm glad," and Venus actually sighed a sigh relief, "that her last contract has been fixed up and now I can take up other matters."

She pressed a little star and one of the heavenly messengers appeared at her elbow. In the most business-like manner, Venus directed, "Bring me the birth data of Virginia Gardiner."

I HAD a chance to look over the office while she was making some notations on a little pad, and I couldn't help but envy Venus such a lovely spot in which to work . . . The walls were done in snowy cloud effects . . . and they were very tall and ended in a turquoise blue ceiling . . .

All the furnishings . . . the desks, chairs and filing cabinets . . . were done in some kind of composition that looked like mother of pearl with gold trimmings . . . it was a very impressive set up . . . but let me tell you about the carpet. It was so soft and buoyant that I felt like I was walking on down feathers, and it was just the color of the morning Sun . . .

Venus was dressed as usual in her favorite color, a silvery violet, and, of course, being a planet she could walk around as easily in her flowing trains as we do in sports skirts.

She took the data which the messenger brought to her and gave a little exclamation. "Oh, this is just splendid. Now I understand why I haven't had her called to my attention before."

She leaned back in the mother of pearl swivel chair with its gold frame, and I give you my word there wasn't even a creak out of it and said, "Virginia is one of those girls who can take care of h self . . . She's a hard worker and is go to win a success that she'll wear a crown of achievement as long as lives."

She laid the birth chart on the d . . . "Just look at this." She point to the position of the planets, "Here have steady progress . . . a slow upw movement over a period of years . deepening of comprehension . . . of en tions . . . of thought processes . . . girl has one of the best minds of anyo in her profession . . . " she tapped a g pencil lightly on the shimmering top the desk . . .

"Within nine years," she said slow and impressively, "this girl is going sweep to the very top of her professi . . . she'll be proclaimed as the great dramatic actress of her time. . ."

"Whew," I said, "that's certain something to look forward to . . ."

"And that's not all . . . her road towa that goal begins right now," went Venus, "she'll be surprised one of the days with an offer that will be far beyo her present expectations . . . but the be aspects are forming for her the latter pa of July. From then on things will very nice . . . maybe she'll take a tr abroad in the summer. . . . August I shou say . . . if she does . . . it will do her lot of good . . . and will prove benefici in more than one way."

I PUT these notes down a fast as I could because I was sure all Virginia's Radio friends would be glad t know that some wonderful things ar coming for their favorite. She'll have t be careful during the latter part of Apr about falls . . . you know there are time when can stumble over a rug and cour

ister . . . and other times a fall doesn't
n give us a bruise . . . but Virginia
st be careful of how she uses her feet
ing the last week of April . . .
t this time there is also a possibility
some misunderstanding with women,
Venus said she wasn't going to worry
ut that because Virginia is such a
et girl and so tactful that she could
trol any situation.
Of course I was curious about why
s was so successful as an actress on the
dio . . .
Venus pointed her gold pencil to Mars
the twelfth house. "This is why she
ns her living in a concealed position.
e Radio gives her success because her
ievements must come while she is hid-
n. Many of the men and women who
e dominated history, yet who during
ir lifetime did not appear in person be-
e the public, have Mars in this posi-
n. In the latter part of life," said
nus impressively, "she too, is going to
ke some constructive and permanent
ntribution to mankind. I should say
will be in some form of writing. She
y not think it possible now, but her
oscope shows that long after many of
favorites of today have been
gotten, her name and her work
l her thoughts will be guiding
ure generations."
Well, I guess that's some horo-
pe . . . I can't imagine anybody
getting a thrill out of prophecy
e that!
Here are some other things I
rned about in that white and
ld office of Venus.
Virginia must save her money.
e will never have any extended
riods of bad luck, but because
is extremely artistic, sensitive
l easily affected by her environ-
nt she must be prepared for an
casional rainy day. She has very
h ideals . . . so high, in fact, that
is almost impossible for an or-
nary human being to live up to
em . . . she is a fascinating crea-
re because she possesses that curi-
s elusiveness which all actresses
o achieve great fame seem to
ve. It is the same quality which
reta Garbo has and yet it is not
repelling because Virginia has a
rmer, more enthusiastic and hu-
an nature.

JUPITER in the sign Cancer gives her great success th the public, and as Jupiter is w transiting her birth sign it will ubtless bring to her some unusual er.

I suppose that Virginia has often ondered why it was that she uldn't go out to parties and have rip-roaring good time like every-dy else there seemed to have . . . e would think she was going to ve a good time . . . that this time everything would be different . . . but it always turned out the same.

Saturn in the fifth house causes its subjects to go looking for pleasure on the outside but it at the same time makes it impossible for them to find it . . . Virginia is going to get her greatest happiness in this life through the realm of her mind. She has Mercury in Saggitarius and it remains for practically all her life, in the same unusual situation that we found in Will Rogers' horoscope. This is a splendid position for Mercury and when all the deep and profound thoughts which even now are on the borderland of her consciousness begin to creep through, life will take on a new meaning. Doubtless many of her friends never suspect the depth and profundity that is buried beneath her flashing smile and gay words. Seriousness is never connected with vivaciousness and yet there is no reason why the most serious person in the world can't relax and kick up his heels if he wishes to do so . . . Now we don't know whether Virginia kicks up her heels or not . . . but if she does we'll wager they are very pretty heels and she does it very gracefully, for she should be an excellent dancer, as well as singer and musician.

She has strong intuitions and hunches about everything important that comes into her life . . . and she should never go against a hunch . . . if she follows her intuition she'll never have much trouble . . .

If you were born with your Sun in Scorpio, like Virginia Gardiner . . . that is between October 23rd and November 22nd . . . then you belong to one of the most powerful signs in the Zodiac. For Scorpio gives strong characteristics, shrewd judgment, excellent critical faculties, the ability to work hard and to give minute attention to details. You are reserved, tenacious, determined and extremely secretive. You do not want anyone, even those closest to you, to know all about your affairs. As Mars is your ruler you express his fiery force either for good or for evil. You will take up a battle at any time for someone else, or for some impersonal cause, and you will never be content with half measures . . . it is either one extreme . . . good or bad.

While Scorpio people, if their planets are afflicted, often take the wrong side of an argument, they have one redeeming feature—they are not underhanded or crafty, whatever they do, they do in the open and above board.

They have a vivid imagination; a clear, sharp and penetrating mind; and possess great personal magnetism.

* * *

Peggy Hull is casting personal horoscopes for RADIO DIGEST *readers. Send for yours—see special offer on page 102.*

This April Virginia's stars warn her to be careful about falling—good thing her winter planetary influences aren't such kill-joys, 'cause she just loves slippery ice and snow.

History records that:

MISS GARDINER was born in Philadelphia. She started singing in the "curls and pink bow" period and kept it up throughout he childhood. Her family moved to Toledo and she began to make public appearances as a singer and in amateur dramatic productions.

She went back to Philadelphia and studied music at Curtis Institute for two years. Then she won a scholarship awarded by Madame Sembrich, of the Metropolitan Opera Company and for another two years studied under the direction of the opera star. Concert engagements followed and then she decided to seek a career in the Radio studios. She found it.

Miss Gardiner is tall and well proportioned. She is pretty and laughs a great deal and has the kind of teeth you see in dentifrice ads. Though she has no real theatrical background she acts strenuously when she is before the microphone. She has a half dozen different voices and has used them all in one program in which she was called upon to play many roles.

Broadcasting from

Advertising and Radio Broadcasting

EVERY few days, there breaks forth some new outburst against the ruination of Radio programs by an overdose of advertising. Complaints emanate from the great as well as the small. Indeed, there is no doubt that the great mass of Radio listeners would be pretty drastic in deleting advertising copy if they could have their own way. In fact, they might go quite too far and wind up by killing the hen that lays the golden eggs—the hen in this case being broadcasting and the eggs, the programs of the air.

To our way of thinking "there is much to be said on both sides", but before most of the talking is done, representing either viewpoint, the "loud speakers" should acquire a much more detailed knowledge of the subject whereof they complain. Most of the tirades with the strongest echoes are the vociferations of men and women who are ignorant of the facts, intolerant or impatient by nature, or just downright selfish.

Considering some of the transgressions which have been committed via the microphone, this may sound like propaganda, like an effort on the part of the Editors of RADIO DIGEST to persuade the Radio audience to refrain from criticism. Nothing could be so far removed from the truth. Our primary sympathies lie with the public in consequence of which fact no one could be more desirous of protecting the American people from abuses in broadcasting and particularly in program conception. As a matter of fact, we actually anticipate occasional clashes with Radio manufacturers, with broadcasting stations and with program sponsors. In every such instance it will be found that RADIO DIGEST is "with the people". We have come out unequivocally on such matters as Radio censorship, electrical transcriptions and the musically inferior type of midget sets. Regardless of consequences, we are going to serve our readers—the Radio public —first, second and last.

And so, while we propose to approach this question of whether advertising is destroying the popularity of broadcasting with every effort to be fair to *all* the parties concerned, we confess beforehand that we are partial in our viewpoint to the best interests of the listening public.

Let us consider: Is advertising on the air overdone? Most emphatically, *yes*. Should advertising on the air be suppressed? Most emphatically, *no*. What should the public attitude be toward advertising via Radio? In our estimation it should be one of tolerance insofar as moderate inclusion of advertising is concerned and one of constructive criticism in those cases where the advertising is definitely offensive.

At this point it may be well to draw some parallels, wi such things as books, "the movies", magazines, the theat the opera and the newspapers.

In the case of books, the public pays a full pro-rated pri for each and every copy. There have never been any serio complaints because of this method of doing business wi the public; the reading of books has been rendered mo widespread by public, private and endowed libraries. In t field of books the public can buy only what it believes worth the money and the time required for reading. Th option of the public, as regards books that are both paid ar free, is so complete that the system of book distribution h received public acceptance.

In the field of moving pictures, free exhibitions oth than those of an educational sort are of minor volume. Th public has accepted without ado the principle of paying pro-rated cost for each and every admission to a given sho The theatre and the opera fall largely in the same categor although endowments and underwritings generally pay pa of the expense of attending opera for the audience at large.

WITH magazines and newspapers, the situation is di ferent. With comparatively few exceptions the pu lic pays for only a part of the physical cost and almost never fo any part of the editorial cost—in other words, for the cost o the actual words they read and pictures they see. Who tak up this staggering slack? Obviously, advertising does. An what a break that gives the dear old public, who in the earl stages of publication advertising used to be so resentful i its attitude. Gradually, however, all this has changed. Th public has learned to accept printed advertising in magazine and newspapers not only as an acceptable means of reducin subscription costs and greatly improving editorial content but also to a considerable degree on its own account becaus of the news and information contained within the advertisin itself.

At this juncture, one may ask what all this has to do wit Radio advertising. Plenty. Because as matters now stand practically the entire cost of Radio programs of all types sustaining as well as sponsored, is being underwritten b advertisers who are willing to spend millions and millions o their hard earned dollars to entertain and inform the Ameri can public, provided only that they be given a reasonabl good opportunity to acquaint the public with the product they have to sell. What a break for the public in having it Radio program cost so completely assumed by advertisers

Radio sets are sold to the public on a basis which include no part of the costs of broadcasting. Therefore, the se owner finds himself in the position of being "all dressed up but no place to go" unless some kind soul comes along to sell him or to give him a program. In America it is a case of give, though with many of the important foreign countries,

he Editor's Chair

adio audience is compelled to pay. And, irrespective of st element—which is not to be lightly considered—what he public get?

here the public pays for its programs—as in England, e and Germany—the public gets virtually no choice in casting stations, and hence virtually no selectivity in ams at a given hour and day and, of course, a very d variety of programs and schedule of each particular

As in the case of most governmental projects, the is compelled to accept what is thought best for it ve rather than what it chooses to have. Furthermore, am competition for public attention is virtually unknown.

d what by way of contrast do we get in the United , under our system of the Radio set owner paying no of the tremendous cost of broadcasting and providing ams? Here are just a few of the benefits:

A numerically large number of stations, operating under a wide variety of managements.

A wide selectivity not only of stations, but of variety in programs and quantity of each type.

Talent, definitely the best in the world, with lots of variety as to kind of talent and the number possessing each type of talent.

Extensive competition among stations and programs for public attention, thereby enabling the public through its untrammelled ability to "turn the dial" to force steady progress not only in the excellence of talent but also in the excellence of programs *and in a satisfactory application of the advertising phase.*

OTHER words, in America, the public sits in the saddle with adequate control over programs *without paying the* while in the countries where the public pays the bill, the o audience is ridden by those in charge of broadcasting. of which, incongruous as it may at first blush seem, is Radio Digest believes that the primary interests of the o audience can best be served by an attitude of welng advertising as the underwriter of broadcasting (even has done with magazines and newspapers).

'e should not feel so inclined were not the key to the e situation both figuratively, and literally, right within ands of the public. We refer, of course, to the ability e public to tune in and tune out whenever and whatever ooses. With this supremely powerful factor under its control the public need never worry for long about nt or offensive advertising. The remedy is ever at l, but because of this very fact the public should make a cious effort to educate advertisers on the kind and ant of advertising that is acceptable in exchange for advertisers' underwriting a wide variety of very costly programs. For the mutual benefits there should be a blending of effort to arrive at a mutually satisfactory result, instead of pulling apart due to lack of understanding on the part of advertisers as to proper advertising technique when on the air, or to lack of tolerance and sympathetic appreciation insofar as listeners are concerned.

The American method of paying for broadcasting is the best in the world, when judged solely by the standard of number, variety, and quality of programs offered to the public. Let's keep that fact always in mind.

It is certain that advertisers do not want to offend the public—without exception they are aiming to please the widest possible audience. Hence the problem, in so far as advertising is concerned, revolves around what constitutes good technique.

There are effective ways and means of being constructive and cooperative in our criticism. More of this later. And meanwhile, let's take care that the hen who lays the golden eggs shall be with us ever more.

Ray Bill.

RADIOGRAPH

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

SETH PARKER says, "One thing about singing these old tunes, they make everybody feel as if they were neighbors." And the first impression that you get of Phillips Lord, the creator of Seth Parker, is that he is a neighborly person.

I met him for the first time in a bare little hotel room where he had gone, he said, "to find a little peace in order to finish up some work." (Dictating an "Uncle Abe and David" sketch, answering the 'phone about every two minutes, and being interviewed by me, doesn't seem like peace but then we all have different ideas.) Yet even in the rather

Phillips Lord

hectic moments that we were in his so-called place of refuge, he made me feel at home and welcome, just the way old Seth Parker makes all his guests feel welcome at his home up in Jonesport, Maine.

The friendliness, the kindness, one gets immediately upon meeting Phillips Lord, but it seems hard to believe that one so young—he is under thirty—could be old Seth Parker on the air.

"I can't believe it," I told him.

"Can't you?" His forehead wrinkled up. His shoulders hunched together in an old man's stoop. There was a tremor to his hands. He said, "Would you just give us the note, ma."

It was Seth Parker himself. (*A picture of Mr. Lord as Seth Parker appears on page 36—Editor.*)

"Yes," said Phillips Lord, "I often use that voice as a means of identification. It's rather convenient sometimes. I remember once I had to buy a tire in a strange town and they took my check on the strength of my Seth Parker voice."

Perhaps no one who owns a Radio has failed to hear the Seth Parker program at some time or other. If there is any such person, then let me say that the program goes on the air every Sunday night at ten-forty-five, eastern standard time, from the NBC studios. It is one of the best known and best loved of all the programs, and probably does more good than any of them.

It is a religious program, yes, but a member of any church could step into the "githering" at Seth Parker's and feel at home. And Seth Parker's philosophy is summed up in the word neighborliness. As Phillips Lord says in the foreword of the Seth Parker hymn book: "A neighbor is a man, you know, who tries to make living a mite more fun for everybody and when a man gets feeling this way, he's pretty sure to catch religion. One thing to remember, though, is that if you're a neighbor, it doesn't make much difference what color the church is painted that the other neighbor goes to."

The group that plays Seth Parker—Ma and Cefus and Captain Bang and Lizzy and all the rest of them—is a very congenial and friendly one. The rehearsal which I attended didn't seem like a rehearsal. Instead it was a group of neighbors dropping in to sing. I felt a part of it myself. Lizzy—that's Mrs. Phillips Lord, a slim, brown-haired person—came over to talk to me. She told me about her two babies, about how she couldn't help her husband as much as she'd like to now because the children were going to be a man-sized job. She was excited because that night she and her husband were leaving for Washington, where they were going to put on a Seth Parker skit for a mission society. She said they were to meet President Hoover. We were chattering away as if we had lived in the same town for years. Suddenly the subject of colleges was brought up.

"I went to the University of Arizona," said Mrs. Lord, "in Tucson."

"But that's my home town."

"Don't tell me you're Oliver's sister."

"And did you know . . . ?"

"And have you been . . . ?"

She'd been a neighbor of mine for years without my knowing it. We had to come to New York to meet. I knew that she is a western girl. Her home is in Connecticut.

The story of the birth of the Seth Parker idea is an interesting one. Three years ago Phillips Lord came to New York from Maine. He wanted to write but after he'd collected enough rejection slips to start an album he went to work in a candy factory. One evening he happened to listen in to a Radio program about country life. It was so untrue and exaggerated that he felt he must do something about it. That something was to write a sketch himself, get a group of people together, rehearse them in the sketch, and then take it to one of the smaller stations. It was put on and was an instant success. Then he started sending the scripts out to other stations. Seth Parker's Old Fashioned Singing School began to be heard in all parts of the country. And he is still sending out the scripts. One is being rehearsed now in an Australian station.

Naturally NBC heard of young Lord and his Singing School. They wanted to buy it from him, but Lord felt he could not take it away from the smaller station that had stood by him when he was getting his start. However, he offered NBC another idea, the Sunday evening gathering at Seth Parker's, and as such it has gone on the air, in a coast-to-coast broadcast.

I asked Phillips Lord why he thought

Helen Nugent

ural type had such a wide appeal.
s explanation was that farm memories
ry close to every American. The
cities have not yet made us en-
el urban.

As I left the studio that night, after
ng to Seth Parker's homely philoso-
y I felt that the world couldn't be
so bad as people made out.

Helen Nugent

"BUT I haven't any story," said Helen Nugent, when I talked to her in her ve, East Forty-sixth Street apartment. ways knew I wanted to sing. I d away at it. And now I'm g."

n notice she said she plugged away For one thing Helen Nugent has, capacity for hard, purposeful work. es, Columbia's popular staff singer lot of other things, too. She's you know. She has the clear pink hite skin, the coal black hair, the a wistful something in her beautiful hat children of Erin so often have. he has that other thing that occa- ly is missing in the Irish strain— ower of concentration.

voice is a lovely mezzo-soprano, e can sing alto without effort. She knew she wanted to sing ever since she was a child. And the road by which she has come to be one of the most popular sopranos on the air has been the quite undramatic, but usually successful one, of native talent plus applied effort.

Cincinnati is her home town, and when she was seventeen she tried out for the Cincinnati Summer Opera Company. She was chosen from a large number of competitors. She became a soloist for the opera company, singing for them six years. During that time she studied at the Cincinnati Conservatory of Music.

Her Radio career began with WSAI. That was six years ago.

"So you see," she said, "I am quite a pioneer. We used to sing into a horn back in those days, and if we sang too loud and 'blasted,' the sparks would fly out in our faces. It was a pretty effective way of preventing us from doing it."

Not that Miss Nugent has to worry about her microphone technique. Her voice is perfect for the air; it has that intimate, I'm-singing-right-to-you quality that is so essential for Radio. Miss Nugent went on to explain why some grand opera stars fail before the microphone. "It's because they can't forget their stage manners. They are put in a big studio and feel they should fill it; or they are conscious of the millions listening in, and sing as if to a great audience."

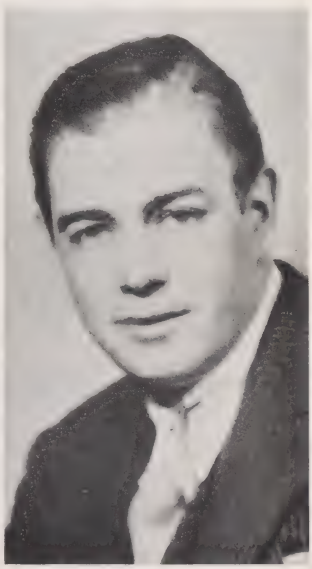
Miss Nugent would like to go into light opera and musical comedy some day. "Not give up Radio," she hastened to add, "but I should love to do both. It would give me an opportunity to act, and that is what I most love to do. However, when television comes I'm going to be able to eat my cake and have it, too."

Notice the pajamas Miss Nugent is wearing. She had them on the afternoon we had our talk. They are deep violet satin and very fetching. Pajamas, incidentally, are one of her hobbies. Another is her canary, "Thou Swell". "Thou Swell" believes in singing in the bath tub. Not when he is, but when she is. Every morning the sound of the shower starts him warbling. He sings while she is eating breakfast, and then refuses to give out a note till six o'clock in the evening.

As for the singing of his mistress, she sings in five languages, and speaks in two. Her Spanish is as fluent as her English. In her years at school she had as a room-mate a young girl from Mexico City and it was from her that she learned her Spanish.

Miss Nugent has been with Columbia since 1928. She is heard on the Robert Burns Panatella Program, in Ward's Baking Hour, in the Mardi Gras, with Ben Alley, in the Paramount Publix Hour, in Three Modern Maids, and in The Coeds. Watch for her in two new commercials, too. They are to be announced soon.

Morton Downey



NO, MORTON DOWNEY isn't related to Napoleon.

But because he has a certain little trick that the French Emperor had, he is able to weather the hectic life that a program of seven broadcasts a week, running his Hotel Delmonico Night Club, and making personal appearances at the Paramount Theatre, entails. And that trick, which saved the "Little General" through so many of his campaigns, is the ability to fall asleep at a moment's notice. Morton Downey can catnap any place. He picks up his rest little by little, here a minute and there a minute. Otherwise the regime he leads as Columbia's busiest tenor would surely kill him.

The afternoon I saw him in his office in the fashionable Hotel Delmonico, he had just come from a broadcast at WABC, was due in a little while at the Paramount Theatre, and then would come back to direct his orchestra and sing in his night club. And that is his daily schedule. Yet there he sat as if he had not a thing on his mind, discussing his favorite hobby, the raising of pedigreed dogs. Incidentally, it was his friend, Harold Lloyd, also a dog fancier, who inspired this canine interest.

Downey has an amazingly high, sweet tenor voice. And so good does Columbia consider him that it puts him on four days a week—Tuesday, Wednesday, Friday, and Saturday at seven o'clock. Yet despite the competition from Amos and Andy, the tenor is receiving more fan mail than any other of Columbia's ar-

MARCELLA

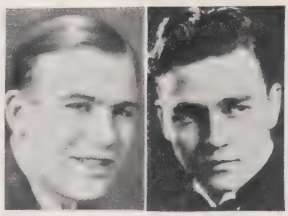
Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

TODDLES (Presiding Pigeon of Graybar Court) and Marcella, garbed in our finest plumes, walked rather nervously to the CBS to interview Louis Witten—one of the handsomest announcers. my dears, we have ever seen. Bowing most graciously and with a perfectly devastating voice, he welcomed us. Toddles kept on nudging me and I kept nudging her as dear Mr. Witten told us his history. Would you believe that he used to sell trucks and autos—that was after he left the army at 21—he's 33 now—a glorious age, don't you think? Was announcer for CBS until Hanff-Metzger, advertising agency, realizing he was worth his weight in gold made him head of Radio Department. Now is guest announcer on Royal Typewriter Hour. My dears, only one word can describe Louis Witten—he's devastating!

Louis A. Witten

* * *

MARCELLA SHIELDS MACNAMEE of The Troupers and your own Marcella spend our days and nights getting our letters straight. The only broadcasting this Marcella has done has been confined to wax—instructing chickens how to lay eggs. So Mrs. Waalkes, it wasn't "me" as you 'eard. Jane of Secor, Ill., joins in your request for a glimpse of Tony Wons, the man with a philosophy all his own. He was born in 1891 under Menasha. Wis. skies. On the shore of a Wisconsin lake, he and Mrs. Wons, formerly Ruby Hill of Chicago, have a little log cabin. Tony himself constructed this rustic little home as well as a boat and a jetty. His early life was filled with bitter experiences, but he strove above his environment and succeeded. He read much and collected verses here and there to steady him along the road of his ideals. During his stay in the hospital after the war these clippings comforted and inspired him. He now shares his constantly expanding scrapbook with thousands of Radio listeners.



Anthony Wons

Walter J. Neff

* * *

INTRODUCING a popular announcer over one of New York's stations—Walter J. Neff—as fine a personality as anyone could wish to meet. Has two decided aversions—fried scallops and heavily perfumed women—mind you, not *heavy,* perfumed women.

Little Jack Little John Fogarty

* * *

MILDRED, my dear, the only *cheeild* that Little Jack Little has is a li'l Pekingese dog—just the darlingest, cutest, most fascinating thing you ever laid eyes on. In the magnificent home in Hyde Park, Cincinnati's exclusive suburb, Panky romps and plays the whole day long. Jack and his very lovely wife are quite attached to their pet and wouldn't part with it for anything. William Lloyd and hundreds of others who have been attracted to Jack's magnetic whispering voice want to know something about him. He was born in London somewhere around 1900 under name of Jack Leonard and at the age of four was sent to London Conservatory of Music to study music. Family later settled in Iowa and he studied for two years at the University of Iowa. Negligent in his studies, he left college and did a little traveling, meeting along the way the hungry wolf. "Tl need of money started me writing songs says Jack. His startling success is a sto in itself. His Radio work is the delight listeners all over the country.

* * *

"I SO thoroughly enjoy listening Popular Bits over NBC and would like some information about John Fogarty, the tenor," writes Mrs. McM. of Bloomsburg, N. J. "We all agree that John Fogarty is the future John McCormack," says A. M. of Pennsylvania. Would you believe, my dear Mrs. McM and A.M. that at the age of 16 John ran away from his home in Sio Falls to join the army? He was alwa interested in singing and appeared shows behind the lines. When he came New York he studied under Louis Chartiere, who he considers is the "greatest living baritone." Toured on the Keith-Orpheum Pantages Circuits in headline acts and now tours country via Radio waves.

Kathleen Stewar

Stanley Bell

* * *

KATHLEEN STEWART as staff pianist of the NB certainly gets her radiant personality ov the air. She isn't to be counted amor the people who the Indian describe as "laughing with th lips but not smilin from the heart".

Mrs. Hall K. Clements

* * *

"DID you eve find out anything o Stanley Bell, th Columbia announce at Washington, D C.?" inquires Rut

dams of Akron, one of my faith-
ils. "Was he an Akron boy? The
ne I knew would be around
irty." Mr. Cant, behind the
enes of Columbia—and may I
id, dear Ruth, one with whose
partee Marcella has to sharpen
er wits—says Stanley is a native
f Akron and went to Washington
t an early age. So, my dear, he
ust be the very one you know.
le now announces Columbia pro-
rams from the nation's Capital,
nd he is credited with having in-
roduced more distinguished people to
adio audiences than any other announcer
n the dear old U. S. A.

* * *

WGBS, New York City, has one of he most versatile, active little women n its staff in the personable Mrs. Hall Zane Clements. Distinguished as a newspaper and magazine feature writer, as a director of programs and a novelist, she is now directing the publicity work for this popular station of Knickerbocker Town.

Jack Sharp

* * *

SCORES of letters have been received fromlistening friends, giving their own suspicions as to he name of the clever young lady who impersonates the Old Dutch Girl—the character who stands guard near everyone's kitchen sink. Who is she? And why does she hide herself so mysteriously. Some say it's Mary Charles, others Barbara Maurel, and a few suspect it's Irene Beasly. One thing sure, it's not Mme. Queen!

Gloomy Gus

* * *

"I AM sending you a photograph of Jack Sharp which I want you to use. I can't keep from saying nice things about him as he is very popular over KFDM, Beaumont, Texas." writes Ida Cross Farrow of Elizabeth, La. My, wouldn't it be grand if every Radio announcer and artist had such interested publicity representatives. Ida says that Jack has a very charming voice and the finest personality—a perfect delight to everyone fortunate enough to hear him. Thanks, Ida Farrow—and I'm returning the pictures to you today. Oh, yes, and Miss Farrow says that Jack has traveled extensively and appeared in the best theatres.

Tastyeast Jesters

* * *

"HERE I am again," announces Twilla of Salina, Kans. "Won't you please print a picture of Gloomy Gus of WKY," she pleads, "and—is he married?" Alas, and alack, my dear, dear Twilla, Gloomy Gus is wedded—and what's still alas-er and alack-er his wife is a very charming woman, so that he wouldn't be interested, from all appearances in a "second". Would you think so? They have, while we're on the subject, two beautiful children. Gloomy Gus or Gayle V. Grubb has been station manager of WKY, Oklahoma

Earle Nelson Irwin Cowper

City, for two years—is also blessed with the lucky combination of good business and artistic talents.

* * *

MISCELLANEOUS Announcements: Interested Mother—there's a feature story of Real Folks on another page in this issue. My humble apologies, Dr. Clark. In March Marcella very blunderingly said that Dr. Clark received 10,000 letters during two years of his broadcasting French lessons. There were *18,000* letters. Edna Stewart of N. Y. C. will find Alois Havrilla's picture in September issue. Sorry, Pat, Mr. Crutchfield of WBIG, Greensboro says that Mildred Roscue was an out of town artist and sang only once over that station. If "Subscriber" will tune in on NBC every Saturday or Sunday night, he or she will hear Floyd Gibbons on regular sponsored hours. Madame X will find a picture of Simpy Fitts on page 77 December issue. Idaho will find a picture of Ben Bernie in this issue. It's a good thing there are no birthday parties—I'm beginning to feel like Uncle Don himself. Rabid Radio Rookies will be able to locate Marsha Wheeler at WGBS, New York.

* * *

HERE are the Tastyeast Jesters—vitamins are hiding—in this . . . It's a nice theme song. They are Guy Bohman (Vigor); Wamp Carleson (Vim) and Dwight Latham (Pep). All three comedians had their experience at WTIC in Hartford. Now on NBC, of course.

* * *

CURIOUS also wants to see a picture of Earle Nelson and his announcer, Irwin Cowper. Here they are—look as if they enjoy their work—don't they? Well, Curious, my dear, Earle began with lessons on the uke for a pastime and see what he does with it now—on a commercial program the Fox Fur Trappers. The family, consisting of wife, nine-year-old son and the dog hold auditions in the bedroom where Earle has installed a mike. Uke's named Oswald.

Jeff Sparks

Clem Betts

* * *

MEL R. writes, "WLS being my favorite station I look forward with great anticipation to see whose picture is in from that station. Would like to see the Three Hired Men." Behold, here they are! Wish you could see them with their overalls on. "Willie" or Eric Andreasen plays the guitar, then there's "Louie" or Bill Hoagland, and finally comes "Sammie", known as Dave Pearson. Bill is married and has a baby girl. The other two are not married but have girls, mebbe(?). All are Swedes and delight Swedish Radio listeners very often *vid Swedish* songs.

The Three Hired Men

* * *

TELLING everything: Arthur Paul is only sixteen, Mrs. Foy, and

Joseph H. Mackey

the picture you sent in is actually his. Lois Bennett is the Quaker Girl, W. N. Hirst. If Maye of El Paso turns the dials to KMJ, Fresno, Cal., she may tune in on Jerry Wilford, Vagabond of the Air. That's where he was last heard from. Mr. Vincent of KSL informs me. Thanks for the lead, Mr. Vincent.

The Oklahoma Harmony Boys have separated, Kathleen of St. Louis. Fay and his new partner are working somewhere in Texas, and Al, some weeks ago was looking for a new partner. Snowball and Sunshine, formerly of KMOX, are not on the air so far as the Junkinses know. And as for Otto Gray and his Cowboy Band, Mr. Russell, they were working around Pittsburgh, when last heard of. I. B., turn to page 72 of the February issue for a picture of Jack Turner.

George Beuchler

Syracuse and R.E.D. implore me for a picture of Jeff Sparks. When he was a young boy he had golden locks and a sunny disposition. Now his hair is as black as ebony, but his disposition has not lost any of its cheer. He tried his hand at medicine and art. Would sketch the minister on Sundays, and the school teachers on weekdays. Used to be at WARS, Brighton Beach, N. Y. Been on NBC now one year, this month. Knows and speaks six languages: German, French, Spanish, Italian, Russian and Japanese. Good books, the theater and Oriental music are his hobbies.

Vincent Sorey

* * *

AGNES of Kansas says she would like to see a picture of Clem of the mountain life serial, *Moonshine and Honeysuckle*. Clem Betts, or Louis Mason, was born in Danville, Ky., June 2nd, 1892. Ministerial career was mapped out for him but he ran away from home as he wanted to be an actor. At age of 15 he took the part of a 72-year-old deacon in *Eben Holden*. Lulu Vollmer, creator of *Moonshine and Honeysuckle*, was the author of *The Dunce Boy*, a play which had a successful run on Broadway seven years ago. When Gerald Stopp of the NBC saw Mason in this play he signed him up for the network. He is not married. Has ambition to own a stock farm in Kentucky and raise race horses. Is six feet two inches and weighs 165 pounds. Fair complexion and brown hair, which isn't always as tousled as it is in this picture. Photo represents him as Clem Betts. He has a fine baritone voice but has never had an opportunity to use it professionally.

* * *

MRS. HAZELWOOD of Richmond wants to see the whole staff of WRVA, especially a picture of Joe Mackey. Well, Joe, my dear, was born poor in Richmond, Va.—and isn't ashamed of it. Is rather proud of having sold newspapers as a boy and is keeping his eye in that field in case he loses his position—which isn't very likely from reports that attest his popularity. He's five feet eleven and weighs a hundred and fifty. His one ambition in life is to be a fat man and have a head of curly red hair—but not, he adds, both at the same time.

* * *

"MY SISTER and I are terribly interested in three Columbia announcers," writes Olive Sherman of Washington, D. C. "They are Frank Knight, George Beuchler and Andre Barouch." Well, girls, your complete order is filled at one time. Beuchler (pronounced Bewler) was born in Jacksonville in 1906 and at eighteen was graduated from Georgetown University. He joined the National Opera Company. It was not until he substituted, by mere chance, for a singer who failed to appear on an Arabesque program that his beautiful baritone voice was discovered.

* * *

"I HARDLY ever miss a Vincent Sorey broadcast," confesses E. M. Post. Vincent directs the Gauchos program on the CBS and the compositions are those which

Bel Canto Quartet

he collected from nearly all over the world. They are individual and have atmosphere and soul. Vincent comes from Italy, and when a young child showed a precocious interest in violins. During his many travels, this modern Marco Polo never forsook his dear old fiddle.

Frank Knight

* * *

IDA A. M. of Huntington Station, L. I. says, "I'm not inquisitive, but I'd like t know the color of Virginia Gardiner's an John McGovern's hair. And have the ever had stage ex perience?" Virgini has light brown hai and brown eyes. Tal in stature and wit a fair complexion you can just pictur how she looks o stage. Her phot has appeared ofte in RADIO DIGEST and of course yo noticed her paste on this cover. Can' get the exact meas urements on John McGovern, but Gene Mulholland, a very important person a NBC, says tha someone told hin that John is dark has brown eyes and dark hair. Virginia is not married—lives with parents. Radio stars don't memorize all of their parts. They generally read from typewritten scripts, throwing the sheets on the floor as they finish with each one.

Mrs. Wall

Andre Barouch

* * *

IF ANY station needs an especially fine announcer, RADIO DIGEST can recommend one. He's Lewis C. Carey who resigned from WLW Cincinnati in order to locate East. Has had exceptional training—having taken special studies in articulation, diction and expression at Emerson College of Oratory. Marcella will forward any inquiries to Mr. Carey.

* * *

HAZEL of Dayton wants pictures of the Bel Canto Quartet of WFAA, Dallas. Listen to this train of experience, Hazel, my dear. They are Victor Recording Artists, have been seen and heard in Fox Movietone, and have made personal appearances at the Mormon Temple (gracious me!), Salt Lake City, Hollywood Bowl and other prominent places. Vin

(*Continued on page 91*)

Nellie Revell the Voice of Radio Digest

Weekly Program on NBC Chain from WEAF, New York—Personality Skits and Yarns About Notables of Radio, Stage and Screen

The Voice of Radio Digest

THE Voice of RADIO DIGEST is on the air. It is a voice of cheer; a voice that brings to the fireside a bit of gossip, some humor and any well told tales, about people of nom you have heard much. A bit of ilosophy now and then, a line or two inspiration and many a chuckle . . . ding the air waves with Nellie Revell, om station WEAF and the NBC net-ork, every Wednesday from 11:00 to :15 P. M., Eastern Standard Time.

Who is Nellie Revell? It is a ques-on that requires a long answer. Nellie evell, most recently the Voice of RADIO IGEST and associate editor, is a name to onjure with in journalistic circles, in ie theatrical world, in the world of ooks, writing them as well as burning ie midnight oil reading them. She is a hilosopher; she has the courage of her onvictions, and she has a greater courage . . the will to fight on and on when ings seem blackest and all seems lost. he is a poet and raconteur; a wit of intillating brilliance and last but not ast she has a priceless sense of humor. Tellie Revell loves people and they like er.

It is as natural for Nellie Revell to write as it is for her to breathe. Journalism is her heritage. From father to daughter it has come down. It is in the blood and what is more natural than that a woman who has been writing stories since she was a mere slip of a girl, and who has spent her life observing people and events, studying causes and effects, should be able to tell a good story over the Radio. Miss Revell's father was a well-known newspaper man and journalist. For years he conducted a newspaper at Springfield, Illinois. He was an editorial writer on the Chicago Tribune. He, too, had the gift of words, and that little newspaper in Springfield had such a lure that Miss Revell just had to become a girl reporter. That was a long time ago and since then she has seen much and achieved greatly. Springfield soon became too small a field for this girl and so she turned her face to broader fields. She has worked on papers in many parts of the country. The old Times in Chicago claimed her for awhile; then the Chronicle, the great Tribune and the American; and then the Mecca of all good newspaper men and women—New York.

Nellie Revell and Her Old Friend, Irvin Cobb

She was a good newspaperwoman and so she came East. Gothamtown claimed her for its own and at various times she worked for the World, Mail, Evening Telegram and Morning Telegraph. That record is one that any newspaperman may well be proud of, but it is only a small part of the work and experiences that Nellie Revell has crowded into the years of her existence. She soon was known from coast to coast as a first rank journalist. The Denver Post, Butte (Montana) Miner, Seattle Post-Intelligencer, San Francisco Chronicle, San Francisco Examiner, Cincinnati Enquirer . . . she knew them all and worked for them. She was on the old Show World in Chicago and later became its New York manager. She has contributed to the columns of many magazines, including articles on vaudeville to the Theatre Magazine and at the present time in addition to acting as associate editor of RADIO DIGEST and putting its programs on the air at NBC this busy woman conducts columns in three publications—Variety, the Clipper and the New York Evening Telegram.

What a record! And that is only part of this remarkable woman's career.

AND finally the indomitable will that had carried this woman through more experiences in a few years than most people know in a lifetime could no longer avert the inevitable. A malady which had been developing for years and which she fought with iron courage caused her collapse and for four years she lay flat on her back—rigid in a plaster cast. From super activity to a motionless existence—a prison sentence that stretched on and on. There was little hope that she would ever be able to move again, but will power and sheer grit won out and today Miss Revell is active again.

During those four years Miss Revell was not idle. Far from it. She kept right on working. She wrote a book, appropriately titled "Right off the Chest." A title that was eminently suited to a book that was written in long hand with a lead pencil on a pad of paper resting on the cast that encompassed her body. That book IS Nellie Revell.

And now you know just a little about Nellie Revell, the Voice of RADIO DIGEST. When she made her initial broadcast telegrams and letters poured in from friends and well wishers all over the country. Will Rogers sent a wire from Hollywood; Al Jolson, that great comedian, wished his old friend Nellie Revell the best of luck. From a lonely spot in Maine came a long letter saying that Miss Revell's broadcast had been an inspiration. Up and down Broadway the word has been flashed that Nellie Revell is back—and broadcasting.

Read more about Miss Revell next month.

"Know Your Songs"

Rudy Discovers there are Orchestras and Viands in Chicago Unsurpassed—Marvels at Ben Bernie and Johnny Hamp—Surprised by New Songs He Had not Heard before—"Good Time Had by All"

MY GOSSIP on the ten popular songs for this month will be less comprehensive and less detailed due to our tour. Due also to the fact that we are not playing for dancing every night, which is the only way an orchestra leader gets to know the best things about the songs he plays, I can only give a cursory summary of some of the best tunes I have heard other dance orchestras play either over the air or during my meanderings, especially in the city of Chicago.

Chicago is happily blessed with some of the finest cafés right in the center of the city, where one may go and hear the finest music in the world, and eat the finest food that ever passed a pair of agreeably surprised tonsils. I can truthfully say that there is no city in the country that has so many really fine dance musicians. This may sound like treason coming from one who has made New York his home for the past four years, and who loves New York above any other great city, but it is a fact. The excellent average of the musicians in Chicago is very high, and the ability to handle their instruments is surprising, and the quality of music engendered by the dance bands in the Windy City makes all tunes sound pretty fine.

The most popular orchestra out here, and I say this without any fear of contradiction, is that of the dear, Old Maestro, Ben Bernie. The wind blew Ben to the Middle West, where it seems that he has been completely rejuvenated, and like the Phoenix he towers above all other competitors and is loved, adored, and spoiled by the darlings of society, and even the white collar working class of this good, old Middle West metropolis. Ensconced in the College Inn, the place that is famous for its marvelous food (food which reaches the rest of the world in cans and bottles), in one of the most delightfully ventilated, and exquisitely and artistically decorated rooms that I have ever seen, Ben plays a dinner and supper session with, in my humble opinion, the finest band in the world following the beat of his baton. I have no ulterior motive in giving Ben this credit; but for pure, rhythmic dance music and fine singing on the part of Pat Kennedy, his diminutive vocalist, I think Ben has staged a comeback, and his Radio popularity has tripled, and even quadrupled!

Lest I be accused of partiality, I must mention a few other orchestras before I go on to the actual discussion of the songs themselves. It is really through Ben Bernie and Johnny Hamp that I have come to make my selection of songs for this month's issue of RADIO DIGEST. Johnny Hamp was playing at the Congress Hotel, where it is my privilege to occupy the presidential suite during my stay here. It happens Johnny has just left for a new hotel in Cincinnati and has been replaced, in fact only last evening, by Jan Garber. Johnny surprised me during the course of our conversation by mentioning so many individuals who started with him, or who he was instrumental in giving to other bands, and who have since become very famous. I was surprised that one of the lead figures of the Olson Trio, one of the finest voices I have ever heard, Bobby Borger, was given to Olson by Johnny. As we sat there talking, I had to interrupt Johnny to ask him the name of this tune or that tune which his band was rendering so delightfully.

Over at the Black Hawk Cafe, are the pioneers of the air, and unquestionably the most popular dance band in the Middle West for many years, jolly, old Coon-Sanders, and how they play! Their comedy and by-play among themselves is so genuine and delightfully breezy that it is a pleasure to watch and listen. Their rendition of *She Loves Me Just the Same,* a song which it was my pleasure to help Carlton Coon himself write, is a masterpiece. At the mention of each particular school at which the young l[ad]y has a hero or sweetheart, a [few] strains of the football song [or] that particular university or [col]lege is played in a most spiri[ted] fashion, with the dancers hopp[ing] around in 6/8 for this particu[lar] passage. I've got to have din[ner] there at least once again befor[e I] leave, because I enjoyed the evening I spent with the boys very much.

The king of all maestros, old K[ing] Paul, is out at the Granada Cafe, wh[ere] the Lombardos once held forth. In fa[ct] I am "jest" of honor there this even[ing] in the course of their famous Cuck[oo] Club. Paul's arrangements of some cl[as]sics, especially *Trees,* is one of the m[ost] beautiful things I have ever heard. Th[ere] is also a new tune that has come up fr[om] the South, it is named *Rocking Ch[air].* It is a tune that grows on one; the Ash[es] sisters sang it on our broadcast here a week ago Thursday, and I wondered [at] their audacity in playing, what to [me] seemed a hymn, on the Fleischmann Ho[ur], but I have since learned that it is a ve[ry] popular tune in the Middle West, havi[ng] come up from the South, and it h[as] grown on me so much that I have learn[ed] to like it with the rest.

Paul is there himself nightly, w[ith] some very clever acts, including a n[ew] singing trio, Frankie Trambauer, Mildr[ed] Bailey, and an excellent floor show.

Up at the exclusive Edgewater Bea[ch] is our old friend from the Pennsylvan[ia] Hotel, Phil Spitalny, with a Chicago ba[nd] whipped into shape after two or thr[ee] weeks of grueling searching and rehears[al] he has one of the most popular bands Chicago, and his rendition of some of t[he] new tunes is typical of Spitalny's unusu[al] conceptions. He has become very pop[ular] lar with Radio fans in the Illinois sectio[n].

There are a great many other ban[ds] which I would like to mention: Way[ne] King at the Aragon Ballroom, T[iny] Weems, Earl Hines, Henri Gendron, Hu[gh] O'Hare, Art Kassel, and a great ma[ny] others.

This month's selections will be co[m]posed of songs that I have received fro[m] the publishers, and which I have r[un] over with my own orchestra, heard play[ed]

By RUDY VALLEE

Rudy introduces a Southern nightingale in Miss Frances Langford whom he found at WFLA, Tampa. She joined the NBC staff.

by two or three bands, and which occasionally have flung themselves at me as I have passed a Radio or Victrola store.

Our stay in Chicago was very pleasant; I think it will be the high spot of the entire trip due to so many things conniving to make it a most enjoyable two weeks. The tremendous and cordial crowds at the theatres, delightful theatres to play in, the many relatives I have in Chicago who were so kind to me in the summer of 1926, and who repeated their hospitality on this tour, and the general cordiality of everyone, has helped make it so.

But now to get down to the songs.

Two Little Blue Eyes

WE INTRODUCED this slow fox trot on the fateful Fleischmann Hour of February 26th, when trouble with the wires somewhere in the vast system of arteries of the National Broadcasting Company's coast-to-coast network caused the first half of our program to bring to the listener our music as a background, or foreground (varying with the strength at which we played) for a dramatic sketch on the other NBC network. And then at the half-hour things went from bad to worse, and although we could hear Irene Bordoni singing at intervals from New York, and the emergency string orchestra which is always ready to meet such a crisis, yet even their music was only going over a certain number of stations, and ours was not getting anywhere as we stood, waiting patiently and hoping that the trouble would be rectified before the end of the hour, but the lines were still tied up for at least an hour after the finish of our broadcast. This is the first time on the Fleischmann Hour that I have had serious trouble in the "piping through" of our music from our remote location to New York.

Few people realize how difficult it is for the engineers to map out the lines in the correct fashion to enable us to jump back to New York for Dr. Lee, and back to Chicago, or wherever we are broadcasting from, and then back again for the guest artist if he or she is in New York.

However, in the first half of our program we were able to present, and I think we presented it in a way to show the possibilities of the song; this song, which was the work of two rank amateurs, (when I say "rank" I do not mean the word in the sense in which it is sometimes applied) but they really are just amateurs, was brought to me for my inspection and my revision. I saw a few places where I felt that changes would improve the quality of the song, and after making these changes I rushed the song back to the press. They had brought the song to Rocco Vocco, the head of Feist, who was formerly the Chicago representative of Feist, and who now has charge of all the Feist offices in the country, and whose headquarters is in New York. Rocco is one of the most liked men in the music publishing business, and the music profession in general. At the age of 7, "Master Rocco Vocco" was singing in Chicago theatres, and although he has only a limited *technical* knowledge of music, he has one of the best musical judgments for picking of songs of any man in the industry. In fact, over a period of the last fifteen years he has picked many of the Feist songs which became big hits.

Rocco enthused about the song when he gave me the original manuscript of the two composers, but waited for my reaction. I was sold on the song the minute I heard it, and I think it should be well-liked. It has a swing, and properly played, a dance orchestra can do much with it. There is a great place for first an ascending and then a descending piano "run" at the end of the first and second phrases of the song. The thought is different, bright, and cheerful. The crowds that sing with the organ will get a lot of fun out of singing it. We play it about thirty-eight measures a minute, and it is published by Leo Feist.

By the River Sainte Marie

ALTHOUGH we have played this song on our Fleischmann Hour once before that broadcast referred to above, it began that particular broadcast, but what set it apart, at least as regards my own rendition of it, was the fact that I sang it both in English and French. I was highly gratified by compliments on the part of some people who seemed to think that the French chorus was well done. I am waiting for a comment by my sister, who knows her French, and who will probably tell me whether or not I did justice to the French lyrics.

It is an old song, having been on the shelf for four or five years. It was writ-

(*Continued on page 100*)

Chain Gang Chatter

THE man who put telegrams into novels . . . J. P. McEvoy, humorist, ex-greeting card rhyme writer, author of *Show Girl* . . . is now added to the roster of Columbia talent. 'Twas accidental, for when Heywood Broun was too busy trying to become a Congressman to come up to WABC, J. P. subbed, dragging up eleven-year-old Donald Hughes to the studio. Together they did a "Daddy and Rollo" act, which was a "natural". A sponsor was found, but McEvoy refused to appear every week . . . he hadn't the time. Sponsor La Palina demanded McEvoy or no one. It was a deadlock, until some one noticed how much Nick Dawson's voice resembled the author's. Nick was director of the Commercial Idea Department (another of those back-stage affairs) and still is. Now McEvoy writes one of those "Papa, Why?" skits each week and Dawson and Donald appear in it.

* * *

SAW Arthur Murray the other night. Off air, he is retiring, diffident and more like a college professor than a famous teacher and exponent of dancing. Says Mr. Murray, "I could teach a new step every week for three years on my Radio program and still not be at the end of my glides." He declares the old-fashioned waltz is coming back and recommends that those who cannot find partners for his broadcast lessons step out with the loud speaker.

* * *

LATEST use for Radios . . . sleep on them. Hospitals now have a "singing" pillow, made of sponge rubber with a loudspeaker concealed internally. You "lay me down to sleep" and hear a program, but the sound cannot be heard by anyone else. Suggested for distance fiends who leave apartment house windows open in the summer time with the volume on full blast.

* * *

IS Freddie Rich married? Or to whom was the Columbia batoneer hastening when he was arrested for speeding in Doylestown? However, that's not the story . . . this is . . . Freddie once received a ten dollar check from an admiring fan in Doylestown. Of course, he never cashed it, but carried it in his pocket as a souvenir. A year later, when he was hauled in, he remembered his unknown admirer, phoned him and told of his troubles. Admirer was a friend of the judge . . . you know how those things work. . . . Freddie paid no fine. But he still hasn't cashed the check.

* * *

TIE a big satin bow around "mike's" middle, give him a bow and arrow and he'll double nicely for Cupid. The latest reported casualties from his darts are George Dilworth, vocal director of the Salon Singers, and Gitla Erstinn of the same NBC group. George may be studio boss, but who's boss at home, we wonder?

* * *

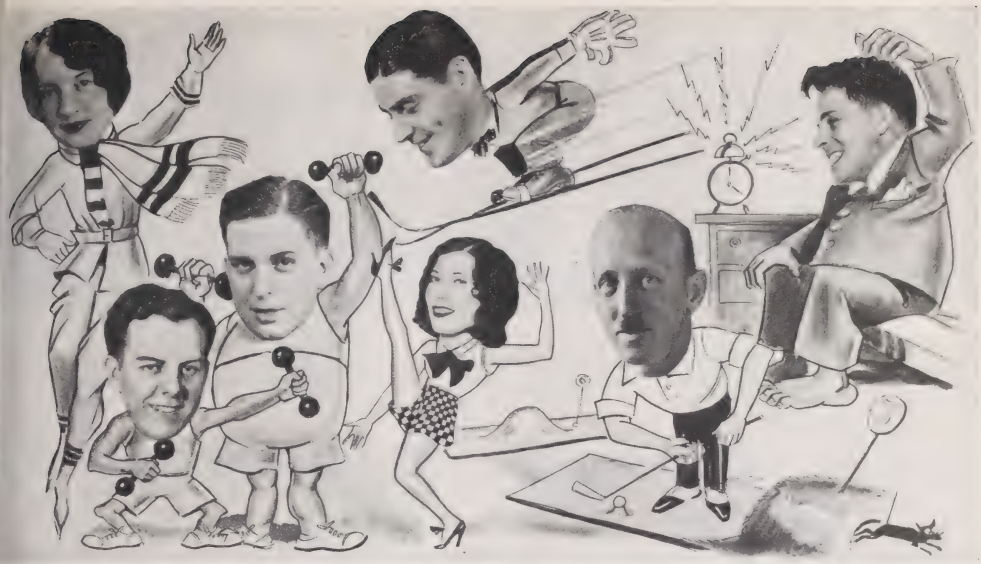
HERE'S a dance orchestra leader who actually admits he doesn't know a thing about music, Bert Lown. He plays by arithmetic instead of by ear, numbers the notes instead of writing them on the staff. That's how he wrote the lyric for *You're the One I Care For*, his song hit. Once he was a coat room boy in White Plains; N. Y., now he owns sixteen orchestras beside the Hotel Biltmore band which is aired on CBS. He's only twenty-six, slight, fair-haired, and is a real musician despite his modesty.

* * *

THERE are two McLeods at NBC, but one is real and one is purely imaginary. Keith McLeod, musical director of the chain, is getting fan mail meant for "Matt McLeod," a fictional "Vermont Lumberjack." Should he answer it and admit he never chopped kindlin' wood, or, still less, a big giant of the forest?

* * *

WHO made "Mechanical Mike"—the giant robot of the last Radio fair in Madison Square Garden? 'Twas the son of a Radio celeb, Paul von Kunitz, engineering offspring of Dr. Luigi von Kunitz, who is conductor of the Toronto Symphony Orchestra heard over the Canadian network. The steel man has within his body ten miles of wires, can rise to his feet and speak, fire a gun and answer 500 questions.



* * *

HOW to break into Radio . . . become a monitor engineer. That's the way it worked with Irving Reis, author of "Split Seconds," a recently presented experimental Radio play. It marked his first play, Ethelyne Holt's first Radio acting part, and George Beuchler's metamorphosis from announcer to actor.

Above: "Daddy" finds "Rollo's" arithmetic a puzzler. Played by Nick Dawson and 11-year-old Donald Hughes. Right—the play must go on! Tom Powers, Theatre Guild leading man, broke his leg and had to be wheeled into NBC studios.

WTMJ artists and announcers keeping physically fit. Skating, Myrtle Spangenberg; Small Gymnast, Fred Jeske; Large Gymnast, Russ Winnie; Skiing, Louis Roen; Dancing, Julanne Pelletier; Golfing, Bill Benning; Early Riser, Merl Blackburn

They're Some Sports in Milwaukee!

By MAE WELLER

IT WAS Julanne Pelletier who started it all. Julanne, the vivacious little French girl whose delightful ivory tickling over WTMJ, The Milwaukee Journal station, has made her a favorite of ether fans, came dashing breathlessly into the studio on this particular morning. Off went the big raccoon and there she stood, a chic French doll, garbed in the daintiest of pink and blue checked rompers!

"I didn't take time to change," she cried, her slanting green eyes sparkling with merriment at the startled pairs of eyes on all sides. "Just finished my tap dancing lesson, and I'm on the air in ten minutes. Must keep physically fit, you know," and with a click of heels and flash of white teeth she was gone.

"Physically fit," I murmured. "Gosh, that's surely important for Radio artists. Not a cough in a broadcasting room!" How did they do it? And off I started on my little job of inquiring reporter.

I lassoed announcer Louis Roen first of all. Louis? Oh, he's WTMJ's heart breaker. Six feet two of dark good looks, a pair of irresistible dimples that I promised him I would never again mention, and a soulful, crooning tenor.

"What do I do to keep physically fit?" he echoed my query. "I ski, of course." And on he went, lost in a beautiful description of the thrills of soaring over hills and crests with the assurance of a sea gull.

He was still talking when I spied Russ Winnie, WTMJ's assistant manager and popular sports announcer. Can't help seeing Russ these days. There's more to him than there was in the days when he played leading roles in Haresfoot and set sorority girls' hearts aflutter (he married one of them).

Russ smiled expansively. "Look at me, baby," he exclaimed almost ecstatically, "I've lost eight pounds in eight days (by the time you read this he may be reduced to a shadow). I am now a scant 205 pounds!"

And out came the truth. He had joined the Y. M. C. A. and had embarked upon a reducing schedule that included handball, volleyball, baseball, swimming, running and "one-two-threes" with dumb bells.

"FRED JESKE'S joined too," he told me. Fred's WTMJ's good looking strummin' baritone, a Radio pioneer from the Windy City. When Radio was still a smart young kid, Fred was known as "the baritone with the lovin' voice." Fred now sings, announces and dramatizes at WTMJ.

Leaving Russ flat, I set out in search of Myrtle Spangenberg, whose lovely soprano voice is known to fans far and near.

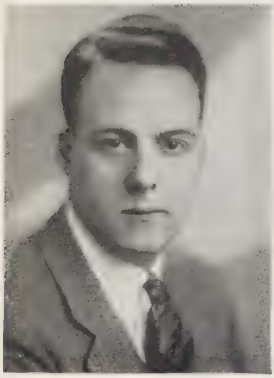
"Exercise?" Myrtle smiled. "Didn't you know? Terese Meyer and I skate . . . almost every day. There's nothing in the world like skating . . . skimming over the ice with the wind in your face . . . and my costume, it's heavenly! Blue suede with a touch of red. Terese wears red. How they do fall for us!" She giggled. "We do plenty of falling ourselves!" (Terese Meyers, folks, is the station's new organist.)

"Hello, folks!" It was Merl Blackburn's booming voice . . . the voice that starts the day right for thousands of ether fans who tune in WTMJ's Morning Parade, the alarm clock of the air.

The striking good looks of this early bird have adorned many an ad. WTMJ's pretty stenos say he's "simply gorgeous!"

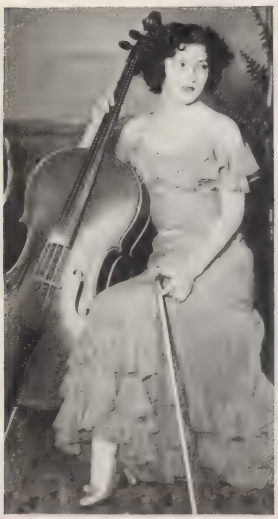
"A-ha!" Merl ejaculated to my eager query. "My answer is simple. Early to bed and early to rise . . . that keeps me salubrious, opulent and sagacious!"

Bill Benning was my next victim. Musical director of WTMJ is his imposing title, and he is one of the outstanding musical figures of Wisconsin, having conducted leading orchestras for more than twenty-five years.



"Physically fit?" Bill laughed. "I swing a baton and a driver for exercise, young lady," and he launched into an enthusiastic description of his indoor golf lessons that will send him out on the fairway this spring ready to sock that little white pill wickedly. Some sports, all of them.

Latest sports model, manned by three KFRC stars. Driver, Juanita Tennyson, soprano. Back-Seaters, Eleanor Allen and Margaret O'Dea.



Don E. Gilman, vice-president in charge of Pacifi Divison, NBC, recently voted one of Californa's twelv greatest men, confers with Riuji Nakayama, of th Broadcasting Corp. of Japan, on recent visit.

Paul R. Heitmeyer, who not only owns KUJ in Walla Walla, Wash., but also operates it and announces as well. He's a pioneer in western Radio.

Ruth Gordon Shovic, member of the unique KFBB, Great Falls, Mont., concert orchestra—all one family—Dr. and Mrs. Gordon and four children.

Far West News-Bits

By DR. RALPH L. POWER

THE twelve greatest Californians have been chosen, and Radio has its representative among the elect—Don E. Gilman, vice-president in charge of the Pacific Division of NBC. Twelve California newspapers and the presidents of twelve California colleges were the jury, which chose him for his "leadership in presenting the highest type of Radio broadcast to further the prestige of California as a Radio program source." Herbert Hoover is another member of the Honor Roll of twelve.

* * *

PAUL R. HEITMEYER, one-time Radio editor for The Oregonian, more recently manager of KGW, has renounced a life of relative peace and calm. Early this year he set out to conquer new Radio fields by owning the new KUJ at Walla Walla, Wash.

Paul R. (whose picture appears on this page) was operator for KGW shortly after it went on the air. As the years rolled rapidly onward, he took up the duties of Radio editor, then some production work for the studio, selling time on the station and finally . . . when station managing became more of a job for a business executive rather than a music director . . . young Heitmeyer was given the post. But the Heitmeyer onward march could not be stopped. He had a yearning to get into business for himself, bought KUJ's newly constructed transmitter at Longview, secured authority from the Commission to move to Walla Walla late in December and now his post office address is there.

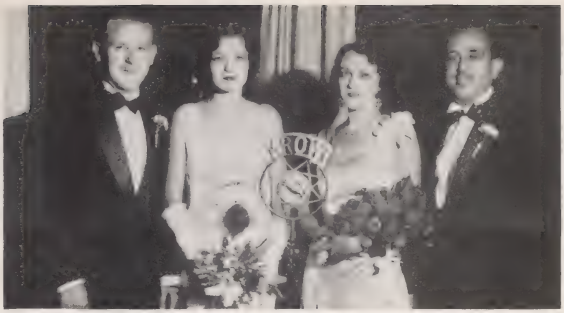
* * *

NEWEST recruit to the ranks of KTAB dramatics is little Peggy Jensen who plays the role of "Peggy" in Sam Dickson's bi-weekly comic strip: Educating Wuzzy. Peggy looks just like her name implies; snapping black eyes, an irresistibl happy smile, black unruly hair, and figure built for College-bred sports clothe She is a Girl's High School alumnus an crashing into the Radio world from schoo finds life an exciting proposition.

* * *

Bill Ray, KGER's manager, sent out hi Valentine cards this year with sundry mis cellaneous verses of his own. Best shot . . "Blondes may come, and blondes may g But they all sound alike on the Radio."

* * *



THE Rose City Beavers of KOIN, snappy aggregation, nimbly skips u up and down the scale of syncopation whe Frank Trevor shakes a tantalizing baton be fore them. When Frank was a mere youth down N'Orleans way, the romance and gla mour of show boats was too much for hi unsophisticated being so he up and joine one of the floating show palaces. Six sea sons in all did he float up and down th father of waters; then he did a country wide tour with a circus band . . . doublin up in various jobs, too . . . such as malletin down tent pins, riding elephants in th parade and other such tasks. Since 192 he has been with the Portland station.

* * *

KARENA SHIELDS, petite blond Radio drama enthusiast, is doing th KTM drama bits these days with a chang ing cast of characters ranging in numbe from three to a dozen or more. About year ago KPO fans heard her voice fro the north. Her husband, Frederick, one time of a Kansas City Radio station, is now program manager for KTM in Los Angeles

dramatic players of WXYZ in Detroit get to- to read script . . . Helen Wright, Peggy Fenn, ames Jewell, Dramatic Director. Their biggest comes in presenting plays of the "It Actually Happened" series.

A Radio wedding at KROW. Bride was Harriet Pool Branham of the staff, attended by Beth Chase, Blues singer. Glenn Branham was the happy bridegroom.

LA CHARTE, now lyric soprano for ie United west coast Radio chain, had ght start in life for a Radio career. as born in New Orleans, studied four with Herbert Witherspoon, vocal r. and has done a little concert work hich the soft, delicate tones of her particularly fit her.

* * *

ARLES FREDERICK LINDSLEY, rofessor of speech education at Occi- l College, Los Angeles, the past six is now on the second year of his rpretations of Literature" from KHJ. take the form of a wide range of poetry and drama. Tall, thinning hair, scholarly-looking, and bespec- l, Professor Lindsley has made a name himself in the southwest through his al readings . . . "The Chariot Race" *Ben Hur; Courtship of Miles Standish* scores of others.

* * *

SEEMS as though Mac's Cow Hollow mphony (KFRC) comes from six , but has only one native Californian— apello, accordionist. White Woodall s from Oklahoma (quarter Cherokee); Richards hails from Louisiana; Cecil ht from Arkansas; Harry MacClintock :) from Tennessee; Ace Wright from ming.

* * *

HE spring catalog for Continental Broadcasting Corporation comes out in raiment in green color formation and d like a microphone. Most outstand- alent in the aggregation . . . Deacon n (Billy Evans) and his Peacemakers sing *Lonesome Road* as the theme song.

* * *

GER is faced with the dire situation of having only one solitary surviving r. It seems as though Eddie Marble, , packed up bag and baggage and moved KDYL, Salt Lake. Penry Selby, an- staff tenor, made up his mind to be a church singer, and moved away to study. This leaves young John Page as the station's only remaining tenor, whereas four months ago there were six on the staff at one time. Young Page, recently out of Manual Arts high school in Los Angeles, is lithe and agile, handsome in a movie type manner, a good dresser, six feet three inches tall and glossy black hair.

* * *

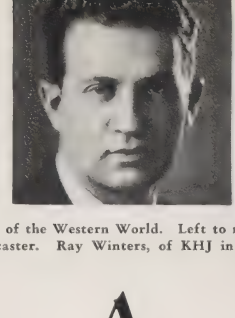
JACK PLUMELET, KYA announcer, followed the sea for more than five years before he finally hankered for dry land. At 19 he was appointed to the New York nautical school's training ship, the U. S. S. Newport. Upon graduation he was given a third mate's rating by the department of commerce, and followed the sea on merchant ships for nearly six years. Now he has been in coast Radio circles for three years . . . first in the bay district; then at Los Angeles (KFI, KMTR); and finally back to San Francisco in June of a year ago to be with the KYA announcing staff.

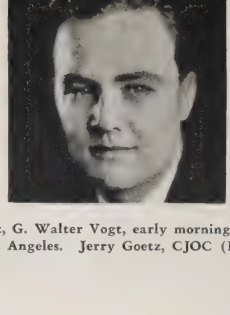
In Detroit Studios

By B. G. Clare

IT IS hard to refrain from calling Leo Fitzpatrick as "The Merry Old Chief." The present general manager of WJR bore this title when he led the Kansas City Nighthawks at their after-midnight revels years ago. Fitzpatrick is now one of the regular railroad commuters between New York and Detroit, on various activities connected with the management of his large station. He is an "air commuter" also, flying between Detroit and Cleveland, for his new enterprise there, Station WGAR.

* * *





OLIVE SHARMAN is featured continuity writer with WJR. Her Radio career started when WJR shared a wavelength with WCX. This background of Radio experience is augmented by several years' newspaper and advertising work.

Wistful Dorothy Irvine of the dark curly locks does children's recitations and pianologues for KGA up in the northwest country at Spokane, Wash.

WJR in Detroit abounds in Radio personalities—one of whom is Jack Douglas, the big six-footer who is known to listeners as the "Old Night Watchman."

A cross section of announcers of the Western World. Left to right, G. Walter Vogt, early morning announcer at KFAB, Lincol France Laux, KMOX sportscaster. Ray Winters, of KHJ in Los Angeles. Jerry Goetz, CJOC (Lethbridge, Canada) manage

"Your Announcer Is—"

WHAT thrills being an announcer must bring—if that weren't the case, why would the calling attract so many men who have known the thrill of adventure, who have had colorful careers? Take the eight good-looking representatives here, who have posts as widely scattered as far-north Alberta, to southerly Macon. In their ranks is a descendant of the Russian royal family, a real broncho-busting cowboy, an actor, an ex-aviator!

The "royal" announcer is John Kuropatkin Chapel of KQV. His mother was a princess of the royal family of Russia, who is now married to a Pennsylvania steel man. Soldiering and writing have claimed him—he went to West Point and then deserted by resignation, to the University of Virginia Journalism Course. After a try in the army, he favored WBZ with the use of his four-lingual voice, then WORC, WLEX, and WCAH, but now he says his ramblings are over and he'll stay in Pittsburgh at KQV.

Then there is G. (is it perhaps Georgie?) Walter Vogt of KFAB in Lincoln, Nebraska. He's only twenty, but has been at it for a year, getting up at 5.00 A. M. for the eye-opener programs (which makes sleeping a hobby of his). He attends the University of Nebraska, and would rather talk than dance.

France Laux, crack sports announcer at KMOX, is the ex-aviator. Ran away from high school to join the 259th Aerial Pursuit Squadron, and went to France. Came back and worked up from sports referee at broadcast games to announcer. He joined KMOX two years ago, i ried and has two children.

Ray Winters, of KHJ, in Los A was going to be a farmer, but tur Hollywood instead and finally to . . . Frank Hoggard has the imp post of Advertising Manager way south at WMAZ in Macon, despi scant twenty-four years, but spends of his time at the mike.

Roger Krupp of KSTP is the e boy. The son of a cattle-ranch he acquired a wanderlust which him to a newspaper as a sports wri iron mines in Minnesota, to the meets as a speed swimmer, and t York as an artist and advertising Now he's back in St. Paul, wh spends his non-announcing hours own studio. The "Original Abie" of *Irish Rose* . . . that's Ha bert, studio manager of who played for five ye Anne Nichols' play. Th managed a Denver stock pany, and finally turned h back home to Council Bluf

They play at cross-purposes but in perfect harmony . . . Dottie Sherman and Monica Leonard (left) . . . the popular piano duo of WGY in Schenectady, N. Y. Only use one piano . . . but it's grand! Below—The Wandering Poet, WPG's actor-author. This is the first published picture of him.

A Scoop! Fi Published Ph of WPG Celeb

THE Wandering P WPG is an alluri ure, and an app one, for he draw prize mail bag at the A City station. RADIO D publishes the first photo actor-author ever to app the press, but his nam marital status still shrouded in mystery. H weekly "Bundle of Dr broadcast presents senti and dramatic readings w soft string ensemble playi propriate accompaniment.

lore announcers: Left to right, Roger Krupp, ex-cowboy of KSTP, St. Paul. Hal Shubert, ex-actor of KOIL, Council Bluffs, Iowa. Frank Hoggard, of WMAZ, Macon, Ga. John Kuropatkin Chapel, "Royal" announcer of KGV in Pittsburgh.

Gossip of The East

O START with N'England . . . it seems that Mike Hanapi, boss of WTIC'S Ilima Islanders, was only fifteen years old when he awaii and leis. He joined a circus, ome Indians whom he liked and with them, masquerading as Hailstone." One day he met a r Hawaiian doing the same stunt ome Sioux Indians. They joined went into vaudeville as a duo became the nucleus of the famous ukensemble, now in Hartford.

l Hoey, Boston sports announcer, k at the mike this month, after g an indoor miniature golf course nter . . . Leo Reisman's Orchestra ons from the Bradford Hotel in via Station WEII. He has an at his disposal, installed when the Lodge owned the . . .

* * *

WN in the big metropolis . . . femi- visitors to the new theatre-studio of WMCA are thrilled to see that their favorite announcer, "Aleck" is over six feet tall and as good-looking as he sounds. Known formally as A. L. Alexander, he draws down a heavy mail-bag . . . The Three Virginians (whose picture appears here) are a trio of roving sisters. They are ex-vaudevillites and appear on Sundays and Mondays at WBBC, and other days at WMCA, WGBS and WPCH.

Mary Zoller of Ilion, N. Y., is a newcomer to WIBX, Utica. She plays piano, croons, xylophones marimbates, accordions and plays the organ. In other words she's a whole orchestra in her own right . . . WLBW, the Columbia station in Oil City, Pa., points with pride to two newcomers. Peggy Barton, "Shopper" and Dr. William Ashbaugh sports reviewer.

BALTIMORE is the birthplace of Mabel Garrison, celebrated concert and opera star, hence it was fitting that her Radio debut occurred at WBAL. She is appearing exclusively on the Tuesday night McCormick programs from that station. For eight years Miss Garrison was with the Metropolitan Opera Company. In private life she is the wife of George Siemonn, conductor of the Baltimore Symphony Orchestra . . . Jack Dempsey paid a visit to WFBR studios in Baltimore recently to reminisce with Announcer Don Hix, who was assistant director when Jack was making movies.

The Roanoke Entertainers of WDBJ left Virginny for a visit to New York and broadcast from CBS headquarters. Their novel "barn dance" tunes brought them many congrats.

Scull, pretty society who sings at WPEN, lelphia on the Amoco and other programs, onducts a Radio gossip n in the Philly *Record*. nade her Radio debut WCAU, but later be- a staff member at N, the "Mystery An- er" station, where she appears daily.

The Virginians in their pretty costumes are Mildred Pianist, Marguerite Violinist and Bernice 'Cellist Arnold, of the Boro Radio Service and other WBBC, New York programs. Below—Mildred Godfrey Hall, staff harpist of WTIC, who has played here and abroad in many cities.

Moving Day in CHICAGO

By BETTY McGEE

MOVING day—in the Chicago studios—arrived a month or two in advance of the traditional May 1st this year. Not properties, but people. . . . The most breath-taking change of all was when NBC moved in on the WENR wave length. The chain bought out the local, lock, stock and barrel, and took over a good many of the favorite stars and programs. As, for instance, Weener Minstrel Show with Gene Arnold, Frank Westphal, and Al and Pete and the rest of its talent. Others still in the old spot are . . . the Edison Symphony with Morgan L. Eastman . . . Jim and Bob, the Hawaiians . . . Sally Menkes (what would the staff do without her accompaniment!) . . . Chuck, Ray and Gene, who do some NBC comics on WLS, as well as on WENR.

Migrations included the Smith family to WMAQ (with a few changes in the personnel) . . . Edwin Delbridge, tenor, also to WMAQ . . . WBBM claimed Mike and Herman and their dialectics . . . while WMAQ signed up the singing team, Marian and Jim . . . Paul McCluer's Sunday morning Sunshine Hour is at KYW now, but Paul joins the NBC Sales Department.

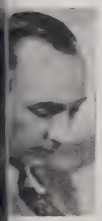
Irma Glen, staff beauty, organist and Air Juniorite, went chain before the big surprise, but now returns to WENR . . . Everett Mitchell, announcer . . . Gale Swift, Musical Director . . . Edwin Boroff, Chicago pioneer . . . Mrs. Anna Peterson, Home Economist . . . they're all still doing business on the old stand.

"Little Joe" Warner is still going strong at WENR. More formally, he is J. B. Warner of Beverly Hills, a South Side suburb, where he lives in a bungalow with his wife and several children. He was born in Chicago and has lived in it all his life. Baseball, football and books come next to his family among "Little Joe's" interests.

* * *

SPEAKING of old favorites—Pat Barnes is back at WGN midst much rejoicing in the camp of Barnes' admirers (and their name is legion). For the benefit of those who haven't discovered it, Pat is heard in his sketch "Jimmy and Maw" each

Above—June Meredith, pretty leading lady and Charles Hughes, genial "First Nighter" of the NBC sketch of that name.



Left—It's moving day for Quin Ryan, WGN announcer, to new quarters with his bride, who was Roberta Nangle, newspaper woman.

An honest-to-goodness peanut roaster was dug up for Russell Neff, popular WTAM tenor, when he sang *The Peanut Vender*. Studioites ate nuts hot off the whistler.

morning except Friday and Saturday. . . . Another old C favorite who has drifted back to town is Bobby Griffi same Bobby with the same nice smile and smiling voic gained popularity years ago on the Nutty Club program WBBM with Guy Lombardo and Charlie Garland. Since good old days, however, the wide open spaces have be and Bobby has found himself at KVOO in Tulsa, d Gainesville, Florida, where he opened a station opera the University of Florida, and then in Des Moines. A he's announcing at KYW.

Faces have been changing at the last-named Chicago Maurie Wetzel, whose name was almost synonymous wi of KYW, is there no more. Jules Herbeveaux and hi are now spending most of their time over in the NBC while Rex Maupin and his "Aces of the Air" are now portant part of KYW broadcasts. Harold Bean's is ano the new faces—although a familiar one at WBBM, w managed to keep busy singing with Leon Bloom's band, a ing and writing continuities when time hung heavy on his He is the new "Voice of State Street" and is one of the Peddlers" with Freddie Rose on afternoon programs, taken Elmo Tanner's place since Elmo joined Ted

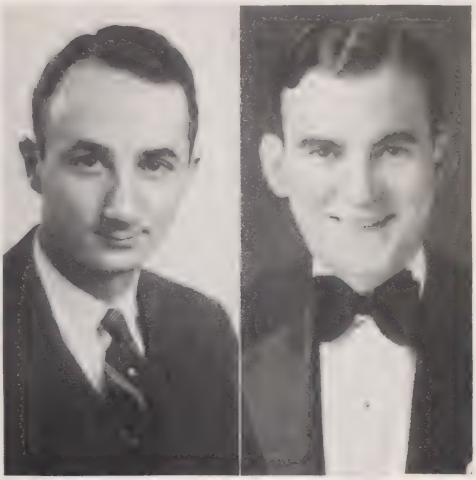
Above—"Curly" and "Charlie" piled up barrels of fan telegrams at KSTP recently.

Right—Harry and Joe, popular WJAY funsters.

Two Chicagoans in the quartette (left). Top, Jack Doty, featured in NBC "First Nighters," and Bobby Brown, WBBM program boss and announcer.

Bottom, two Clevelanders. Fred Ripley, assistant manager of WGAR, and Stanleigh Davis, who wields a musical saw at WHK when he isn't smoking a pipe.

I attended the University of Illinois, where he majored in matics and coeds, taking a Bachelor's Degree in science possibly accounts for the fact that he is not married. nother new comer to KYW is Bernice Yanacek—pianist redhead! . . .



* * *

E people who produce the Little Theatre plays have inter- ing "dramatic" backgrounds. June Meredith, who is the lady in the "First Nighter" productions, an NBC feature, n the legitimate stage, and Jack Doty, featured on the air Miss Meredith, was also drafted from Broadway where he popular leading man for several seasons with Jane Cowl. author of these plays is a blond, winsome little miss, Catherine Abels by name, no mean actress in her own right. as graduated from the Department of Dramatics of the sity of Wisconsin. And just a word about Charles P. s, the producer. Mr. Hughes has been doing clever Radio tion work, principally over WIBO, for some time, but has ly come from behind the scenes to assume the Radio per- y of the genial "First Nighter."

Personality Bits from

CLEVELAND

By Marvell Lenoir

ABOUT that happy pair of funsters, Joe and Harry of WJAY . . . Off the air Joe O'Toole is as Irish as his name. His blue eyes, curly hair, and Irish ways make him as popular as any bit o' green ever made a body yet. Harry Royale is taller, darker, and more dignified but even he packs plenty of smiles and spreads them around generously.

The boys began their work together in that casual way so common to Radio Folk. You know—one man is rehearsing in a studio, when another strolls in, heaves a sigh that plainly says, "I want to rehearse in this studio, must you always be underfoot?" "A" looks disgusted, but doggedly keeps thumping away, and to show how nonchalant "B" feels he begins singing a late popular song. "A" stands impatiently tapping his foot on the rug, which "B" doesn't hear at all. Finally liking the tune and forgetting his grievance in true temperamental style, "A" begins the second chorus and sings it with "B". "B" looks at "A" and "A" looks at "B", then they both grin broadly, friends again.

They make up and shake on it, outline a program, hunt up the powers that be and beg an audition. Granted and they click and there they are. That's how Joe and Harry met and clicked and still continue to click for sixty minutes every day.

* * *

FRED RIPLEY, one of Cleveland's premier Radio men and a newspaper man of note, is now assistant manager of Cleveland's youngest Radio station, WGAR. (His picture appears here.) He is tall and dark, with a deep, resonant bass voice that fits him perfectly. He first sang bass solos over Cleveland's pioneer station WHK. And later created the very popular character of Black Bill, singing more bass solos in dialect over WTAM. Several times Mr. Ripley has left Radio to devote his entire time to newspaper work, but the lure of the "mike" has been too much for him and each time he comes back.

Mr. Ripley gives special attention to auditions and despite his many other duties insists on hearing them all himself. Every Sunday afternoon he gives his audiences a treat with two new voices never before heard over the air.

Voice of th

STATIONS! — ANNOUNCE CALL LETTERS MORE FREQUENTLY

RECENTLY I waited nearly an hour for the station announcement from WTAM, Cleveland, and then just when they got ready to unburden themselves of the much-wanted information, the soda mixer in the drug store just below my home started and I missed it.—Charles E. Woodhull, 1535 Broadway, Detroit, Mich.

* * *

SUPPOSE you suggest that each broadcasting station never fail to give its call letters at the beginning or close of each number. Thousands of listeners are disappointed when it is not given. Some stations announce after every number, regardless of the intermitting time and get maximum advertising for the station and city.—R. G. Banta, 30th S.S., and W. Holly, Seattle, Wash.

* * *

HAVE WOMEN MORE BRAINS THAN MEN?

YOUR magazine is charming, although sometimes rather exasperating when my favorites are not mentioned. Three cheers for the One and Only Georgia Backus of Columbia, and the talented Minnie Blauman, of the same station. Neither of these brilliant artists has an equal in her line.

Also, it is not always the person who appears at the mike who is the best, as witness the case of Minnie Blauman. She is Professor Exzema Succotash in the *Nit Wits*, but that isn't all. She is also an arranger and director for the Columbia Chain, and is the only woman in Radio who does her type of work. Truly, a glimpse into the CBS will show that it isn't always the men who have the brains. May I ask for a picture and write-up on these stars? (*See March for story about Nit Wits with pictures of these two artists—Editor*)—Julie Gerard, Manchester, N. H.

* * *

FROM AN AMERICAN IN GUATEMALA

I HAVE a wonderful small Radio, but it is marvelously clear. I have just heard my 117th station—my range includes San Francisco, Salt Lake City, Denver, Chicago, Detroit, Toronto, Montreal, and many, many southern stations.—Jessie D. Eltringham, Apartado de Correo 330, Guatemala City, C. A.

* * *

THIS FAN INSISTS ON KNOWING WHY PROGRAMS ARE DROPPED

A FEW Sundays ago I tuned in a certain station which carried a very interesting Columbia feature, fully expecting to hear it. To my surprise another program was presented in its place, without any explanations or apologies. May I suggest that it would be a good policy, when discontinuing or substituting a program, to explain to the listener the cause. This, at least, is due to the person who expects to hear his favorite program.—George W. Shepard, Marion, Kans.

* * *

OH, WHERE AND OH, WHERE IS JACK SHARPE?

WE MISS the friendly voice of Jack Sharpe from KFDM as much as the beautiful sunshine is missed from the skies on a rainy day in the winter time. I sincerely hope Jack will soon return to some station where we can hear him again—I hear hundreds of fine Radio artists that I admire but none whom I think can equal my old favorite.—Ida Cross Farrow, Elizabeth, La.

* * *

QUICK, WATSON, FIND JIMMY GREEN

THERE was something in your February edition that rubbed my fur at just the right angle. It was the letter concerning Jimmy Green and his Orchestra. He has a couple of boys in his band that make others sound like combination hog callers and fog horns when it comes to singing. And when Jimmy announces he talks like you are his best friend. He has left Albany now and I can't find him—I feel like I have lost my left arm. If you know where he is, please let me know (*His former Radio connections write us that they do not know his present whereabouts—Editor*) — P. H. Kelly, Jr., Box 128, Montgomery, W. Va.

* * *

TAKE A HALF HOUR OFF TO READ THIS ONE—IT'S WORTH IT

HERE'S a coupla dots and dashes—on an epic: Friday night, January 30th, California Fruit Grower CBS System—coming from local WCCO—This is the California hour—followed a rumble and noise, then—"a wire broke, folks, but we now continue —". Silence again for a fraction of a minute, then—"this is a WEEKLY FEATURE over this system."

Irma Glynn, WENR, has grown about 1000% in my estimation since I first heard her. Her pre-supper broadcasts for the tots interest me immensely. DARN GOOD! WOS brings us very nice "old-time" fiddling, etc., every so often. Makes you want to stay right with 'emê

Call the Engineer on this one: Why do some stations fade as regularly as clockwork, regardless of their power, while others with small power hew right to the line hour after hour? WHY IS IT?

After tuning all but five of the broadcast channels during the past week, I find that Call Letters are sounded less frequently by small stations than by high power ones. Yet the small stations are usually crowded on local channels, and when you tune one of these clearly you'd like to know who's what, but dern them lo-watters! They'll play, talk, yell, jazz, announce things time after time and let you sit there trying to guess! Must be afraid someone'll steal the letters away if they shoot 'em into the ozone.

With greatly improved transmitter and additional remote controls, WHBY, De Pere, Wis., is a comer. Give 'em a boost some time soon.

Smokey Joe and Teetain on WWL Tuesday and Sunday night programs are still my favorites! Smokey (Ralph Nogues) has represented 22 characters which I heard since last October. And they are not done with 'em yet. They are genuine "Ambassadors of the Air", for they can handle any situation in true O. Henry style, with a pinch of the serious here, a bit of the comedy there, and a surprise ending always. Guess this is enough for this annual letter.—Art J. Hantschel, 226 E. Fremont St., Appleton, Wis.

* * *

A PUBLIC BENEFACTOR

I AM mailing the back numbers of the RADIO DIGEST mentioned in our correspondence, directly to Mr. Anderson, director of the New York Library.

If they will serve a purpose to a larger number of people, then I shall feel my sacrifice is not in vain. I really treasure these old copies, but I am also looking forward with pleasure to receiving some of the recent issues.—Mrs. J. F. Foster, 4824 Elm Avenue, Hammond, Ind.

(Mrs. Foster generously responded t plea from the director of the New Library for back copies of RADIO DI We wish to add our thanks to those of Anderson—*Editor.*)

* * *

LINES TO THE AUTHOR O "NIGHT CLUBS"

CONGRATULATIONS to you on pub ing and Rudy Vallee on writing article on "Night Clubs". It is one o best and most comprehensive articles on timely subject that one could find. can wish for such a person only the of luck. And the same wish goes for magazine.—H. J. Crawford, Hotel Yorker, New York.

* * *

DON'T SAY THE NAUGHT WORD!

JUST received the notice of the ex tion of my subscription to RADIO D and the usual sales argument as to w should renew the contract. You may that I have never of my own free will, stated that I desired that you send t the RADIO DIGEST. This act was i upon me by the purchase you made o magazine Radio Broadcast, of which I been a regular subscriber for many ye

What in h—l you think I can po see in your publication is more than imagine. The other magazine was fu technical data about circuits, power plies, data sheets, etc. Your magazi full of "junk" (as far as I am conce about the physique of Rudy Vallee mustache of Norman Brokenshire, an voice of Lizzie Twitch.

I, for one, can positively state that may never expect to include me as a scriber of this publication, as long as of the type that I have received in fin out my year on the original magaz Charles L. Pattee, 36 Raymond Ave., S Mass.

* * *

WE BASK IN FLORIDA SUNSHINE

JUST the other day found your ma in the library, so went up town a and got the February issue. I mus I'm afraid the house suffered until read it through.

I am too deaf to enjoy the talkie I prefer to be alone as much as possi the Radio is my hobby. Hardly eve it off before midnight as I dread the ness and can't sleep yet. And I turn every morning at 6:30 to get WL you see how I use it. Our little WRUF at Gainesville is very good c ering its size, and they have some good talent among the studio staff.

This is for the lady who objected t cipe programs" and said those who b a cook in these days eat out. Well, she is jealous of we folks who still l cook and love our folks well enou want to learn new foods and new w preparing them. I want to express m ings about people being unfair, beca we all thought alike this world would a very interesting place to live in, wo —Mrs. Rosamond C. Andrews, 212 S St., Palatka, Fla.

Listener

NITIATION NIGHT AT THE OLD V. O. L. LODGE

E by this letter to become a mem- of the V.O.L. Club.

of the best programs on the air in rk City is the Radio Scandals Hour HN each Wednesday night. Its ity and—of course—its entertain- lue, make it good. There are only ists that appear regularly on this t; the others are picked from night he stage and the newspaper field. the artists rehearses with the others. practice his singing, but the en- doesn't appear before the hour on he program appears. Nick Kenny, er of ceremonies, introduces the ar- hey wish, but none know who will ext one to be called up to the mike. aughs result from this, and the gen- d humor of the program is some- orth listening to.—Walter B. WINTER POEM

ght, I am not at a movie show, by a wood fire's cheery glow what care I for sleet and snow ng as I have my Radio.

—Mrs. Winifred Coplien, Brodhead, Wisconsin.

* * *

'LL SOON FIND OUT "WHO'S IO" IN BROADCASTING

WOULD like to see the feature, Who's Who In Broadcasting," in agazine again. It was very interest- it seems as if there was more in- n for the amount of space used any other feature. (*A new version o's Who" will be issued for* RADIO *readers within the very near future .*) We wish to congratulate you on rovement in your magazine. When ve this month's issue it will complete of R.D.'s. The first ones were very ng but the better quality of paper using now makes a great improve- the pictures and also makes it easier eyes while reading them.—Mr. and ank A. Jennings, 628 N. State St., fich.

* * *

'RE WAITING PATIENTLY FLOYD GIBBONS' RETURN

OUR December issue of the RADIO ST you predicted the return of Floyd . Many of us have been waiting y for his return. How much longer e wait?—From a group of boys who a real he-man, Litchfield, Conn.

* * *

writing this for a group of Radio ers. We all admire Floyd Gibbons and were so disappointed when he nued his nightly chats. Lowell is good but can never take the place d Gibbons.—Mrs. E. J. Dobson, 35 nd Avenue, New Britain, Conn.

YOUR magazine is splendid—I enjoy every bit of it. I do so miss Floyd Gibbons—his nightly broadcasts were an inspiration. The whole world seemed a more cheerful place to live in after he had finished—not so with Lowell Thomas. He is like a continual funeral, for his jokes fall flat. And *Literary Digest* suggests a map to follow him to places of interest. Oh me! what with grasshoppers, ash cans, and the moon coming up over the cow shed, and last but not least, petticoats and laces—he makes the trips pleasant indeed.

Please bring us back our he-man Floyd Gibbons on a nightly broadcast and we will be forever grateful. By the way, Mr. Editor, you did predict his return—we are still waiting. Please tell us when. (*Mr. Editor says: Listen to Floyd on Saturdays on the General Electric Hour and Sundays on the "World Adventures" program—and be patient a while longer*)—A Group of Radio fans, Shreveport, La.

* * *

AN EARLY BIRD CATCHES—A WORD OF PRAISE

VINCENT SOREY and his violin, with the dawn of every new day, are in perfect harmony. The Soul of Sorey links Columbia's network from coast to coast—forming a rosary of musical hours. Men may work from sun to sun—but Sorey's music vibrates perpetually.—M. V. Loscalzo, 22 Nassau Drive, Great Neck, L. I.

* * *

WHAT THEY LIKE—AND DON'T LIKE!

THE DIGEST used to be a good Radio magazine. You will note I say "Radio" magazine. However, since you begin including fiction stories and articles not relative to Radio, it has become just another magazine to me. (*No fiction has been run since last December—Editor.*) On receiving the January issue I see more of what I would like to see and less of what I wouldn't. Nevertheless, with all my complaining, I still enjoy the old DIGEST, but would like it to contain more pictures and short articles on people and organizations whom we, on the receiving end, know only as voices.—D. Egan Jamieson, Smith Falls, Ont.

* * *

MY YOUNG brother glanced through your November issue and exclaimed, "Holy cow! First thing you know they'll be having articles on crocheted doilies, hooked rugs, advice to the lovelorn. Oh my dear! which is the correct fork to use to tune in WJZ?"

I defended you loyally. But then the very next month you had the hooked rug article! So please go light on cooking recipes, beauty hints, interior decorating, fashion notes. Give us more intimate stories and pictures of the entertainers.

Now for a lot of praise. I always admire your covers, your editorials, Marcella, Scientific Progress, V.O.L., Parade of the Stations, your expose of racketeers, your rotogravure section, Radiographs.

The articles by Doty Hobart, Evans E. Plummer and Alma Sioux Scarberry cannot be beat!—Florence Haist, Box 157, Lindenwold, N. J.

THOSE ORCHESTRAS AGAIN

ADMIRERS of the famous dance-music dispensers are never lukewarm. For several months an interesting controversy has been raging in these columns over the merits of the various orchestras. Here's another installment—*V.O.L. Editor.*

* * *

"THE OLD MAESTRO—BEN BERNIE"

I THINK honest differences of opinion are permissible and really instructive, but they can be expressed without becoming abusive. My opinion on the situation (if it is worth anything) is that each of the leading orchestras of the day is really good, but if I had to express a choice, it would be Ben Bernie, "The Old Maestro."—Wallace E. Johnson, Mobile, Ala. . . . Have you heard Ben Bernie play *The Kings Horses*—if you haven't, you have missed something. I want to buy a horse every time I hear it. —S. D. Haynes, Montgomery, W. Va.

* * *

VARI-PARTISAN

THE FOLLOWING is my list of the leading dance orchestras in the country—Paul Whiteman, Coon-Sanders, Guy Lombardo, Phil Spitalny, Ted Weems, Jan Gerber, Henry Busse, Wayne King, George Olsen and Duke Ellington—David Smith, 40 Second St., Sharpsville, Pa. . . . Being an ardent DIGEST follower, I want to join the chorus. My list would include Paul Tremaine, Paul Whiteman, Vincent Lopez, Leo Reisman, Guy Lombardo, Phil Spitalny, Wayne King, Coon-Sanders, B. A. Rolfe and Kay Kizer—Rudolph Anderson, Ludington, Mich. . . . Throw a few votes to Blue Steel. Can anyone fail to be thrilled by his pleasant, "Little Boy Blue talking to you?" —Frank E. Howell, Lynch, Neb.

* * *

COON-SANDERS

WOULD like to inform all interested that they can join the Coon-Sanders Fan Club by writing me at this address.—Sylvia R. Slavik, 4723 W. Washington Boulevard, Chicago, Ill. . . . Have any of the others the solid reputation of Coon-Sanders? Have they played for nearly as long a time? Coon and Sanders are the two greatest singers in jazz today, the two greatest dance orchestra personalities.—J. F. Finarty, Jr., The Dower House, McLean, Va.

* * *

THE LOMBARDOS

THE soothing manner in which the Royal Canadians play their slow tempo music, makes Guy Lombardo's band the most popular on the air to me—George H. Etheridge, Crossett, Ark. . . . They are inimitable and cannot be equaled.—Loraine Brunner, 2964 N. 7th St., Milwaukee, Wis.

* * *

RUDY VALLEE

I KNOW many of Rudy's admirers would like to join a club formed in his honor. I should like to take this opportunity of inviting all Rudy's friends to join us.—Dorothy Yosnow, Rudy Vallee Rooters, 386 St. Johns Place, Brooklyn, N. Y. . . . This isn't a "silly-girl" crush, but I must correct some recent false statements. Rudy is so much better looking than any picture of him, I don't see how anyone can think otherwise.—Virginia Menzel, 461 Sackett Ave., Monore, Mich. . . . After all, Rudy writes for this magazine and if he reads all the letters slamming him, how do you think he feels?—Agatha Filippelli, Long Beach, N. Y. . . . When he sings, he sings for the love of singing—that is part of his make-up. —"Duke", Lincoln St., Evanston, Ill. . . . Because I prefer his music does not mean that I cannot enjoy any other program. I listen in on a host of others and thoroughly enjoy them.—Mrs. Parker, Salem, Ohio.

TEMPER

Its Cause and Cure

Outbursts Are Often Distorted Expressions of Beautiful, Native Qualities

By Miriam Finn Scott

Who broadcasts regularly over the NBC

UNDER the stress and strain of the varied responsibilities mothers have to meet during the day as wives, housekeepers and mothers, it is no wonder that the faults of children assume abnormal proportions—they irritate, offend and hurt us to the point of exasperation. Then we feel it our duty to punish them for their faults in order to bring them into a state of good behavior. We rarely stop to look into the cause of these faults. We punish blindly, harshly and often unjustly, instead of checking the child's faults.

With all due consideration for the overtired and exasperated mothers, as well as fathers, I want to state most emphatically that punishment administered in anger and in fury, does *not* help to check the child's faults. Such punishment often only serves as an outlet for the parent's own uncontrolled temper. To help a child correct his faults, we must, first of all, realize that the fault of a child may be only an unpleasant, twisted expression of powers that are beautiful, native; second, we must realize that the faults in our children are often reflections of our own conduct, habits and shortcomings.

The most common fault in children, and perhaps the least understood, is "temper". Parents have been driven to despair by this error in their children, and the children themselves have inflicted immeasurable misery on others because of it and have had their own usefulness crippled.

Ugly and painful as temper ordinarily is, the qualities which are behind it, if understood, controlled and directed wisely, are capable of contributing to the child's finest development. Behind the temper of a child may be vigorous physical energy, will-power, curiosity, initiative, concentration, imagination, emotional strength.

We must realize that the child who will cry vehemently for the fulfillment of a desire, has an absolute conviction of what he wants; that the child who will go through a violent fit of temper has physical energy, emotional strength, will-power and the power of concentration. The same child can use his emotional strength in expressing happiness as he can for expressing anger. He can direct these same splendid forces into constructive channels with the proper guidance. It is, therefore, the responsibility of mothers, fathers, teachers—all adults who are responsible for the first years of the child's development—to get hold of this crude, but precious element which manifests itself in temper, and make the greatest possible use of it.

TO PREVENT the development of temper there are two chief points to follow: first, we must begin with the child's earliest days, remove all possible causes of needless irritation. Temper, like every habit, good or bad, may take its start from an insignificant practice, and it becomes an established habit through repetition. Second, we must see to it that from the beginning of a child's life those energies which, when misunderstood and mishandled, result in temper, have opportunities for a free, happy and constructive development through play and occupations.

One chief cause for temper in a child's earliest years is the irregularity of physical habits and the inconsistency of treatment by the parents. The child who has not been given food at regular hours, who has not been encouraged to sit properly at table and to eat his food correctly, will, naturally, be apt to fuss at meal-time, and this will irritate the parents.

To avoid a temper at meal-time and all eating difficulties with your child, it is most important to remember that the child must be seated comfortably, either in his high chair, if he is under two years, with a support for his feet, or at a small table and a little chair that comfortably holds his body. The table could be painted or covered with oilcloth. makes it easy to keep it clea child's plate, drinking cup, fork an should be attractively placed befo

Give the food to the child in room, allowing him to feed himse can (it must be remembered that gets bored and tired by the mon movements of placing food i mouth). The mother must assist feeding him part of the time, extra spoon or fork ready for t pose.

If the child sometimes refuses remove the food at once. Skip meal or two will never hurt you

The mother who has been putt child to bed at a certain hour eve and who makes it a business to s the hour is religiously kept, an the trouble not to allow any events to happen just before rarely have a struggle or a st temper in getting the child to know a little girl of five who, w mother was entertaining several at tea one afternoon, came in the surprise of one of the guest "Mother, I came to say good ni time to go to bed," and kissed her and went out.

"How did you ever get Jane that?" asked the friend. The explained that there had been no d at all; Jane had started that way continued the habit.

AS a matter of fa just as easy and convenient in the household to have a definite which the child knows he is to go as it is to have irregular hours. are times, I realize, when friends tives call and remain for supper the evening; the child becomes in in the visitors and when his

it is often difficult to get the child without making him unhappy and g him to rebel. To avoid an out- of temper at such a time, an ence which is always humiliating, to the parents and the child, the on should be handled in one of ays: either occasionally to make an ion, to deliberately allow the child joy in full the half hour or hour d his regular bedtime. A privilege t sort given a child who is accus- l to going to bed regularly, will be red and is apt to stimulate in the a generous and thoughtful response request made by the mother. But exceptions can be of value only if are infrequent; otherwise the child assume that the exception can be the rule.

other way of handling this situation make clear to the child in advance e visit that you expect friends for r, but that you will expect the child to bed at the regular time; and in to make it easier for the child to w his regular program, it must be mbered that children, like ourselves, it difficult to give up what seems a and diverting experience.

YOU can prepare for him a surprise, an inexpensive game or which the child has expressed at some a desire to have. Fifteen minutes re bedtime you take the child to his , present him with the surprise and e he is absorbed in his new gift, you quickly get him ready for bed. With t of forethought for the child on ial occasions all conflicts will be ded. I want to make clear that this surprise for the child is *not* a bribe. s a *legitimate* new interest for the ose of diverting the child from an -exciting and over-stimulating expe- ce of being with adults.

ur own thoughtlessness in small things is often responsible for the bad tempers of our children before going to bed.

"Johnnie, it is time to go to bed." I heard a mother say to her little boy.

"I don't want to," returned the little boy.

"Johnnie, you must go to bed!" commanded the mother.

"I want to ride my cockhorse just once." whined Johnnie.

"You heard what I said, Johnnie."

"But I want to," Johnnie insisted.

"I say 'no'!"

"But I want to!" exploded Johnnie and stamped his foot.

"Just for one minute, then, Johnnie—only one, remember."

JOHNNIE pranced off for his cockhorse. The mother, in the meantime, became interested in something else and fifteen minutes passed instead of the *one* the mother had agreed Johnnie was to have on his cockhorse. By that time Johnnie was playing marbles, and his mother again told him it was time to go to bed. Again a struggle ensued, again the mother yielded, again Johnnie began another game, and it was one full hour before poor, tired Johnnie was finally carried off the scene, screaming, his legs frantically kicking.

"He is very bad, I have the hardest time getting him to go to bed," the worn mother exclaimed to me, with never a thought that her trouble was of her own making.

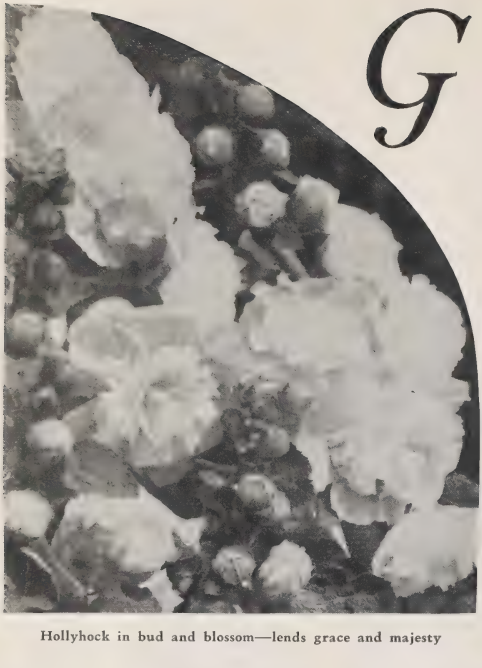
There is no recipe or formula for curing a temper which has become established, that will fit all children, but there are a few points which apply in *all* cases:

First, we must recognize that punishments such as scolding, shaming, spanking, have practically no curative effect. A child may yield at the moment through fear or pain, but most likely there is engendered in him a furious resentment which will later burst out in an even more deplorable manner.

Second, in handling a child's temper, the parent must be in perfect control of his own temper. He must be very kind.

Third, the parent should always make clear to the child that the penalty inflicted is the direct result of the child's temper—"I will not get dressed," Mary screamed—"I won't, I won't". "Very well," said her mother quietly, "I will give you ten minutes, if you are not ready we are not going to the circus." Mary was not ready and had an afternoon in which to learn that she herself was responsible for missing a joyous experience.

* * *



Mrs. Scott will give readers of RADIO DIGEST the benefit of her priceless experience. Write to Mrs. Scott, care of RADIO DIGEST, 420 Lexington Avenue, New York.

* * *

Good news for the children! Uncle Evans is out after a great story for you. He is finding out all about these wonderful Uncles and Aunts who come to you with their voices through the air and your Radio. Did you ever stop to think how important these Voices are? Do you know that many and many little boys and girls are alive today only because they listened to a Radio Uncle who warned them to beware of dangerous games and habits? We're hoping Uncle Ev will have it ready for you in your May RADIO DIGEST.—*Editor*

Gardening by Radio

Program on Planting Sets Shovels, Rakes and Hoes Agog

By

THE MASTER GARDENER

Every Thursday and Sunday The Master Gardener broadcasts helpful recommendations over the NBC on every phase of gardening. The Vigoro Programs are sponsored by Swift & Co. An interesting handbook on this subject may be obtained by writing to Dr. G. J. Raleigh, in care of RADIO DIGEST, *420 Lexington Avenue, New York City.*—EDITOR.

IF YOU follow the suggestions I have presented here, you will have lawns and gardens this year which will be real blessings in your lives. I believe that everyone's life has been influenced in some way by a garden. It may be the garden that we have today. It may be the garden that we tended so patiently a few years ago—before, perhaps, moving to the city. Or it may be the garden of one's childhood. Somewhere, though, back in your memory there stretches a wide, cool, green lawn, where flowers bloom, and all is very beautiful and reassuring.

Isn't it strange then that so many people build one of the most important parts of their homes without a plan? That is why I should like to emphasize the necessity of *having a plan* before you start to work making your garden. I want to suggest that you let no water roll under the bridge before you begin your plan.

Of course, you may already have a garden, and you may be quite satisfied with it. Yet all of us from year to year see how we can improve some small part of the garden area, at least, with little trouble.

At your first opportunity, then, this very day, if possible, give your imagination some play on this subject. Stand at the kitchen window and look out at the back yard. Stand at the front window and survey the front yard. Go out into the street and look at your property as a unit. That is think of the house and grounds together as *home* for that's what they really are, you know.

Then when you have a pretty complete picture in your mind of the whole place, proceed, in your imagination, to set out your trees and flowers and shrubs and vines just where you think they would look prettiest.

As a matter of fact, you will have even more success if you will make a rough diagram of the property.

Your property is your home. Every bit of earth in that home offers you an opportunity. You will be happier in that home, and healthier, and friends will admire it more, if you are careful to take advantage of every chance to improve it. Seize the advantage of every square foot of earth and make it beautiful.

Now for the design of your garden. Perhaps you want a formal garden with the plants arranged in such a way that they will have a definite proportion, a balance, symmetry. Obviously, you can't have such formality unless the area that you are landscaping has formal, straight lines, and has sufficient area or, enough land surface.

As a matter of fact, unless the area lends itself to formality, it's better to have an informal garden. Now, I don't mean to say that an informal garden is one that is haphazardly laid out. Just take a picture by some great artis doesn't resemble a leaf in its symm The figures or the objects pictured, formally arranged, but the picture tistic and beautiful. Very often t rangement of plants in an informal g requires much time and thought.

Now, of course, no matter whethe garden is formal or informal, you have a lawn! I feel that I can' phasize too much the advisability o ing a lawn that is beautiful—a backg for the other features. The grass be kept green and thickly matted. roots should go deep into the soi should be free of bare spots. The several reasons for this. In the place, you want your lawn to be yie soft, resistant to the playful fe children.

KEEP the lawn Don't let it present a conglomerati shapes and colors. By being kept it gives the impression of space, larg freedom to the home. By all means build small flower beds in the lawn. them at the border lines.

Let me say a word or two about v I'll agree with you . . . sometimes do somehow just ruin the looks of a and garden. But here's a suggestion if you make the walk of stepping st and let the grass grow up between can tone down the harshness of the curving walks are very nice, but too quently we see a large curve in a walk, and that looks a bit odd. Ju natural. Don't try to strain for be Keep your lawn and garden simple natural.

I'm going to risk a bold statement Too many of our homes have too trees. I'm one of the best friends

rees of this world have today. I oward a tree almost as I do toward an being. It has character, stabil- oise and beauty. Nevertheless, don't have *too many* trees. They are sary to proper landscaping. But if et too many of them they shade the plants. People like flowers too, and s and vines. It's a lot better to two or three trees for a small , trees properly placed . . . than to a lot of trees just growing up with gard for proportion.

w, a few words about shrubs. her your garden area is formal or nal, it will be advisable to enclose h shrubs. If you desire privacy . . . nost of us do . . . use shrubs of con- able size, and supplement these with er shrubs . . . presenting a banked When you put shrubs at the ex- ities of your property, you give your an air of expansiveness. Of course, os also screen your service drives your foundation plantings.

find that we Americans are not using as much as perhaps we should. Now, onally I like vines. I have noticed charmingly they soften the lines of use . . . how beautiful they are on ses . . . and how effectively they hide hose unsightly objects in our home erty which cannot be covered by an- r kind of plant. But I think the main on why I love vines is that they give ir of permanence, of age, maturity, nity to the houses where they grow. ve seen men build a new home, and t alongside the chimney a rapidly ving vine. In a very short time I seen that new home bearing the air ge . . . looking as if it had gained the lom of many years . . . looking as if ere a place where people did a great of living.

lere's where we come to a phase of tening that allows us the most latitude, gives us the most pleasure. It is growing of flowers. There are thou- ds of types of flowers that we can nt in our garden. If I started to dis- the different kinds that you could w successfully, many pages would be tten.

MAY I suggest very seri- ly that you do not plant your flowers beds in the lawn, but at the margins. int the taller growing varieties at the ck and the shorter in front. There many fine combinations. For in- nce . . . one of the tall varieties of snap dragon at the back, and in front them, light colored Petunia, and, if u wish, Sweet Alyssum in front of the tunias. Or put some California pop- ys in front of the taller pit Marigolds. ose are just suggestions. I do want say however, that there are some wers that are so outstandingly good at they ought to be in every garden . . . r example, the daffodil, tulip, gladiolis, lox, dahlia, zinnia and chrysanthemum.

And you don't want your garden to be all ablaze with beauty one month, and dying stalks and stems the next. Select the flowers carefully, with the view to having flowers in bloom every day during the growing season.

At the beginning of this article I emphasized the necessity of having plans for a new house before you let the contractor start building your house. I want to say now that if you were having a house built you would want to be sure that it was being made of good materials —materials that would not fall apart and let the roof drop on your heads. Of course you would. Well, then, if you are building a flower garden, you should be just as sure that you were making it out of good materials.

I REFER now not only to seeds, bulbs and plants, but also to the quality of the soil.

And what has that to do with the growth of a garden? Are plants made out of things in the soil? And my answer is that they emphatically are!

I wish I could walk out into your yard with you and take up in my hand a little heap of soil. If I could I might explain more clearly to you what I mean by what follows.

Suppose you were building a house. You would need lumber, mortar, bricks and other materials. So in the building of a plant, certain materials are absolutely essential.

A plant must have a certain amount of food substances—potash, phosphorus, nitrogen and several other elements. It must have every one of these essentials to sustain life. These are as vital to the plant as sunshine and air—as vital to the plant as food and water is to man in his daily life.

The soil is the plant's environment from which it derives its nutriment, and the importance of keeping the soil rich and healthy cannot be over-estimated in building a garden.

Healthy plants are important to the success of your garden. Garden! What a word it is! How much it means to us and what an influence it is in our lives. Is it asking too much of ourselves, therefore, to give it just a little time and thought to make it one of the byways of memory to visit in later years? For that is what a garden can be.

The beauty, symmetry and form of this garden are results of thoughtful planning and thorough care

Barbara Gould

Milady o

She Charms Ze American Gentleman—*BUT WHY?*

THE author has just returned from a trip to many of the important cities in Europe where she has opened her own beauty salons. Her long stay in Paris especially qualifies her to present authentic views on the beauty of Parisian women. Her weekly Radio talks over the Columbia Broadcasting System every Thursday morning have been a boon to feminine listeners.

ARE PARISIAN women lovelier than we are? That provocative question has been ringing in my ears ever since my return from Europe. As perhaps you remember, I went abroad early this year to open beauty salons in several European cities, Paris, London, Berlin, Budapest, Prague, Rome, and Milan. Of course on such a pilgrimage in the cause of beauty I glimpsed feminine loveliness triumphant under flags other than our own. Women all over the world are dreaming of lasting loveliness . . . and are achieving it, too!

I am now going to attempt to answer that impelling question, are Parisian women lovelier than American women?

Traditionally "comparisons are odious" . . . but I think and I feel sure that my readers agree with me that a thoughtful consideration of the comparative loveliness of the typical Parisian woman and the typical American woman cannot fail to yield beauty truths of value to each of us.

And even if it only led some of us to understand why French ladies fascinate our men—why they are such formidable rivals in romance——that would be some satisfaction.

But first of all, what is this "loveliness" we are talking of? It has been hinted by a philosopher to be "a gift of God," by a cynic, "a short-lived tyranny," by a person out of love "an ivory mischief." My own pet description of feminine loveliness is: a triumphant expression of a woman's personality.

So for me the moot question isn't, "Are Parisian women lovelier than we are?" but rather, "Are Parisian women more eloquently feminine than we are?"

My answer—well, let us consider for a moment the possible ways of expressing a woman's personality.

The voice is one of the important elements in creating an impression. French women learn early and never forget the innate loveliness of their language. Too often American women discount the music that is in our fine English language . . . and just talk. The magic of a truly feminine voice is decidedly one of the fascinations of the French woman—and the lovely charm of it should awaken us to an expression of loveliness.

Another signal mark of loveliness is graceful movement—walking, dancing, sitting. Nowhere in the world does one see such youthful, swift suppleness of figure as among American girls and women. Their bodies are beautifully built and trained, with just the merest hint of the primitive about them. American women are unrivalled in this claim to triumphant loveliness. I do not like even to mention the importance of "keeping the figure," for it goes without saying that the accumulation of excessive weight means farewell to loveliness.

THE decisive factor in a woman's appearance is her complexion. The American and French complexions differ to a great extent, but each has its individual attraction; the one so characteristically Anglo-Saxon in its fairness, and the so Gallic in its wonderful ivory Any comparison here would certain odious, that is if each achieves it beauty. French women have known this and practised it. Am women are becoming more and convinced, so that now both Frenc American women are agreed in co the youthful radiance of the comp as one of their most precious posse

THE proper care o skin is one of the first beauty dutie one which no wise woman neglects her iridescent teens through her tri ant forties. When I was in Paris o my salon there on the Boulevard du dent Wilson I was impressed by the fulness with which the French w consider their complexion lovelines hoped, then, that American women

Gay Paris

By Barbara Gould

The French way of enhancing beauty.

as faithful in giving proper care to
r natively fair and radiant skins,
since my return I have been encour-
d about it. Lasting complexion love-
ss is every woman's rightful glory.
t has been hinted more than once that
erican women are the best dressed
nen in the world, but it is undeniable
t the French are the most chic. Cer-
ly a French woman has a genius for
ring her clothes. The chic Parisienne
not hesitate to have her clothes
de to suit her *own* personality. She
ceeds better than most of us do—and
h less—because by a flick of a bow,
tilt of a hat, some little gay some-
ng, she interprets her own individual-
in terms of her costume.

ONE of the most precious
aracteristics of the typical American
man is her glorious individuality, and
rtainly it would be more than folly to
ggest that it is over-developed. We
ve grown to be as we are because our
untry has had the fine pioneering his-
y it had and because it continues to
w as it does today. In becoming just
at we are we have filled a great need of
r country and destiny. But in all
is we should cling to the fact that there
a great hint waiting for us over the sea
nong the French women. In regarding
rselves as individuals we must never
rget that to realize fully our worth as
dividuals we must remain true to our
herent femininity.

As I recall my impressions of actual
eauty among the charming French
omen I have met I realize more and
ore clearly that actual beauty of fea-
re is not more than a small part of the
pression of exquisiteness and magic
hich they create.

In the same manner I think of the
merican women whom I know so well,
nd here, too, there is a mysterious some-
hing that cannot be pinned down to any
pecial physical characteristic.

I try to compare the two and I feel
hat it is quite unimportant whether or not
he sum total of French noses is equal in
eauty to the sum total of American noses
. . and the same for mouths and eyes.

Not all American women are beauti-
ful. Neither are all French women beau-
tiful. But no French woman ever allowed unimportant or plain features, drab hair, or anything like that to discourage her in expressing her own particular share of loveliness, however small. We sometimes do! French women are unfailing in improving what should be enhanced, correcting or making unimportant what is less advantageous to their feminine charm.

If I should have to state candidly whether I think American women better looking than Parisian women I think that I would say "Yes, they are." But in the long run it is unimportant, because the aim of every wise woman in reaching the real exquisiteness that is her ideal is not to imitate her next-door neighbor, but to be just as lovely as she herself can be—to make everything about her tell its own story of just what her personality is like. The French woman carries her handkerchief in a way that is bewitching, because it's her own individual way. One woman can use make-up with exquisite effect and another can't because the first woman makes the powder and rouge melt into her natural appearance while the other imposes it on her face. One big difference between one woman's own loveliness and that of another is whether the one is more beauty-wise than the other. Certainly in all honesty the French women are more learned in the ways and rites of beauty than we are. If American women are to realize the full expressiveness of the beauty that is theirs . . . make it count gloriously in their lives, and the lives of others, they must emulate the French women and study how to individualize their own beauty even to the tiniest detail.

American women cherish their femininity, but French women insist upon theirs. I honestly think this difference in point of view is the beginning and the end of the idea that Parisian women are lovelier than we are. In the first place we seem to have schooled ourselves to expect a minimum of gallantry. We have won our equal footing with men in a hundred ways and sacrificed some of our feminine prerogatives in doing so. French women do not "sit on a cushion and sew a fine seam" any more than we do. But they still exact and receive all due homage to their femininity. And you must agree that men love to give it.

The typical American woman, concerned as she is with a thousand important interests—business, philanthropic, civic and otherwise—is the modern woman par excellence. But isn't she a little apt to let these things make her think that she is too busy to consider her femininity very seriously?

DON'T be afraid to be yourself. Don't, above all, follow like a sheep. If your hair is becoming one way don't wear it the way your favorite friend wears hers. It may not suit *you*.

Have the courage to express your own likes and dislikes in every single detail about you. And above all give yourself a good chance to be lovely looking. Get plenty of sleep. Eat wisely. And more than anything else in the world, be happy. Only a happy heart adds that inner something to your appearance which is really the most important thing about it. Let your expression tell a story of happiness and contentment.

Gallant Art of GAMBLING

Wise Risks—Not Foolish Speculations — are Essential to Success in Beauty, Home and Office

"Investing—or gambling, if you please, a few minutes each day is a step towards preserving beauty," declares Miss Ingram. Do this and become a Ruth Collette (above)—of Earl Carrol Vanities.

By

FRANCES INGRAM

Consultant on the Care of the Skin
Heard on NBC Tuesday Mo...

I BELIEVE in gambling. We're all gamblers more or less, you know. We gamble on success, we gamble on happiness, we gamble in one way or another every day of our lives. Our gambling is not with money—it is with something much more precious. We gamble on ourselves.

There should be more gambling of this sort in the world. Gambling, according to the dictionaries, is any transaction involving uncertainty. Sometimes we are too cowardly to risk uncertainty. Our courage is not sufficient to allow us to take a chance on a stake which means everything to us. Examples of this type of cowardice are all around us.

For instance; two highly paid business women of my acquaintance lost their positions last November when their company merged with another concern. The one girl gambled on herself. She took a chance. With some of her hard-earned savings she went to Bermuda for two weeks. When she came back, she was vibrant and rested. From her depleted savings, she purchased a new wardrobe. Then she started out serenely to find another position. She found one, too—and a better position than the one she had lost.

The other girl was afraid to gamble on herself, and after several weeks of frantic job hunting, she worried herself into a nervous collapse. She is one reason why I say sincerely—I believe in gambling.

Here's another reason: One of the most successful men in American industry is an inveterate gambler. His gambling, however, is not on Wall Street. It does involve money because his decisions effect the turnover of large sums, but his gambling is not directly financial. It is primarily a gamble on his judgment.

WHEN he has some very important decision to make, and it seems that an immediate settlement of the problem is vital, this executive goes away for a two-weeks' rest. He always returns with a clearer perspective. He gambles on these periodic vacations and the most important forward steps in his company's history are the result.

There is a form of gambling, of course, which is disastrous and which justly calls forth whole diatribes of oratory. Foolish speculation in the money, time, or beauty market come under this head. Wives who grow careless about ap... ance, about courtesy in th... mestic circle are gambling ... their own happiness and th... every member of their fam... No one condones this ty... gambling.

ON THE ... hand, there is another for ... gambling for wives which d... serves no opprobrious com... which involves fewer risks, ... is practised far too seldom. ... know wives who are too ... born to gamble with their ... bands for stakes which ... deliberately underestimate. ... husband wants to make a t... he needs a rest. He arrang... get away from his business. ... wants to gamble a few w... time against a fresh poin... view. But his wife is sure ... it is a reprehensible gamble. ... cannot get away. The h... cleaning must be done now ... cannot be postponed. The ... dren cannot be left at this time. T... are always reasons—indisputable rea... as far as the husband is concerned. ... wife refuses to take a chance for a ... most certain stake, but by her ref... she gambles away something else o... estimable value.

"Second wives" are seldom guilty ... such culpable conduct, and because ... are usually willing to do some justifi... gambling, they call down censure on t... heads from the wives who suffer f... martyr complexes. The "second w... may not consider orgies of house clea... and frantic flurries of preserving so ... to the happiness of the household as ... first wife did. Does "WOOF" convey nothing more to your benighted intelligence than the bark of a canine? Well, you're all wet, according to the latest dictionary of radio jargon compiled by Engineer Irving Reis of the Columbia technical staff. It means a signal to start a program or check the time.

And ON THE NOSE isn't a knockout blow, it's being on time at the close of a program within three seconds.

SOUP is neither vegetable nor nitroglycerine that the safe-crackers employ, it's electric current, fed to antennae. MOTOR-BOATING is not an aqua sport, it's allowing the volume level of a mike to fall below normal, which makes a "putt-putt-putt" noise.

HOP is not transatlantic, it's merely power supplied to mikes; HITS are non-scoring, they are just noises produced by the man up jarring the mike. DEAD MIKE isn't a cause for a wake, it's an unconnected microphone, while a HOT MIKE is one supplied with power.

O' LIVE THE POOR GIRL ALONE

Three Little Sachs, WABC:

First Sachs: Why is the first olive in a bottle like a kiss?

Second Sachs: I don't know, why?

First Sachs: Because the first one is hard to get. After that they come easy. —*Lyro G. Portridge, Spafford Lake, New Hampshire.*

EGGS-ACTLY RIGHT

Heard from WJR, Detroit:

"How do you tell a bad egg?"

"I don't tell a bad egg anything, but if I had to, I'd break it gently."—*E. M. Muma, 1007 N. Madison Ave., Bay City, Mich.*

"Boners" is a collection of school-boy examination paper mistakes which Clifton P. Fadiman, NBC book reporter, recently reviewed. Here are a few choice examples he culled:

"Solomon had 300 wives and 700 porcupines."

"A polygon is a dead parrot."

"In Christianity a man can have only one wife. This is called Monotony."

And this is reported by a school teacher friend of Indi's: "The dog ran down the street, emitting a series of whelps."

IT'S A LOT OF BUNK

Al and Pete:

Pete: Did you know Carnera has a bed seven feet long?

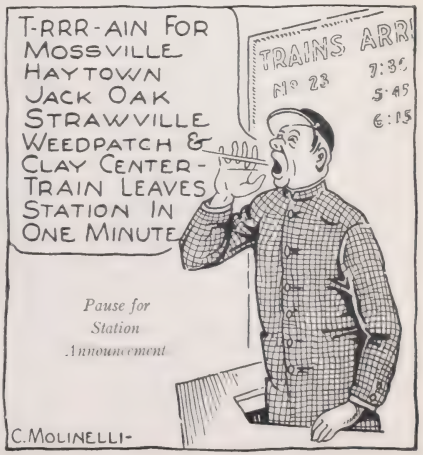
Al: That's just bunk, Pete.

Pete: Bunk! That's no joke—he really has a bed seven feet long. I wouldn't call that bunk.

Al: Well, it's a bigger bunk than the Singer Midgets have.—"*Fran,*" *Wayne, Neb.*

NOTHING TO SNEEZE AT

While listening to the Westinghouse pioneer station at Pittsburgh, I heard the following announcement, "This is KDk, KDku, KDku-choo!" Luckily, the announcer wasn't advertising cough-drops.—*Hugh Lineback, 1412 Mt. Olive, Siloam Springs, Ark.*



Here's a joke Indi heard yars and yars ago. But in its trip around the world it acquired a new ending. Do you like it with, or without, the last line.

Complaining woman (in a hotel): I can't sleep.

Room clerk: Why?

Woman: Somebody in the room above dropped a shoe on the floor and I'm waiting for him to take off the other.

Room Clerk: Don't wait. The man in the room above has only one leg.—*Valentine Sadowski, Buffalo, N. Y.*

IT'S A CRUEL WOILD

There's no sympathy for young love out in Iowa. For when authorities at WOI, broadcasting station of the State College at Ames, noticed a daily disturbance caused by a motorcycle passing the studio window at 12.30, they investigated. Sometimes the cyclist rode with cut-out wide open and engine at full roar, other times he would shut off the power, "punctuating" the motor's din.

Finally A. G. (Andy) Woolfries, announcer, discovered that the boy had a girl in a town about 100 miles away who listened in every day at noon. Full motor meant he had received a letter, "punctuated" motor meant he hadn't. Andy switched off the mike as he passed, and he eventually stopped! **Proving that all the world doesn't love a lover—if he insists on broadcasting it.**—*L. R. Combs, Iowa State College, Ames, Ia.*

WGY

Crawford: The Radio has certainly simplified many of the problems of our daily life.

Crabshaw: You bet it has. Look at the easy way it has given us to spell such a word as Schenectady.—*J. J. O'Connell, 15 Audubon Ave., New York.*

CALL TO ARMS

WWJ Early Birds:

Frank: Who wrote the greatest war song, Ernest?

Ernest: Mendelssohn—the wedding march.—*Ashley N. Chandler, 1943 Summit St., Toledo, Ohio.*

RADIOTIC PRATTLES

"Good evening, folks. This is the News Hour of the Idiotic Daily News." Get ready, please for time. It is exactly forty-seven minutes past seven, Eastern Standard Time. And remember there is no better time on the market than Eastern Standard. There are certain companies in the habit of giving the time at ten o'clock, and while we do not want to knock anyone, you can't make a mistake in using a nationally advertised time like Eastern Standard.

Reports from Russia, folks, are about the same. Our correspondent wires us: Took a walk the other day and asked a bearded peasant, "How far is it to Moscow?" "About twenty versts," he answered. "Twenty-first what?" we asked him, knowing the unutterable stupidity of the mujik. But we could get no reply, so had to spend the night in Tiflis. That, folks, concludes our little talk on today's news events, so good night all, this is IDN signing off."—*Fitzhugh Watson, Philadelphia, Pa.*

SLIPS THAT PASS THROUGH THE MIKE

COME AGAIN WHEN YOU CAN'T STAY SO LONG—WLW announcer bidding farewell to Ishn Jones: Mr. Jones, if ever you co again to Cincinnati, you may be s WLW will give you the air!—*Fr Sherman, 713 E. Markland Ave., komo, Ind.*

THIS LITTLE PIG WENT TO MIKE—On WHO, during the Mas Farmers' Convention, one man said himself: "I have a family of five gi and five boys. I myself am a h (slight pause) and cattle raiser."—*M Merrill Pregler, 1596 Auburn Dubuque, Ia.*

ALL THE LATEST INCONVENIENCES—"Have a Radio out in every room," said the Radio nouncer, "in order to assure yourself the greatest in convenience." (It's so bad in print—but oh! when vocalized).—*Leo. J. Jellison, 2506 Wi sor Ave., Dubuque, Ia.*

PETTING IN THE PARK

Gene Arnold: Have you been pinch yet in your new car, Bill?

Bill Childs: No, but I've be slapped!—*Mrs. W. S. McCauley, 4 N. Woods St., Sherman, Tex.*

William Braid White

The Enjoyment of Classical Music

Tschaikowsky as compared to Bolshevik—
"Incomprehensible Organizations of DIN"

A Monthly Feature By
WILLIAM BRAID WHITE
Doctor of Music

FINDING myself in New York recently, I decided to hear at first hand a performance of the Roxy Symphony Orchestra, reinforced two hundred players, at one of the ar concerts which Roxy has been giv- weekly for the benefit of unemployed sicians. The experience was very resting, and I shall use it here, for reasons. In the first place the pro- m for that day happened to include t of Schumann's famous concerto for no and orchestra, as well as the so- ed *"Pathetic" Symphony* of Tschai- vsky. The second of these is con- ntly, and the first sometimes, to be rd on the air from one or another of symphonic broadcasts, so that I feel re than ordinarily justified in making h of them in turn subjects of discus- n in this magazine. If I can help my ders thereby to take in these two great ces of highly organized music an in- est more living and more full of mean- for themselves than they would erwise be likely to acquire, I shall have omplished something worth while.

In the second place, my visit gave rise certain reflections upon the relation ween the production and the reproduc- n of music, and especially of music hly organized and developed, which I ppose to pass on to my readers.

Tschaikowsky and Suicide

Some thirty-seven years have passed ice Peter Ilyitch Tschaikowsky (I use e customary but incorrect French spell- g of the name) passed suddenly from e world during an epidemic of cholera St. Petersburg, as it was then called. e was only fifty-three and at the height his mental and emotional powers. The rcumstances of his death seem to have en somewhat peculiar, and undoubt- lly gave rise to a suspicion widely dis- minated, that he had committed sui- de. All that can be said here about the cts is that Tschaikowsky was a most ahappy man, that he suffered from a istressing malady of the soul, and that e died in circumstances which have never een completely explained.

The sudden death of Tschaikowsky ame only a few weeks after the first performance of this *Pathetic Symphony*, his sixth and last adventure in the symphonic form. It had been composed under circumstances unusually pleasant. It had scored a fair success at the first and had aroused genuine enthusiasm at the second, of its performances. The composer's outward circumstances were comparatively prosperous and his personal life more peaceful apparently than it had been for years. All the more surprising, therefore, was the astonishing appearance in this symphony of a final movement which is one long sigh of sorrow and one long groan of mental agony. I shall never forget my own introduction to this work, which began to become known in the United States only during the dawn of the twentieth century.

Wassili Safonoff, of Moscow, had been invited to come to New York to conduct some concerts for the Philharmonic Society and he chose for his début this very symphony. That season (1904) we had had a succession of eminent conductors, each taking one concert. Safonoff came towards the very end and made a tremendous hit with this Russian music, then so new, so striking and so fitted to the mood of the day. The extraordinary finale of Tschaikowsky's *Pathetic Symphony* was meat and drink to us young men and women, and we almost, so to speak, wallowed in it.

Even today it still has magic to stir the pulses and to make the blood run both hot and cold. The professional musical connoisseurs sneer at it now as outmoded, preferring to invite our attention to incomprehensible organizations of din by contemporary Bolshevik composers. These, we are assured, are now the only genuine article. Happily, those of us who still prefer music which has some perceptible form and some noticeable melodic structure still find Tschaikowsky very much to our taste.

Tschaikowsky wrote six symphonies, as well as one of the best of violin concertos, two piano concertos, of which one is universally known and liked, some overtures, piano pieces and songs, some operas (of which one, *Eugene Onegin*, has had great success), a lovely string quartet, a magnificent trio for piano, violin and 'cello, and the delightful ballet suite "Casse-Noisette" or the Nutcracker. His music is Russian, but it is not eccentric. He always said that his hero was Mozart, and he had all the great Wolfgang's ability to write lovely melody. Although he lived during the European ascendancy of Wagner and of Brahms, neither of these giants in any way influenced him. His music stands for himself alone. He combines, as I have said, great ability to invent lovely melodies, with a still greater power over the resources of the modern orchestra and the piano.

Tone Color

Tschaikowsky had a wonderful ear for tone color and knew how to make use of every instrumental voice, in combinations that never cease to thrill the listening ear Not even Wagner can make the orchestra more lusciously sweet or so gorgeous in array of color. What Tschaikowsky can do with some violins, some contrabasses, a couple of clarinets, an oboe and a bassoon is astonishing. I hope that all my readers who are making a practice of listening to orchestral music on the air will accustom themselves to distinguishing the various tones characteristic of the different instruments.

The pungency of the strings, the smoothness of the brass, the noble openness of the clarinet and the dark silkiness of the bassoon, the bitter-sweetness of the oboe and the pealing martial call of the trumpet, are all so many pigments, so to speak, lying side by side on the palette of colors which the creative musician has at his disposal, just as the painter can spread upon his palette one after another all th tints of the spectrum, afterwards to be combined by him into a thousand and one varying, shifting, lovely shades. The musician can do with tones for the ear what

Dr. White will answer readers' inquiries on musical questions in his columns. Address him in care of RADIO DIGEST, *420 Lexington Avenue, New York.*

the painter can do with colors for the eye.

Let an oboe sing a tune by itself. We recognize the bitter sweet characteristic quality of its sound. Let a clarinet now join in and at once we have another tint or quality of sound, caused by the mixture of the two characteristic tone qualities. Add to these a group of violins and again the tone-color takes on another hue. A composer who is very skilful in, and sensitive to, the shifting of these tone-colorations can do wonders with an orchestra. No master surpasses, and few have equalled, the Russian, Tschaikowsky, in his command of orchestral tone-color.

I suppose it is hardly necessary to remind the reader that the term "tone-color" is really rather misleading. The word "color" is borrowed from the world of the eye, and only by analogy can it be applied to the world of the ear. Nevertheless what is meant can easily be explained. When one says that one piano has a beautiful tone and another one is tinny or harsh, one is referring to the "quality" or "character" of the sounds, as distinguished from the pitch or loudness of each one. When one observes the smoothness of sound produced by the clarinet or the French horn, and compares it with the sharp peal of the trumpet or the long-drawn-out sob of the violin, one is dealing with the same property. Every musical instrument has its own quality of sound, which distinguishes each of its tones from the same tone produced on another instrument. The same is true of voices.

Why "Pathetic"?

To get however to our symphony. The name "Pathetic" was given to it by Tschaikowsky's brother and biographer, Modest, who says that on the morning after the first performance he came down to breakfast to find Peter Ilyitch already at the tea urn with the score of the symphony on the table before him. Some conversation then took place, in the course of which Modest, the brother, asked whether it were proposed to append a special title to the new work, which already seemed to be the most important his brother had composed. Peter Ilyitch replied that he had intended to call it simply "Program Symphony" thereby implying of course that it had a program or meaning but that the hearer must guess this for himself. Modest objected to this and proposed as an alternative the title *Pathetic Symphony.* To this Peter Ilyitch assented. There and then the new title was written on the score.

It might be well, however, to point out that the word "pathetic" really means that which pertains to or expresses suffering. It is commonly used to mean that which excites sympathy. The first meaning is undoubtedly correct in the present case.

The Finale is certainly gloomy, but it is far more than just that. One may properly call it a magnificent lament, almost a funeral march; but the death it mourns is not of any mortal man. It is the death of hope, the death of belief, the death of aspiration. Granted that, to one generation which has gone through the World War and to another which does not even know that there was a pre-war world, the pathos may seem to be forced, and here and there artificial. Still, even if one entirely ignores any suggestion of meaning or program, the finale is glorious music. Tschaikowsky never wrote more genuinely moving strains than he gives to the violins at their entrance, in the middle of the movement, with the noble melody of the second theme. The climaxes he builds up are genuine, too, and the whole working-out is masterly.

I grant that a mind wholly unable to see anything in music save bare sound may wonder what commentary like this is all about; but I am not writing for those who can find in music merely an expensive form of noise. Let them listen to Senator Borah or to that Episkopos Oikomenikos at Zion City, Illinois, who

Ernest Hutcheson, concert pianist who has appeared on Columbia Concert programs.

manages at one and the same time to use Radio and to believe that the earth is flat.

Schumann's Lovely Concerto

Schumann's piano concerto was played extremely well by that veteran artist Carl Friedburg, with the masterful assistance of Mr. Erno Rapee and his very large orchestra. A concerto, as I have previously explained, is a "small-size symphony," with a solo part for some instrument written into it. It is intended to give to masters of that instrument opportunities to show their virtuosity. No one ever wrote a better piece of work in this genre than did Schumann. Neither orchestra nor piano is supreme. The empire of sound is shared between them. The earlier clas[sic] concertos were sometimes no more [than] brilliant solo pieces with a guitarish [ac]companiment. The later ones ten[d] bury the solo instrument in the orche[stral] mass, until one can hardly distinguis[h] Schumann draws the line neatly bet[ween] the two extremes. The themes, n[ot] over, are melodious and charming, [the] working out is satisfactorily clear and [the] composer allows both parties to the [...] a fair chance to display themselves. [It] is splendid music, and I hope that it [will] often be repeated for the Radio audi[ence].

Something to Think Abou[t]

You all know that Roxy started [the] series of symphony concerts with an [or]chestra of double the usual size, and [the] tickets selling at a flat rate of one do[llar] for the benefit of unemployed musici[ans] in New York. There are, unhappily, s[till] thousands of these men out of wor[k] the metropolis alone. The sound-pic[ture] must carry the responsibility for the [loss] to which so many of these skilled ar[tists] have come. The musician cannot [help] himself in face of conditions like t[hose] which now confront him. We live [in a] mechanical age. Its machinery has [pre]tended to the reproduction of music[al] so large a scale that, to the comme[rcial] interests engaged in the entertainm[ent] business, it has appeared quite feasible [to] organize a system of distributing this re-production in such a way as to elimi[nate] the need for flesh-and-blood musician[s in] moving picture theatres everywhere.

In fact, as the technical state of the reproducing systems becomes more [and] more nearly perfect, it is certain that [the] state of affairs will be intensified, until so far as any one can now see, the pro[fes]sional performance of music will be [con]fined to (1) the groups who play in [the] picture studios, (2) those other gro[ups] which are furnishing music for broadcast[ing] (3) the players in the dozen or [so] great symphony orchestras maintained in as many great cities and (4) the s[mall] body of eminent artists who can dr[aw] large audiences by their own supreme [skill] and genius.

Now probably, most of my readers have never thought of this; but if they will think for a moment they will see [that] here we have a state of affairs not at all healthy. Music is a living art, which demands for its growth a large organization of composers, performers, [and] teachers. Music lives only when it is performed. If the demand for performing musicians suddenly dwindles in [this] manner I predict disaster.

I shall return to this very important question in later articles. For I can assure you that something is going to be done about it. Meanwhile let me close on a word of praise for Mr. Erno Rapee, conductor of the Roxy Symphony Orchestra. He is a capable and masterly musician who does wonders under conditions not very easy for any one.

The Pipes *of* Pan

Turning over a Few Wet Ones for a Slight Sizzle in the Warming Oven—the Big Name Bubble—Better Morning Programs

By GEORGE D. LOTTMAN

AS EARLY as January, when this department made its debut before readers of RADIO DIGEST, we discussed the "cutting-in", practiced by so many prominent orstra directors from Coast to Coast.

Ve offered to organize a Society for Prevention of Cruelty to Radio Fans, se chief function it would be to curtail indiscriminate choice of songs by ba--wielders, a choice influenced, more n than not, by the fact that many of n were receiving "cut-ins" in the shape 'courtesy royalties" on the songs they gged incessantly, regardless of their it or their pertinence to the general sentation.

Ve started something. Soon after this cle appeared, Merlin H. Aylesworth, sident of the National Broadcasting , wrote us to say that that mammoth anization planned to do everything it sibly could to prohibit duplication. "I roughly agree with you in regard to the icy of overdoing music by repetition," letter concluded.

A prominent music publisher, one of three foremost in the industry, took the subject at a meeting of the Mu- Publishers' Protective Association, ich subsequently decided to take imdiate action to stamp out the evil. The erican Society of Composers, Authors Publishers is appointing a committee investigate the situation, and things are inning to hum.

We discussed the matter recently with n G. Paine, Chairman of the Board of Music Publishers' Protective Associan. Mr. Paine was emphatic in his deciation of the evil, and promised that rything in his power and that of his anization would be done to eradicate it. "We are glad to note that RADIO DIGEST s taken up the cudgels," he declared. he mediocre programs that one hears often these days can be directly atbuted to the fact that, in most cases, ders are being paid in various forms to omote inferior numbers. Naturally, iters like Irving Berlin, Jerome Kern, alter Donaldson and George Gershwin n't be parties to such illegitimacy, and their product is neglected in favor of mmonplace songs, in which musical dictors have an 'interest'."

Mr. Paine added that if an amicable lution among the publishers proved imssible, he would appeal to the Federal rade Commission to help him stamp out a condition that he characterized as "an unfair method of competition."

We are glad that the condition is receiving official notice, and that it apparently is headed for an early demise. Once the "cut-in" practice has been exiled to oblivion, the Radio will be a more enjoyable means of entertainment than it has been for some time past.

* * *

IT IS a relief to note that Radio stations are paying more attention to their morning programs, which have, previously, been so sadly neglected.

Commercial accounts were never educated as to the value of the time before noon, and the poor housewife, as a result, had to listen to sustaining programs which were often without merit.

Of late, however, advertising agencies have begun to realize that the morning period can be used most advantageously. The woman of the house is sure of being in, and, in most cases, can be found in a receptive mood at that time of day. Her shopping hasn't commenced, and the preparation for the evening meal is her sole objective. What better time to persuade her of the merits of this baking powder, or that canned soup?

We are glad that advertisers are permitting themselves to be sold morning periods. Maybe soon it will be possible to tune in any time at all and get entertainment.

* * *

THE incongruity of many Radio programs offered by commercial sponsors could be eliminated with a little ingenuity. Although the nature of the program does not have to be in keeping with the merchandise that is being exploited, there could be a semblance of harmony to indicate that a little thought had been used by the program planners.

To this writer there is an absurd aspect to a program of classical masterpieces interspersed with announcements that Messrs. Bach, Beethoven, Wagner and Handel are coming to you under the auspices of the makers of a canned soup, vacuum sweeper or cough drop. It may be appropriate for a railroad or a serious publication of some sort to offer the "heavier" type of program, but it's a giggle to hear Mozart by the courtesy of "the makers of Monarch Lolli-pops—they melt in your mouth."

Periods advertising women's wear and such could advantageously embroider their presentation with music of Victor Herbert, suggestive of lace, frills, swishing silk and color. Cigar folk, virile and masculine, using the Radio could offer he-man themes,—lusty baritone solos like *Road to Mandalay*, and the like.

There doesn't have to be a set routine or immutable order, but it wouldn't hurt to use the old noodle at times.

* * *

IT'S no secret that a certain famous theatrical star, recently engaged for a large round sum to make weekly appearances before the microphone in behalf of a familiar product, has unfortunately failed to fully "click."

Although a popular favorite, this artist minus his visibility, can't seem to register his real personality over the ether, to the amazement of a million admirers.

Are the sponsors worried? Do they regard their heavy investment in this star as a loss? Not a bit of it!

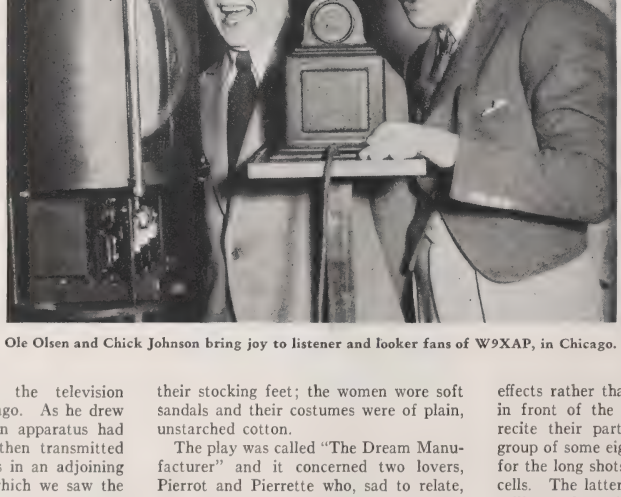
An important official of the company, speaking recently to the writer, to the latter's great astonishment, said in effect:

"We had a hunch he wouldn't register when we signed him. But we knew he'd get listeners. Regardless of what happened subsequently, we were confident that we'd get a vaster audience with this star than if we had engaged a dozen others whose talents were finer."

So THAT'S it, is it? Tricked is what we've all been, Radio devotees. Again it's a case of "names" versus talent. Once more art bows to advertising, and entertainment is sacrificed on the altar of promotion.

All of which has been one of our "pet" plaints for many moons. Millions tune in breathlessly to "catch" a program, to discover they've been hooked by a tempting morsel of bait. Until talent and performance are given recognition, commercial air programs will be so-so.

And here's a thought in concluding. Just WHO is being fooled? It is this meek scrivener's humble belief that a repeatedly disappointed public, measured in millions, must inevitably react most unfavorably toward the product whose sponsors have become P. T. Barnums, instead of level-headed business people



Scientific Progress

By Howard Edgar Rhodes, Technical Editor

Television in Chicago

WE settled ourselves in a comfortable chair, our guide pressed a switch, and we found ourselves in darkness except for a square patch of pale pink light that glowed like a bit of ghostly ectoplasm through an opening in the opposite wall of the room. We watched. The image of a hand appeared in the square of light. The hand held a pencil and as we sat with our eyes glued on that ethereal bit of light the hand began to sketch a picture with bold, firm strokes. The drawing completed, the hand disappeared from the screen and in its place came a man's face. The lips moved, we heard his voice, as he told us that he had just drawn the picture on a sheet of paper placed in front of the television transmitter located in the television studio of W9XAP, Chicago. As he drew the picture the television apparatus had scanned the scene and then transmitted and reproduced it for us in an adjoining room. The screen on which we saw the image was about a foot square, the light was sufficiently brilliant to enable one to look at it for a long time without straining the eyes, and the detail in the picture sufficiently good to recognize the sketch as a likeness of Lincoln and later to recognize the artist after having seen his face on the television screen. We were, we admit, well impressed by the demonstration.

Not so very long ago a short play written especially for television was transmitted over the television system of W9XAP and the broadcasting station WMAQ, so that those with both television receivers and broadcast receivers saw and heard the actors and actresses in the play. During the play every effort was made to eliminate extraneous noise. The strings of the piano were muffled. To prevent noise from creaking shoe leather the men played in their stocking feet; the women wore soft sandals and their costumes were of plain, unstarched cotton.

Ole Olsen and Chick Johnson bring joy to listener and looker fans of W9XAP, in Chicago.

The play was called "The Dream Manufacturer" and it concerned two lovers, Pierrot and Pierrette who, sad to relate, were about to drift apart when the manufacturer of dreams finds them and brings them together again, to live (we suppose) happily ever after. Undoubtedly the closing scene (we didn't see the play) showed them, Pierrot and Pierrette, in blissful embrace.

MAKE-UP, so important in the movies, is just as important in television. Davis Factor, the son of Max Factor, who is the big gun among the make-up artists out on the lots of Hollywood, experimented with various effects. To date best results have been obtained by using a thick coating of grease paint on the face, with eyebrows and mouth outlined in brownish red. Seen in person the players with all their make-up in place look like some Holloween apparition; with the make-up a hen-pecked husband could recognize his wife.

But of more interest than the subject of the play was what we might call the stage technique. By means of a special arrangement of lenses in the transmitter and by the use of several groups of photo-electric cells, it was possible to obtain both close-ups or long shots, like in the movies. First the group of three players might be televised, then a close-up would show just the girl as she spoke her lines, then a switch to a close-up of the man and so forth. A further effort was made to add interest to the program by such effects rather than to just sit the players in front of the photocells and let them recite their parts. For the close-ups a group of some eight small cells were used, for the long shots there are two enormous cells. The latter are suspended from the ceiling and can be swung to any position in the room.

The demonstration we witnessed was especially impressive in three ways. First we were impressed by the brilliancy of the image, for the light was sufficiently strong to make the picture easy to look at; the light source for this demonstration was a neon tube producing a very strong pink point of light. The neon tube used in the ordinary home television receiver consists of a glowing plate about one and one-half inches square, but the light from the glowing plate being not very strong in the first place and since the process of scanning causes only a small portion of the plate to

of the Radio Arts

Owners of Television and Radio Sets in Chicago Hear and See Actors in Specially Written Skits

visible at any one time the image, in the linary home television receiver, is quite ll and looked at for any length of time quite tiring on the eyes. With the point irce type of neon tube, all of the light m the tube is available for each point the picture and, as a result, the image very much brighter. The point source e of tube has the disadvantage, how-r, that it requires the use of many lenses the scanning disc, which makes the cost such a television receiver so great as to ke it impractical for ordinary home use. so the present types of tubes require a nparatively large amount of power and ngerously high voltages for their opera-n. But we understand that new tubes this type have been developed that re-ire much less power to operate them and ey may finally be improved to the point ere they can be adapted to the ordinary me television receiver.

The second point which impressed us s the detail of the image. In considering e detail in a television image we must lize that the picture is composed of any small spots, the tensity of illumina-on of each spot rresponding to the nount of light re-cted from a given ot on the subject ing televised. The reater the number spots into which e picture is divided e greater the detail; is for the same ason that reproduc-ons of photographs this magazine are better quality than ould be reproduc-ons of the same hotographs in a ewspaper. Many ore dots of ink are sed to reproduce a hotograph in this agazine than are sed to reproduce a notograph in a news-aper. The picture hich we viewed at 'OXAP was divided vertically into some forty-five parts and divided horizontally into about one hundred parts and so, in effect, the image on the screen of the television receiver was reproduced by some five thousand spots of light. Since the system was arranged to transmit fifteen pictures per second, about seventy-five thousand distinct signals were picked up by the photo-cell every second, converted into electrical energy, transmitted through the system and reproduced at the receiver.

SEATED some ten or fifteen feet from the screen, as we were during the demonstration, the reproduction appeared to the eye to be somewhat better on the large screen than did the one and one-half inch image which we saw later in the small home television receiver. The apparently better detail on the large screen was due, probably, to the fact that the brilliancy and size of the image made it easier and more interesting to look at.

The third point that interested us was the absence of "flicker." Many readers will recall the early motion pictures and the horrible manner in which they flickered. Many television images flicker in just the same manner, but the image we saw at W9XAP was unusually steady. This is due, we are told, to a system of scanning which breaks up each picture into three parts so that the eye gets the impression that there are many more pictures being transmitted than is actually the case. Flicker is especially annoying because of the eye strain it produces.

The television receiver we have described was designed solely for demonstration purposes. The receivers being sold in the Chicago area for ordinary home reception use the regular small square neon tube that produces pictures about one inch square. The home receiver (and also the demonstration receiver) is synchronized by the use of a motor (known to engineers as a synchronous motor) which can only operate at one definite speed. To start the motor a handle on the front of the receiver is given a twist, after which it automatically turns at exactly the proper speed. There is nothing new about this motor or its use, for it has been utilized in television receivers at various times during the past few years. It has the advantage of simplicity and the disadvantage that when it is used it is necessary that both the transmitter and receiver be supplied with power from the same power company. It cannot be used with good results when the transmitter, located in one town, is supplied with power from one company, and the receiver, located in another town, is supplied with power from another company. But there are

(*Cont. on page 107*)

Presentation of a play over television station W9XAP synchronized with WMAQ, bringing to fans the visual Radio while simultaneous broadcasting furnishes the words. Irene Wicker, Vinton Haworth and Douglas Hope are the performers. Mr. Haworth is staging such shows regularly for sight and sound fans.

Broadcastor Oil

(*Continued from page 47*)

National Cavaliers, a quartette of four singers. He is also their coach and arranger. In fact he does everything for them except their washing. Wirges dissipated an otherwise normal mind on growing hairs. A pitiful example of social ambition, he spent hours raising a Tom Thumb moustache, hours that could have been more profitably spent in practicing demented seventh and prostate ninth chords on which he was particularly weak, as who of us isn't. He wanted a set of lip-feathers like Groucho Marx, but they turned out more in the Michael Arlen manner. So he compromised and tried to wax it like Adolphe Menjou. But ah my friends, note how such an obsession wreaks havoc with Art and stifles creative endeavor. (Neat phrase that.) Wirges got to twirling his moustache so that the wax came off on his fingers, and when he tried to play the piano his fingers slid all over the keys. His friends, thinking he was playing passages from the Niebelungen Ring, would invariably get up and go.

I am glad to say that Wirges now wears his moustache dry.

As the stout lady said to the size 16 pajamas, this sort of thing can't go on.

In conclusion I want to say that I am five feet seven and one half inches tall, with blue eyes, curly hair and a slight impediment in either foot. If notified, find owner. Last seen stepping into an elevator on the thirteenth floor of 711 Fifth Avenue, and boy what a good time we had that night. Dorothy wouldn't speak to me for three days—don't say anything to Charlie.

Radiographs

(*Continued from page 59*)

tists. Then he broadcasts from his night club on Monday, Thursday, and Saturday.

Downey is married to Barbara Bennett, the film actress, and daughter of Richard Bennett. How he met his father-in-law is one of the tenor's best stories. He had been married about a year, but had never met his wife's father. One night he was singing at the Palace Theatre, when in the middle of his song there walked on the stage a distinguished looking gentleman.

Said the intruding gentleman, "Do you know who I am?"

"No," said Downey, half way between anger and amazement.

"Well," said the gentleman, "I'll tell you. I'm your father-in-law."

The audience had a good laugh over the unusual introduction, but Morton Downey hustled his parent-in-law off the the stage, saying it was his act and not Bennett's.

Downey is another singer who tried everything else first. He has sold phonograph records. He has sold insurance, or tried to. He has sold newspapers on railroad trains. He has run a little donkey engine in pursuit of freight cars. He says he failed at all these jobs, that there was nothing else to do but sing. His chance came when Paul Whiteman heard him singing in a restaurant and engaged him to appear with his orchestra, and from then on he has been a most popular entertainer both in this country and in Europe.

Downey has opened night clubs in Berlin, Paris, and London. He has sung comedy songs at a White House dir

Last Chance to Vote For Your Favorite Station in Popularity Contest.

See page 5 for Story . . . Here are Rules and Conditions

1. The contest started with the issue of RADIO DIGEST for October, 1930, and ends at midnight, April 20, 1931. All mail enclosing ballots must bear the postmark on or before midnight, April 20, 1931.

2. Balloting by means of coupons appearing in each monthly issue of RADIO DIGEST and by special ballots issued only when requested at the time of receipt of paid in advance mail subscriptions to RADIO DIGEST when received direct and not through subscription agencies according to the schedule given in paragraph four.

3. When sent singly each coupon clipped from the regular monthly issue of RADIO DIGEST counts for one vote. BONUS votes given in accordance with the following schedule:

For each two consecutively numbered coupons sent in at one time a bonus of five votes will be allowed.

For each three consecutively numbered coupons, a bonus of fifteen votes will be allowed.

For each four consecutively numbered coupons, a bonus of twenty-five votes will be allowed.

For each five consecutively numbered coupons, a bonus of thirty-five votes will be allowed.

For each six consecutively numbered coupons, a bonus of fifty votes will be allowed.

For each seven consecutively numbered coupons, a bonus of seventy-five votes will be allowed.

4. Special ballots will be issued only when requested at the time of receipt of paid in advance mail subscriptions, old or new, to the RADIO DIGEST when received direct and not through subscription agencies according to the following voting schedule:

1-year paid in advance mail subscription direct..	$3.00	150 votes
2-year; two 1-year paid in advance mail subscriptions direct.....	6.00	325 votes
3-year; three 1-year; one 1 and one 2-year paid in advance mail subscriptions direct.	9.00	500 votes
4-year; four 1-year; two 2-year; one 3-year and one 1-year; paid in advance mail subscriptions direct.	12.00	750 votes
5-year; five 1-year; one 2-year, and one 3-year; two 2-year and one 1-year; one 4-year and one 1-year; paid in advance mail subscriptions direct.....	15.00	1,000 votes
10-year; ten 1-year; five 2-year; three 3-year and one 1-year; two 4-year and one 2 or two 1-year; two 5-year paid in advance mail subscriptions direct.	$30.00	2,500 votes

5. For the purposes of the contest the United States has been divided into 48 districts, comprised of the 48 states of the Union.

6. The station located within the borders of each State receiving the highest number of votes cast by individuals residing within the same State will be declared the Champion Station of that State, and will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the second largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the third largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the fourth largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

7. In the event of a tie for any of the prizes offered, prizes of identical value will be given to each tying contestant.

8. Any question that may arise during the contest will be decided by the Contest Editor, and his decision will be final.

il publicity. Number sixteen is more or ss neutral. He is Don Bernard, NBC roduction man in charge of Empire uilders and other programs. As such he ets little publicity, so speaks impartially hen he says:

"The type of work one does should overn the policy. Romanticists should eep their audience in the dark. Singers f old-time ballads might gain by letting eir fans know of their marriage. It epends on the air role."

There are two more neutrals—Adele 'asa and Paul Tremaine, both of the 'BS network.

"Miss" Vasa, whose glorious soprano heard regularly on many programs, akes the stand that the general public not particularly interested usually hether the Radio singer is married or ot. She admits, however, that on concert tours it might be advantageous to et the public believe the artist is heart nd fancy free, and holds that a musiomedy star is dearer to her audience hen envisoned as a "happy bachelor naiden." Adele, notwithstanding, having been only recently married, wants the hole wide world to know that she has ound her "ideal man" and is "just gorgeously happy".

And Tremaine, the band leader, unmarried, says that if his orchestra can present an enjoyable program, it's all that is ecessary, and whether the listeners know is matrimonial status or not doesn't make a bit of difference one way or the other.

There you have it. Now, after you've ead what the stars think about your—he public's—reaction, sit down and write letter to "Mr. Editor," of RADIO DIGEST elling just what you think about it yourelf. I'm sure he'll publish the most interesting letters just to set the loud peaker favorites right—if they are wrong.

Marcella

(*Continued from page 62*)

Lindhe of WFAA, we thank you for the picture of these worthies.

* * *

FRANK KNIGHT received his Radio tutelage from Edward B. Husing and the late John Daniel, both of whom persuaded him off the legitimate stage and actually pushed him into Radio. He was born in St. John's, Newfoundland, May 19th, 1894, the son of the best known barrister and solicitor in that country. Graduated from St. Bonaventure's College and picked up some business training in the Canadian Bank of Commerce. War interfered and after that tried his hand at medicine at McGill University, Montreal. But the call of the stage was loud and alluring and he followed its beckoning tones —until Edward B. came on the scene and showed him the booming opportunities in Radio. And here he is now on CBS.

ONE could write volumes on the unusual dramas which life has played with Radio artists. There is Alma Wall, for instance—born with a diamond-studded spoon in her mouth and a background of ancestors that anyone would be proud of —earning her living through recitation of her own poems in a New York station. She is the lineal niece of Chief Justice John Marshall of Virginia and is related to Thomas Jefferson.

* * *

ANDRE BAROUCH deserted his palette for the microphone. He was born in Paris, August 20, 1906 and educated in the Beaux Arts School. He came to America some thirteen years ago and here he pursued his studies of art. At the N. Y. division of the National Academy of Art he won a scholarship which took him to Paris. When he returned to these shores some months ago he placed his application with the CBS. He came for a position as a pianist, but while filling out the application he wrote "announcer" instead. After the rgular round of auditions, confabs and interviews, he was accepted. He speaks several languages.

* * *

MR. AND Mrs. Morton Harvey—known otherwise as The Rolling Stone and Aunt Betty—have severed connections with Radio Station WBBZ of Ponca City, Okla. Does some station need this good act? Mrs. Wm. A. R. of Warm Springs, Ga. writes, "Please tell us about Dot and Dick." "They are the only truly young married couple," says Mrs. McConnell, Jr. of WMAZ, "who live their everyday experiences before the mike as though they were in their own home. Dot and Dick write their own skits out of a varied married experience that stretches back ten years. That's why they can give their listeners little human dramas that provoke genuine laughter and —sometimes a sympathetic tear." Edna Woodward wants to know who is 'Lizabeth Ann. Martin Campbell, Assistant Manager of WHAS, Louisville, and by the way I expect to get a picture of him for this column one of these days, says that 'Lizabeth until recently was a child impersonator at that station. She recently married, and left Louisville to make her home in Greensboro, N. C. where she hopes to continue her Radio work. I'll have some private correspondence with your secretary, Mr. Campbell and see if I can't wheedle a picture from her.

* * *

MARCELLA hears all, tells all. Write her a letter, ask her any of the burning questions that are bothering your mind. Information is her middle name.

SAVE

EACH ISSUE OF RADIO DIGEST

Binders

are now available for readers of Radio Digest. Each binder will hold six copies. Through the purchase of a large quantity we are able to provide these binders at the very low price of

$1.00

Note: Volumes of the new Radio Digest—October, November, December, 1930, and January, February and March, 1931 issues—will be supplied in these binders on order accompanied by remittance of $2.00

Make certain of obtaining your Binder or the five issues of the new Radio Digest in a special binder by placing your order without delay. To save time, utilize the coupon.

RADIO DIGEST,
420 Lexington Ave.,
New York, N. Y.

In order to keep a file of Radio Digests for my future reference please send me at once the items checked [X] below:

Binder .....$1.00 ☐
Binder with October, November, December, 1930, and January, February and March, 1931 Radio Digests .....2.00 ☐
Enclosed find (check or money order) for $ ..... in payment for same.

Chain Calendar Feature

The heavy response from readers to our questionnaire indicates a need for Chain Calendar Features. As program changes occur frequently after press date, slight inaccuracies may appear here and there. In regard to the headings of Eastern, Central, Mountain and Pacific Time, readers are doubtless familiar with the division of time used by favorite stations. For location of station, see index to network kilocycles on page 96.

eatures

)0 p.m.—WABC—Mr. and Mrs. Graybar. ı know just who they are because you e seen people just like them. Homey ma with a laugh and a tear.

30 p.m.—WABC—Paramount Publix Ra- Playhouse. A variety program offering. rton Downey, Jesse Crawford, Marie ard, William Haines and a screen chat by ry Madison.

15 p.m.—WABC—Richie Craig, Jr. Blue bon Malt Jester. A time to be mighty eful what with buttons flying in all di- tions.

30 p.m.—WEAF—Rapid Transit tches of Metropolitan life with appro- ite background of jazz music. (See HROUGHOUT THE WEEK"—Chain endar.)

Wednesday

0 p.m.—WJZ—Gloria Gay's Affairs. A dern girl's affaires de coeur—tender, ro- ntic and—impetuous—but they always t as per. (Sponsor—Katterman & Mit- ell.)

0 p.m.—WEAF—Bobby Jones. Golf mp leaves links long enough for net- rk chat on cherished game. Good chance corner golfer to learn some good licks. ambert Pharmacal Company.)

5 p.m.—WEAF—Radiotron Varieties. ugs" Baer as sparkling toastmaster—the ce with the schoolgirl complexion. Sup- rted by splendid cast. (See "THROUGH- JT THE WEEK"—Chain Calendar.)

0 p.m.—WABC—Sunkist Musical Cock- l. Direct from Golden State. Los An- es yields Raymond Paige's orchestra, Hal- ujah Quartet. Vocal Chorus and Sundry nkist Soloists.

0 p.m.—WEAF—Palmolive Hour. Fa- rite songs and melodies conveyed by ive Palmer, Elizabeth Lennox, Paul Oli- r and the Revelers; Messrs. James, Mel- n, Shaw and Glenn. Orchestra under di- ction of Gustave Haenschen.

30 p.m.—WEAF—Coca Cola Program. fers exceptional opportunity to get inside pe on sports from celebrities themselves— th Grantland Rice as hostmaster.

Selected by the Editors

To provide you with the outstanding features for each day of the week the RADIO DIGEST *program editor has selected the programs indicated as Blue Ribbon. Do you agree with her selections? (For stations taking the programs, see adjoining list.)*

Thursday

8:00 p.m.—WEAF—Rudy Vallee—Idol and despair of feminine listeners. Voice brings up pictures of plumed knights, fair ladies, moonlight—romance! (A Fleischmann presentation.)

8:45 p.m.—WABC—Hamilton Watchman. When a minute counts for eternity. Palpitating dramalettes to tune of timepiece vibrations.

9:30 p.m.—WJZ—Maxwell House Ensemble. Good program—good music—good orchestra directed by Don Voorhees.

Friday

8:00 p.m.—WEAF—Cities Service Concert with lovely Jessica Dragonette, Cavaliers Quartet and orchestra led by Rosario Bourdon.

8:30 p.m.—WABC—Dutch Masters. Attractive program—wide range of variety—good songs and music. Lillian Taiz, Nelson Eddy and Jack Smart.

8:45 p.m.—WJZ—Arthur Murray—Natural Bridge Dancing Class. Lessons in modern Terpsichorean art.

9:30 p.m.—WJZ—Irvin Cobb presents side-splitting satire on silly art. Assisted by mixed chorus and orchestra. (**Chez** Armour.)

10:30 p.m.—WEAF—RKO Theatre of the Air—a scintillating hour with stars from stage, vaudeville, pictures and ether.

Saturday

8:00 p.m.—WEAF—Webster Program. Good old Weber and Field team provides hearty laughs with fresh supply of humor. Not a bit rusty.

8:30 p.m.—WABC—Alexander Woollcott. Fine opportunity to learn correct pronunciation of words you never looked up. Be surprised! And a barrel of fun.

9:00 p.m.—WEAF—Floyd Gibbons on the General Electric Hour. Symphony Orchestra under baton of Walter Damrosch—Floyd Gibbons takes you for jaunt to the "House of Magic."

Tuneful Topics

(*Continued from page 65*)

ten by an Italian and a dyed-in-the-wool Yankee. Edgar Leslie is the Yankee, and Harry Warren is the young Italian, whose songs have put him up among the top-notchers of Tin Pan Alley.

The song has appeared at an opportune time, and the thought is entirely different. Warren has done an excellent job on the melody, and there is no reason why the song should not become a fair-sized hit. One of its advantages is that it may be played strictly up to tempo without losing any of its lyrical or melodic value, which is unfortunately not the case in the majority of songs published today; therefore the bands that play all tunes at a bright tempo cannot injure the qualities of this one.

We play it at about fifty measures a minute, and it is published by the Robbins Music Corp.

Love Is My Master

"THE Old Maestro," as Ben Bernie enjoys being called, has picked this song for a hit, and it is the darling of his heart at the present time. A visitor to the College Inn will hear the song three or four times during the course of the evening, and the rich Irish quality of Pat Kennedy's voice invariably will make the diner prick up his or her ears as the song is being sung and played by Ben Bernie's band. It was written by two Chicago boys, Walter Hirsch, and Frank Magine, both of whom are really great song writers. Magine I have known for some time; he it was who wrote the melody of *Baby, Oh Where Can You Be,* and many other fine songs. Hirsch is a comparatively newcomer, even to Chicago, but is doing such fine work that his recognition has been quick and sure.

The song has a delightful change of key right in the middle of it, and although there is a slight possibility of a resemblance to *Body and Soul,* the song is all the more beautiful for the resemblance. I was going to introduce it on the last half hour of our Fleischmann hour, when the line trouble ended our efforts for the evening.

On that particular evening I was Ben's guest at the College Inn, and I cannot recall when I have had a more delightful evening in that capacity. I am happy to know that I made many friends there; I had the pleasure of meeting Rod La Rocque and his very beautiful wife, Vilma Banky. Many were the celebrities present, and everyone took a turn at doing something; we carried on until 5:30 in the morning. A night long to be remembered.

Love Is My Master should be played at about forty-five measures a minute, and is published by the Remick Music Corp.

You're Never Too Old to Go Back to Mother's Knee

BENEE RUSSELL, who seems to have a flair for winning prize song competitions, which he evidenced in his winning of at least two competitions which have given him trips abroad, has written this number very beautiful and commercial. His first was *Song Without a Name,* which the reader probably knows well, and has enjoyed many times over the air. His second song with the same firm of Leo Feist is to be published by them shortly.

This song, which is written in waltz time, is one which he played for me at the Brooklyn Paramount some four or five months ago, and which I emphatically suggested that he have published at once. I was glad to give a warm recommendation to any publisher who felt such a song would be welcome in his catalogue.

As its title implies, it is a typical "mother" song, but the treatment of the subject, and the melody, are extremely well done, and I only wish that I could hear Henry Burr sing this in the same way that he sang that beautiful "M-o-t-h-er" about fifteen years ago.

I am introducing it on the Fleischmann Hour this coming Thursday, and I think by the time this article appears the song will be well on its way to popularity. It is published by DeSylva, Brown & Henderson.

I'm So Afraid Of You

THE TWO writers of the quickest hit of the past few years, *Three Little Words,* Bert Kalmar and Harry Ruby, have given us what they term in Tin Pan Alley a "follow-up" song, meaning a song they hope follows the sensational hit in which they have exulted. Rarely does the second song really follow-up the first. Walter Donaldson's *You're Driving Me Crazy* is the best example of a follow-up song. In fact, to my mind it is an even greater song than *Little White Lies,* though evidently the public does not agree with me, in that *Crazy* will not reach the peak of sales that *Little White Lies* did though there may be something in the fact that *Crazy* has come out during the worst period of depression in music buying.

I'm So Afraid Of You is in certain respects just as simple in its notations as *Three Little Words.* The notes are all either quarters or halves, as were the notes of *Three Little Words.* The range is extremely simple, and it is a song that grows on one. My first reaction was one of apathy, but I have grown to enjoy its rendition above that of many other songs. In fact, I am pleased to give it a prominent place in this list of the first

It may be played brightly, which I said before, something in its favor. play it at about forty-five measu minute. It is published by Harms,

King's Horses

SOME of the old veterans of Tin Alley, especially the publishers bemoaning the fact that novelty are no longer in demand. Many of t in a certain way, blame me for th parent general trend of the public t appreciation and buying of the love lad type of song.

Time was when such songs as *Ban Speech, Wobbally Walk, Wooden Sol I'm Wild About Automobile Horns,* so on *ad infinitum,* were extremely lar and sold into the hundreds of sands. The *Stein Song* may be call renaissance of popularity of novelty s as it is really just that. Although it written in 6/8 time, and was a so march, it was really a novelty being neither—strictly collegiate, ing, military, or what have you. T fore it is surprising that one of the popular songs on the air is the *K Horses and the King's Men.* It wended its way over from England, v I suppose its writing was inspired b annual Lord Mayor's Parade in Lo It was my pleasure during my ye London at the Savoy Hotel, to witnes annual feature, which is a parad pomp and splendor, as the Lord M wends his way down through the st of London, although I am not very just what the reason of the functio

The song was written about the K horses themselves, the beauty of trappings, and it attempts to make see the parade in all its glory. It s impossible for me to mention the without referring to Ben Bernie, and I be accused of favoritism, I must again explain that Ben's band has the means for me to see the desig features of most of the songs I discu this issue.

He has made a Columbia record of *King's Horses,* which, for a make recording, as it really was, is a Very often we who record are force record a song with no rehearsal or sp arrangement of it, just a mere slap together of the verse and the chorus, a few impromptu and extemporan ideas therein. Sometimes these rec turn out to be our finest. The *Stein Song* was one of these. In fact, I hav little time for rehearsing that nearly our recordings have been very, very promptu. Ben and his men certa made an extremely clever record in *King's Horses,* Ben affecting the

d English accent which most English ple I met over there did not have. y seconded by a vocal chorus by all men in the band, he shows himself e extremely versatile in making this rd.

hil Spitalny's band does a great job t, with various men in the band tak- choruses in their own particular style way. Although I received the orches- ion from London several months ago re it was published in America, it re- ned for the Chicago bands to show the cleverness of the piece. Unfor- ately four and five shows a day at the amount give me so little time to re- rse and to get the meat out of various gs sent me, that sometimes I must wait il other bands play them for me.

he song should be played brightly, al- st like a march, although it is written 4/4 time; it is published by Leo Feist.

Dream A Little Dream Of Me

HIS is one of the purest examples of a song which, on its own melodic ue, arrested my attention. During the rse of the evening after my five ws, I visited Johnny Hamp at the Con- ss Hotel in the delightful Balloon om with the myriads of lights going and off, the beautiful room in black vet against the red glow of these ts. Johnny's band is down at the l, in their very smart attire which is nny's own conception of how an or- estra should be dressed.

As we were talking the band played a lody so fascinating that I asked Johnny name, but he is so rarely on the stand it he himself did not know its name. being told its name I realized how ich I was missing by being out of New rk on tour. New York unquestion- ly is the music publishing center, and bands there are fortunate in being le to get tunes the minute they come the press, and then are way ahead of her bands throughout the country in ing able to play them first.

The melody writers are newcomers to e, the lyric writer being the most fa- ous writer of lyrics in the entire music ofession, namely Gus Kahn. I doubt yone would care to vie with him for is particular honor. Gus makes little no claim to melody writing, although am not so sure that he wouldn't do ually well in that sphere, but as a lyric iter he is second to none, and is the ghest paid lyric writer in the profes- on.

Although, as I say, the melodic value the song was such that it captured my ncy, Gus has done a beautiful job with e lyrics, and the entire thought of the hole song. Personally I think it is one the most danceable songs I have ever eard.

We would play it brightly, at about rty measures a minute. It is published y Davis, Coots & Engle. All indications oint to a big run.

Little Joe

DURING my visit as the guest of the evening at the Edgewater Beach Hotel, at which Phil Spitalny and his Chicago orchestra are featured, the rendition several times throughout the evening of a very clever song led me to believe that it was going to be a very popular dance tune. Unfortunately its melodic key changes are so intricate that I doubt if it will ever fascinate the little girl who sits at the piano and plays from the sheet copy. Like *Body and Soul* it is bewildering in its sudden key changes, but it is going to be a great record song, and one that will be extremely popular to those who listen to Radio and so forth. In fact, I may be surprised by a big sheet sale; one can never accurately predict what the piano-playing lovers of popular music will buy.

I was very happy to meet, that night, Phil's pianist, who is the composer of the melody of the song, namely Jules Stein. He is a very clever pianist, and if *Little Joe* is any indication of his writing ability he is going to produce some great songs!

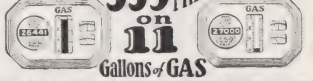
Ted Miller, another Chicago boy, is responsible for the very clever lyrics. For the song he has taken the idea of *Mighty Lak A Rose*, and put it into a fox trot, naming the little rose, Joe. The song is the story of the love of a colored Mammy for her little pickaninny, regardless of what the rest of the world thinks of him. Phil has a banjo player who rendered the song so excellently that I instantly qualified it as one of my "Tuneful Topics."

The song should be played fairly brightly, at about forty measures a minute. It has a pretty high range, though people who sing high will have no difficulty in rendering it. It is published by Irving Berlin, Inc.

When the Silver Moon Is Shining O'er the Hills of Dear Old Maine

HERE is a song whose history is somewhat akin to that of the *Stein Song* As a very young boy I can remember the singers who used to sing with slides in our local movie theatre, singing a song about the silvery moon shining o'er the hills of dear old Maine. The song, very much like the *Stein Song*, has stuck in my memory over a period of almost fifteen years. It is a melody that has been used in many songs. The layman may be surprised when I say that unintentionally, or intentionally, certain strains of melodies have been used in sometimes as many as twenty songs, and *there is no such thing as a really original song*, because if one cares to take the trouble and go back through the list of songs written over the past twenty-five years, nearly a counterpart, or a similar melody will be found somewhere, or at least parts of it will resemble the new song.

When I first heard *When The Organ Played At Twilight* I thought for a moment that it was *Silvery Moon*. There have been several other songs that have recalled this song to me. In the middle of the song is introduced the old, familiar strain *Where Is My Wandering Boy Tonight*, and those professional musicians who are wont to scorn the hilly-billy, and what we term "corny," type of song, would lift their noses up contemptuously at this one, but it is a song that the masses would probably enjoy hearing because it is down to bed-rock simplicity, and its melody is extremely catchy.



A resident of Portland, Maine, a city six miles from my home town, wrote it some fifteen years ago. Although he does not pretend to be a professional song writer, he has written several songs.

As in the case of the *Stein Song*, I have revised the song considerably, to make it just a bit more palatable for the public of today, and I am curious to see whether people of other states will enjoy hearing about the silv'ry moon of my own state. It is a waltz, and is going to be published by Leo Feist, Inc.

Walking My Baby Back Home

ROY TURK and Fred Ahlert crash through again with one of the most danceable tunes of the season. You re-

Over the Mountains from Los Angeles 559 Miles on 11 Gallons of GAS

Think of it! FIVE HUNDRED FIFTY-NINE MILES over rough mountainous country burning only ELEVEN GALLONS OF GASOLINE. Imagine more than FIFTY MILES TO THE GALLON! That is what the WHIRLWIND CARBURETING DEVICE does for D. R. Gilbert, enough of a saving on just one trip to more than pay the cost of the Whirlwind.

THE WHIRLWIND SAVES MOTORISTS MILLIONS OF DOLLARS YEARLY

Whirlwind users, reporting the results of their tests, are amazed at the results they are getting. Letters keep streaming into the office telling of mileages all the way from 22 to 59 miles on a gallon, resulting in a saving of from 25% to 50% in gas bills alone.

Mark A. Estes writes: "I was making 17 miles to the gallon on my Pontiac Coupe. Today with the Whirlwind, I am making 35 1-10 miles to the gallon."

P. P. Goerzen writes: "24 6-10 miles with the Whirlwind, or a gain of 21 miles to the gallon."

R. J. Tulp: "The Whirlwind increased the mileage on our Ford truck from 12 to 20 miles to gallon and 25% in speed."

Car owners all over the world are saving money every day with the Whirlwind, besides having better operating motors. Think what this means to your own car. Figure up your savings—enough for a radio—a bank account—added pleasures. Why let the Oil Companies profit by your waste? Find out about this amazing little device that will pay for itself every few weeks.

FITS ALL CARS In just a few minutes the Whirlwind can be installed on any make of car truck or tractor. It's actually less work than changing your oil or putting water in the battery. No drilling, tapping or changes of any kind necessary. It is guaranteed to work perfectly on any make of car, truck or tractor, large or small, new model or old model. The more you drive the more you will save.

SALESMEN AND DISTRIBUTORS WANTED
To Make Up to $100.00 a Week and More

Whirlwind men are making big profits supplying this fast selling device that car owners cannot afford to be without. Good territory is still open. Free sample offer to our workers. Full particulars sent on request. Just check the coupon.

GUARANTEE No matter what kind of a car you have—no matter how big a gas eater it is—the Whirlwind will save you money. We absolutely guarantee that the Whirlwind will make, than save its cost in gasoline alone within thirty days, or the trial will cost you nothing. We invite you to test it at our risk and expense. You are to be the sole judge.

FREE OFFER COUPON

WHIRLWIND MFG. CO.
Dept. 3164, Station C, Milwaukee, Wis.
Gentlemen: You may send me full particulars of your Whirlwind Carbureting device and free trial offer. This does not obligate me in any way whatever.

member, they are the boys who wr *I'll Get By, Mean to Me*, and whose fi tune when they arrived back from M. G. M. studios where they had b writing, was *We're Friends Again.*

They played *this* tune for me in back of the Villa Vallée one night, its possibilities were apparent to me once. In my review of *We're Frie Again* I laid stress on Roy Turk's t dency to write slangy lyrics. Roy wri in the wisecracking—Winchell—Bro way—Times Square sort of vein, and though I flatter myself that I can do t type of song full justice, as critics I did in my recording of *St. Louis Blu* or *How Come You Do Me Like You Do, Do?*, in this particular instance felt that I would feel uncomfortable singing the song.

Rhythmically the piece has few equ for a stimulus to dancing and tapping feet. It makes a fine rhythmic contr on our Radio programs, and the crow love to sing it with the organ, when it played in organ fests. I am happy to these boys crash through with anot hit, because they are two of the fin song writers in the profession.

We play the tune at about forty m sures a minute, and it is published DeSylva, Brown, & Henderson.

Don't Shoot! Snap!

(*Continued from page 11*)

with his head pointing precisely in o direction. He got up on his little hi legs and with his little brown nose swi ing excitedly in the breeze just for moment; he dropped down and start racing back to break up little "Apr Strings'" tea party just as fast as could. Even stranger, he had not co ered more than half the distance wh Mrs. Murphy and "Apron Strings" we on their feet and then on their hind l looking in our direction. They cou not smell us but somehow "Little Roug neck" managed to tell them all about for by the time he was almost to th the old lady started for the alder thick just as fast as she could go.

I have never in my own mind be able to make a satisfactory explanati and while I don't propose to say th Mrs. Murphy had gathered her t youngsters beside her before they l the home den and told them terrible be time stories about their one great enem man, I am inclined to accept this as explanation until someone gives me better one. All in all, bears are by f the most fascinating wild creatures th it has ever been my good fortune meet and again I repeat, I am not pro but sorry of the fact that I have kill any of their species.

The Minister Who Doesn't Preach

(*Continued from page 25*)

er, made with these men impressed I believe, more than anything else npressed him throughout his life. an sense it in his speech and action

There's a simplicity, sincerity nmistakable directness about him. m sure that this Bowery experience he reason why, years later, when is preaching at the First Presby- church, here in New York City, ened up a personal contact bureau. id learned that New York—outside e Bowery perhaps—did not lend to human contacts, and he knew human contacts were vital to him were to do his job well. For Dr. ck, at all times, must be mid- n in the current of life. He can- reach to a congregation of people he knows the problems confront- hem and, multiplied numerically, urse, the problems that confront us. And that brings me to the way rks today.

s in his office in Riverside Church ht-thirty every morning. He works ut interruption, until noon. The ngs are his own. He never makes ntments during the forenoon. He s those three and a half hours for g and study and thus he is work- directly or indirectly on a sermon. luncheon he usually lectures, sev- lays a week, at the Union Theolog- Seminary. Other afternoons, how- are devoted to personal conferences all kinds and types of people on nal problems. These are the con- ces that bring him his richest re- —his understanding of life.

r rest and relaxation he likes to read walk and occasionally play golf. He's derate smoker—one cigar a day is th. He's married and has two daugh- –both students at Smith College, his favorite reading, I should have you, is biography. His residence ound the corner from the church.

cannot deliver a sermon on an act theme. He has to have some ion or problem of life, and he tries terpret it in terms of the individ- He doesn't try to be oratorical or ent. He thinks the ideal of preach- is animated conversation.

e favorite story of his family—that ory concerning him—has to do with cident at his first parish, which was Montclair, New Jersey. There was iderable discussion of Dr. Fosdick e home of one of his parishioners finally an old colored woman, work- for this family, expressed a desire ear the preaching of this man that yone in the house was talking about. mistress said, "Well, why don't you o church and hear him?"

, off to church went the old colored an and, oh yes, bear in mind what I told you at the outset about Dr. Fosdick's most distinguishing physical characteristic—his shock of curly, wavy hair. Well, when the colored woman returned after the services, her mistress asked her what she thought of Dr. Fosdick, and this was her reply:

"Fo' de lawd, ma'am, his very hair do declare him to be a man of Gawd!"

But those of you who know him, and know his work, can go far beyond that description. I wonder just what it is that makes him great; for he is great, I think. Is it because he knows life? Is it because he can interpret it so honestly to the rest of us? Is it because of the quality of sincerity in his voice and the fact of its existence in his soul? One could answer all of these questions in the affirmative, but that would not be the entire story. You have to go deeper.

He has, I believe, one outstanding quality and that is, the power to give. He gives of himself. There's a steady stream of persons—men and women—to that little reception room on the eighteenth floor of the Riverside Church.

And these troubled wayfarers find in him a receptiveness to hear them—to hear their stories and, having told them, they are conscious of a receptiveness within themselves to hear him. And that's when he gives! He gives, out of himself, all that he has to help others. And that, I am sure, is his greatness.

Are American Women Happy?

(*Continued from page 16*)

before he joined D. W. Griffith's company in Hollywood. It was when his interest turned to the writing of scenarios that he was introduced to Anita Loos and they entered upon their famous writing partnership which led to marriage.

Miss Loos attributes courtesy and respect for each other's opinion as a personal recipe for her happy marriage.

"If husband and wife would treat each other with the same courtesy and consideration as they do to strangers", she said, "it would pay them greater rewards and give their marriage a better chance of enduring. The necessity for living in small apartments these days, causes them to get on each other's nerves very quickly. They lose respect for each other's privacy and before you know it, they become rude to each other. They say things which they don't mean, but which nevertheless draw them further apart.

"If husband and wife would insist upon courtesy from each other right from the early days of marriage, it would help tremendously to smooth the course of their matrimonial bark."

* * *

Do you agree with Miss Loos that American women are unhappy? Read what Cosmo Hamilton, famous playwright and author, has to say about it in the next issue of RADIO DIGEST.

High-Hatting Hollywood

(*Continued from page 46*)

Martan arrived just a moment ahead of Jack Benny, who was to be master of ceremonies.

The minutes sped past. It seemed that the hour of nine o'clock, like a living, conscious thing, was sweeping upon us. Finally a warning "Two minutes!" was shouted from the cage. There was a bustle of last minute activity. Like sailors at a life boat drill everyone hurried to his post. "Thirty seconds!"

Thirty seconds and we would be on the air! You'd think the Kentucky Derby were about to start. Everyone was tense . . . Charlie King, Blanche Sweet, Jack Benny and all of them, from the boy with 'phones clasped over his ears and with his arm upraised ready to give the signal from the cage above, to the world prominent stars themselves. Sam Wineland, with his baton raised above his head, kept his eyes glued on the boy at the table. The moment was fascinating.

Suddenly the boy's arm jerked. Sam Wineland's baton came down with it, as the orchestra broke into the pulse-quickening strains of the Metro-GoldwynMayer "signature song". The spell was broken. We were on the air.

The orchestra swung into a fast jazz number. A moment later the doorkeeper opened the stage door quietly to admit a diminutive young lady in a smart tan sports suit. It was Bessie Love, big as . . . or, to express it more aptly, little as . . . life. She was accompanied by her husband, the popular young business man, Charlie Hawks.

The pair tiptoed across to the broadcasting set, smiling greetings to numerous friends. But the jazz music was too much for Bessie. She retired behind the huge screen and went through some dance steps the like of which never graced screen or ballroom.

Later in the hour Charlie King was singing one of the famous songs from *Broadway Melody*, assisted by the orchestra and chorus.

There is a gripping fascination to these "movie" programs that is individual and entirely unlike anything else on the air.

But that is enough of this program. When we had gone off the air the entire group, even the few of us who were non-participants, relaxed with a sigh that showed the tension we had been under and of which we had scarcely been conscious.

What has all this talk about the Hollywood sound stages and the studios to do with the Radio program? It unquestionably is a vital part of the broadcast . . . perhaps solely through the romantic appeal of hearing something direct from Hollywood. There is magic in the name.

Puppy Love

(*Continued from page 49*)

has happened to his playmate and relative.

He misses Lobo during the play hours in Central Park; he misses him in the country, for then Lobo used to jump over high fences and bark a challenge to the younger dog, as if to say, "Let's see you do that." And he misses the harmless bites and nips Lobo used to torment him with at their home. Professional jealousy never crept in.

Only once did Moore resent the presence of Lobo. A couple of years ago, more or less, Moore was courting a college co-ed in sunny California and Lobo became jealous of his master's a tions. The girl became equally an Lobo's impudence; he would dec and it is the one instance of disobe —to leave his master while he was ing with the girl.

When Lobo's death was anno tributes came from far and wide, the Radio audience, friends and rities. Murray Roth, vitaphone p tion man; Miss Eva Clark, operat prano, and Rudy Vallee, all consolatory messages. Moore say he received some 500 telegrams ar ters.

Moore himself was so grief-st that members of the orchestra wer pressed to keep the ball rolling. master preferred a quiet, solemn f for Lobo, a funeral that did not witness the playing of a single Lobo's orchestra. So Lobo was in a New York dog cemetery—an there is a movement on foot to p fitting marker over his grave.

He was a famed dog, second o Rin-Tin-Tin in the eyes of the Am public. Had he not amused many —to say nothing of frustrating do cats—by his barks over the air played the roles of an Eskimo mal and a bloodhound, and, furtherm is a fact that he won the favor President of France and American bassador Walter Edge in Paris. A was photographed in several movie

When Lobo won the favor of the dent of France he saved a delicat ment for Horace Heidt and his C nians. The scene was the stage fashionable Parisian theater, the was up. But the orchestra was not and a superimposed platform was veniently small. For a moment con reigned in the hearts of the orc members, all men with college educ but Lobo, with the mind of a ch nine, stepped forward and bowe wagged his tail. The French like and Lobo had saved the moment.

There was nothing Lobo liked than a good big bone. Likewise ished raw meat, and it was that led to his death. Lobo and Lo were both fed raw meat one Th night and Lobo II immediately to but recovered in a few hours. Lo not become ill until the following

During that night and up to th Monday morning, when he finally six veterinarians were in atten Lobo suffered four hemorrhages failed to sleep during the length illness.

Nick Kenny, a New York Radio and columnist, wrote a little ver titled *The Empty Chair*, at the ti Lobo's death. In conclusion, he

"But if there's a dog's heaven
Up there in the skies,
We know good old Lobo is the

No, Moore did not have any ance on Lobo.

MICROPHONE SNAPSHOTS FROM WESTINGHOUSE RADIO STATIONS

MEET THE APEX TRAVELERS

Scene—KDKA Studios. Time: 7:45 P. M. Saturday. A moment of hushed suspense . . . a signal from the control board . . . and the Apex Travelers swing into the lively opening measures of "Sleepy Town Express."

In thousands of homes, north, south, east and west, radio listeners settle into their chairs with a special thrill of satisfaction. Younger members of the family, connoisseurs of lilting rhythm, nod approvingly. Shoulders and restless feet follow the eager tempo . . . it's almost impossible to keep still when the Apex Travelers get going.

Whether it's the latest Broadway melody, an old folk-song, or a haunting "blues" interpretation, there's something about the Apex Travelers you can't resist.

And the Apex Travelers from KDKA are characteristic of Westinghouse Radio Station programs. They are a part of that "studio personality" that brings thousands and thousands of radio dial indicators around to 980, 990, or 1020 kilocycles day after day.

Listeners say, "There's always a good program from Westinghouse Radio Stations."

As an outcome of listeners' interest, advertisers report, "Westinghouse Radio Stations bring results."

Thompkins Corners

(*Continued from page 19*)

MATT: He ain't a tramp, Bill. There's somethin' fine about his mind. He can do us some good, if we'll listen to him.

BILL: Well, I'll hurry along and git everybody out.

And Thompkins Corners forthwith is a-hum with telephone calls, door bell buzzing, street corner confabs in preparation for a scintillating session with Shakespeare. The whole town is in a fervor of artistic uplift under the ministering hands of Mr. Worthington Mitchel.

Mr. Mitchel, revived and invigorated by food and drink, deplores the fact that his wardrobe is missing. But Matt is undismayed as he says:

MATT: That's all right. I've got a Sunday frock coat you can use, along with a shirt and some studs for the occasion.

MITCHEL: Ideal. Just the thing for an informal reading. I shall do my utmost to make the excerpts wholly understandable.

MARTHA: You men go ahead and I'll get things straightened up here.

MATT: Come on, Mr. Mitchel. We'll get ready for the show.

MITCHEL: Lead the way, mine host. Once more doth Worthington Mitchel tread the boards for the multitude.

(*Band is heard in distance*)

MARTHA: Heavens, Mr. Jones. Here comes the Firemen's band. I wonder how they're managin' without all the instruments playin'.

MRS. JONES: Sometimes I think, my dear, that there is nothing our menfolk can't do.

(*Crowd enters*)

MRS. STEVENS: Say, Marthy, what on earth has Matt Thompkins dug up now?

WATTS: Well, Bessie, maybe he's goin' to exhibit one of the family skeletons.

MRS. STEVENS: When I picked up the receiver and heard that telephone operator, I rushed right over.

MRS. JONES: I understand Mr. Thompkins has a Shakespearean reader as guest of the evening. I wish I had brought my unabridged edition as reference. Oh, I do hope he reads nothing from Othello.

MRS. WATTS: Oh, is that what we're here for? Good 'eavens, that's the most excitin' thing that's happened to me fer a long time. Readin' from Shakespeare! Oh, I'm all a-flutter.

MATT: Now, folks, if you'll all get yourself a seat—wherever it's most comfortable for you, we'll go ahead with a little treat we got tonight. First of all, I want the band to play a fanfare to announce somebody who's comin' in from the parlor. All right, boys . . .

MITCHEL: Why, Mayor Thompkins, this is overwhelming.

MATT: Folks, that fanfare was in honor of our guest here who's got a little surprise for us tonight. I was goin' to save it till tomorrow night, but our guest has to be off to another city by mornin' and I thought we could listen right here and get just as much good out of it as anywhere else, providin' we all listen. Our friend is a distinguished Shakespearean actor and he will read us some of the speeches from his plays . . . that is, Shakespeare's plays.

(*Applause*)

MITCHEL: Kind friends, your tribute is appreciated.

MRS. WATTS: My ain't he elegant . . .

MRS. JONES: He reminds me of Sir Henry Irving . . . that marvelous man . . . whom we saw in London at the beginning of the century.

MATT: Now everybody be quiet . . . Mr. Mitchel will address us now.

MITCHEL: Dear people of Thompkins Corners, I stand before you tonight in this quaintly lighted room, a servant of the art of the theatre. I hope that my offerings fall upon receptive ears. The first excerpt will be that famous example of logic and philosophy, the advice of Polonius to his son Lærtes who is returning to France after coming to Denmark for the coronation of the dead king's brother.

Give Worthington Mitchel credit, he did know his Shakespeare. He swept into majestic cadences; he moaned, he thundered, he wept and stalked across the slightly creaky boards between the cracker barrel and the end of the counter that supported the cheese case. His audience listened in rapt admiration. He bowed and they burst into wild applause as Mrs. Jones stepped forward with outstretched hand.

MRS. JONES: Oh, that was charming . . . charming . . . perfectly charming.

MATT: Mr. Mitchel, I can't tell you how much we have enjoyed your recital. I know each and every one of us got a heap of pleasure and thought out of it. That Shakespeare sure did know how to use his words—no wonder he's considered the greatest play writer.

MRS. STEVENS: My, I like to cried durin' that last speech.

MATT: Now, folks, these two fine readings complete the program for the evenin'. Mr. Mitchel will visit us again in the near future. He'll bring a company of fine actors with him and put on a regular big production for us. While the band is playin' another tune I want everybody to leave some offerin' on the counter so's to show Mr. Mitchel a little concrete appreciation. All ready, boys.

(*Band plays*)

MARTHA: Why, Matt, we got fifteen dollars and twelve cents here.

MATT: Well, that's real nice—more'n I expected.

MRS. JONES: Oh, Mr. Thompkins, I want to leave this check for ten dollars—I didn't bring my purse with me—the one I keep my money in. He, he. And Mr. Mitchel must be invited to bring his company here as soon as possible.

MATT: Thanks, Mrs. Jones. That sure is a fine total . . . twenty-five dol and twelve cents. The spirit must h moved all of us up several notches.

MITCHEL: It was a very atten and . . . er . . . appreciative audience Reminds me of a reading I did at Scra some years ago.

ELMER: (*Interrupts*) Gee, U Matt, am I late? I didn't mean t . . . honest.

MATT: My goodness, I forgot about you. You get right in there at homework. You got away with it time, but you won't do it again.

ELMER: Aw, Uncle Matt . . . S and me was—

MATT: Never mind Sneed and . . . get right in there.

MITCHEL: A . . . twenty-five do and twelve cents . . . er . . . very g very good . . . and there wasn't a si line of advance publicity. Very goo

ıdon Salutes Lincoln

(*Continued from page 29*)

incoln was a fool, and that the prob- as how to make his folly as inop- e as possible.

e at night he called on his Secretary ate. McClellan, then Commander ef, is out. They wait, and at length eneral returns out of humor, hears he President is waiting for him, oes straight to bed. Lincoln re- home, and his Secretary remon- with him. It seems to Lincoln be a time for making points of tte and personal dignity. He adds, ll hold McClellan's horse if he will ıe victories."

re are two characteristics that we clearly to realize if we would under- Lincoln. The first is at the very of his essential greatness. A les- which history teaches us with un- ing patience and one which is yet ded by many active members of y, is that the truly great man is he extremist, however devoted his ge or picturesque his personality.

other characteristic of which we is Lincoln's loneliness of mind, a worthy of the Greek tragedians. In ıistrative affairs he was anxious, even ıes unduly anxious, for advice, and routine of office he could sometimes little careless in the choice of depu- ıut in the formation of principles he lted nobody. When a decision in- ıg fundamental principle had to be the period of Lincoln's speculation l be a long one, and while it lasted ıost intimate associates could tell ıg of what he was thinking. Then ıly his intentions would be stated ıequivocal terms, and that was an f the matter. This gave easy play tractors and the opportunities were and not always scrupulously taken. Lincoln's justification was that his ıusions truly were founded upon prin- , and that his intellectual under- ing of principles was in the sphere tion the finest in the country. It justification that has now made a and durable impression upon man- and America has given a hero to world.

elevision in Chicago

(*Continued from page 89*)

methods of synchronization that do ıave this disadvantage although they ısually more complicated; in any event ıes not seem that synchronization is of the major problems of television we feel the engineers at W9XAP were to use the simplest system so that could spend their energy on more ırtant phases of television.

ıese home television receivers are be- old, we are told, by about one hundred ıs in Chicago; at Marshall Field & Company, the largest department store, a television room has been constructed and is open to the public during all the television broadcasts. It appears that television has taken hold in Chicago more strongly than in any other part of the country. Those to whom we talked stated, however, that the experimenter, the Radio fan, still composed the major part of the television audience. But the regularity of the television programs from W9XAP, the variety of the programs, the definite efforts being made by the station personnel to make them entertaining, and the direct tie-up between W9XAP and WMAQ have all made the programs interesting.

Without being derogatory and without desiring to underrate in the least the excellent work being done at W9XAP, for we feel that they have done an unusually complete job, especially in the organization of interesting program material, we must give consideration to whether the methods being used represent distinct advances or are matters of detail. Though we wish it were otherwise, careful consideration of the results being obtained indicate that no really new important ideas have been incorporated in the television transmitter or receiver the features of the system are matters of detail, refinements in the transmitter and receiving equipment.

We do not mean that refinements are not worth while, but we do feel that refining our present methods of television will not bring it any closer to realization.

But the history of science exhibits torch-bearers all the way down through the centuries. So let us hope that out of the tremendous amount of thought being devoted to television someone will find the missing link needed to solve its problems.

RADIO TRAINING

you need at home in your spare time

IN order to help you learn radio in the shortest possible time, RCA Institutes, Inc., was established. You may study radio at home in your spare time . . . or at any one of the Institute's resident schools throughout the country.

It is not hard to study radio the way it's taught by RCA Institutes. You learn radio by actual experience on the latest type of radio equipment. And you need not give up the position you now hold. You can study an hour a day or any number of hours a day at home in your spare time.

The RCA Institutes Home Laboratory Training Course teaches you in a most thorough manner. You learn about servicing and selling, operating, radio telephony and telegraphy...also instruction in sound motion picture installation, maintenance and repairs. And you receive at no additional cost the complete RCA Institutes' home laboratory equipment, a modern outlay of apparatus furnished to every student, enabling you to easily solve radio problems.

Home Training Course by America's Finest and Foremost Radio Training Organization

This home training course and free laboratory equipment are backed by more than twenty years' experience.

Send for our FREE BOOK Today!

Everything you want to know about radio . . . describes in detail the home training that has placed thousands of men in good paying positions.

RADIO SOLDER

Ben Bernie

(*Continued from page 7*)

his duties the task of watching German acrobats on the Orpheum circuit.

While in New York, and while the war was still being waged and the German acrobats were still tumbling around unsuspiciously, Bernie became very interested in a certain violinist by the name of Paul Whiteman, then leading an orchestra in a night club and well on his way to national fame. After work, Ben would go to the night club and watch the famous leader and his orchestra and at times they would hold long conversations together. Bernie was interested in orchestra work and became more so steadily. Whiteman encouraged him greatly and gave him many pointers which Bernie has not forgotten.

The new train of thought in Ben's mind took root and developed into a resolution and then into fact. At the height of his career as a vaudeville performer, Bernie left the stage and organized a dance band par excellence. (Half of the men he chose at that time for his first band are still with him.) Then back to the Keith Orpheum circuit with his band went Ben Bernie and made of himself a very, very passable maestro beloved of thousands. It was the beginning of the Bernie we know now.

His travels took him hither and yon through the country and finally back to New York again. Fate again loomed great on the horizon and as usual, Bernie met the great lady half way. The Hotel Roosevelt was just on the point of opening a new grill room where there was to be dancing and entertainment. The worthy managers of the hotel bearded the lion in his den and pleaded touchingly for the services of Ben Bernie and his orchestra for opening week. Bernie had never played for the dance before but he thought that it would do no harm to try for a week.

Needless to say he was a success. He was the type needed and he was remarkably resourceful when it came to the entertainment. In fact—it was at this time that Bernie used to introduce his numbers from the floor and post-script them with a suave, smooth—"I hope you like it." And he was most sincere about it. He hoped the patrons of the Roosevelt did like it. And they did, for it was not until five and a half years after the opening of the room that Bernie again was assailed with the itching heel and departed bag and baggage for London.

Of course, many things happened in those few years. In the first place, Ben quickly became a diminutive orchestral "Big Shot" in New York. Don't take me too literally—Ben is not a really little man—but tho' in stature he is quite normal, he somehow has not become deflated with egotism and self importance. He is modest, quiet and self-effacing to the extent that one thinks of him as little. But to go on—

Save for Vincent Lopez, Bernie was the only other orchestra leader in the city of any really great fame or importance. It was before the advent of Radio, of course. And then the maze of twisting dials, hoarse static and aerial cluttered roofs became evident. Bernie was immediately placed on the air at WEAF and the name "Old Maestro" became as common a name as bread, butter or salt.

It was but a little time after this that Bernie took his tunes to London and put the dancing shoes on the British. He was so popular there that the Islanders paid him the compliment of asking him to be the first American orchestra leader to broadcast his band over an English chain.

Back in the States, Bernie continued on his way, crossing the continent and coming back, always finding new friends and few enemies. Radio advertisers paid as high as they could for his services as master of ceremonies on their programs of dance music. Rudy Vallée and Guy Lombardo, now "big shotting it around" as Bernie puts it, looked on the happy Old Maestro with thankful eyes because it was he who more or less gave a boost where a boost was needed. Vallée had gone through his apprenticeship already and Lombardo was in debt for the success of one song.

Out on the West Coast Bernie and his band created a sensation that other eastern orchestras have been to accomplish. In fact, most eastern go out to the Golden State, play o two months and then pack up the struments for a warmer climate. Bernie had a warmer welcome an only because a previously made ar ment called him East to Chicago.

There we find him now, in the s est dance place in Chicago, the C Inn. Wielding the same wicked cracking the usual wise cracks and ing the usual friends among both and Radio fans. And, speaking of fans—your writer was privileged to a wire that came to Ben one night— ing—"Why didn't you say good to-night? I can't sleep until you *Au Revoir, Pleasant Dreams.*" Of the lady was a perfect stranger, but how, once we have heard Ben say night in that pleasant crooning voi his—we, all of us—strangers no cluded, wait for the good night.

Coming now to what is responsib Bernie's rise to fame and fortun lay greatest emphasis on his cha personality and good fellowship. primarily a showman, of course, bu too, a poor orchestra with a good would not make much headway stands in front of one of the most p organizations for the dance that c found. Their method of playing outgrowth of one of Ben's pet th A theory for which almost every dance orchestra leader in the count been hailed. Perhaps Bernie doesn very much where the credit goes. your writer believes in being just.

When Bernie was playing on the with his band he used the new slow to his music that made it more ada to singing than the half ragtime so lar in those days. Bernie tried it dance floor and found it good. But were difficulties. The young caught on to the new time as people have a way of doing. I sweeping the country. The middle couples looked their dismay an older people, used to lovely old w seemed more pleased than not to fox trot that was as slow as a wal

Bernie allowed himself to worry the middle aged couples and finally out the reason for their antipathy t music for the dance. They had beer and bred in ragtime. "But," he ex "as the young people are really th cers, I continued with the slow t It was new and different to them pleased them."

Let us sum up the story with th most important features of Bernie's —the two new feathers in his ca is Brunswick's leading orchestra. r ing at least a record a month and two. And he has just placed on th ket two of the loveliest new son the day, one, his theme song, *Lon Old Town*, and the other, his signi song, *Au Revoir, Pleasant Dreams.*

THE RISE OF CAROL DEIS

False teeth are a great invention BUT *keep your own as long as you can*

HUMANITY

HAS GOOD REASON TO FEAR PYORRHEA

MANY people are self-conscious and uncomfortable today with false teeth who might have been spared the loss of their own.

Pyorrhea, which comes to four people out of every five who pass the age of forty, can rob you of your teeth and break down your very health if permitted to go unchecked.

The first symptoms are tender gums that bleed easily when brushed. As it progresses, it makes gums soft and spongy until teeth often loosen in their sockets and either fall out or must be extracted.

But don't wait for these symptoms. Many people have the beginnings of pyorrhea in their mouths for ten years before outward signs appear. To be safe, see your dentist at least twice a year and brush your teeth twice daily with Forhan's.

The formula of a pyorrhea specialist

In your own home your teeth are your own responsibility. It is up to you to give them the finest care possible.

Forhan's was created by R. J. Forhan, D.D.S., who for 26 years specialized in the treatment of pyorrhea.

It is unique in that it contains the benefits of an ethical preparation developed by Dr. Forhan, which thousands of dentists use in the treatment of pyorrhea.

Don't gamble with pyorrhea

Start using Forhan's today. You can make no finer investment in the health of your mouth and the safety of your teeth.

False teeth are a great invention, but keep your own as long as you can. Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

FORHAN'S

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

WEALTH! ROMANCE! HEALTH! *How well do you know your own strength and weakness as revealed by the stars? Tune in Miss* EVANGELINE ADAMS, *world-famous astrologer, on your radio, or send for your solar horoscope. Just sign your name, address and date of birth on the box in which you buy your Forhan's toothpaste, and mail to Evangeline Adams, c/o Forhan Company, 405 Lexington Avenue, New York City. FOLLOW MY STARS OF YOUTH TO A ★ ★ Clearer, softer skin

Frances Ingram herself tells how to keep the skin lovely at its 6 vital places

"YOU are just as young and attractive, or just as old, as your skin looks," I told a charming woman who recently came to consult me. "Keep your skin immaculately clean... Keep it youthful at my six stars... And *you* are youthfully lovely."

Then I explained to her my method with Milkweed Cream.

"To cleanse the skin, spread my Milkweed Cream generously over your face and neck. Let it remain for several minutes, to allow the delicate oils to penetrate deeply into the pores, and then remove every vestige of it with soft linen.

"Now—apply a fresh film of the Milkweed Cream. With outward and upward strokes pat it into the skin at the six points starred on my mannequin.

"There are special *toning* ingredients in this Milkweed Cream. These penetrate the cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

I have recommended my Milkweed Cream and my method to so many women, and I have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to a clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES—*If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

MICROPHONE SNAPSHOTS FROM WESTINGHOUSE RADIO STATIONS

ANSWERS IN MELODY TO THOUSANDS OF • LETTERS •

John Herrick, Baritone

A radio dial—one of thousands—is turned to 990 kilocycles! A lilt of fascinating rhythm ends in a crashing crescendo of saxophones and trumpets! Then a mellow baritone swings into the melody of an appealing popular ballad.

For a half hour this succession of intriguing numbers holds its merry pace from WBZ-WBZA. And Ranny Weeks and his H. P. Hood and Sons Modern Concert Orchestra have filled many of their thousands of requests . . . made hundreds more staunch friends in their vast audience. Eagerly, a multitude of radio fans await the night when the H. P. Hood Modern Concert Orchestra comes on the air. Approvingly, they thrill when their letters are answered in notes of music.

So it is with all Westinghouse Radio Station programs. Families have long since learned to listen for them and enjoy broadcasting that maintains a consistently high level of radio entertainment. And KDKA, WBZ-WBZA, or KYW are favorite dial settings nightly in thousands upon thousands of homes.

. . .

Advertisers also find a satisfying response in the popularity of Westinghouse Radio Stations.

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

DID you have the good fortune to attend the Radio début of the sensational new diva, Lily Pons, of the Metropolitan Opera? She sang for Radio listeners for the first time over the NBC network last Easter eve. Nellie Revell, our "Voice" on the National net, told you about Miss Pons' simple unaffected manner. The item appears in Miss Revell's *Gabalogue* in this issue. Now our inveterate interviewer, Miss Lilian Genn, has had an enjoyable afternoon with Miss Pons in her apartment. As the interview was in French many of us would not have been able to make much out of it. But Miss Genn is equally facile with her English, as you well know, and she is going to tell you all about it in the June issue.

* * *

IF YOU are unfamiliar with the "Bishop of Chinatown" you may still have the pleasure of meeting one of the Radio classics of New York. The "Bishop of Chinatown" or Tom Noonan, brings hope to the outcasts. He puts them on the WMCA mike, sometimes. And it's many a tragic tale you are apt to hear when these underworld characters take the air. A vivid story of the "Bishop of Chinatown" will be presented you next month by Miss Dorothy Thomas.

* * *

ANOTHER matter of great interest to Radio listeners and readers of RADIO DIGEST will be the announcements of the winners of our State Championship contest in the next issue of RADIO DIGEST. See whether the stations for which you voted win the medals to be awarded the four most popular stations in your state.

* * *

MR. PLUMMER in these pages begins his story of how Seventy Radio Stars had their beginning. The most of them that you know so well were humble American citizens and quite like the rest of us. But there is one great favorite who began his career in that dark and mysterious land of the Russians. David Ewen will introduce Toscha Seidel to you as he appeared at the time his mother took him, a little boy in a sailor suit, to meet the great Leopold Auer in Petrograd, and you will read what the famous master said to the faltering mother and her little boy. His life is a thrill of human adventure. And that comes in June, too.

* * *

JACK STANFORD ALLMAN sauntered in to see us one evening and called our attention to an item in a newspaper concerning Robert M. Crawford, director of the Newark Symphony Orchestra and prominently identified with many other important musical organizations. "I hea his name over the air a few evenings ago," said Jack, "a just about dropped dead when I discovered him in all th æsthetic glory. The last time I saw Bob Crawford he w decked out in a rough woolen shirt, short ragged breech hanging outside his boots, an old slouch hat and a bag camping truck over his shoulder. The neck of a uke sticki out of the top. It was up in Alaska where he was born. simply could not imagine him down here in soup and fi leading an orchestra of 82 pieces. But sure enough it w Bob—the same old Bob, so far as fine character is co cerned." You're going to read all about it next month.

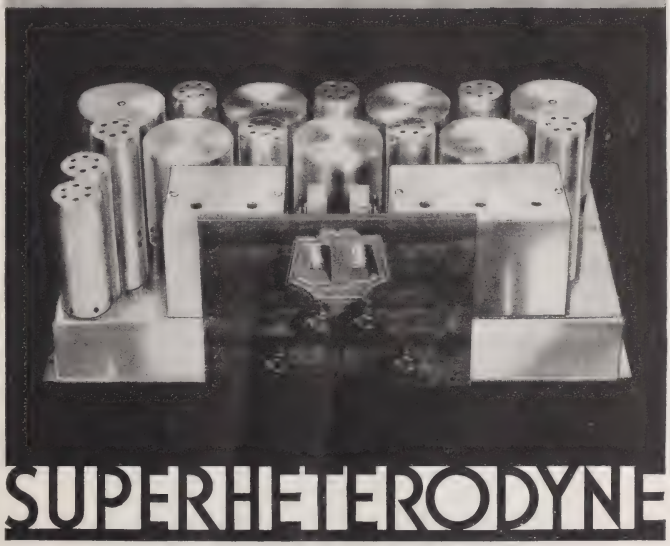
* * *

ATTENTION, you fair admirers of Jean Paul King! M King, one of the newer idols of the NBC announci staff has turned author. He is writing for RADIO DIGEST a several other magazines. We have be successful in bringing you the person writings of Rudy Vallée, who co tributes to this magazine regularly, a now we know you are going to l pleased to read what Mr. King has say about some of his fellow artist Don't know how long it's going keep up but anyway we have his fir story which happens to be about tho two intrepid "females" of domest wisdom, the Sisters of the Skillet. Whe they put away their aprons, hang up their bungalow blouse and attire themselves in their natural habiliments they a known as Ed East and Ralph Dumke. What they don know about household economics is plenty, but they are not in the least lacking in advice on the subject. It's a roaring skit. Jean Paul King gives you the low-down about these rotund Skilleteers next month.

DUMKE

EAST

* * *



"HITTING the crest in Radio," is an expression that applies to a person who is sweeping to a high wave of popularity. Entertainment rolls along in a gay and fairly even tenor and then suddenly it is observe that someone is sailing out ahead of the rest. He is attractin unusual attention. The fans are deluging him with letters He is discussed in private homes and public places. Storie are told about him. His background looms up in a glamorou mystery. When RADIO DIGEST spots an individual or an ac in this position it hastens to inform its readers *first* a thoroughly and completely as possible—just as it was firs to tell the world about the personal side of the individual who became internationally famous as Amos 'n' Andy Now we have the spot light on Morton Downey of CBS He's sweeping to the crest. We are going to tell you al about him in a series of three articles, the first of which wil appear in the next issue of RADIO DIGEST.

nd it's sharp,
isp, clean and
ear like a local
oadcast.

he Scott All-
ave is the only
ceiver that han-
es the short wave
and equally as
erfectly as the
roadcast band.
his is due to two
ings. First, the
nique manner in
hich a set of
0007 tuning con-
ensers are auto-
atically cut into
he circuit in place
f the regular
0005's when the
hort wave band is
esired to be
orked. Secondly,
he smoothness of this receiver's performance on the short wave
engths is due to the perfect stability of the Scott high-gain, four
tage, intermediate frequency, screen-grid amplifier. The short
wave stations slide in just as smoothly as those within the broad-
cast band of 200 to 600 meters.

What more can a receiver give you than the whole world of radio at the mere flick of a dial? The new Scott All-Wave gives you the one additional thing necessary to your complete satisfaction. Its fine construction gives you complete assurance of dependable 'round the world performance throughout the years to come.

SCOTT TRANSFORMER CO.

4450 RAVENSWOOD AVE., CHICAGO, ILL.

Sole Representative for New Zealand: CHAS. BEGG & CO., Ltd., 21 Princess St., Dunedin, N. Z.
Sole Representative for Uruguay: ARMANDO I. LOPEZ, Chile 388 Cerro, Montevideo, Uruguay.

Chrome-Plated Rugged Metal Chassis

The Scott All-Wave is as bright a jewel of construction as it is a star of performance. It is all metal—heavy pressed steel that won't warp, twist, or impose strain upon the wiring. And it's put together like a modern bridge! Add to this superb construction, the beautiful, polished chromium plate that covers the whole chassis, and the Scott All-Wave Superheterodyne looks the thoroughbred it surely is.

Thrill to This New-Day Performance

Tune the new Scott All-Wave alongside of any other receiver in existence today. See for yourself how it tunes the whole broadcast band without concern for the miles that may exist between broadcaster and receiver, and with equal unconcern for proximity to local stations. Thrill to real 10 Kilocycle selectivity over the whole band! Thrill to the *fact* that there's a station at *every* dial point! Then cover the 15-250 meter band. Listen to stations in Europe, Asia, South America, Africa, Australia. Enjoy a tour of the entire world, in your own living room. Then, and only then will you fully realize why all major world's records are held by Scott receivers and that the new Scott All-Wave is, in all truth, the greatest achievement in modern radio engineering.

The price of the new Scott All-Wave is amazingly low. You'll be agreeably surprised when you hear the low figure at which this remarkable instrument may be obtained.

"OLD SIG", as he known to many has had a finger i all kinds of Radi pies . . . has bee musical director sports announcer spot news broadcaster Now he is M. C. o the Happy Wonde Bakers, NBC

Sigmund Spaeth

A Learned Ph. D. and a Jolly M. C.

Sigmund Spaeth

He has Three Unique Achievements to his Credit. He is Doctor of Philosophy in Music, Master of Ceremonies, and a Hero to his Stenographer! She tells here many Amusing Anecdotes of this Radio Pioneer's early Experiences

By MARCHA KROUPA

I FIRST heard the voice of Dr. Sigmund Spaeth while pinch-hitting one day at the switch-board of a big piano company in 1920, when he had just been appointed an educational director of that organization. He talked so long on the telephone and as there were only two trunk lines available, I exclaimed in a very exasperated manner, "Ye Gods, this man ought to talk for a living!"

And much to my surprise I later found out he did. I did not know then that the title of "doctor", which the whole piano trade used with a reverential awe, was actually a Ph.D. from Princeton University, and that "Old Sig" as his friends invariably came to call him, had won his degree in English, German and Philosophy, with a very learned yet very readable thesis on "Milton's Knowledge of Music! Its Sources and its Significance in his Works".

He later became my boss and always insisted that clearness was the one and only object of all writing, talking and thinking. "If you find that you have written a sentence that is not entirely clear," he would say, "it probably means that your thought is not entirely clear in your own mind. First find out exactly what you really mean, and then put it down on paper so that other people will understand it also."

His business letters were the envy of all his colleagues, and still are. So far as personal letters are concerned, he never wrote me more than a picture postcard, so I can't qualify on that subject. But Dr. Spaeth did teach me a lot about the English language, especially punctuation. He insisted again that there were no rules of punctuation except the demands of clearness. That elusive little atom known as the comma was to him a mere indication of where the voice would naturally pause in a spoken sentence. "Say it out loud", was his rule, "and then you'll know where to put your commas. There are too many commas anyway". (And I am still hoping that letters will eventually be written like telegrams.)

Now that Sigmund Spaeth is known all over this country and in parts of Europe as a writer, a speaker, a teacher and a pioneer of Radio, it is rather good fun to try and put down, as clearly as he himself would wish, some of the impressions of ten years spent almost entirely in his employ. (I might have said "in his service," but that is a little too full of humility. After all, every man of ability needs a lot of managing.)

It was Dr. Spaeth's Radio work that always interested me most, and I still feel that this is his most important field of activity, both as a propagandist for good music and as an effective entertainer of the general public. He has taken part in practically every branch of Radio except the mechanical.

Marcha Kroupa, who writes this, has been Dr. Spaeth's secretary for many years

In the early days of the broadcasting stations, the Ampico reproducing piano was often used to fill in on a program, or even to accompany a singer or a violinist. Dr. Spaeth made many interesting experiments in this connection and also introduced the actual artist on the air, in direct comparison with his own piano recording.

Many of the pioneer programs of station WJZ, in the old Newark days, were arranged by Dr. Spaeth, and he likewise acted as musical adviser for the Atwater Kent programs before the big international artists came into the picture. Roy Durstine, another Princeton man, whose advertising firm has been closely identified with Radio from the outset, had Dr. Spaeth write a booklet on "Music in the Air", and later he prepared a similar pamphlet, "Listening", for the Kolster Corporation, which was widely distributed.

It was at WOR, then also in Newark, that Dr. Spaeth gave the first series of talks on music appreciation ever presented on the air, and this proved very successful and ran for a long time. It came about through a modest program in the piano salon of the Bamberger store, on which occasion, incidentally, Dr. Spaeth introduced to broadcasting a very fine violinist, Godfrey Ludlow, who shortly afterward joined the forces of WJZ, where he became a great success both as a performer and as an announcer. This was only one of many similar cases.

So far as I know, Dr. Spaeth was also the first to make a success of the "ad lib" style of announcing, which eventually became the bad child of the studios and is still looked upon with some dis-

New Simmons Program Brings Darlings of Opera to Radio

Sigrid Onegin, noted concert artist

By Richard Spencer

MIGNON picked up her hoop-skirts and Norma her flowing priestess' robe, and in one leap crossed the great gap between the Metropolitan Opera and a Radio studio. Carmen, with a click of castanets and a swirl of shawl trod on the toes of the bedeviled Faust, and jostled the stately Rhadames escorting his Aida along the same road in oriental pomp.

In other words, opera has come to Radio.

A current and recently inaugurated series of programs on Columbia's air offers to music lovers under the sheltering and sponsoring wing of the Simmons Company much of the finest in music and the most famous of names known to the operatic stage today, and at that under a plan of program setup tending to make for very delightful listening.

Under the baton of Wilfred Pelletier, conductor of French. Russian and English opera for the Metropolitan, a picked symphony orchestra of thirty-two pieces provides the instrumental background for the artists, among whom may already be numbered such as Beniamino Gigli, Rosa Ponselle, Giovanni Martinelli, Marie Jeritza, Sigrid Onegin, Queena Mario, Lily Pons, Grace Moore and Tito Schipa.

The program gives every indication of being a distinct step in the welding of opera and Radio, which until very recently have been so deplorably far apart. Be that as it may, it is assuredly a big step in the right direction so far as Radio presentation of this type of entertainment is concerned.

OF course certain aspects of the plans made for Radio City in New York are another thing again. If, and as seems at the moment highly probable, the Metropolitan Opera is housed in one branch of that gigantic project, it goes almost without saying that the wedding bells for opera and Radio will ring out over the broadcast channels. But—as I said—that is another thing again—and is still much of the future.

Today it is still rather a goodly jump from the glittering galaxies of the "diamond horseshoe" at the Metropolitan to the arid atmosphere of a broadcasting studio—so far indeed that when for this or that reason operatic stars have been heard over your loudspeaker—it is an even chance they gave beauty or fashion hints, tips on what the well-dressed man will wear—or won't—or if you were very lucky, thrilling moments from those other dramas enacted in the grimy, canvas-encrusted chasm "backstage"—thin that the diamond bedecked dames in t audience never dreamt of, and would r be interested in beyond a polite boredo if called to their attention.

This does not mean that opera st have not been heard singing on the air no indeedy—there has been a distinct a growing tendency in that direction, thou hindered chiefly by, er—"contractual o ligations"—I think is the term usua dragged in by the announcer of the m ment.

Of reasons there are plenty. One the quite natural desire of the artists cash in on an additional and highly r munerative field. Another perhaps, pressure brought to bear by those behi the principal broadcasting corporatio an effort to cater to that large air aud ence which prefers music of the voc order, and which has suffered at lea long and in varying degree, if not exact silently.

THEN, too, we must tal cognizance of the attributes of big bus ness—of interlocking directorates—ar this and that. So not to be overlooke is the natural desire of one angle of suc a combination to make capital of th good things enjoyed by another and com plimentary one.

To get down to concrete cases, consid

GRACE MOORE. Mr. Ziegfeld hired her for beauty, but later Mr. Gatti-Casazza of Metropolitan Opera liked her voice. A Simmons star.

for a moment the Victor people, with oodles of opera stars under contract. What more natural than that their affiliated corporations, the RCA and National Broadcasting, should look with desirous eyes on those selfsame artists? Nor is it strange that in view of more recent events such as that of present consideration, we should see a sudden and unprecedented rush of these same artists to the microphones of said affiliated corporations, they being for the most part under contract to Victor for recordings.

Of course there have been various and sundry operatic hours, perhaps among the most notable being those which have been picked up from the stage of the Chicago center.

These, however, have been only in part, fault number one; and as far as Radio engineers have gone toward the ultimate perfection of broadcasting, pickup of a program direct from the stage during the play never has been, to be kind, wholly satisfactory. Fault number two.

Giovanni Martinelli; another Simmons star

Of what you hear at home nothing need be said here. Those who like this type of program have most assuredly heard those Simmons hours which have become Radio history; and hearing, were content.

In makeup the hour is unique. The artist around whose famous numbers the individual program is built has full scope in which to offer his or her best. The one selection given over to the orchestra is just enough to lend pleasing contrast to the hour.

But enough of that! Have done!

Here I would tell you of the scene presented recently in the studio at Columbia at the Simmons premiere on a Monday night at 8:30 o'clock.

Sit in a corner near the control room and half close your eyes, just sufficiently to shut out the confining walls of the studio—to lend distance to your perspective—and it is a very easy matter to be moved mentally to that lobby at the opera which gives onto the lavishly publicized diamond horseshoe.

Maria Jeritza of Metropolitan Opera fame

Even the flowers are there, the bouquets, great vases and baskets of them, more probably than when the opera star was enthusiastically accepted by an audience at the Metropolitan.

Surely were one actually at the opera but little more of brilliance could meet the eye, no more fastidious display of the ultra-smart in gowns—no more prodigal parading of fortunes in gems. Look where one will, it is a keen eye indeed that can spot aught but full evening dress. And if finally discovered it is more than likely to be none but the control engineer seated behind his panel full of dials and doodads. Even here if one gets close enough so that more than a head is visible, it is an even wager a dinner kit will move into view.

Yes, there has been a deliberate attempt to make the program a high hat one indeed.

The Simmons people have had an urge to go on the air for some time, but were unwilling to take the step until they could secure that which they felt was of an order fine enough to be known as the "Simmons Program".

It is known that more than a year ago negotiations were under way to present Fritz Kreisler under their sponsorship, but for one reason and another that dream never materialized. But now they have secured the type of program material they want, on the air they are, and it is to be hoped, for a good long time.

A DEAL of care and thought was expended to make the offering as perfect as possible. The hour of presentation was chosen as being—not too late for the younger set before they start out on their nightly quest of venture and adventure—and early enough for the old folks. Thought is given to the listener who is congenitally against advertising on the air, a very brief opening bit, and the closing announcement is made prior to the last offering of the singer—leaving a very pleasant taste withal.

In naming Wilfred Pelletier to direc the orchestra, which by the bye is com posed largely of Philharmonic musician they chose well indeed. Besides h duties at the Metropolitan, where he wa made a conductor at the surprising age c twenty years, he is director of the Sa Francisco Opera and of the Ravinia Par concerts at Chicago in the early summe

The idea has been to make the pr grams in the nature of a studio soci event, and to that end attendance at th Simmons hour has been by engraved in vitation only—with the old R.S.V.P. an all that—to a selected few. To get i without one of these cards is about a hard as crashing a star's dressing roon and I am still wondering how I turne the trick.

Of just how this scheme of thing making a Radio broadcast a social even has worked out, there will be more to b said later.

As one sits in a corner of the studi doing one's best to hide a sack suit behin

Wilfred Pelletier, the orchestra conducto

a harp, the while reveling in the wealt of melody which floods the place—an taking more or less for granted th smoothness and perfection of the pres entation—it is rather difficult to visualiz the many trials and obstacles that had t be overcome in the very beginning befor the programs could ever be presented.

Such things as conflicting or limitin contracts, and prior professional engage ments of the artists, were but a few c the barriers that had to be successfull hurdled. The date of appearance of th singers had to be set so as to cause n conflict with their scheduled appearance in opera. Opera companies, even th Metropolitan, have a habit of going o tours, and this fact alone sprouted mor than one gray hair in the harassed hea of the program director.

Just to give you, who have nothing t do but sit back at your ease and drin your emotional fill of these offerings, som idea of the minor points that had to b

(*Continued on page 98*)

Friend Husband

"I Have To Feed His Pet Oysters, Buy His Neckties, Shoo Him to the Studio on Time—There's Nobody Like Him"

By Mrs. Graham McNamee

Friend wife—Mrs. Graham McNamee

I HAVE been trying to think of the things I might tell you about Graham, and do you know, the first thing that comes to mind is that he ces apple pie better than almost anyiing else to eat. And, I don't mind lling you it must be apple pie that I bake. But I suppose we had better start at ie beginning of a day: Graham usually is his breakfast some place between the ning room and the front door. Inasuch as it is seldom more than a glass of ilk—he never has time for anything else -I don't have much trouble getting it to im before he is gone. I am not sure what e has for lunch because I rarely see him ien. I do manage, however, to see that e eats a good dinner. It's keeping that inner good that is occasionally difficult, as the hour for dining in our apartment is just about what it is in a first-class hotel. From six o'clock on.

Also in checking up with my friends I find that Graham, like most other husbands, is under the impression that the best place to practice golf putting is on the living room rug. In our house the game usually starts about midnight after he gets home from work.

As husbands go I can't imagine anybody just like Graham. When he gets a new necktie it is because I have bought it for him. His favorite color is blue. I usually remember where he put his key ring, what particular shirt he wants, where the collar buttons are kept and when to have his hair cut. At some time in his life he may have arrived at some railroad station two minutes before the train left. But usually I land there first with his bag, and those important papers he forgot to take when he left the apartment.

From a pastel by Howard Chandler Christy

Graham McNamee

With Graham working as he does, and not knowing just when he will be free, our social life is necessarily difficult. I make it a point to keep the hours he keeps, and to entertain our friends when it is convenient for him. Many a time I've made pancakes and fried egg sandwiches at four o'clock in the morning.

Although Graham's work takes him away a great deal, I have one advantage over most other wives. I can always hear him. And no matter where he is the first thing he does when he finishes a broadcast is to telephone me and say: "Did you hear the program? Well, how was it?"

Living in a pent house on top of a skyscraper we cannot have the pets Graham would like to own—a couple of dogs, for instance. He doesn't feel that it is fair to keep a dog in a small apartment. But as many other people think differently, he gets a lot of fun playing with the neighbors' puppies. Once this caused great excitement. He was late leaving the house for a very important broadcast. I think he drank his glass of milk that morning while waiting for the elevator. It was some time after that that the telephone rang and a frantic voice asked: "Where's Graham?" "Why he's gone. Left here fifteen minutes ago," I said. Five minutes later I answered it again, and five minutes after that. Doing a little detective work of my own, I discovered that Mr. McNamee had stopped in the lobby to play with a terrier puppy while the broadcasting company was considering sending out the police to locate him.

LIKE most people associated with public events, Graham has many souvenirs, of which he is extremely proud. For my part, I'm proudest of the phonograph record made when he broadcast Lindbergh's return. Graham has in his study nine autographed baseballs, a chunk of coal which he mined himself, keys to several cities, a commission making him a Kentucky Colonel, loving cups of various sorts, lots and lots of pictures, and oh yes! his police record—finger prints and all. I must admit that the record was done as a joke. But Graham didn't know that until it was all over.

Being the wife of an announcer is fun, but it also has its difficulties. I wonder if any of you women ever tried mothering a hundred pounds of oysters or a live wild turkey. I've had to. The

There's a Chance for You if you hav Salesmen, Cowpunchers, Stenographer

By Evan

PART ONE OF A SERIES

HOW DID the big air favorites get started? Is there any set formula or rule by which you or I can get the "break"? Perhaps this study of some of Radio's most notable artists and entertainers may help. But first—take a tip from an old-timer who has been watching Radio grow since twelve years before KDKA and WJZ blew their first tubes. Here's the tip:

Good voice, dramatic ability or musicianship does not mean success in Radio.

There are many better voices, actors and musicians outside the studios than the stars within. But they've something missing. Call it "X" if you will. That X means the difference between Radio success and failure.

Radio, like the movies, stage and vaudeville, is looking for "trick" voices, acts, instrumentalists, stunts, bands—something that is different and something that has an uncanny appeal to the public when pumped through a microphone into millions of blind loud speakers. We'd all like to think we are Amoses and Andys, but most of us, except perhaps one out of a million, never will be.

That sermon may be a bit off the original subject, "How They Got Started", but nevertheless it may save many a mike-struck lass and lad a whole flock of heartaches later. How did the big favorites get under way? Well, here is a study of many stars of varying magnitude and brilliance all of whom are living room topics to most of you.

Being a traveling salesman didn't exhaust Jimmy Wallington's capacity for telling stories so he became an NBC announcer.

Few of the present stars trained themselves especially for Radio, for when they were young there was no such thing as hurling voices and music through space. So the microphone drew much of its entertaining personnel from stage, opera, vaudeville, concert hall and movie lot. Yet many of the big names today came by none of these routes. They accidentally went before the microphone and became successes practically overnight, much to their utter astonishment.

In their various pasts, Graham M Namee, James Wallington and "Old To per" Ray Perkins were traveling sale men. "Roxy" Rothafel and Wallace Bu terworth clerked in department store and Roxy also was once an America Marine. Of the Landt Trio and Whit Karl Landt taught chemistry, Dan was house painter, Jack was still in scho and Howard White ran a bakery. Wil iam Merrigan Daly was editor of *Ever body's Magazine*. Elizabeth Davenpor Vee Lawnhurst and Giovanni Siragusa, recent find, were accomplished pianis before their voices were discovered b Radio directors. David Ross had widely varied career including even beir an orphan asylum supervisor. Lou Katzman was a "jack" of twenty trad before Radio. James Stanley, Mer Johnson, Ben Bernie and Nat Shilkr started out in life to be civil, electric or mechanical engineers.

BUT probing farther int the mikesters' backgrounds, one unco ers many interesting facts.

Freeman F. (Amos) Gosden served i the Navy during the War, then becam a tobacco salesman. Returning to Rich mond, Va., he danced a clog dance in "home town" talent show staged by Ch cago professionals. He did well enoug to earn a job coaching similar shows fc that outfit. Thus his life converged wit Charles J. (Andy) Correll. The latte sold newspapers as a boy in Peoria, Ill laid brick for his family's constructio company, and in his evenings turned ou to be considerable of an entertainer, play ing the piano, acting, dancing and sing ing. He was hired as a coach by th home town show production company

. Plummer

Here's one phase of Lowell Thomas' multi-colored career—Chicago newspaper reporter.

rrell met Gosden when the former was igned to teach the latter the busi- is. Six years later, made office mana- s in Chicago for the company, they k a joint apartment. For fun they nt to WEBH, Chicago, in 1924 and ed out as a harmony team. They were en a job—without pay.

Stage appearances and a small pay job another station were next. Then that tion wanted a daily comic skit based a famous strip appearing in the news- per owning the station. Correll and sden tried to write it but gave up. stead they proposed a blackface turn, am 'n' Henry". Almost from the art it was a success. Two years later 928) they took Announcer Bill Hay ong to another Chicago station, higher y, and to avoid legal troubles, the mes Amos 'n' Andy. Transcriptions ade them nationally famous and NBC d the rest.

Henry Burbig could have been catcher of Detroit National League Team but chose to put 'em across instead—as CBS monologist.

LOWELL THOMAS dn't train for Radio—it trained on him. homas, in his thirty-eight years, has en Chicago newspaper reporter, col- ge professor, and discoverer of news ents in strange and difficult lands all ver the world. The latter work made m friend of kings, sultans, premiers, enerals and mandarins; turned him into famous author and caused him to give ctures to standing-room-only audiences the world's largest auditoriums. His oice, trained for public speaking by his ather, was a Radio "natural". The mag- zine for which he newscasts nightly sought im out.

Phillips Lord, creator of *Sunday at eth Parker's* and *Uncle Abe and David*, raduated in '25 from Bowdoin College. as a teacher and strived to become a magazine editor. Tuning in one night to a rural sketch on his Radio, he recognized some discrepancies as a result of his early environment. He hied himself to the Radio studios and showed them how it should be done. The Seth Parker sketch, first of his creations, paved the way for the second one in which Yankee humor mixes with shrewd bargaining.

Arthur Allen, past the fifty year mark now, wanted to be an organist but the lure of the stage won him. He played years in stock and on Broadway and finally entered Radio with character parts in the Soconyland and Schradertown programs. Now you hear him four nights a week as the mean "David" who plays opposite good-natured "Uncle Abe" as enacted by Phillips Lord.

"ROXY" (S. L.) ROTHAFEL, native of Stillwater, Mich., after department store clerking and a "hitch" in the U. S. Marine Corps, found himself in early movie days a successful pioneer in presenting stage shows and other entertainment along with the feature films. New York soon claimed him, and when broadcasting began, it was only natural that a mike should be placed in the Capitol Theater, where Roxy was then located. His method of announcing and quality of programs made him an early favorite and he still stands his ground. In checking, incidentally, on where many of the present musical air favorites had their first "break", I learned that Roxy was responsible for launching many of them on their way to fame and futures. Roxy has probably started off as many Radio vocalists as Mme. Ernestine Schumann-Heink has operatic proteges.

"Tony Cabooch", or Chester J. Gruber, climbed from ragged newsboy to vaudeville success. For eighten years he did his more than half a dozen dialect impersonations to the encore cries of vaudeville patrons in England, France, Germany and his own United States. Then, by reason of a friend's recommendation, KMOX, St. Louis, tried him out. In fourteen

weeks of applause-weary 1929 he pulled 42,000 fan letters! A commercial chain contract soon followed.

Jones and Hare wandered about in many jobs. Billy Jones was government clerk, bank clerk, sheep herder, miner, telephone and telegraph lineman, carpenter and blacksmith before he discovered he could sing. Ernie Hare only sold books, pianos and baking powder until he learned likewise. They met in a phonograph recording studio, tried a double act, and merged. Much vaudeville acting and singing followed after that and before Radio dawned in 1921. The pair were selected to become "The Happiness Boys" way back when on what was one of the first toll (meaning commercial) programs, and it looks as if they will beat Weber and Fields yet on their partnership duration.

"OLD TOPPER" Ray Perkins was in turn a college student musically inclined, an army captain, an advertising salesman, a music critic, a song writer, a vaudeville performer, early Radio performer (as "Judge Junior"), once more a vaudeville star, and three years later, again a luminary of the air. Wendell Hall, air pioneer, started writing songs and singing them as he strummed one of the first ukuleles, when he was still in high school in Chicago. KYW drafted his talents to fill its hours when it was the first station in town. His tours, songs and vaudeville work have made him internationally known.

Gene and Glenn made air debuts on separate teams before they made network fame together. Glenn Rowell ran away from his Pontiac, Ill., home at the age of thirteen to join a tent show, eventually became a song plugger in a ten-cent store, next elevated himself to be music publisher's representative, and then became a theater organist. WLS attracted him in its early days and there he teamed with Ford Rush. Gene Carroll at the age of seven carried a crown in a play at Hull House, Chicago. His fate was sealed. He likewise teamed with a pal as Jack and Gene at WLS at about the same time Ford and Glenn were going over great. WLW and WTAM engagements followed and the two teams melted into simply one of Gene and Glenn. In Cleveland the networks found them the toast of the town, and so you hear them every week morning—with your toast.

Brad and Al, the Senator and Major, or whatever name a sponsor wishes to call them, also traveled many roads before Radio. Bradford Browne was a stenographer for the government in Washington, a successful cemetery lot salesman, a realtor on a larger scale till his assets shrunk, and a lawyer. Al Llewelyn watched an open hearth steel furnace in Pittsburgh until the plant and his job burned down. Brad and Al met in a Newark, N. J., boarding house as both reached for the hash simultaneously. Becoming pals, they wrote a musical act, formed the Radio comedy team of "Ham and George, the Cellar Knights", and as such were discovered by WABC and CBS.

"DAD" (Obediah) Pickard and his family got into financial difficulties and Radio with their old-time and hill-billy songs in Nashville, Tenn., at practically one and the same time. "Solemn Old Judge" George Hay, WSM's director, found their talents just as Dad Pickard's commercial credit business blew up. Confident of himself, Dad loaded mother, Bubb, Ruth and four-year-old Anne into the family flivver along with their fiddle, jews-harp, harmonicas, guitar and banjo, and rattled on to New York. Parking at 711 Fifth Avenue, the family took their instruments and asked to be shown to

ene and Glenn rose from vaudeville to the chain gang NBC). Now they're thinking of going higher—but hey're cautiously testing a Zeppelin part before flying.

essful broadcasts from a New York sta- ion. He's been on the air eight years.

Charles W. Hamp, remembered by Eastern fans as last year's "Early Bird", nd who is one of the greatest stars on he Pacific Coast, played first in a dance rchestra, thumped a piano at twenty in vaudeville theater's pit, trouped for two ears in musicomedy, invaded Italy with jazz band and excited the olive-skinned Verdi lovers enough to win the Dal Verme nedal in Milan's Teatro Dal Verme, en- ered Radio via the audition route as an nnouncer, and then evolved his piano- playing, singing and chatting act.

"DOBBSIE", or Hugh Barrett Dobbs, every bit as big as Amos n' Andy on the West Coast, walked into he studios of KPO six years ago and applied for an audition. In four and a half years he had accumulated over a million letters attesting to his popularity. A commercial sponsor signed him for three years at a salary higher than President Hoover's. Back of Dobbsie's air success, we find him attending Johns Hopkins at Baltimore to become an instructor in physical culture, graduating and taking a world tour, next teaching physical training, and then promoting the building of outdoor playgrounds in New York City. Judge Ben Lindsay sent for him to do the same for Denver; Seattle was next to call. Then, in 1905, he became associated with the U. S. Government Survey and aided in establishing the boundary between Alaska and Canada. Commercial movies occupied his attention after that, and in 1924 he came to San Francisco to sell musical instruments. His Radio tryout followed this varied career.

ANTHONY WONS, of "Tony's Scrapbook", is a born philosopher. Working his way through college by making automobiles, beds and punching cows, he probably would have continued fishing, hunting and thinking in the Eagle River country of Wisconsin, but that he felt the air was short on philosophy. So he went to WLS and proposed to start a philosophical period, communing with kindred spirits among the fans. His scrapbook, a collection of bits of poetry and philosophy submitted by his listeners and gathered also by himself, sold 80,000 copies in nine months. Going to WLW, he sold 90,000 of its next edition in a like period. CBS scouts were watching and had him sign the dotted line.

Little Jack Little, whose right name is Leonard, wrote a lot of college songs at the University of Iowa, so turned to song writing when he was graduated. He was given a job as song plugger in Chicago eight years ago and told to use the Radio stations. He worked with a partner in his earlier days. Then he went on alone, crooning in his inimitable way as he played his own accompaniments. Tours playing every principal station in the country followed along with vaudeville engagements. In the past several years he settled in Cincinnati to make WLW his headquarters, but NBC finally awakened and signed him up early this year.

Ohman and Arden, the duo-pianists, didn't know one another when they both were looking for work and food in New York. Phil Ohman was hired by Wanamaker's and Vic Arden landed with Ampico. Ohman first met Arden when applying to him for work making player rolls. When Arden went to Q.R.S. to make rolls he took along Ohman to work out the duo piano recording scheme. Their first work of this type brought society, club and musical show engagements. Friends persuaded them to embark on a Radio career.

ROBERT L. RIPLEY, whose unusual syndicated "Believe It or Not" cartoons brought him his Eastern network contract, sold his first drawing to a humorous magazine for $8 when he was fourteen years old.

JUST folks after all—these people who entertain you on the air. No royal Radio antecedents in this field. It shows that we are interested in people who know us and belong to us from all walks in life. That's why you are going to enjoy the next installment wherein Mr. Plummer will tell you how other successful Radio celebrities got their start. Don't miss it in the June RADIO DIGEST.

Stand

The Muezzin, calling all good Mohammedans to pra

OUR Radio station at Algiers was really a birthday gift for the Centenary year, 1930, the year of Algeria's hundredth birthday as a French colony. It is an appropriate present, for after one hundred years of development under French rule Algeria may be said to have attained its majority, and is now important enough to make its voice heard among the nations.

The Radio station is some ten miles from the town of Algiers on the road from Maison Carrée to l'Arba, and was opened by His Excellency The Governor General of Algeria. It is a simple and dignified building, gleaming with oriental whiteness under the African sun, and well suited to the Algerian landscape.

Technical details of interest are as follows:—Wave Length, 364.50 metres, feeder power, 100 kilowatts, aerial power, 13 kilowatts, and modulation percentage 100 per cent. The station has a high frequency emittor of three circuits, and there are six automatically cooled valves, the cooling being done by an ingenious water system. The pylons supporting the antennae are about 250 feet high. The calculated radius of action is nearly 3,000 miles.

The Algiers Radio is fitted with the most modern apparatus, and with a five valve set and a loud speaker it has been clearly heard west of the Azores, and letters reporting good reception have been received from Newfoundland and from Tonkin in French Indo China.

The writer of the present article has received hundreds of letters from va ous parts of England and Scotland a Ireland, as well as from Euprope countries, commenting on the clearn with which Algiers can be heard. A f letters have also been received from t U. S. A. In fact, several writers wish to know if they had been hoaxed wh they heard an English voice announc as speaking from Algiers, and one wri said that he had been told by his frien to whom he related his experiences, t the Algiers station did not exist.

Arabian musicians address their love songs to the mike as to some houri of a Mohammedan paradise when they broadcast.

The actual broadcasting studio is Algiers itself, and the programs transmitted from there to the bro casting station and then relayed ba again to a loud speaker in a room joining the studio, so that the stu staff can judge how the program sour to listeners. The principal progra is given in the evening from 7 p. to 11 p. m. Greenwich mean tim While of course for the most p the French language is used, there also items in Arabic, and English a Esperanto.

Among the interesting regular items the Arab music and singing, and ta given by natives. It is amusing to wat the native musicians in front of t microphone—they address their lo songs to the instrument as to some ho

By *for* Morocco!

By Le Capitaine

(*Special Correspondent to* RADIO DIGEST)

from his balcony was one of the first "broadcasters".

of a Mohammedan paradise. The Arab stories, too, are often really humorous; they are told first in Arabic and then translated into French.

The English talks have been for the most part descriptive of the scenery and the life in Algeria.

It will readily be realized that a powerful Radio station is of especial benefit to a country like Algeria where farms and estates are far-flung over wide areas, and communications not so numerous as in America or Europe. It is also a powerful means of propaganda and publicity, and as the natives are already taking an interest in wireless it will help to spread French culture throughout the whole of French North Africa.

At the fourth Algerian wireless exhibition held at Algiers last November many of the visitors were puzzled by one of the exhibits. It was a safe, just like any other safe, but when one put a hand near it or approached it, or even when any object at all came near it there was a loud ringing which warned the owner that some unauthorized person was near his safe. This is a scientific application of the principle underlying the phenomena of capacity variation, so well known to wireless amateurs.

It was most interesting to watch the large groups interested in this exhibit, and to hear their comments while there.

In the campaign launched against malaria by the Algerian Government General one of the most important weapons is the Algiers Radio. This reaches not only distant colonists and farmers in North Africa but also many of the native population.

Last Autumn the first of an important series of lectures was broadcast from Algiers by the medical officer in charge of the anti-malaria service. In addition, at all the concerts of native music and singing which are regularly given every week from Algiers practical advice on the prevention of malaria is broadcast in Arabic.

The Algiers wireless station is adopting a novel method to find a new announcer. There are thirty applicants for the post and a committee will select the three most suitable speakers. Afterwards, three special concerts will be given at which the three selected candidates will act as announcers, and listeners will be invited to send letters voting for the candidate they prefer. Prizes amounting to francs 10,000 are offered for the best letters.

"WHY don't you give the DX hounds something to chase?" demanded a caller at RADIO DIGEST. *"We are picking up distant stations all over the world practically every night. Come on out and we'll prove it." A day or so later the article and pictures on this page chanced to come from a correspondent in Algiers. Let's see if some of our DX fans can pick up this station. Next month we are going to give the DX friends an article by Charles J. Gilchrist, secretary of the Chicago Daily News DX Club.*

WIRELESS is becoming increasingly popular among the native population of North Africa, owing, in great measure, to the excellent propaganda work on behalf of Radio-Alger and Radio-Maroc, which was done earlier in the year by "The Giant's Voice," a travelling wireless installation and loud speaker. The installation consists of two motor vehicles, one for the actual broadcasting and the other containing the power plant. The plant has a modulated output of more than 600 watts derived

(*Continued on page 99*)

The RISE of

CAROL DEIS traded her typewriter
for a grand piano and $5,000 cash

Carol Deis

She Hitched Her Wagon to the Bell Song
And They Heard Her Round the World

By Anne B. Lazar

Mr. Atwater Kent presents a $5,000 check each to Carol Deis and Raoul Nadeau, audition prize winners.

JUNE skies, fleecy clouds floating daintily in the blue heaven. A robin cheering lustily in a maple shade tree at the corner. Green lawns and hedges. Children idling homeward from school their books tucked under their arms. A farmer with long red beard seated in his horse drawn cart, homeward bound from a successful morning in the public market.

Carol Deis was going home, too. She had finished her second year of high school—and she would not be going back. She was not very happy and the world suddenly assumed prodigious and inconceivable proportions. Next year she would be in a business college. And what would that lead to?

Certainly she had no great interest in business. She wanted to be a singer, an artist; oh if some kind fairy would wave a wand and make her an opera star! But how could a girl win artistic fame and success in Dayton? A bumblebee droned dizzily over her head. She glanced upward through the tree tops. Far above an airplane was circling upward and upward. The Wright brothers had won fame in Dayton—and there was the great flying field of the army at the edge of the town. But a girl—what could a girl do?

Well, there was no other way for the present. She must go to business college, and watch for opportunity. For a girl just finishing second year high the outlook for any rise of consequence appeared remote. All she could see was just another stenographer in an army of thousands. But anyway she would be the very best stenographer possible, and earn enough money to achieve ways and means for better things.

Before she entered her home she heard her mother singing. She adored her mother's voice. It was clear and true and sweet. Her father could also sing well, and her brother. Carol imagined that if she could only get the right sort of training she might find her future with her voice. But her dream of a grand piano suddenly turned into a typewriter—she would be playing a typewriter—a tuneless clicking typewriter!

Carol was just fifteen when a great event happened in Dayton. The famous Galli-Curci was announced for a concert. Mrs. Deis had promised Carol she would take her to hear the great diva sing some "real music".

Never had there been such a treat. Carol floated in ecstasy as the incomparable coloratura appeared on the stage and poured out the perfect notes of the revered classics. She came to the *Bell Song* from Lackme—and as Carol listened some great and wonderful thing was born in her soul. Some day she too would sing the *Bell Song*. Some day—

ONE must be inspired, and hope and strive onward and upward, even as the circling airplanes ascend into the azure skies beyond the vision of earth bound mortals. Carol was inspired. The *Bell Song* as she heard it that day lifted in angelic sweetness by Amelita Galli-Curci summoned and called up the something within that would never die as Carol followed her course through business college.

The *Bell Song* was the Star of her life toward which she would arise surely and certainly even if she did have to take her first job as a stenographer for the law firm of Estabrook, Finn and McKee. It was rather a cold prosaic world, but then she would do her best at whatever it was best for her to do.

TWO weeks after she had been assigned to a desk and a typewriter there came a call from the office of a member of the firm.

"Miss Deis!"

"Yes sir," she answered somewhat of a tremble and wondering what terrible blunder she may have committed in her tyro ignorance. Perhaps she was going to be fired. The boss looked up from his desk. His face seemed cold and expressionless.

"I believe you have been with us two weeks, and that this is your first job," he said.

"Yes sir, but I'm beginning to get onto things bet-better now," she said with a catch.

"You seem to be getting on very well, young lady," he replied. "So I thought I would let you know we have decided to raise your pay—er-beg pardon, what's the matter——"

Carol sat down in a heap on the nearest chair.

"Didn't think you'd take it that way, Miss. But if you'd rather not have the raise, why, er——"

Well, Carol recovered and mentally she began to hum something from the *Bell Song*. She had already acquired a record and had begun playing it over and over.

You see Carol had already begun to rise.

Now she was in a position to take vocal lessons. Her family joined to give her every possible advantage. She sang in the church choir—and that helped to give her poise before an audience. Ralph Thomas, now conducting an opera school in Los Angeles, was her first instructor and he held for her the most ambitious hopes.

And now let us skip over eight years during which Carol became Miss Deis.

She had been gaining ground as a singer. But still she did not feel justified in surrendering her secretarial job.

There came a day only a few weeks ago when your interviewer was called upon to see this same Miss Carol Deis in the studios of the National Broadcasting Company, 711 Fifth Ave., New York. We found her comfortably seated in a green tapestry chair, and her smiling blue eyes grew reminiscent as she leaned back and told me of some of the things that happened up to the time when she had been awarded the Atwater Kent first prize scholarship and $5,000 in cash, last December.

She was no longer the little girl with school books under her arm, but a grand young lady dressed in the latest style with black velvet gown and her abundant hair, almost typical in its auburn shade, was neatly coifed in the mode of the hour.

"I can scarcely realize it yet," she smiled. "It seems almost too good to be true. Nothing like that has ever happened to me before. Still, as I sit here in the very Radio heart from which flows such marvelous and wonderful music to all the country and the world beyond it seems an incredible dream from which I must presently awake at my little desk in the law office of Estabrook, Finn and McKee at Dayton."

INDEED it did seem unbelievable that this luxurious young pet of the musical world had only six months ago been one of the millions of young women who find their day beginning and ending in a humdrum of office detail with little hope of ever finding a way out. She fanned the edges of a little folder she held in her hand—an announcement of a new Atwater Kent contest, I believe.

"Life was so colorless, such a grind, almost as far back as I can remember," she continued. "Of course I was busy, always busy, but it was all such a deadly routine. Every girl who works in an office will understand what I mean. There was just a spark somewhere within that seemed to whisper, 'If you will keep trying, keep up your faith in me I will transform your life.' I believe that, if we recognize it, that spark of our better innerselves is in every one of us, and we can accomplish much if it is nurtured and developed to the best of our ability.

"Mother had great hopes for my voice. She had wanted to be a great singer. As I grew up she hoped I would achieve some of the things of which she had dreamed. What can be more wonderful and inspiring than a mother's love! I would have wanted to strive for success if only to please her. But it was hard to bring myself to believe that singing could ever be more for me than just an extra bit of good fortune to relieve the deadly monotony of making a living."

Then she told me something of the

"Never give up even if every day seems as hopeless as the other," says Carol Deis.

romance that blossomed into her life...an experience that did much to change the whole world for her. There was a seamy side that has no place outside the confidence through which one woman may speak to another. Her marriage did not end happily as a romance but it left her a mother and spurred her on to accomplish things she might have missed otherwise.

"AS a matter of fact," she said, "my voice really was never anything much until after little Donnie came. What happened? I cannot explain. I only know that when I resumed my vocal training I discovered new tones at my command which I had never known before. And there was distinctly more power back of my voice."

"You recommend marriage, then?" I asked in some surprise.

"Yes," she replied simply and hesitated a moment before she added, "even though it should end tragically as mine did. No girl should forego this greatest of all experiences. It calls forth the best that is in her, expands her capacity for love and compassion; and through some kind of process it changes the worst side of selfishness into a broader sense of things."

Disillusioned by the one she had loved, her ideals shaken by the breaking of lightly taken vows, she returned with h child to her mother's arms, and resume her maiden name, Carol Deis. Onc more she took up her duties in the la office from which she had stepped out ir to a heart-wrenching interlude of tw years. Again she took up the dry trar scription of legal proceedings from note book to typewriter paper.

Seeking the old paths she soon disco ered her new advantages of voice an power. She felt new courage. Some how, some way she would find a way t achieve. Her mind was alert. Oppor tunity, she felt, would be found. Sh earned more money now. Her serv ices were decidedly more valuabl Where would this new trend of am bition take her, toward business o toward a profession?

NOW she was mother, a daughter, a student—and business woman. Her life had fille out considerably, and she was near ing twenty-five. No, she did no neglect her voice culture; she fol lowed it more vigorously than ever She reasoned within herself sh must make the most of these pre cious years of youth. She had goo instruction.

"I feel that I owe almost every thing of this new turn in my life t Ralph Thomas, my teacher," sh said reminiscently. "It was the fou years he took to build into my voic the important fundamentals of sing ing that counted. He had previously wanted me to enter this contest of th Atwater Kent Foundation. But I felt in adequate—lacked the courage to matc my voice against the many, many other who, perhaps, had been better privilege than I.

"When I realized that it had to b done in 1930 or never, because of th age limit, I decided to make the try."

During all this time she never had for gotten her great ambition to sing th *Bell Song* as she had heard Galli-Curc sing it. She had never been encourage to attempt it by her teachers becaus even the best of singers fear that open ing cadenza, sung without accompani ment. Disaster is inevitable even if yo are a very little off key.

When Mr. Thomas had finally per suaded her to try for the contest he first thought was to put all her chance on that one song. Eight months befor her first local audition she began rehears ing it. Her success with this intricat song would be sure to win the favorabl notice of the judges. She applied hersel diligently. To acquaint herself with th Radio technique she was one evening per mitted to sing a few songs over WSMK at Dayton. She conquered her tendency to mike fright and took a posture about two feet behind the microphone, hands clasped behind her head. This, she

(*Continued on page 96*)

"Yes, You American Women Are Happy"

Says Cosmo Hamilton

LAST month Anita Loos, author of "Gentlemen refer Blondes," stood on the negative side of the fence and told RADIO DIGEST *readers she doesn't believe American women are happy. Here's an Englishman's answer:*

Cosmo Hamilton

Reported by Lillian G. Genn

NOWHERE in the world do you find women so vivacious, so ambitious and so enthusiastic as here in America. They walk swiftly up the street of life like beautiful Dianas, turning its corners with an adventurous and youthful spirit. And the zest that they derive from it comes as near to happiness as it is possible for anyone to achieve on this earth."

Thus summarized Cosmo Hamilton when he was approached for his opinion on Anita Loos' challenging statement that the American women are not happy. The famous English novelist and playwright is a sophisticated cosmopolite who has lived in many countries of the world. He has a house in London and a villa at Mentone on the French Riviera, but of late years he has been living for several months in this country where he has a very large and admiring public. Recently he engaged in a series of public debates here with Gilbert K. Chesterton, another brilliant and witty Englishman of letters.

Mr. Hamilton comes from a distinguished literary family. He is the brother of Sir Philip Gibbs and Major A. Hamilton Gibbs and the uncle of Anthony Gibbs, all of whom are well known to readers in both England and America. Lady Mary Agnes Hamilton, Member of Parliament, whose transatlantic broadcast a few months ago received considerable attention, is also a member of this renowned family.

Mr. Hamilton began his career at an early age and was under thirty when he became editor of one of London's most fashionable and clever of society journals. He took an active part in politics, served as Captain in the Legion of Frontiersmen and was commissioned in the Royal Navy Air Service in the World War. Nevertheless he found time to turn out such successful works as "The Blindness of Virtue," "Scandal," "The Rustle of Silk," "Caste," and "Parasites." Oddly enough, his new novel, "Damned Little Fool," an entertaining, romantic book, has as its basis a young woman's search for happiness, so that the discussion for RADIO DIGEST was of particular interest to him.

THE author is a tall, handsome man with the military bearing and gracious, charming manners that are so typical of the cultured and aristocratic European. His apartment in New York is a delightful and cosy place, filled with books and colorful paintings which he brought from his London house.

Lighting a cigarette in a long holder, he relaxed in a large, comfortable chair, and thoughtfully gave his views on why he believed the American women to be happy. His conclusions had been deliberate.

"I believe that Anita Loos' diagnosis was a correct one," he said in his slow, crisp voice, "but only of a certain class of women. It does not hold for American women at large. Similarly, when she declared that the European women

are happier, it applied to only a select class. When it comes to the mass of women in Europe, you do not find them to be anywhere nearly as happy as the American women are.

"FIRST of all, Europe has worn itself out. It has long been decaying, and whatever spirit it had, was effectively killed by the World War. We therefore find that its people are cynical and disillusioned. They are critical of each other and of themselves. They have no ambition or enthusiasm. And no one can be happy without them. For they are the only things that give meaning to life and make it worth while.

"When one goes to a party abroad, the thing that impresses the observer, is that there is no gayety about it. You do not see people laughing or indulging in banter. They are rather serious and solemn and talk in undertones. Their one object seems to be not to be entertaining at any price, so that it is hard to believe you are not at a funeral. Even groups of men, like the Rotary clubs here, are very quiet. There is nothing boyish about them like the American men.

Cosmo Hamilton (from a sketch by James Montgomery Flagg)

"Why is this so? Simply because these people have no spirit; they have lost their zest for life. They have no hope of anything; nothing to look forward to. Thus the atmosphere of Europe is a gloomy one.

"On the other hand, the rhythm and the vibrations of this country pulsate with youth and vigor. This naturally affects the people so that everyone here is full of life and ambition. Even the stranger who comes to these shores is influenced by the atmosphere so that he too soon falls in with the gay, quick pace. Life suddenly becomes an exciting affair.

"What I have particularly admired about the American woman is the knack she has for getting enjoyment from even small things. If she is president of her club and has an opportunity to introduce one of the literary lions of the day; if she gives a dinner and it runs off smoothly; if she wins some sort of social success in her set—these things make her exuberantly happy.

"The women here have a delightful naiveté and are very easy to please. So much so that they at times seem childlike. Perhaps that is one of the reasons why they keep youthful even when they are grandmothers.

"When an American girl starts off to a party, there is a sparkling air of anticipation about her. Her eyes and her manner tell you: 'It's going to be a marvelous party. I'm sure I'm going to have a grand time.' Just the other day, when I was leaving a woman who was going to an afternoon party, I said: 'I hope you will have a nice time.' 'Of course I will,' she laughed. 'I'm going to raise mischief!'

"It would be hard to imagine any English girl going to a party with such a spirit. She goes bored and indifferent. At the party she makes no effort to relieve the gloom. Indeed, she doesn't seem to have any capacity at all for fun.

"American women are happy in some form of achievement. If they can organize a movement, or do their share in bringing about social reforms, or hold down a position in the business world, they are enjoying life.

"English women are not interested in doing anything, while the French women are primarily concerned with their complexions and their beauty. Those who do have jobs are apathetic about them and they have no ambition to advance themselves. They work merely to mark time or to get some liberty of action which they could not otherwise obtain. The European business girl is carelessly and unattractively dressed and she has a rather hang-dog look about her.

"BUT watch the American business girl when she goes to work in the morning. She walks quickly and briskly, and glows with health and vitality. She is smartly dressed and well-spoken. She takes an intelligent interest in her job and always has her eyes on a better one. Any number of them hold important and responsible positions.

"What is more, in this country, there are no dividing lines between the classes, as there are in Europe. The business girl has as much of a chance to marry a big executive or a banker's son as the girl in a better social circle. The knowledge of these limitless business and social opportunities that are open to her and the freedom she has to make any choice that she wants, make her keen, high-spirited and ambitious.

"As for the women who are at home and who have considerable leisure, I find great numbers of them devoting themselves to the job of being better wives and mothers by improving themselves culturally, and also serving humanity in whatever way they can. For they are the ones who are chiefly bringing about worthwhile social reforms and who are undoing many hideous and unfair laws. Men grumble about laws, but they do nothing to change them. The women p pressure on politicians and statesm and work energetically in peace mo ments. They investigate and establ new methods of child training and ec cation. They sponsor cultural societ and serve on innumerable charita boards. At their clubs they discuss a analyze anything from world politi birth control, to labor conditions a crime prevention.

"All this work is tremendously i portant, for it shows that women contributing to human progress and pa ing the way for a better world. At t same time, these women are living th lives fully and intensely, finding a co plete outlet for their energies and en mous enthusiasm. To my mind, th is the greatest happiness and experien any human being can get."

Mr. Hamilton pointed out that Eur pean women, on the other hand, co not be happy because they have not mu that they want nor are they looking f ways to gain it. They are neither acti nor constructive.

"It is because the modern Americ woman has the opportunity to live h life creatively," he continued, "that s is happier than her grandmother was. do not feel, with Miss Loos, that t women of other days achieved happine by merely working for their families. W may think so simply because they did n complain. They bore the cross of li stoically.

"But life was really a dreadful affa for them. They worked like slav merely to exist. They had no time get any satisfaction from life. Th had no freedom of thought or of actio Women in those days had to depe solely upon their husbands for happ ness. The tragedy of it is that wh their husbands died, they were l stranded, with no interests in life a with no ability to support themselve

"BECAUSE a girl was n trained to earn a livelihood, it meant th she had to marry the first man who pr posed to her, no matter what sort person he was. For the same reaso she could not leave him, if he made li intolerable for her. Imagine the sadis that went on in marriage because of t woman's inability to free herself.

"If she did not marry, she had to e dure the stigma of being a spinster. S was on the shelf so far as life was co cerned. The only way she could mana to support herself, if she had no relativ to live with, was to take boarders in h home, sew for the neighbors or be a go erness. The bachelor girl of today c get into almost any field of work. S can have her own apartment and her m friends without losing her reputation. S has freedom to travel and to enjoy li in any way she wants.

"Since she does not have to depen

(*Continued on page 99*)

The Play's the Thing

By Harriet Menken

Harriet Menken, author, authority on matters theatrical, and conductor of a weekly air-column on Station WOR.

SUCH an infant is the Radio script art in the dramatic firmament, that the leading men who are responsible for the Radio dramas that come to you over the ether waves do not even agree on what material goes to make up a good Radio play, so "you pays your money and takes your choice".

C. L. Menser, for instance, who directs the RCA half hour dramatic broadcasts you hear weekly over the National Broadcasting Company chain, as well as other airy playlets, says, "a good Radio play must have two things,—an elemental dramatic situation and structural simplicity. By the former I mean that we cannot have a play about a man who can't swim, out in a lake in a canoe that turns over, for there is nothing dramatic about this; the man is doomed. Put another man in that boat and we immediately create a dramatic situation. Is it his younger brother, perhaps, to whom the inheritance would come? If so, will he save him? Any number of situations might arise. This is drama."

In speaking of simplicity of structure, Mr. Menser explained that he was almost inclined to think that the real values exist in the old definition: "2 actors, 2 boards and a passion!" He thinks simplicity particularly important on the air because it is not what happens in the studio that counts, but in the minds of the listeners. Mr. Menser believes that two examples of perfect Radio plays illustrating both his points are George Kelly's "Finders Keepers" and Sir James Barrie's "Rosalind", which you heard recently with Billie Burke in the title rôle.

Menser's Motto is: "fewer and better Radio dramas!"

Upon discovering that this talented director was also Chairman of the Play-reading Committee at NBC, I pressed him for his reasons in turning down scripts as impossible material for Radio drama. He admitted to finding some too long, some whose themes were too sophisticated—or shall we say immoral—some with too many characters in the cast, and many plays whose whole point and crux turned on some business that required visualization. Other scripts "C. L.", as studio folk call him, simply found needed too much adaptation, "something that takes too much time. I only added twenty-five words to "Rosalind" for the Radio version", the 37 year old director commented.

But Mr. Menser thinks on the whole that a good play is a good play on the air or elsewhere, a bad play a bad one anywhere. "All this talk about a new medium, and spiritual qualities is just a lot of hooey, if you ask me", the former dramatic director at Knox College, ejaculated.

On the other hand, Vernon Radcliffe, who directs NBC's Radio Guild, one of the best dramatic hours on the air, says, "In a word, we must almost have a certain Radio shorthand. We must have plays that can be reduced to that shorthand, which means plays that have a definite structure, like Pinero's and Fitch's dramas. Then we must have actors who can read, can interpret such a script, who are constituted and trained to read our Radio shorthand."

When Mr. Radcliffe chooses a weekly vehicle for his broadcasts, he tries to select a play he says that has both the right dramatic calibre and Radio adaptability.

By the calibre of the play, Mr. Radcliffe says he means that it must have proved its worth at the time of its run, that its author must be well known, that the play must be of highly dramatic content, and that it must have an idea.

Mr. Radcliffe is not interested in plays

(*Continued on page 106*)

Don Clark, Columbia continuity chief, ponders over the merit of a script.

Keeping up with the March

TWO years of writing and researching in the offices of *Time;* one year of broadcasting weekly electrical transcriptions of dramatized news events over a nation-wide group of 110 Radio stations; three months of rehearsals and auditions in the studios of the Columbia Broadcasting System—these are some of the major actuating elements behind *The March of Time.*

Three years ago at WLW I arranged a daily broadcast of news events which included paragraphs from *Time,* The Weekly Newsmagazine. It occurred to me that other broadcasters also would be glad to present a professionally prepared daily news release. I submitted the idea in a letter to the publishers of *Time* and was subsequently asked to syndicate for them a daily news release, called "NewsCasting", to Radio stations. During the summer of 1928 I visited major stations in practically all states east of the Rockies and we began the release of NewsCasting the following September over a group of 34 stations. By the spring of 1929 we had 80 stations.

I THEN began to work on the idea of dramatizing major news events. Specimen scripts were submitted to the editors. Interested, but cautious, they decided that I should test out these novel dramatizations over a period of several weeks to determine if each week would provide sufficient news for dramatic interpretation to warrant the preparation and broadcast of a first-rate Radio program.

In December of 1929 we made our first electrical transcriptions of broadcasts along this line, sent them to a small group of 20 Radio stations as an experiment, and requested comment. The approval was unanimous. From that small initial group of 20 stations, the feature spread—under the revised title, "NewsActing"—to 110 leading United States stations—from Florida to Hawaii and Alaska and from Halifax to New Orleans.

In December of 1930 we approached the Columbia Broadcasting System and said that we might be interested in transferring and expanding our 5-minute recorded feature into a half-hour chain program—if Columbia could prove to us that such a feature could be artistically and authentically presented. And Columbia's answer was: "We'll prove to you that it can be."

Then the CBS production department and Artist Bureau set to work with our scripts, and Georgia Backus, Charlie Schenck and Harry Browne directed and presented the experimental shows to small—but critical!—audiences listening in audition rooms. One major audition was presented in the evening, "piped", by telephone lines, to the home of *Time* Vice President and General Manager Roy E. Larsen and there was listened

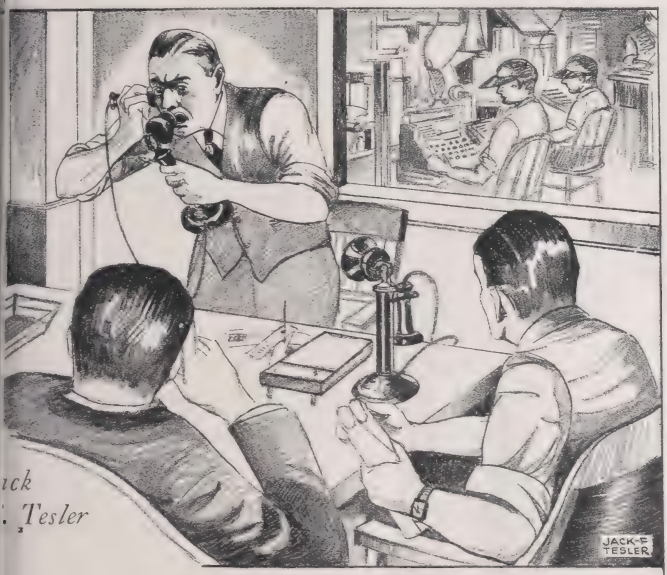
SURROGATE FOLEY reserves decision on the application for sale of the New York *World.* Dynamic little Publisher Roy Howard, of the Scripps-Howard newspapers, chafes at the delay . . . The 2,867 *World* employees know that only a few of them can possibly find employment on the prospective *World-Telegram.* They band together in a last-minute desperate attempt to buy the *World* properties for themselves. The call sweeps through the *World* Building, out into the city to old employees, and to friendly bankers; to newspaper men in other cities throughout the country and throughout the world. Pledges mount to $650,000. Surrogate Foley, touched by the deadly seriousness of the employees, again delays decision. *(clatter of typewriters, chatter, etc.)* In the City Room of the *World,* at 2 A.M., 200 nervous, tense employees—writers, artists, reporters, compositors, pressmen—are waiting for the Surrogate's final decision.

BARRETT: Here is a telegram from the Houston *Texas Chronicle*: " . . . a pledge to buy stock in the New York *World* if put under employees' ownership was circulated here this afternoon. $500 was subscribed in ten minutes with much more in sight. We believe there are thousands of newspapermen all over the United States to whom the *World* has been the law and the prophets and who would pawn their last shirt to help keep the paper as a liberal-independent."

FIRST REPORTER: *(rushing in)* Any word yet from the Surrogate?



SECOND REPORTER: No. Expecting it any minute.

of Time

By Fred Smith

r other executives and the *Time* staff. the end of three months of cease- work—constant molding and revision he dramatic formula—the feature, r the title of *The March of Time*, ready for the air. On the afternoon eding the initial broadcast CBS pre- ed *The March of Time*, by piping program via telephone lines, to sta- tions in the basic network where Radio editors had assembled to listen to that. the *first* nationwide Radio preview. In Columbia's New York WABC studios representatives from leading newspapers, The United Press, the Associated Press, the International News Service and the National Enterprise Association listened to the preview and then unanimously acclaimed the new Radio program to be revolutionary in its technique, amazing in its power to clarify and graphically portray the memorable events of current times.

In the meanwhile, *Time's* Radio account had gone to Batten, Barton, Durstine & Osborn, and into the picture stepped efficient Arthur ("Son-of-famed-bandmaster Pryor") Pryor, Jr., who is manager of that agency's Radio department, with capable assistant James H. Wright. The exigencies of this complicated program were so intricate that Director Pryor elected himself to personally take charge of production, went after the 14-hours-per-week rehearsals with kinetic enthusiasm. Within a week, actors had become so interested in the fascinating quality of *The March of Time* that they said to Pryor: "Don't hesitate to call on us for extra rehearsals—this show deserves and must have extra rehearsals!"

End of the *World*"

FIRST REPORTER: How about the pledges? nat do they total now?

SECOND REPORTER: Nearly a million, and I ar that a big banking house is willing to ck us.

BARRETT: Here's another telegram, boys— m H. V. Kaltenborn. He pledges a thou- ad dollars to the fund.

THIRD REPORTER: Good for him!

BARRETT: And here's another. The Nash- lle Tennesseean has raised $200. But I'm raid we're too late—

(*Telephone rings*) SECOND REPORTER: I'll t it, chief.

BARRETT: The decision!

SECOND REPORTER: (*answering telephone*) es, City Room.

ANOTHER REPORTER: (*whispering to Bar- tt*) Well, what do you think it is? Yes or no?

SECOND REPORTER: (*telephoning*) All right —go ahead.

ANOTHER REPORTER: (*whispering*) It's the decision, all right. Look at Joe's face.

SECOND REPORTER: (*telephoning*) I have it —thanks.

ANOTHER REPORTER: Let's have it, Joe. What's the answer?

SECOND REPORTER: Sold to Scripps-Howard!

(Silence)

BARRETT: All right, boys. It's tough, but we're still newspapermen and we've just got time to get the decision into the last edition!

REPORTER: "Last edition" is right.

(Sound of presses comes up with a roar.)

PRYOR gathered in a nucleus of Radio's finest actors, supplemented them each week with a large variety of actors. Included among the regulars are Bill ("Collier's Uncle Henry") Adams, who impersonated in the inaugural program Mayor Thompson of Chicago and Speaker Longworth of Cincinnati so authentically and so differently that, in both instances, Radio audiences complimented *The March of Time* on its selection of voices so closely imitative of Mayor Thompson and Speaker Longworth. In the second *March of Time* program, Harry ("Show Boat") Browne played The Voice of Fate in the Vivian Gordon melodrama and followed immediately in the hilarious interpretation of Wilbur Glenn ("The World is Flat") Voliva.

Versatile also are regular *March of Time* actors Frank Reddick, Charles Slattery, Herschel Mayall, Pedro de Cordoba—whose "King Alfonso" was a sensation—and Alfred Shirley. Also Lucile ("Collier's Love Story Girl") Wall, who starred as the Spanish telephone operator in the program of March 20th. Announcer for the hour is famed Ted Husing—and *The March of Time* is the only program on which Husing does not sign off by announcing his own name.

For, in Ted's own words—"in this program I am just a Voice—the Voice of *Time!*"

Howard Barlow, musical director of the 23-piece symphonic orchestra which provides the musical atmosphere for *The March of Time*, says he has never seen his men—and all of them have been with him half-a-dozen Radio years—so interested in a program. As individuals they come from many European countries and naturally when a news drama from Roumania, or Russia, Germany or Italy is being enacted, Howard's Roumanian, Russian, German or Italian musicians jump out on the edges of their chairs. Barlow himself, scoring special music for *The March of Time*, frequently sits up until two o'clock in the morning, writing musical atmosphere to surround colorful news dramas.

We who prepare the script work at research and writing seven days a week—and often far into the night. It is frequently necessary to search through histories, encyclopædias and special reference books to discover a single pertinent fact necessary to the clear exposition of a particular news drama or scene. Sometimes we must telegraph or cable our representatives in isolated or far distant spots of the country or world to obtain more complete details of a story we wish to dramatize and to get exact information concerning kind and quality of voices.

Sometimes the news story itself is so replete with dramatic moments that we must select only one or two episodes out of six or eight in the actual story. Such was the case with the passing of the New York *World*. That story ran in the newspapers for a week or more, was continually exciting, constantly dramatic. Eventually we selected for dramatic exposition the court scene where Herbert Pulitzer explains to the judge why the paper must be sold; and the 2 A. M. scene in the old *World* offices when 200 employes, who had been campaigning for three days to raise sufficient money to purchase the *World*, learn that the paper has been sold to the Scripps-Howard interests.

At the other end of the scale, where the news story is very short but contains valuable dramatic elements, we build up the dramatization from the actual brief but significant news story. Such was the case with the story of King Carol of Roumania who visited a Bucharest police station, found the jailer third-degreeing a petty criminal by stringing him up by his thumbs, ordered the prisoner liberated and the cruel jailer dismissed.

In all cases, the advice and cooperation of the magazine's highly specialized staff of writers is invaluable in bringing the half-hour production to the state where it becomes a well rounded and precisely balanced program. Active advisor on script and production is Vice President Roy E. Larsen. In reality, behind *The March of Time* are the personalities behind *Time*, the Newsmagazine. They contribute ideas, counsel and enthusiasm for this new kind of news-reporting: Henry R. Luce, president; Managing Editor John S. Martin; Foreign Editor Laird S. Goldsborough; National Affairs Editor John Shaw Billings; Music Editor Elizabeth Armstrong; Mary Fraser, head of research; Managing Editor of *Fortune*, Parker Lloyd-Smith. Batten, Barton, Durstine & Osborne, intensely interested in the success of the program, contribute much editorial and production advice of great value through Vice Presidents Roy S. Durstine and Paul Hollister.

Fred Smith, producer and author of the "March of Time" broadcasts.

As a result of this concentrated flow of ideas and interpretations from many sources, the program finally goes out on the air and into the homes of America's millions as free from bias and prejudice as *Time* itself. Never can we tell a week in advance what stories will be ours to dramatize. In a large sense, the author of this produc is—Destiny! Back of all the sonal artistry expended upon week's performance, a greater any human hand is writing the ies and dramas which finally their way into *The March of T*

* * *

One of these days s great philanthropist will pos worth-while prize for the pe who creates a new kind of prog that will add new zest to R listening. We have had Amos Andy with their program w stands out in Radio like Ch Chaplin in the movies, and we l had the Atwater Kent, and Vi Ware Murder Trial and other standing events. With the pre tation of *The March of Time* a contemporary magazine Radio gest believes a new and bold has been brilliantly developed mark a new epoch in broadcast

Mr. Fred Smith, managing tor of *The March of Time*, at various times been an ac contributor to Radio Digest. has been a pioneer of new id When Bob Casey wrote the serial s *Step on the Stair* for Radio Digest years ago, Mr. Smith was asked dramatize the story for broadcasting. was at that time director of the Cro station, WLW, at Cincinnati. Sixteen the most powerful stations in the Un States then presented the *Step on Stair* in weekly episodes from coast coast. So popular and unusual was program that several of these stat have repeated the series two and t times.

Later Mr. Smith took a hand in p ducing the notable Majestic progr featuring Wendel Hall, the Red Hea Music Maker. He worked out ne sound effects to illustrate highlights the program. Realism is Fred's mid name.

These experiences have gradually up to this last grand departure— *March of Time*. To him the concep is not new but only the realization crystallizing of an idea that has long b in process of evolution from a fur mental thought. *The March of Tim* the ultimate product of a caref worked out laboratory experiment.

We would vote to award Mr. F Smith the season's Gold Medal for tinctive achievement in the presenta of an outstanding Radio program.

Our Columnist Greases the Skids—Slides out a few Pearls of Great Tripe and some True Defective Stories

By Ray Perkins

WHEN you buy a magazine entitled RADIO DIGEST, I suppose it's reasonably fair to assume that you expect get printed matter having something whatsoever to do with Radio. The ulation department of this handbook microphonetics claims for its readers overwhelming interest in Etheriana. I e therefore been coaxed and wheedled the Editor into a promise, tly given withal, not to go tering off into such subjects true defective stories or the life of the herring.

Vell. If you want to be con- ered an intellectual heavy- ght on the subject of Radio. re are three noncopyrighted rls of wisdom you can scat- hither and thither. Pearls of at tripe. They should be said while you cock your head one side and squint one eye r so slightly dill-pickle fash- , a gesticulatory combination ived from the Movies denot- deepness of thought. These ee cover-alls are: (a) "Ra- is still in its infancy"; (b) Ve have hardly scratched the face"; and (c) "Television is st around the corner."

PUT them all to- ther and they spell horse- athers.

The trouble with Radio today that there isn't anybody who nows what's the trouble with adio today. Except I. (Don't owd. I will not be bullied.) he secret is too many songs of ne I-Love-You school. They're aking the good old microphone icky as a wet lollipop. That's hy we have a new wealthy class the country today—million- ire megaphone manufacturers. lot of singers have to use meg- phones so the songs won't spill ll over them and get their lothes gooey. Unquestionably he present overproduction crisis n the sugar industry can largely be traced to the vogue of Sweetness in Song.

My old friend Lew Conrad, the verse and chorus man, has such sweetness of tone, that he rarely takes sugar in his coffee, contenting himself with singing a few bars of *Just a Gigolo* into his cup. It's non-fattening too. I know a crooner whose voice is so sweet that I'm laying odds that by summer time it will draw flies. He'll have to have an assistant standing by the microphone with a Flit gun.

Problems like that do not bother me. My voice fortunately is just a teeney-weeney bit sour and I aim to keep it that way. No megaphones for this little man. I wouldn't even use a funnel.

Another difficulty we are experiencing at the studios these days is the matter of mixed quartettes. A mixed quartette is a very delicate thing to handle. They say the best thing to do is put a barrel under its stomach and roll it back and forth. If that doesn't work you should send for the fire department or a visiting nurse.

I remember in my student days at dear old Milkstool University we had a mixed quartette of six chemistry students. And you know how chemicals mix. Well, the annual spring concert always came the night following the big ring-around-rosie contest between dear old Milkstool and the State College of Taxidermy, even on years when the contest was cancelled. Incidentally we usually licked the stuffing out of the taxidermists.

It's hard to snap Ray Perkins because he's always wiggling his ears, but this piano is so grand he doesn't dare.

WELL, one time just as the quartette was bracing itself for their second number, one of the singers—(I think it was the second tenor, or no, I guess it was the assistant cashier)—came down to the footlights and said "Is there a Doctor in the Audience?" Well it seems that old Doc Hairoil had been sitting in a box, so that his good ear was nearest the stage, which allowed him to hear the first number. So the Doc stood up and said "Yes, there's a doctor in this audience but from now on there's no audience in this doctor"; and with that he got up and left the hall on his good ear.

But getting back to some-

Three Police Commissioners Reveal How Radio is Cutting the Cost of Prosecution and Preventing Crime

Caught in

A DARK, cavernous alley behind a bank in the Highland section of Detroit. An hour after the last homeward-bound talkie fan has turned in. No moon, so Police Radio Cruiser No. 8 slides unseen into the black alley.

Four armed patrolmen jump out of the car even before it stops, guns drawn, ready for action. Two race to the rear of the bank. Two run for another throbbing car parked in front of the bank. No lights on this big car either, but its powerful motor is panting, ready to go.

Then Police Cruiser No. 10 races up from the opposite direction at forty miles an hour. Brakes squeak. A give-away.

Action! From out the shadows before the bank darts a watcher, who jumps into the driver's seat of the suspect car. A raucous horn—the signal—and the bank's door opens. Satchels are flung into the get-away car, and two dark figures follow, leaping into the tonneau. They are off with a grinding of gears.

"Stop, or we'll shoot!" A yell from the occupants of Cruiser No. 10. But the big car zooms on. Then, aid from the alley! Car No. 8, first on the scene, is back on the job again. It is out of its hiding place, the crew of four picked patrolmen on the running board, shooting as they go.

Bullets go wild, ricocheting from neighboring houses. It looks as if this will be one more getaway in Detroit. Then . . . flash! An explosion louder than that any pistol could make. A tire is pierced. Into the curb jumps the big car, completely out of control.

Pistols in hand, Detroit's Radio cruiser police close in to capture three desperate men. One is severely wounded, one is bleeding from slight wounds, but the third surrenders and then turns to his captor with a slightly dazed look, "How the hell did you get here?"

Yes, how had the police gotten to the scene so quickly? Before the robbery was perpetrated, before the loot had been disposed of, the robbers were "caught in the act."

Detroit Commissioner of Police, Thomas C. Wilcox

Experienced bank thieves, the three had be careful not to set off any alarms. Their ace lene torch worked noiselessly. But they l made the error of leaving their getaway parked at the curb with a purring motor i neighborhood where all good householders ha garages. Edward Hight, an astute young m returning home on foot, had noticed it.

HE KNEW the building wa bank. Racing home, he phoned police he quarters. In *fifteen seconds* Police Stat WCK was on the air. The dispatcher nounced, "Cruiser No. 8, go to 1234 Bl Street. A bank robbery suspected. Cru No. 8, go to 1234 Blank Street. A b robbery suspected." And then, "Cruiser 10, go to reenforce No. 8 at 1234 Blank Str A bank robbery suspected."

Riding around in their precincts in neighborhood, the Radio patrolmen heard t instructions via the loud speaker placed o their heads. Instantly they were on the They caught the robbers red-handed. No t to establish alibis was given. There was opportunity to dispose of incriminating l

...the Act!

By Janet A. Dublon

Trapping Criminals Red-handed by Fleet Johnny-on-the-spot Police Cars, equipped with Radio Receivers

...e three criminals were sentenced. No clever ...minal lawyer could find an out for them.

This is an actual case report of an arrest ... the squad of Cruiser No. 8 of the Detroit ...lice. It is just one example of the many ...strations of hold-ups and criminal acts ...ich have been brought about by the opera... of the new Radio police system which ...kes the law "Johnny-on-the-spot" every-...ere this device is installed.

In Detroit, pioneer city in this able method ... giving wings to the law, Commissioner ...omas C. Wilcox reports a yearly decrease ... the number of crimes committed. Total ...micides, armed robberies and cars stolen in ... 29 were 11,284, but in 1930, when Detroit's ...dio cruiser force was increased in size, but ...138 of these crimes had been committed, a ...crease of 28 per cent.

Criminals are staying away from Detroit, ...t they are fast finding it difficult to locate ... many of the other large cities. Chicago has ...ed of acting as the butt for all gangster ...kes and has installed the largest police Radio ...stem in the country; Washington, D. C.; ...ffalo, N. Y.; Toledo, Ohio; Rochester, N. Y.; ...ttsburgh, Pa., and Cleveland, Ohio, in the east are operating police Radio stations. Following the trail west and south we find Louisville, Ky., Atlanta, Ga., Minneapolis, Minn., San Francisco, Cal., Pasadena and Tulare, Cal. State police in Pennsylvania and Michigan have State-wide patrols. Every day the Federal Radio Commission is presented with new applications from wise city officials who are anxious to use this new, modern method of crime detection. Many of the cities mentioned have had Radio patrols for so short a time that the police, ever cautious in publicizing, are wary in giving figures and divulging methods of operation, but our correspondents all over the country, who have seen the systems in operation, report amazing progress.

LET'S pay a visit to one of the police Radio stations and take the wheels apart . . . see how it works. The Federal Radio Commission authorizes the use of short wave transmitters to broadcast "emergency communications from central police headquarters to squad cars or other mobile units." So unless you have a special short wave set you can't hear squad instructions on your receiver, which is tuned only for the longer wavelengths. Give up the idea of getting your vicarious thrills that way, for you'll have to drop in on one of the Radio stations with us.

Here, in any of the wide-awake cities mentioned, you'll find a switchboard where incoming calls for help are received. In Chicago, with its squad of 100 cars, you'll find ten men on deck at telephone number "Police 1313," pencils poised, ears alert to catch names, addresses, details. In smaller cities, like Tulare, Cal., with its two patrol cars, one man can handle all the incoming pleas for assistance. But the system is the same. On the instant the telephoned details are down in writing, the man at the broadcasting set is handed the information slip. With amazing rapidity, he barks into the microphone on the desk before him,

Austin J. Roche, Buffalo Commissioner of Police

"Squad 141, go to Blank Street and John Avenue. Two negroes are holding up a white woman." His announcing must be crisp, clear and couched so that there is no possibility of misunderstanding.

Simple, isn't it? And the method of receiving is just as easy to understand. A car has been equipped with a special short-wave receiver tuned in on the Police Broadcasting Station. A squad of four or five husky policemen with a sergeant or other officer in charge, hops in. They proceed to their "beat" and cruise around the streets waiting for a call, and watching, too, for unreported violations and stolen cars. Suddenly the loud speaker over their heads inside the tonneau roof speaks. "Squad 141, go to Blank Street and John Avenue. Two negroes are holding up a white woman." The police car siren goes into action. A path is cleared, for every motorist knows enough to get out of the way of this screeching speed demon. The squad arrives while the hold-up is still in progress, arrests the surprised criminals and the good citizen who has seen it from some window or doorway, has the satisfaction of knowing that his telephoned report prevented a robbery.

With the old system of police on foot reporting to patrol boxes every half hour, it might have been more than thirty minutes before one lone policeman could receive a report and hurry, unaided, to the spot. In the meantime, bandits have escaped and the hysterical victim may even be unable to describe them. Everywhere in the country criminals have become more and more audacious. They have taken advantage of every advance of science and every method of increasing the speed of escape.

Machine guns have been called into play, new methods of opening hitherto uncrackable safes have been devised, tear gas and other chemicals have been used, and last and most important, increasingly speedy cars have been used for get-aways. Police were badly handicapped by these high-powered cars. Many times before a report of crime was relayed to its patrols, the crooks were miles away from the scene on the open road. But now, with police on the air instantaneously, escape is becoming increasingly more difficult. In Detroit, where the system has been polished to utmost precision, it takes only fifteen *seconds* for a report to go on the air, and one of the 100 cruisers reaches the spot in an average of ninety seconds. One hundred and five seconds doesn't offer much opportunity for a getaway, does it?

But let ex-commissioner Rutledge, originator of the idea for Radio equipment for Detroit cars, tell the story in

John R. MacDonald, Chief of Police, whose progressive methods in small Tulare, Cal., might set the pace for many a metropolis.

his own words. "Snaring criminals in a Radio network, woven by broadcasting to Radio-equipped cars, has become a matter of seconds," declared Mr. Rutledge in an interview with one of our correspondents.

"Seconds are precious to the lawbreaker. They spell the difference between escape and capture. The wider the margin of time, the better his chances to escape. By the use of Radio the Detroit police department has pared this margin to a minimum, and they are catching the criminal red-handed. And too, Radio is cutting down the cost of law enforcement. One hundred fifty men on duty in Radio cars are equal to at least 400 men on foot."

But there's a funny side to this police Radio tale as well as the serious side.

Originally police Radio sets were ordinary receivers, and they could be tuned in on any station. Many a squad call went unnoted because the police were too busy listening to Amos 'n' Andy to tune in on the police headquarters! But there is no temptation to stray from duty now because the new sets are permanently and unchangeably tuned in on the police wave length.

Then, too, originally police reports were broadcast over the regular broadcasting channels through some local operating stations. In 1929 Chief [illegible] operated by that method with WGN functioning as intermediary. A woman saw burglars looting an apartment across the way, under her very nose. She phoned a report to police headquarters. The police called WGN which stopped the entertainment. Clang! Clang! "Squad Attention!" barked Quinn Ryan who then directed certain squad cruisers to speed to the scene. But when they arrived the birds had flown. In the looted apartment a Radio was going merrily, and on the table was this note, "Thanks for the tip-off."

But that, too, doesn't happen today because police have their own short-wave lengths now. However, they are making use of the entertainment-broadcasting stations, too, in the unique field of crime prevention.

Arthur B. Reeve, author of the Craig Kennedy detective stories, was one of the first to see the value of Radio as a crime deterrent. He conceived the idea of a "Crime Prevention series" and brought about its production over the National Broadcasting Company chain. And Austin J. Roche, Buffalo Police Commissioner, in addition to maintaining a police station for broadcasts to police cars, presents a weekly "crimelogue" over Station WGR of the Buffalo Broadcasting Company.

Many a reader of this story will remember having heard these stirring police dramas from Buffalo. The unique feature is that they are based on fact. Cases are taken from police records and dramatized by Herbert Rice of the broadcasting station. And the able dramatic staff of the station is assisted

A Radio cruiser in Detroit captures two fleeing bandits with their loot.

The Royal Maestro

King Paul

Whiteman is growing Thinner! Two Chins remain firm of his famous Trio. But he's Losing none of his Mastery of Jazz

By Ann Steward

Paul Whiteman, dapper and smiling, as ever

DOES Paul Whiteman deserve the title he wears so gracefully —the King of Jazz? Is he in reality the king—or is he the ure head letting some one else do the ork for which Whiteman gets the glory? Both of these are legitimate questions, ten asked, and why not? Our only op- rtunity to see Whiteman has been on e concert or vaudeville stage or in his cent picture, *The King Of Jazz.* We ve never seen him as he is—minus his age manner—minus his glamorous set- ng we all know so well.

But at last there comes a night when e are privileged to see the real White- an—the Whiteman devoid of all pre- nse—the Paul Whiteman who is not the ing of Jazz, but rather the business man, ie brains of a world famous organiza- on. He is to be found in a Chicago night ub. We go hopefully because we under- and that here is to be found a new and n impressive light on the great maestro.

As we enter the cafe we are reminded hat it was in this place that a now amous band made its start to stardom nd New York. But what a changed ight club it is now. There are two ooms, one large, for the guests and one mall, used for the Whiteman broadcasts nd where only the privileged may enter. Ve stand at the entrance of the larger, ewer room where lanterns bearing the ace—the familiar, caricatured face—of 'aul Whiteman light the way for the lancers.

The band is playing. As we near the tand we see the greatest of all living naestros—Paul Whiteman, the King of Jazz. He is not smiling.

He is listening to his band and his rhythm-conscious hands are beating time at his sides. The number is smooth and new. The dancers crowd by in a great merry group. They stop a moment beside Whiteman, almost near enough to touch him, and undoubtedly they thrill at the proximity, for after all, it is not every one who can boast that they might have touched Whiteman had they wished. That is enough description of what meets our glances when we first enter Paul Whiteman's night life.

THE band plays on smoothly, grandly, majestically. One that didn't take the time to analyze it might say, he has a very good orchestra —he must have, for is he not Paul Whiteman? But one who knows would say—he has power, he has finesse he has rhythm, he has melody. It all goes to make a perfect band that cannot be described in colorless words. It is like a great ship steered by the firm hand of one lone man. There is a feeling of mightiness there, whether one wishes to admit it or not. He has well earned the title of King, Paul Whiteman.

And then of a sudden the music stops. The crowd claps and whistles because this is college night at the cafe. Whiteman bows and smiles. His men bow and smile. They leave the stand and go into the next room, the broadcasting room. It is time for the evening broadcast of Paul Whiteman's Paint Men over an NBC chain. The men take their places solemnly, some of them smiling quietly. Whiteman says something audible only to his men. They laugh out loud and make fun of one another. They relax.

Paul, the great, moves a mike, moves a chair, talks to the boys, looks at a sheet of paper, he holds in his hand and then steps to the front of his orchestra. "Let's go over that tune again, boys." An upraised right hand. A sudden hush falls over the room. It is only practice but it might well be a finished performance. The hand descends and softly come the full notes of a bass clarinet.

The song rises, swells, pauses for a vocal chorus and flows on to fade and end abruptly in an unruffled silence. It was only a commonplace dance number, but Paul Whiteman had glorified it and made it as beautiful as one of the popular classics.

A TELEPHONE bell rings. It is time for the broadcast and Whiteman raises a plump finger to his lips. Then his hand goes into the air, three fingers upheld. One finger comes down. The second follows. The third finger falls and the hand swings down in a graceful motion. The *Rhapsody in Blue* comes out of a pregnant silence and the half hour show is on.

The Whiteman we now see in front of his orchestra is not the Whiteman the

public knows. His face is stern and set. His eyes are fixed straight ahead of him in deepest concentration. His body sways to the music but there is no comedy in it now. This is grim, hard, earnest work by one of the greatest living artists. Suddenly he turns and hurries into another room where a receiving set is turned on. He listens to see if his band is coming through properly. then he is back again. The program continues on.

Some one whispers—makes a sound in the audience. Whiteman turns and frowns slightly, his hand still swaying in motion. guiding the rhythm of his music. The whispering has stopped. He is nervous. this King of Jazz. He doesn't want talking and whispering in his private place of business. The cafe out there in the other room is the place to go if one would be social.

IT IS time for a solo. A youngster scarcely out of his teens steps up to the microphone. Whiteman grins and tweaks the boy's ear as he passes. It is a moment of kindliness. of relaxation. The boy begins to sing.

Whiteman watches him, beckons a trumpeter forward, a saxophonist back. The solo has stopped and Paul is again waiting for the signal. The air in the room is motionless. The silence is tense and drawn. We are tempted to scream just to relieve the awful lack of sound. The signal comes. Down goes the hand. We are saved from making a severe mistake.

A chair must be moved. Whiteman moves it. A music stand must be put to one side. Whiteman puts it there. He acts as stage hand in between his periods of leading his band. He waves to a friend and smiles. He goes across the floor to speak to some one. He makes no sound. The round, chubby man is incredibly light on his feet. He, as well as all of his men, is a shadow. Their music is the only tangible thing in the room, that and the breathless silences in between. Not a sound, a cough, a sneeze —nothing but music. Whiteman is on the air.

AND at last the broadcast is over. We go back to the main cafe and the band goes directly to the stand and begins to play a dance tune. After that comes a concert, solo numbers, the whole *Rhapsody in Blue, When Day is Done*—the Whiteman repertoire.

We look at the leader. He has changed somehow. He is thinner—much thinner than the man we knew as the King of Jazz in the talking picture. True, Paul has traces of the three magical chins, the same tiny black wings on his upper lip. But is it Whiteman? He smiles, he chuckles, he laughs quite frankly—and then we know it is Whiteman. a thinner Whiteman, it is true, but a merry, dapper man who is just shaking off the spell of the hardest part of his daily work—his period of broadcast.

He is on and off the stage where the band is. He sways with the music whether he is leading or listening. He talks to an acquaintance. He listens to the music from every corner of the room. It must all be perfect. He darts back with a friendly pat on the head for one of his saxophonists. His funsters make a great deal of merry. Some of his performers go through a floor show. And at two o'clock Whiteman and his band are still on the stand, still entertaining, still working. Their last period of rest came at a quarter of twelve, two hours and fifteen minutes before. It reminds one of a marathon and when they do stop finally, the crowd lets out a mighty cry, "More!" But there is no more for the present.

One more dance and then Whiteman and his orchestra are through for the night. The crowd does not disperse immediately. They gather around and eat a little or else talk to some one in the band. They wander out slowly—a little loath to leave the place where they spent those happy, intimate hours with Paul Whiteman. And then too, the King of Jazz has not yet left. He sits in a chair and looks at the people around him. He talks just a little to your writer. "I have a bad 'code id da dose.'" His upper lip crinkles in a characteristic smile. His eyes dance merrily. "But I feel all right now." He laughs to prove it. "You don't want to ask me anything? Very well, but I'll answer anything you want me to, providing, of course—" and he walks off chuckling to himself. We suspect him of being just a bit weary.

IN a moment he is back again. "Let's go home. I've had an awful day. Let's go." We get ready to go. We stop and look at pictures in the lobby. We chat, and then finally your writer screws up enough courage to ask just one question—"When will you give up your work, Mr. Whiteman?"

"Stop leading my orchestra? Oh, my goodness, you can't expect me to answer that. I'll never stop as far as I know. Sousa's still going and he's only seventy some. I have a lot of time to keep going. When will I stop? Never, I hope."

And when I asked a close friend of Mr. Whiteman's the same question, he replied, "Whiteman will never voluntarily give up his band and his work. I am convinced that when the end comes for Whiteman it will surprise him in his boots with a baton in his hand."

So much for the evening with Paul Whiteman. It was interesting, awe inspiring and happy. We heard the Whiteman concert. we heard the broadcast from its source and we danced to the Whiteman band. Could humans ask more? But, in addition, we found out some things about this mighty charact that his followers would undoubtedly li to know. One little instance that sho just how big a really big man may be.

Whiteman recently gave a free conc at one of the Universities in Chicago. I wanted to be charitable in the name musical education. And everyone kno that he was just that. He played l concert in the name of charity to crowded hall at the University when might have charged and collected dollars for each seat in the house. It w just one of the numerous gestures, o more generous gift to music lovers a those who would like to know more abc music.

PEOPLE ask, "Wl wouldn't want to go with Whitema band?" Truth to tell, there are plenty musicians who could not and would n stand the gaff for more than a we Before a man joins Whiteman's staff he asked two questions by the maestro hi self. "What pay do you want?" a "How many hours a day are you willi to work?" Whiteman never tells a m how much he will pay him. The m sician states the price at which he w automatically become a happy man. it is too steep for Whiteman he will n pay it, nor will he take the man at lower price. "I want you to be hap with me. If I pay you less you won't happy." If the price is all right, Whit man says, "You'll probably work twen hours some days, my boy. You may g very little consecutive sleep for weel Do you want the job bad enough to into it and stick?" Whiteman nev forces a man. If he wants them to cor with him and they are willing, they mu be perfectly happy in the bargain or th are lost as far as Whiteman is co cerned.

AND speaking of t twenty hour a day schedule, that is n the exaggeration it seems. Of cours not all days are that long. But there a times when Whiteman knows his ba needs practice, and when they need they get it. For a local broadcast alon he sometimes practices for hours. Oft after the cafe is closed, Whiteman and h orchestra stay until six or even eight the morning, working. I said Whitema and his band. That means that eve hour that the band works, Paul Whit man, the King of Jazz is working als working for each man in his band, hol ing each one in his power, his power leader over many units.

That is all your writer can tell yo To see for yourself is to feel the might ness of Whiteman. He is not merely a orchestra leader, an artist or a celebrit He is the man who is responsible for o modern music. He is the man who back of compositions such as his then

(*Continued on page 100*)

"THE find of a decade," chorused New York critics after her recent appearance in Metropolitan opera. "Mikes a million dollars," said the man in NBC control room when she made her Radio debut. She's a French coloratura. U-mm, let's see, ten years back—? She's booked CBS now. Think of Spanish lace and pearls—and EYES—when you hear her!

Lily Pons

Alma Ashcraft

CRINOLINE GIRL of WCKY—typical Kentucky beauty, in a state famous for beautiful women, fine horses and other excitement. She goes crinoline because of the sweet sentimental songs she sings that were popular in the Victorian era. "In the gloaming, Oh my darling."

Margery Maxwell

"FIND of a lifetime," say we of Miss Maxwell, coloratura of the Chicago Ravinia opera. She began in a church choir, studied under Daddi in the City-by-the-Lake, made her debut in opera with Galli-Curci at 19. She has appeared in concerts from coast-to-coast, and is now sponsored on one of the Swift programs over NBC. Her hobby—singing for the Off-the-Street Club urchins of Chicago.

Paul Whiteman

BIG Glorified Jazz and Paintman from Chicago—at least for the present. And that's Niles Trammell with his eye on Paul's pen. Mr. Trammell is V. P. of the Chicago branch of the NBC and Paul has a five year contract with artist's bureau before him. Will he sign it? Will Whiteman's band ever play Rhapsody in Blue? Don't be silly.
(See story in this issue.)

Ginger Rogers (left)
Lorna Fantin

SHE'S got your number, Ginger. Both are Columbia artists. Miss Fantin is famous numerologist and calculates your destiny according to the letters in your name. Ginger walked in on her and wouldn't you love to know what she made out of the name "G-i-n-g-e-r R-o-g-e-r-s"? Must be good because everybody knows Ginger took her audiences by storm from the day she entered a Texas Charleston contest.

Ted Maxwell (left) Charlie Marshall

JUST a coupla hard-working Vermont Lumberjacks gone West. That is, they do their vocalizing in the San Francisco NBC studios. How their backs must ache! Look at that big pile of sawdust under the log where they struck a knot! No joke fiddling logs all day. Guitars are better. Sound your A, Ted, and spare that tree!

Jolly Bill and Jane

"SURE," says Jolly Bill (Mc) Steinke, "'tis a foine time, Jane, for the two of us to be takin' flight over the Emerald Isle." Little (Nora) Jane Harbater gazed up wistfully. "Oh Jolly Bill, I'd be so plazed ef you would." And whizst —away they wint in their magical airship dressed in their very best. You must have heard them on their NBC Cream of Wheat program.

Grand Duchess Marie

SUZERAIN of Style. Grand Duchess Marie left her European Duchy and palaces to broadcast to American housewives through the Columbia system the last decree in fashions for dress. She is regarded as one of the world's highest authorities in this realm. And plaids, my deah, are quite the mode.

Dorothea James

PRINCESS CHARMING, Good News—Strike Up the Band —ta-taTA-ta! That's Dorothea all over. She's a sparkling bit of femininity in all of these great musical shows. Yeah, and she's been in motion pictures ever since she wore pigtails (if any). She gave the Radio listeners a treat in the CBS Radio Roundup.

Batter Up!

DIAMONDS are trumps and the American sporting world is in the pitcher's hands for another thrilling season of baseball. Where will these two famous stars be when the 1931 pennant is in the balance? France Laux of KMOX (center), introducing Jimmy Foxx (left) and Bing Miller of the champion A's to St. Louis audience.

Mickey Walker

WHEN Mick meets Mike it's a round of interesting ring chatter; at least so thought the fans listening in while Mickey Walker was interviewed by Don Hix at WFBR, Baltimore. Don jabbed questions right and left until Mickey hauled off and tucked Mike a sock on the ol' push button.

Rosaline Greene

IT'S tough to be a punching bag when Rosaline gets down to action. But a girl who goes in for Radio dramatics as she goes on the NBC New York staff must keep in trim—and boy what a wallop she carries in that left! Miss Greene is an all around athlete. Uppen atum, Rosaline!

Mario Chamlee

HE takes the cake and well, you know, this is the famous tenor of the Metropolitan Opera in his character as Marcuf. It was the character that made him supreme in his success. Radio listeners heard him during the Swift Garden Hour. Alas, Marcuf, 'tis said you cannot eat your cake and have it too. (On NBC.)

Parker Wilson

"HEE he he he ha ha h-rrr!" You have heard that terrible mysterious laugh of Yu 'An Hee See during the broadcast of the Collier Hour on Sunday nights. Here is the villain who does it. It's one of Sax Rohmer's most weird characters. Pardon, Yu, a good manicure would do you good.

Richard Crooks

FROM palette to palate Mr. Crooks applies his art, insomuch as a palate functions in the control of a voice that is said to most nearly rival that of the late Caruso. Mr. Crooks is famous in opera and concert. He was recently guest artist on the NBC network on a program heard from coast to coast.

Marion Marchante

WHEN lights are low and you have 570 kc on the dial it may happen you will be listening to this charming damosel, for Marion is one of the sweet voices you hear during the Shubert programs at WMCA, New York. She is usually identified with one of the current musical shows. Marion, please, step up here to the mike and—that's a good girl.

FOR nice look-see-hear you gotta have a nice look-see-hear girl and that's why Columbia began look-seeing around for a perfect type for their new television experiments. Hundreds of girls were given photo tests before Natalie was chosen. She is on record as the first artist selected by a national chain especially for television.

Natalie Towers

Irene Dunne

ONE by one the great stars of the sound pictures are becoming more closely identified with Radio. And here is the lovely Irene Dunne in her famous character of Sabra of the Radio Keith Orpheum picture, Cimarron. Radio folk attended a large reception in her honor at the Sherry-Netherland. You hear her on the NBC-RKO broadcast features.

GABALOGUE

Nellie Revell, "The Voice of RADIO DIGEST"

By Nellie Revell

The Voice of RADIO DIGEST

EVERY Wednesday night at 11 o'clock Miss Revell takes her WEAF mike in hand and rattles off a good old fashioned chinfest about the great and near-great of Radio and stage circles. On this page you will read some of the things she broadcast in case you did not hear her on the NBC network.

HOWDY, friends. Now before I get started on the Old Settlers, I've got a lovely task of hand-shaking to do, and some new-omers to welcome, because we've got ome new neighbors moving into Radio-ille. * * *

This job of welcoming people to adio port, or should I say air-port, nd presenting them with the dials to he city makes *me* feel I ought to have pair of spats, a cane and a gardenia, ke Grover Whalen. * * * (Don't rowd, boys, make way for the camera-ien). * * *

Let's begin with music. * * * Wasn't hat Deems Taylor concert last Sunday n inspiration? * * * The composer of he Peter Ibbetson opera, certainly has ound a way to relieve Sunday traffic ongestions. * * * Everyone will stay ome to listen to Mr. Taylor's concerts. * * * And by the way, *Mrs.* Taylor is in professional life, Mary Kennedy, an actress and also a playwright of distinction. * * * They have a very interesting little daughter, who calls her parents "Deems" and "Mary". * * * A friend recently asked the child what she wanted to be when she grew up. * * * 'Oh, I want to be a writer like Mary," she said. * * * "Well, what are you going to be before you grow up?" the visitor inquired. * * * "Oh," she replied, "I—I—guess I'll be just a musician like Deems." * * *

And speaking of opera suggests that Radio's Easter gift to opera lovers is Madame Pons, of the Metropolitan. * * * Zanitella, the tenor, and his wife, Marie Gay, heard her in a provincial theatre in Europe and two years ago sent her all the way to America for an audition with Gatti-Casazza of the Metropolitan Opera House. * * * Gatti sent her back to Italy for another year. * * * She returned to New York last fall unheralded and almost unknown. * * * But one Saturday afternoon last January, she made her début in "Lucia," and was immediately a blazing, breath-taking success. * * *

AND strangely enough, this wonderful lady, Lily Pons, is a *singularly naive person.* * * * The morning of her début, she was serene and utterly unconcerned. * * * She strolled down Broadway, bought two dresses and walked home to Washington Heights (which incidentally is *some* walk). "I don't see why everybody is so nervous," she said, "all I have to do is to go out there and sing." * * *

The Madame's English vocabulary is limited to two words, "Okay" and "Thanks"—both handy words. Her triumph at the Metropolitan recalls one I witnessed some years ago when the incomparable Fritzi Scheff made her début there. I don't believe I've ever seen such a radiant creature as she was that night. * * * One critic described her as a piece of bric-a-brac aflame that electrified the audience. * * *

I REMEMBER she was nicknamed "The Baby of Grand Opera." * * * After deserting opera, Miss Scheff appeared under C. B. Dillingham's management. * * * Victor Herbert wrote four operettas for her, among them, "Mlle. Modiste." * * * still regarded among our American classics. * * * Mr. Herbert told me shortly before his death that he hoped to live long enough to write one more opera, and that Fritzi Scheff would sing it. * * *

I had the pleasure of exploiting Miss Scheff oftener perhaps than any other press agent of the theatre. * * * In the many years I have known her, and travelled with her . . . (and through some one-night stands, too) . . . I can't recall her ever being unfair or unkind. * * * She was the wife of the late John Fox, Jr., the novelist. * * * And unlike many other celebrities, no breath of scandal has ever touched her name. * * *

Many spectacular stunts were attributed to Fritzi Scheff and she has never been able to live down such stories told about her temperament. * * * But most of them were inventions of over-zealous press agents. * * * I am talking about Fritzi Scheff because she is coming on the air next *Wednesday* night. * * * No

Winds in the Willows

Rudy's May Choice of "Hits of the Month" Leads to Reminiscences about Boyhood Days, Working in Father's Drug Store

ENGLAND, or London, to be more exact, has again contributed to America's Tin Pan Alley with a song that I think is perhaps one of the most beautiful things I have ever heard, although like *Body and Soul* and so many other musically excellent songs it will not fascinate the hard-working masses who want simple rhythms. I have rarely been satisfied with my own work and the work of my band on Victor records; maybe because I am super-critical, or that by the time the record gets to me I have lost my taste for that which I once enthused about, but this is one song that I feel we did full justice to in our Victor recording of it.

It begins with yours truly playing a baritone saxophone. The verse which follows has the most melancholy quality about it, and is played by Del Staigers, featured trumpet soloist with Goldman's band, whom I am very happy to be able to engage for our Victor recordings. Del does full justice to the exquisite melody line of the verse. I was in fairly good voice on the day we recorded *Wind in the Willows,* which was preparatory to our leaving on our tour of Paramount-Publix Theatres, and although it has an odd range I am quite satisfied with the record as a whole.

To the average person the first playing of *Wind in the Willows* will lead him to believe that the orchestra is either playing out of tune, or that one half the band is playing one song, and the other half another. This is due to the fact that certain melodic phrases are played in whole tones. Nothing can express the various sounds of nature as well as melody written this way, and the effect of the wind in the willows has been conceived by these whole tones. Upon the second and third rendition of it, the haunting and unusual qualities of the piece should grow upon even the layman, to make him like the composition. The thought is very pathetic, beautiful and sad—the fact that the girl is gone and only the wind in the willows left to remind him of her.

I doubt if this season, or any other season, will see a song so really beautiful and deserving of a three star rating in composition as *Wind in the Willo*

We play it very slowly, abo thirty-five measures a minu which produces an effect qu in keeping with the theme. T song is published by Harms, I

When Your Lover Has Gone

MOST people have only a vag idea of what the word *"arrange* really means with reference to mus They read that "So-and-So *arranged* t piece," or that "So-and-So is an *ranger,"* but just what his function is music very few people actually kno The arranger takes the simple melo and harmony and puts the chords in c tain formations with passing notes a many tricks of harmony against melo to bring out the true beauty of the pie if it has any. You have only to listen the Chase and Sanborn Hour on Sund night to hear the very fine and color methods that Rubinoff uses to bring o the simple composition like a beauti flower. This is perhaps the acme of a rangement.

There are many fine arrangers—Whi man had one of the greatest, Fer Grofé, to whom Whiteman owes mu of his fame, especially for his work

By RUDY VALLÉE

Rhapsody in Blue. Rubinoff's ar-er is a man by the name of Salti, is one of the finest. There are many r great arrangers along Broadway. is rare that an orchestral man, es-ally a saxophonist, turns arranger and omes a great success at it; usually ngers are pianists. Years ago when as at Yale, an occasional appearance public ballroom in Bridgeport brought into contact with a young man who ed himself "Swanee". After being as-ated with the Paramount Theatres, n time to time I heard the name of anee" mentioned in connection with utiful arrangements. I never dreamt this could be the same young saxo-nist against whom we used to play at ballroom at Bridgeport on several gala asions, but it turned out to be none er, and he is considered one of the atest arrangers in the country.

And now he has turned composer, writ-the melody and lyrics of one of the st beautiful, haunting, and unhappy ughts in songs I have ever heard. ose of you who listen in on our ischmann Hour have already heard sing it, and I think you enjoyed it. called it *When Your Lover Has Gone.* We do it in what I term semi-slow npo, or at about fifty seconds for a rus, in order not to destroy the beauty is very fine composition. Swanee certainly to be congratulated. It is published by Remick Music Corp.

Whistling in the Dark

ONE of the pioneers of the music in-dustry, who has been associated th many very fine firms, being the New ork head of one for the past three or ur years, a man for whom I helped to rite *I'm Still Caring*, namely Abe Olman, s finally gone into business, like a great any others, for himself.

That his judgment is most unusual has ways been a recognized fact in Tin Pan lley, and he certainly justified it in the lection of his first song, *Heartaches*, hich, peculiarly enough, was partly ritten by the same young man with hom I collaborated on *I'm Still Caring*, ohn Klenner.

Now Abe Olman has another song, ritten by Allen Boretz, and Dana Suesse. They called it *Whistling in the Dark*, and it is a real whistling song. That is, it lends itself well to that gentle art. As I said in my Radio broadcast recently, it is a long time since we have had a song which dealt with the idea of whistling; *Meadow Lark* by Ted Fiorito, I think was the last that was really popular, and that was way back in 1926.

There was a very unusual reaction after the broadcasting of this song, which I had the audacity to whistle very much as I did on my Victor record of *Huggable, Kissable You.* One old, boyhood schoolmate of mine wrote me to do it again, as it brought to him a mental picture of me walking down the tracks after finishing work in my father's drug store late at night, and whistling as I came home.

In fact, our rendition of it proved so popular by requests which poured in, that we are going to do it again this coming Thursday, as I write. I think Abe has a potential hit in the song, and all the bands seem to be playing it.

We take about a minute and five seconds for the chorus.

You're Just A Lover

THERE seem to be a lot of "lover" songs on the market, song-writers believing in the formula of love, and lovers, and loving. This one, however, is by a master, and is really a very beautiful type of song, perhaps too beautiful to achieve a sensational popularity.

Nacio Herb Brown, writer of a long list of hits, *Pagan Love Song, The Doll Dance, Singing in the Rain, The Broadway Melody, When Buddha Smiles,* and a great many other tunes, writing now for the Radio Music Co., with his own subsidiary publishing company, Nacio Herb Brown, Inc., offers this as one of the current songs for the month. Phil Spitalny's rendition is beautiful, as vocally rendered, by his able banjoist-vocalist. It showed me the charm of the piece, and I have delighted in playing it on our *Fleischmann Hour.*

We take about fifty seconds for the chorus.

Oh Donna Clara

BACK in 1920, when I lay in a bed in Westbrook Hospital, recovering from an appendicitis operation, one of the Victor records which I played by my bedside all day, and which gave me the greatest pleasure, was a recording of *Go Feather Your Nest*, by Henry Burr, who has a most agreeable voice. It was a very popular song, being distinctly of a different melodic twist.

When I first heard this famous German composition, *Oh Donna Clara*, which I was told by a publisher (who didn't even have the song!) would be a tremendous hit, I thought that it was a revival of *Go Feather Your Nest.* The similarity is only apparent in the opening strain, however, and there is no plagiarism. Just another proof of the fact that two melodies, even as the Darwinian theory, may spring up in two minds, situated many thousands of miles apart.

The song was the rage of Germany and Europe in the musical sensation *Die Wunder Bar*, in which it is featured. *"Wunderbar"*, I believe, means "wonderful", and it is the German expression for that superlative. But Germany has adopted the English word "bar", so the title of the musical comedy really has a double meaning. When the Shuberts decided to produce *The Wonder Bar* in New York, featuring that great comedian, Al Jolson, it became necessary for the lyrics of all the songs to be translated. Irving Caesar, one of our most able lyric writers, was chosen for the task. I think he handled it excellently.

Donna Clara, however, is a sort of contradiction in itself, being in the pseudo-Spanish vein, rhythmically speaking; the lyric is also in that vein, telling of one who sees a young Spanish senorita dancing, and falls in love with her. And yet the song is from a German show, produced in Germany. Not having seen *The Wonder Bar*, I am at a loss to understand the connection between *The Wonder Bar* and *Donna Clara.* However, as I intend to take an evening off very soon in order to see this masterpiece, which I am told takes place right in the auditorium amongst the audience, and not on the stage as usual, and which, I have also been told, gives Al Jolson unlimited scope for his great ability, I am looking forward to it, and will probably understand more about *Donna Clara* after seeing it.

It is published by Harms, and we play it at about thirty measures a minute.

Charlie Cadet

EVER since the unusual success of *Betty Co-Ed*, which song gave me the privilege of writing with one of Chicago's most charming young song-writers, Paul Fogarty, with whom I later collaborated on *She Loves Me Just the Same*, there has been a demand for another similar type of song. We hit on the idea of introducing Betty's male counterpart and rather than have him a mere member of a typical college campus, we chose to have him a young, gawky lad who becomes transformed by the training at West Point, hence the title *Charlie Cadet.*

The alliteration of the two "c's" is good, and I have hopes that the song will do at least somewhat as well as Betty did. At the present time we feel that we are too close to the rhythm and melody of *Betty Co-Ed* and are making a supreme effort to get away from that trend. This is more difficult than you would think at first, because the lyrics of *Charlie Cadet* lend themselves exceptionally well to the same melody and rhythm as *Betty Co-Ed.* By the time this issue of RADIO DIGEST goes to press, I believe we will have attained our ob-

jective and *Charlie Cadet* will be flaunting you from every sheet music counter. It will be published by Carl Fischer, or Radio Music, which is the same thing, and will be played in brisk, snappy 6/8 March tempo.

Were You Sincere

IT IS getting impossible for me to write this column for RADIO DIGEST without bringing in the name of that genial and extremely likable little Italian, Vincent Rose. In mentioning his composition, *When You Fall in Love, Fall in Love With Me,* I forgot to credit him with the song by which he is best known —*Whispering.*

He visited me in Buffalo, on my tour, to play a very unusual song, but it was back in my dressing room at the Brooklyn Paramount, before we left on the tour, that he played for me the song of which I am now writing.

The opening strain pleased me from the moment I heard it, but the middle part, it seemed to me, needed a little "fixing". The revision was subsequently made, and now I get a great kick, as I hear the song everywhere. The opening phrase has a sort of running start which builds up into something of a climax near the end of the first phrase, with a seven note drop, at which point the dropping *glissando* may be beautifully employed. By "glissando" I mean the dropping of the voice from a high note to a low note, with no particular note standing out in the drop—a sliding down from the higher note to the lower in one smooth sound. I picture it like a waterfall. It is the use of these *glissandi,* in going from low notes to high notes, and especially from higher to lower notes, that is the distinctive feature of the type of singing that the public calls "crooning". My belief is that the word "croon" originated from the fact that on the double "o" syllable the word "croon" seemed the best noun to describe it.

Anyway, *Were You Sincere* is one of the most popular songs of the day, and the lyric job was admirably done by Jack Meskill, who is collaborating with Vincent Rose on all of his new songs.

It is published by the Robbins Music Corp., and we play it taking one minute and ten seconds for the chorus.

Hello, Beautiful

EVER since his Radio début on the Chase & Sanborn Hour, that great master of personality, Chevalier, has been casting about for the hit songs he needs for the broadcast. He seems to avoid the beautiful ballad type of songs, evidently believing his forte is the rough, comical, risqué type of song. Consequently he has had a hard time finding a means of expression for his vibrant and buoyant personality, since this type of song is very scarce.

This song certainly affords him the opportunity to express it. When I first heard it I thought of Maurice at once, and I was not a bit surprised when I found out that he was going to feature it on the Sunday night hour. And I am not a bit surprised to find it climbing up the list of best sellers, for which he himself may certainly take credit, although that old master of song-writing who crashes through every now and then with the hit of the year, Walter Donaldson, may take Part Of The Bow.

It is nowhere near the hit that *Little White Lies* was, or *You're Driving Me Crazy,* but it does not pretend to be that type of song. Walter certainly did a great job on this type. When Mose Gumble, director of Donaldson's firm, just mentioned the title I knew that it was going to be a lilting, lively, catchy melody, and that is just what it turned out to be. It is a great dance tune.

It is published by Donaldson, Douglas & Gumble, and when we play it we take forty-five seconds for each chorus.

Out of Nowhere

JUST before leaving on my tour of Paramount-Publix theatres, I received a delightful surprise in a visit from John Green and Edward Heyman. They are the two boys who wrote *Body and Soul* for Gertrude Lawrence to take back to England with her, before it returned to become the rage of American society, and one of the most talked-of songs of of the year. Heyman, incidentally, wrote the lyrics for one of the songs of my talkie, namely the song I sang near the end of the picture, *Then I'll Be Reminded of You.* Green is the young scion of Westchester society whose father temporarily disowned him because of Johnny's refusal to go into a stock brokerage, but which stern father has now become an exceedingly proud one since his son has been made one of the musical directors of the Paramount Movie Studios out at Astoria, L. I.

There, all day, Johnny fits music to all sorts of scenes, writing music on the spur of the moment for any particular situation, directing the orchestras in the recording of these musical scenes. His *I'm Yours,* which he did not write with Heyman, was one of the best musical tunes of the season.

Both Green and Heyman played at least fifteen tunes for me on the piano which I have tucked in one corner of my miniature suite at the Brooklyn Paramount. All of them were beautiful musical comedy pieces, much too beautiful not to be in a musical comedy; both boys being of fine, aristocratic family stock write in that particular vein. In fact, they have no intentions of writing the corny type of tune, and I doubt if they could, unless they tried very hard.

The fourth week of my tour, New Orleans, to be exact, I received from the publisher of their song, a rough manuscript of a tune which he rightfully boasted about. It took only a cursory glance to see that the boys had come through with another very beautiful class song, and I don't know which one deserves the most credit. I am always happy to see the perfectly balanced type of song in which the lyrics and melody are both equally contributive toward the final popularity of the song; and this is certainly a classic example of a beautiful thought wedded to a beautiful melody.

Although this song will not be the gossip rage that *Body and Soul* was, I think it will sell more; at least the boys are hoping that it will, as *Body and Soul* was far from being a great financial success, but gave them more prestige than money. There is a beautiful high drop in the song right near the end, on the word "nowhere", where the same dropping *glissando* of which I have just spoken may be employed enchantingly.

The song is published by Famous Music, and we play it at thirty measures a minute.

Moochi

IF YOU have ever glanced at the bottom of a song to see whether the copyright is an original American one, or whether it has been assigned from some foreign country, as in the case of *Just a Gigolo, Donna Clara, When the Organ Played at Twilight, King's Horses,* and so forth, and if you are a keen observer, you must have noticed that there is an increasing number of foreign songs being taken over by American publishers and published here with great success. In fact, little by little it would seem that the English publishers are losing faith in the ability of American publishers to publish hit songs, with reciprocal increase of confidence in their own judgment. And the American publishers are learning to respect that confidence.

The fact is, were it not for some fine English songs which have wended their way across the sea to small and large American publishers, some of the Tin Pan Alley heads over here would be in a fine quandary. Of course that does not mean that everything that was a hit in England becomes a hit over here, because that has been shown to be a fallacy many times. However, it seems quite logical that any song which was a hit, especially in England, where the temperaments and tastes are so parallel to those of the American song-buying public, should at least become quite popular over here and usually in a certain proportion it has attained the same great popularity throughout our forty-eight states.

Several months ago, before leaving on this tour, one of the biggest of American publishers, Chappell-Harms, which represents the English firm of Chappell, notified me that they were going to take over a very odd type of dance-rhythm song called *The Moochi.* The odd story

Beauty Challenge

WHICH station in the U. S. has the most beautiful staff members? That's a moot question, Radio Digest feels, what with the election of the 1931 Radio Queen coming on . . . so we're holding an elimination contest in these pages. See February, March and April issues for previous challengers —and here's the staff of WTIC, in Hartford, Conn. Reader, which station do you choose? Write—remember your choice may help pick Radio's Queen.

Laura G. Gaudet (above) is staff pianist of Station WTIC; a French-Canadian miss who won a scholarship to study in Paris and has been at WTIC six years.

Anna Kaskas (left), Lithuanian blonde with a contralto voice well known to New England fans; for three years a member of the national grand opera company of Lithuania.

Thelma Adams (right), obliging young miss who is in charge of the daytime information desk at the studios of the popular Connecticut station.

Pearl Hill (above), is pianist in the classical "Musique Intime" programs heard under the direction of Christiaan Kriens, Dutch-American composer.

Marion Jordan Bridgman (above), red-headed flutist of the studio concert orchestra, also a member of the Springfield Symphony Orchestra of Massachusetts.

Jane Dillon (left), talented character actress of the WTIC staff, who for seven years toured vaudeville as an impersonator in America, England, Australia and Africa.

Mildred Godfrey Hall (right), staff harpist; formerly with the distinguished Carlos Salzedo harp ensemble and with the McQuarrie Harpists.

Florrie Bishop Bowering (above) director of "The Mixing Bowl" of Station WTIC; author of many cookbooks and household authority.

Malvina Samolis (above), assistant to the program manager, in charge of the making up of all WTIC schedules.

Betty M. Ryan (right), in charge of all fan mail received by WTIC.

Martha E. Dixon (right), assistant to Florrie Bishop Bowering of "The Mixing Bowl," domestic science broadcast from WTIC.

Jest

Richy Craig, Jr. Wisecracks His Way to the Wav Lengths from the Footlight

By STEVE TRUMBULL

Studios resound with merriment from his entrance to his exit—Richy Craig, Jr., irrepressible new Radio jester.

"BORN in a dressing room, cradled in a trunk."

That phrase, borrowed from the profession, describes, figuratively, the origin of Richy Craig, Jr., the Blue Ribbon Malt Jester and one of the latest additions to the firmament of Radio stars.

Richy, Jr., who, at the age of 27, has peddled his wisecracks over the footlights of most of the variety houses in the United States, over the tables of most of New York's night clubs, from the stage of many a musical comedy and who, withal, has found himself with a surplus of humor to sell to other actors, is now appearing each Tuesday over a coast to coast hook-up of the Columbia Broadcasting System.

Craig's humor is the humor of sophistication, a sophistication bred of a lifetime in "the profession". The son of Richy Craig, veteran musical comedy producer, and Dorothy Blodgett, musical comedy prima donna, young Richy cannot even remember the circumstances surrounding his first stage appearance.

"I suppose I just strolled on while Dad and Mother were out there doing their stuff," Richy said. "Dad saw there was no use interfering with the inevitable, so it wasn't very long before he was touching me up with a little make-up and costume, and even giving me a line or two to say. Audiences love tots."

When Richy was six years old the Craig family went into conference and decided he should stay behind with relatives in New York and attend school, and there's where Richy's difficulties started.

The change was too abrupt. Teachers found it impossible to convince him that the same antics that had made the audience roar in Ithaca, merited a vigorous spanking when attempted in the class room.

School teachers were unappreciative. The snappy come-backs with which young Richy had panicked the gang backstage drew the most severe of penalties when addressed to these dour gentlemen.

Richy couldn't understand it; he didn't like it, but there was the consolation of summer vacations with dad and mother, back in those old and familiar surroundings, the world of footlights and merriment. And so life went until Richy had reached the ripe age of thirteen.

THE previous summer Richy's family had decreed that he should remain in New York in a summer school, so young Richy promptly stepped out on his own and found a job dispensing peanuts with a carnival. It was a glorious summer, and young Richy, ev the mimic, learned by heart all of the "lin of the "spielers." In the fall he turned to school with his newly acquir information.

One day, shortly after the resumpti of classes, the teacher was summoned fr the room. Returning, ten minutes lat he found young Richy standing on desk, a snake skin wrapped around neck, shouting in the approved style the carnival barker all of the lures of t "amazing spectacle inside for ten cen a dime, only a tenth part of a dollar!"

Twenty-four hours later, Mother a Father Craig, in the midst of a perfor ance in Buffalo looked into the wir and saw Richy, Jr., a grin spread acr his face.

"THAT was my first re break," Richy said. "That very eveni the juvenile had been taken sick. D was desperately in need of another a there I was. I suppose if he had been sh a chorus girl, I would have been a chor girl.

"After that I was everyone in t cast who took sick. Dad encouraged in taking dancing lessons, perfected technique and kept me going. I ke at it, and finally struck out on my o in a vaudeville act, *Sixteen Sunshi Girls*. At the age of nineteen I achiev that ambition of every variety actor. played the Palace, New York.

"Phil Goodman's show *Dear Sir* ca next. It was a colossal flop, lasting t weeks, or twenty minutes, I forget whi Anyhow, it was back to vaudeville f yours truly.

for Fun

long about this time I made a dis-ry. Up to then I had been playing ukulele, singing, dancing and wise-cking. I now discovered that in ieville the less you did the more you cted. First, I threw away the uke, I quit dancing and singing.

"THE act went over. With a pse of real money I wanted to make e of it, lots of it, and fast. I figured that the more times I could do my act, more I could collect, and there was York, full of night clubs paying good ey for anything that would make laugh.

Before long I was ducking into Texas an's for a fifteen minute skit, grab-a cab for the Moulin Rouge for her fifteen minutes, and from there, in the same evening and in turn, to Monte Carlo, the Chantee, the Twin s and the Studio Club. Between es I filled engagements at Loew's e and at the Winter Garden.

It was great while it lasted, but quite denly, I found myself in a physical akdown. The doctor ordered me to a ntry sanitarium. I'd been doubling in s so long that instead of going to one itarium I went to two of them.

My health improved (I believed), I de all arrangements for a tour of glish theatres when I was called to w York and offered a contract that tered anything I had ever received. s walking on the clouds, when my m again failed."

And the remainder of Richy Craig's ry is the story of a "never-say-die" rit. Banished again to the mountains aig refused to sit idly, brooding and moaning his fate. He couldn't peddle wisecracks along Broadway. He uldn't, personally, go on in this laugh-king business—but the sense of humor s unaffected. It was still there.

Richy started writing. While convaicing from that illness he turned out, d sold, twenty vaudeville acts, several arious scenes for Broadway revues and en some "talkie shorts." Richy was still aking them laugh, even from his sick bed. In Radio, as he was on the stage, ichy Craig, Jr., is a fountain of wise-acks. He refuses to regard anything as olly serious. In the midst of an im-ortant business conference he will burst it with a remark that will completely srupt the entire proceedings. The art-ists' reception room at WBBM, key station for this broadcast, rings with laughter from the moment he enters until he leaves.

Jack Nelson, associated with Richy in this program, is a Midwest Radio favorite and proof of the statement, "Radio fans never forget their favorites."

Back in the early days Jack was director at WJJD, then broadcasting from the Mooseheart home for orphans. The microphone open, Jack would hear the youngsters' prayer, at 9 P. M., and then hustle them off to bed. Until far into the night he would stage a one-man Radio show. In 1927 he retired from the microphone end of broadcasting and went into program building. Nearly four years had passed when his name was announced on the Blue Ribbon program, but his old friends remembered and showered him with letters.

Nelson is, incidentally, co-author of *Remote Control*, first a Broadway success, then a "talkie."

It is a unique combination, this act — stage veteran and Radio fledgling Craig, supported by stage fledgling and Radio veteran Nelson.

CRAIG'S shafts of humor often wing their way toward Nelson, but Jack shrugs them off, because he knows they're "jest for fun." Here's a sample of what he has to grin at and bear:

"I sincerely hope that you liked that last song, as immediately after this broadcast Mr. Nelson is to rush right over to St. Luke's Hospital. He is going to have his nose lifted so he can sing to people living above the tenth floor.

"And next Tuesday night at this time, Mr. Nelson is going to sing the same song in Greek for the benefit of the bus boys in Thompson's restaurant. I think we are very fortunate in having Mr. Nelson with us on our programs as he is a thorough musician—his grandfather for many years was a first violinist on a ferry boat. He knows music from A to Z and has just published a book on music entitled, 'From Bach to Beethoven and Back to Bach Again'.

"And now, ladies and gentlemen, I am going to take this opportunity to say a few words about a man who was and still is the idol of our country. I thought it would be nice to say something about Abraham Lincoln. It is an old saying and a true one that history repeats itself. Lincoln freed the slaves in 1863, and Hoover is doing the same thing in 1931. Nobody is working now either. But I guess you can't blame it on Hoover, as the unemployment situation is by no means anything new. My father thought of the same thing twenty years ago. In fact, he's been practicing it for longer than that. If I'm not mistaken, he was the originator of the whole thing. He just sits in his rocking chair and says: 'What is to be, will be,' and naturally nothing happens. He is waiting for a job that fits his personality. He wants to be a floor walker in a telephone booth.

Jack Nelson, Chicago Radio Pioneer who sings between the halves of Richy's rapid-fire barrage of wisecracks.

"But getting back to Lincoln—there was a great man. He was born in a little town in a log cabin that he built himself.

"Well, to get off the subject again, it's getting so now with these short hair cuts and the smoking that the women are doing, you can hardly tell the boys from

(*Continued on page 105*)

Cuckoo College

Van and Don, Professors of Drollery, WHAS, Transfer Allegiance from Kentucky—Take Post Graduate Classes at Dear Old NBC

BELIEVE it or not, but "Cuckoo College," that mythical center of learning whose insane doings are chronicled through the Pacific Coast NBC network each morning by Van and Don, the Two Professors, was founded over a luncheon table recently.

The waitress who used to serve Don McNeill and Van Fleming in a Louisville, Ky., restaurant really should be one of the trustees of dear old Cuckoo, for she it was who abetted its future pedagogues in their foolery. The hilarious Radio act they present each morning grew out of Van and Don's inability to be serious, even while eating.

FROM the "gags" they tossed across the table at each other to make the waitress giggle, developed a comical duo which is unlike any other on the air. Whether it be in their tense description of a knitting tournament between Cuckoo College and some rival university, or a "drammy" class lesson in which they put on a deep "drammy" to show the students how to act, Van and Don present perfect teamwork in their nonsense act.

There was the time the Two Professors set fire to Cuckoo's school buildings, to test the efficiency of their fire-drills — and the time they ran against each other for the job of janitor of Cuckoo, because as professors they were unpaid, and as a janitor, one of them could "clean up"—and the big football game in the Nose Bowl of Washalfornia—the boys themselves have to smile when they discussed some of the side-splitting situations in which the Two Professors get entangled all the time.

By Louise Landis

Called on by the League of Nations to settle an international boundary dispute, the "Two Professors" take a short cut and do a little globe-splitting. Left, Don McNeill, B.V.D., T.N.T., and right, Van Fleming, P.D.Q., O.K., D.F., Q.E.D.

"We have more fun than the a dience," confides Don, and it's easy believe him.

He started a career which includ newspaper work and Radio announci when he was graduated from Marque University. His first job was Radio edi of the Wisconsin *News*. Fr there he went to the Milw kee *Journal*, and from there the Louisville *Courier Journ* still steeped in the tradition "Marse" Henry Watterson. acted as announcer at N station WHAS there. And t is where he met and renew acquaintance with Van Flemi guitarist and singer of sw songs, whom he had known Chicago.

FLEMING h been soloist with various le ing dance orchestras of t country. He was a member the NBC artist staff in S Francisco before he went Chicago, where he was hea with an orchestra conduct by Jean Goldkette. Sergeant "Doc" Wells

Commander of the Smiling Army

Sergeant "Doc" Wells of KROW Came Through the War Shell-scarred, One-armed, but with Courage to lead 8,000 Listeners to Happiness

By Mary V. Roeder

THIS is a success story.

A story of a man who has been successful, not at making money, but at making happiness—a much ore difficult accomplishment.

Sergeant "Doc" Wells, commander-in-ief of more than 8000 members of the ROW Smiling Army of the air, is a ccessful philosopher. He went through terrific life battle during the World r and has come out with a wealth of miling ammunition" which he gives adly to those of his many listeners who e ill, discouraged, and heartsick.

Few have the pleasure of watching oc Wells work before the microphone. 's a picture worth seeing—he stands rmly on two feet, every inch a soldier, ne arm gone, his face glowing with the lory of his wonderful message of "smil-ig ammunition". His camp fire meet-igs over KROW, Oakland, Calif., Tues-ay and Thursday nights at 9 o'clock, and aturday nights at 8:15, are an inspira-ion to thousands on the Pacific Coast. he Members of the KROW Smiling rmy are scattered from Alaska to Mex-co.

The evening I chose to get this inter-iew with Doc Wells will always remain n my mind as one of the most inspiring happenings in my life. I stood looking hrough the plate glass window into the tudio where he stood before the mike. Questions crowded close in my mind. Would he tell me how he escaped from the German prison? Would he be willing to discuss the horrors of the World War as he had seen them, as one of the first Canadian soldiers at the front, back in 1914? Would he talk about himself, or about his work—you see I know Radio personalities!

He came out of the studio and greeted me with one of the most wonderful smiles I've ever seen . . . it seemed to warm me clear through. And then followed two hours of an intensely interesting story of a soldier, a journalist, a lecturer, and lastly a Radio personality. He gave me an autographed copy of his new book *Sunshine and Shadows of Life* which recently came off the press, a collection of stories of France, along with dough-boy poems that anyone would treasure. For example, an anonymous contribution by one of the Smiling Army members, an ex-soldier:

I was only a buddy in khaki,
A pawn in the game of chess.
And I am saluting your smiling army,
In honor of those gone West.

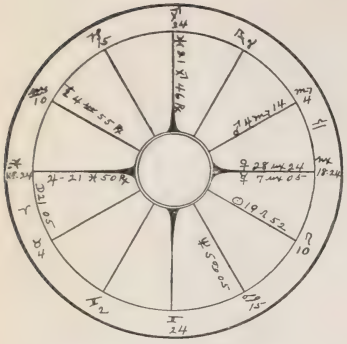
I've wallowed in mud to my ankles
Read the shirt of the Poilu in blue.
Missed pot shots that cost me a helmet.
And bummed fags from a guy like you.

And tonight, coming over the ether,
You brought back those days again,
Of carefree frolic and laughter,
Yet so often garnished with pain.

You ask me if I'm still smiling,
Sure, Doc, and I'M mighty proud
To be sitting here dreaming, and thinking
Where the guy is, that laughed out loud.

And tonight I am with you a million,
As Commander in Chief of the air.
Of the army of smiling doughboys
Who came back from Over There.

You are welcome in Castle and cabin,
You are followed by Gentile and Jew,
And here's hoping the sunshine you're spreading
Brings sunshine and smiles back to you.



A Vagabond Trooper.

DOC WELLS, a native of Boston, Mass., was working on a newspaper in Vancouver, B. C., when Europe declared war in 1914, and he was the first man to volunteer for active service from Canada. When he went up for final medical examination at Valcartier, P. Q., it was only through his life-long friendship with the examining doctor, that he was passed as physically okay. So he was able to go on to France with the first Canadian Contingent.

I had heard about the famous "Tin Can Band" of the Canadian Army, which Doc Wells had originated, so I was curi-

The Countess *and* Her Stars

Horoscope of Countess Olga Albani

"Go West, Young Woman—to Hollywood!" That's advice to Countess Albani Relayed from Moon by our Astrological Reporter

By Peggy Hull

MILKY WAY, April 20th—The Moon, in an exclusive interview today declared that the Countess Albani, Barcelona Beauty and Spanish emigré, who has made a name for herself singing over the NBC chain, is destined for greater fame via the motion pictures. "If she is a wise little girl," said the Moon, "she will go West. The farther she goes from her birthplace the greater will be her success and prominence."

In looking over the aspects which surrounded her birth in Barcelona, Spain, one August 13th not so long ago, the Moon pointed out that Jupiter, the great benefic, is in a position to assist her materially in California. She will receive the full force of his fortunate rays in the West, and as all the other indications in her horoscope point to a dramatic career, the Moon, as spokeswoman for the other heavenly bodies, asked specifically that she be informed of the greater possibilities which await her out there.

It was a good thing for the Countess that she came to the United States, according to the stars, for she is one of the natives of the earth planet who must shake off the family ties and home surroundings before she can adequately express herself. She had established herself as a singer in Spain before she came to the United States, but through the Radio she has reached millions of listeners who would never have heard of her otherwise, and now it seems that she can still further add to her fan following by taking up a screen career.

JUPITER, that planet whose position in our natal charts indicates the degree of success we will achieve, was in a most fortunate position at her birth. Posited in the sign Pisces and on the ascendant he promises her great fame and prosperity. He also stands by like a guardian angel to protect in times of difficulty. No matter what happens to her; no matter how many arguments, quarrels and disputes she has; no matter how many times she stubs her toe and falls down, Jupiter will come along like an indulgent father, pick her up, dust her off, and put her on her feet. This position also adds strength to the location of Uranus near the mid heaven.

"THIS unusual arrangement of these powerful planets," remarked the Moon, "establishes beyond all question the extraordinary life she will have. This is not an ordinary horoscope by any means. No one with a fire trine could be anything but an exceptional person. The trine, very unusual I want you to know, gives her an inexhaustible supply of energy. These people are always doers. They make history, nations, new records of achievement. And the Countess is at heart a pioneer. If she takes up a motion picture career she will doubtless contribute some thing entirely new and different to motion picture history."

Some of the intimate facts which her chart reveals are her love of animals, insatiable desire for travel and her generosity to people. She has a deep, profound, philanthropic nature. She is quickly sympathetic and no matter how lowly the individual's position, the Countess is ready and eager to help. Nothing of snobbery here, all gentleness, warmth and sweetness. She will give of her own substance until she has nothing for herself, so genuine is her charitableness. She is tolerant, broad-minded and easy to get along with, but she is not easy to amuse or entertain. She has great mental depth and unless a subject can hold her interest she is quickly bored.

She is subject to moods. The Moon explained that it was her own position in Aries. The Moon's rays directed through this sign gives the Countess sudden enthusiasms and varying moods. She can be the life of the party one moment and the next, quiet, sad, remote.

Three planets in water signs make her very adaptable. They give her rhythm, a love of music, flexibility and instinctive sense for the dramatic. And another thing they are going to do for her is to make her change her mind about a lot of ideas she has concerning life at present.

"There's no doubt," the talkative Moon told me, "that the Countess Albani has already reached a higher degree of prominence than any of the people in the circle in which she was born. Uranus near the mid-heaven is responsible for this."

She will meet many interesting men and have lots of admirers among the members of the opposite sex. As a matter of fact, she'll have admirers right up to the day she dies. Is there a woman on earth who wouldn't like to hear that?

THE Moon, who helps Venus out on all love affairs, confided to me that there were plenty of romances in the Countess' chart. That is, the romances are there if she wishes to turn her pretty head in their direction.

She is intuitive, psychic, has a pioneer spirit and oh my word! . . . what's this? Why it is nothing more or less than that she'd make a wonderful astrologer! I'll wager that's something the Belle of Barcelona never thought about, although she

(*Continued on page* 97)

COUNTESS OLGA ALBANI, NBC song star, is fond of apple blossoms, according to her horoscope and the photographer. Peggy Hull charts her future across the way.

Broadcasting from

The Growing Political Power of Radio

THERE is ever accumulating evidence that the influence of broadcasting is growing rapidly in political arenas throughout the world. In a recent issue we published an article by Harry A. Mackey, Mayor of Philadelphia, whose use of Radio is so extensive and so constant that he is known by many as "The Radio Mayor." Quite a few of our cities own stations outright or lease time for local broadcasts. As this issue goes to press Governor Franklin D. Roosevelt of New York has threatened to appeal to the public via Radio if a certain amendment is not withdrawn from a pending bill affecting the water-power interests—the amendment being of a type which Governor Roosevelt maintains usurps purely executive functions of government for the legislative branch. In England there is much talk about the advisability of broadcasting the proceedings of Parliament so that British subjects at large may know exactly what the government is doing. Over in Russia and in some other foreign countries broadcasting stations of great power are being erected for purposes which are largely political. Sometimes the objectives are strictly national; in other instances, they are international.

Our own federal government is not paying for broadcasting time, but in the United States the leading chains make a point of broadcasting news from Washington with great regularity. Virtually all of the important political figures up to and including President Hoover have been granted frequent microphone "appearances" before the American public. In short, every phase of our political life—community, county, state, nation—is being affected more and more through the medium of Radio. In fact, much of the broadcasting which is not ostensibly of a political nature, such as the international broadcasts now exchanged between the United States and various foreign countries, is of a quasi-political nature. All of these things, moreover, are going on at rapid pace in sizable volume during what might be termed peace times, *i. e.,* times when no major political battles are being fought out in our country.

Of course, when we get close to the actual election periods, double, triple and sometimes even quadruple emphasis is placed upon the influence of Radio. In other words, like it a little or like it a lot, the American people are certain to find that Radio is playing an increasingly important part in their political life directly and in their social life by reason of the effects of political government upon national business economics and the national habits of living. There are many Radio enthusiasts who will accept this knowledge with anything but personal relish. They have heard so many very poor orations via the microphone that at times they have bee truly bored. Hence, their attitude toward the political in fluence of Radio is largely premised upon impatience and in tolerance. However, even this element of American citizen will grow to see it all from a different and more welcom viewpoint. They will find that to an increasing extent Radi has served as a purifier of political practices, as an improve of the quality of men who run for public office, as a develope of wiser political platforms, and as a liberalizing factor i helping the public at large to understand and be sympathet with viewpoints other than those which are highly partisan

Radio is destined to do all these important things in th field of American and international politics because of it ability to do certain things which cannot be accomplishe equally well by any other means. In the first place, th politician can talk *in person* to his audience so that *his or he* voice is heard as he actually speaks. By any other mean this type of contact is relatively limited in so far as the size o a single audience and the time factor are concerned, becaus it takes time to travel a state or even to tour about one larg city. Not even the enterprising speed which characterize the modern metropolitan newspaper can accomplish so muc circulation of what is said with such tremendous rapidity.

Radio presentations also prevent the opposition party fro garbling, extracting or editing the speaker's copy in such way as to misinform the readers, a practice which is ver common with the opposition press. Political speeches ove the Radio prevent the partisan press on the affirmative sid from overdoing the case and misinterpreting what is actuall said. Again, because of the space limitations Radio broad casting permits of a completeness which is almost never pos sible in a considerable number of newspapers and in relativel rare instances complete in any. Again, Radio broadcastin insures an accuracy of what is said which eliminates th occasional errors that creep in on account of faulty reporting or prejudiced reporting or typographical errors.

In other words, Radio is winning a powerful position i political fields because of its ability to do a *faster,* mor *accurate,* more *widespread,* more *intimate* job than is possibl through any other means.

The Editors of RADIO DIGEST believe that the Radio audi ence should adopt an attitude toward political broadcast which is much the same as the one they should hold as re gards advertising on the air. Individual ability to turn th dial and thereby tune out any and all objectionable talk should provide a type of censorship which will enable th public to tell politicians how to talk when they are on th air, both as regards the length of time consumed and th character of facts, information and ideas presented.

Mayhap one of these days, because of its ability to ge politicians to place themselves in a position where thei constituents can hold them strictly accountable for what wa

The Editor's Chair

ally said, we will find the genesis of a new party, which, sense, will be "the Radio party." If this happens, as is likely, we can be sure of one thing. The Radio party everlastingly have to premise not only platforms but performance on the principles of *honesty* and *fair dealing*.

Film Recordings for Broadcasting

RADIO fans have probably already had a chance to read quite a bit about the experimenting which is being done at Station WLW with programs that based upon film recordings instead of flat records of the type. In the near future undoubtedly much more will ear in print about this relatively new method for broadcasting programs and, no doubt, many of the DX enthusiasts other long-distance and novelty hunters will get quite a out of tuning in for the first time on this new type of orded program.

Here are a few fundamentals to keep in mind when reading about or listening in to film recordings. In the first place, recording of sound on film is not fundamentally new. the moving-picture business it was developed to a practical nt several years ago, and since that time has been in active npetition with the disc method of recording, which also is d extensively in silver-screen production. Up to this time nion is considerably divided among moving picture executives and engineers as to which is the best method for handling the sound factor, namely, films or discs. From the ndpoint of the quality of results, there is little to choose ween the two, but from the standpoint of flexibility and having specific measures of sound always in the quickest ssible physical association with the stretch of film for which y are the accompaniment, it appears that the film method the most practical and convenient. There are many moving ture men who feel that it is only a question of time when cordings on discs will be eliminated entirely, and certainly age as regards the total volume is evolving definitely toward e practice of putting sound on film.

In reportorial work such as the news reels, the portability equipment where the sound for pictures is put on films s been developed to a much better point than where news porting is done via records.

Turning now to the Radio industry proper, we venture to y that the film method of recording will prove to have me very definite advantages. Most of these advantages, owever, will relate to such flexibility as the re-use of parts a given recording, the "patching" of portions of several cordings to make one complete broadcast, the editing t of defective portions, the condensation of certain types of recordings through the editing process, the insertion of certain kinds of announcements subsequent to the making of the original recording. Very few of the advantages, however, will relate directly to the quality of result achieved, because at the present time there is very little actual difference between the best in recorded broadcasting and direct broadcasting. The prime difference lies in the psychological effects upon the listener, and as long as broadcasters are forced to announce "electrical transcription" the public is bound to be a little prejudiced in its judgment of the quality of the result achieved.

Popular approval for electrical transcriptions, film or wax, will depend primarily on the individual merit of the program rather than on the quality of the result. Broadcasters will favor film because of its larger adaptability—easy to edit, cut, patch and revise; convenience for recording timely events, special speeches and historic incidents. Owing to the fact that most stations are now equipped for disc transcription film may be temporarily retarded. Two years more and television will make its Radio position secure.

RAY BILL

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

"WELL," said Mr. Johnstone, "in the first place he's a human dynamo. He's working eighteen hours a day, seven days a week, and accomplishing in that time more than any three men."

"He," of course, means Merlin H. Aylesworth. President of the National Broadcasting Company, and Mr. Johnstone is G.

Merlin H. Aylesworth

W. Johnstone, "Johnny Johnstone, Assistant to the President."

We were talking in the beautiful executive offices of NBC.

"He's down here every morning at nine o'clock," Mr. Johnstone went on, "and before that he's read all the morning papers. Just once was I able to show him a clipping he hadn't seen. (Here Mr. Johnstone smiled a little proudly.) That was the day after the Pope's broadcast.

"'Here are the clippings, Mr. Aylesworth.' I said to him when he came in.

"'Seen them all,' was his reply, as usual.

"'No, you haven't.' And then I showed him Il Progresso Italo Americano, the Italian newspaper. He hadn't seen that. But that's the only time I ever got ahead of him.

"Besides reading the papers before he gets down, Mr. Aylesworth has collected the impressions of last night's programs from everyone he has met—elevator boy, doorman, barber. Then he's ready to start on a day that lasts usually until seven o'clock at night. And even then, it is rare that his dinner engagements are not partly business.

"Take today for instance. It's typical. He was in at nine. Something had come up that demanded an immediate conference of the Vice-President, General Manager and the Program Director. He'll be in that conference until ten-thirty. Then he has an interview with a representative from *Editor and Publisher*. At eleven-fifteen his car is outside to take him to a meeting of the board of directors of the Irving Trust Company. Incidentally he is also on the board of directors of four other companies—RKO, Victor-RCA, City Service, and, of course, NBC. At one o'clock he is at a press luncheon for Amos and Andy. At two-thirty he has an appointment with—well, just call him a man from Chicago. At three he must be at the Graybar Building for a conference with the architects of Radio city. At four-thirty he has an interview with a special writer from *Redbook Magazine*. He'll be in that until five-thirty or six. And then somewhere in the day he has to get in a couple of hours dictation, answer the telephone, see all the people who drop in to see him.

"Oh, yes, they drop in. There's hardly a day that five or six persons don't drop in whom Mr. Aylesworth has casually invited. And he sees them, too, although they may have to wait. Sometimes his secretary gets a little frantic when his schedule is already jammed full. She says she could get along better if Mr. Aylesworth were twins and days were twice as long.

"He has a finger in every departmental pie. He'll jump on a train to Chicago, come back and call up the sales department. 'I've sold a program for you,' he'll say nonchalantly. Or if something has gone wrong mechanically, he's as likely as not to go over to Bellmore and investigate the trouble right at the source.

"He's the sort of man who inspires de votion. We love to work for him. Bu he doesn't spare himself or anyone else Holidays don't exist for him. I remembe one day a friend called up and asked hi if he didn't want to get out of a luncheo engagement—a business luncheon, c course—because Monday was going to b a holiday. 'Mr. So-and-So,' Mr. Ayle worth said, 'the National Broadcastin Company works eighteen hours a day, 36 days a year. We entertain the public da and night. We have no holidays. I'll b at that luncheon.'

"And," grinned Mr. Johnstone, "any o us who had been making plans for Mon day, cancelled them forthwith."

All in all the impression gained by th Radiograph Editor of Mr. Merlin H Aylesworth was that NBC's chief execu tive does earn his salary.

Here are some brief biographical detail He was born in 1886 in Cedar Rapid Iowa. He graduated from the Universit of Denver in 1908. He married Blanch Parrett in 1909. He has two childre

Lula Vollmer

on Jerome and Dorothy. He prac-
ic law in Colorado until 1914 when he
e into public utility work. In 1919 he
ne managing director of the National
ric Light Association. In 1926 he
ne president of the National Broad-

David Ross

ing Company. He lives at 812 Park
nue, just around the corner from his
e.

Lula Vollmer

HE wrote *Sun-Up*, that Southern folk
drama which has had such an inter-
onal success. She wrote *The Shame
man*, *The Dunce Boy*, and *Trigger*.
n she turned to Radio. *Moonshine
Honeysuckle* is the title of the serial
ch comes to you every Sunday after-
at two o'clock (EST) over the NBC
work. The episodes center around
m Betts, a boy of the Southern moun-
ns. Louis Mason takes the part of
m. On the legitimate stage, he was in
ss Vollmer's *The Dunce Boy*, and *Trig-*
.

As a little girl, Lula Vollmer wanted to
a moonshiner. Well, maybe not a moon-
ner, but she wanted to be as unre-
ained and carefree as were the little
untaineer children with whom she was
ught up.

For Miss Vollmer's father was in the
mber business and she was born in a
rth Carolina lumber camp. She early
w how much luckier the mountaineer
ldren were than she was. They could
y in the woods all day; she had to go
school. They could be sewn into their
thes for the winter; she must be always
ssing and undressing. They could fight
d swear and chew tobacco; she must be
perfect little lady.

It was with a shade of envy that she learned to know and love these simple mountain folk. But she did learn to know and love them, and her first play about them, written at the age of sixteen, was made into a successful vaudeville sketch. *Sun-Up* first produced at the Provincetown Theatre in 1923, has been playing ever since, both in this country and in Europe. *Moonshine and Honeysuckle*, originally scheduled for thirteen broadcasts has gone on for thirty-two, and will probably continue indefinitely. The reason for her success is summed up in one word—authenticity. Her characters are real, her background is real. She writes as if she were a mountaineer herself, which she says, sometimes she thinks she is.

"Of course, occasionally I should like to come back to civilization, but I could be happy for months at a time among the mountain folk. Life is so simple with them, in contrast to the complexities of the city."

She does not find writing for the Radio very much different from writing for the stage. She thinks working on Radio programs has given her more facility. "You know writers are notorious dawdlers, but with actors waiting for scripts at a certain hour every week, you just have to get busy and produce them. Rain or shine, in sickness or in health, the script must be in. Sometimes it is quite a task. A half hour of dialogue is thirty pages, as long as an act in a play. I once wrote one when I was sick in bed with the grippe and had a temperature of 102."

Miss Vollmer tries to write every afternoon from one to six. Sometimes the actors will make suggestions as to how she may do a part for them, but mostly she carries on by herself.

"Fortunately," says Miss Vollmer, "in Gerald Stopp I have an excellent director. When I turn a manuscript over to him I know the drama will be produced exactly as it should be, and that I have nothing to worry about except getting out next week's program."

David Ross

"The knights are dust,
Their swords are rust,
Their souls are with the saints,
We trust."

DON'T know if I'm giving that quotation correctly, but if David Ross, CBS announcer and dramatic reader, had lived back in the days before knights were dust and swords rust, he undoubtedly would have been one of those wandering minstrels who came to the great castles to play and sing for the lord and his family.

It being, as it is, prosaic 1931, he stands before a microphone, and his beautiful resonant voice goes out not to one family but to hundreds of thousands.

For David Ross believes that poetry should appeal mainly to the ear, that just as a piece of music is to be played, a poem is to be voiced. And Radio, he says, is establishing something that was almost lost from our modern life—the intimate contact of the poet with his audience.

We were talking up in that little room on the twenty-third floor of Columbia that they call "Siberia" and the "Dog Watch". It is the room—barely furnished with a desk, two chairs, and a microphone—from which local announcements are made.

Every fifteen minutes David Ross would lean forward in his chair and say into the microphone on the desk, "WABC, New York." "W2XE, New York." Even with that short announcement the surprising beauty of his voice was apparent. And more than its beauty you were aware of the character of the man behind the voice. Here was poise and serenity and understanding. Somewhere—and I don't know whether I have this quotation right either—there's a line which says when a cup is full it runs over, but the real fullness stays within. That is what you feel about David Ross, that whatever he gives out, there is much, much more within.

One can be crushed by an unfortunate environment or one can rise above it. Certainly there was much in the early life of David Ross to kill in him all love of beauty.

He was born in New York on July 7, 1894. Before he was old enough to go to school, he was selling newspapers on the

Georgia Backus

street. All the way through school and college he had to work to earn enough to eat. Out of college he did all sorts of things to make both ends meet. He waited on table in a restaurant. He was a mail clerk in a wholesale dress house. He acted with Eva Davenport. He was a supervisor in an orphan asylum. He was a social director in a settlement house. He was a dramatic coach at a summer camp. He was secretary to a Russian baroness.

(*Continued on page 102*)

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

"WELL, you needn't look at me like that," blinked Toddles (who is, has been and always will be Presiding Pigeon of Graybar Court). At this we both regaled ourselves with another smack of cracker and honey. "I suppose," I retorted as coherently as a mouthful of cracker and honey will allow, "*I'm* to blame for it." "Well," said Toddles, with her own homely philosophy, "whoever is to blame, an apology is necessary." So here we are *Jeff* Sparks, as humble as two birds of a feather can possibly be for getting things a little twisted about you and *Harold* Sparks of KFJF. There is a vast difference between the two. So everyone please get out the March copy of RADIO DIGEST and compare. Jeff Sparks is 25, has an altitude of five feet eight and a half inches and a predilection for blondes. His favorite hobby is Boy Scouts. You must all, and Clara D. of Davenport, especially, have seen him in Marcella's department in April. Thanks, Jeff, for the tip on the blondes. Toddles and I shall be off in a jiffy for some hair dye. Toddles' noodle is of a deep maroon and Marcella's locks are of an old rose gray, but that wouldn't do, I suppose, would it?

Girls! A discovery! John S. Young was classmate of Rudy Vallée in Yale! Now what d'ye think about that, Sally, Christine and Elsie? His success is entirely due to taking his job seriously. Enjoys most announcing Rudy's program. Studied playwrighting at Yale and worked as actor at WBZ-WBZA but is now recognized as among NBC's best announcers. Also fine uke player.

John Young

A musical genius and a prize fight fan! How do you account for that? Hugo Mariani was born in in Montevideo, Uruguay, S. A., of Italian parentage, Bob, and learned the rudiments of music from his father, one of the best violin teachers in that Republic. At the age of eleven, on a tour of South American countries, he was hailed the "Wonder Child." As solo violinist at the Rialto Theatre in New York he became very popular with the audiences, and as orchestra director with the NBC, where he has been ever since the organization started, he has won for himself a great reputation. He is an exponent of jazz and believes that this type of music will eventually become complete expression of America. Mariani is married to a Rumanian artist, Nella Barbu. Mariani, though a musical giant, is small in stature, very modest and has keen, searching black eyes—always searching for the hidden beauty in things. He is invariably well tailored but his gaudy shirts are the distraction of his associates. He makes a hobby of collecting shirts of extraordinary hue. But the enigma—prize fight lover!

Hugo Mariani

Above: Al Cameron and Pete Bontsema
Below: Russ Wildey and Billy Sheehan

Bee of Rockport, Texas, pleads, "Marcella, please tell me something about my favorites, Al and Pete, and why don't you give us their picture?" Well, my dear, here's your comedy team. Al Cameron née John B. Brodhead, might have been an M.D. had not injuries sustained in football game diverted his interests to music. While in vaudeville he met Pete, at that time leader of an orchestra. Pete Bontsema, the team pianist, is tall and blond, and was born on Holland soil. He has a penchant for contests of any and every variety. Just can't resist it. When he's not busy answering his young son's questions, which are legion, he can be seen working out or creating cross word puzzles. Al spends his leisure time writing short stories and has a drama on the fire, I understand. He hopes some day to spend all of his time in writing. In four ye they've amassed 10,000 old-time songs s by their admiring audience. I don't thi Al is married, Loraine. And, by the w they are NBC artists.

* * *

OH, WHERE, oh, where are the Ray-vac Twins—oh, where, or where can th be. I've looked up and down throu the Radio waves, but oh dear, I'm still at sea. And if anyone tells me where th are I'll make up another little song. R Wildey and Billy Sheehan, the Twins person, have not been on NBC for so time and some Marcellians are ve anxious about them. Their pictures here so that they can be identified, for possible they're broadcasting under so other *numb de prune*. Reward—one Marcella's own prepared compositions.

* * *

THE female partner of "Mr. and Mrs the striving young couple who air th domestic difficulties over CBS each we was busy on her Westchester farm wh RADIO DIGEST's photographer sallied for So we are able to present only the liken of "Mr." "Mr." was presented to parents in 1902 by the long-billed bird a Thanksgiving gift in t city of Philadelphia. [HE last that has been heard of Mar- in Provensen was when he was in etroit. All track has since been lost of m. He is blond and tall and resembles mewhat Adolphe Menjou. His brother, erluf Provensen, is supervisor of an- nouncers in the Washington studios of ie NBC, and in this capacity introduces President Hoover whenever the latter talks on the air. The Provensens have been making history for many years. One of their ancestors, Ansgar, the famous missionary, is reputed to have brought Christianity to the north of Europe. In 1917 the father of

Marthin Provensen

Harry C. Browne

Edith Thayer

Marthin and Herluf accepted from King Christian of Denmark a post in charge of three churches in Jutland, Denmark. Herluf was born in Racine, Wis., on July 10th, 1908, and although an American citizen he spent ten years in Denmark, the family's native land.

Interested Mother and Mrs. Lucey are terribly interested in Hank Simmons' Show Boat, a CBS presentation every Saturday night. Harry C. Browne is the guiding spirit behind this very popular river boat feature. No, Mrs. P. R. S., the programs are broadcast direct from the studios in an imaginary show boat. It is one of the oldest programs on CBS wavelengths, and its success is entirely due to Mr. Browne's versatility as an experienced actor and director. The cast is as follows: Harry Browne is Hank Simmons; Edith Clinton—Lettie Simmons; Edith Thayer—Jane McGrew; Elsie May Gordon—Maybelle; Lawrence Grattan—DeWitt Schuyler; Frank Readick—Happy Jack Lewis; Harry Swan—Joe Carroll; James Ayres—George Morris, and Brad Sutton takes the part of Frank Miller. Edith Thayer, the charming Jane McGrew is known as the world's smallest prima donna, reaching the magnificent height of four feet eleven inches. Theatregoers will remember her in the leading role with the original company of *Blossom Time*. After this three-year engagement she appeared in Chicago theatres under the management of her husband, Howard Butler, who is now stationed as announcer at WMCA.

* * *

"WISH the whole RADIO DIGEST could be devoted to WTAM's staff," writes Janet Hart of Punxsutawney, Pa. "WTAM is my favorite station," says Al of Pennsylvania, and in this Carolyn F. of Cyclone concurs with him. "Let us have something about WTAM," is the cry of E. J. H. of Warren. Well, my dears, with so many readers on my neck for WTAM, guess the safest thing is to say a kind word about that station. Here are Doc Whipple, Helen Bucher and Tom Manning, all WTAM-ickers. Doc, or Clark Whipple, played the piano for years at the Golden Pheasant Restaurant. Then he toured on the road with a dance combination of his own, and in 1929 joined WTAM's forces as leader of the dance band. Miss Bucher is soprano, composer and pianist all rolled in one—a sweet roll—and it's not just a Jack of all trades with her. She is skillful in each of these callings. Tom Manning, my dears, is all of 28. He started on his athletic career as a boy on the baseball diamond and is well known among baseball fans. During the winter he announces all dance bands and any hockey, basketball or indoor games taking place.

Doc Whipple, Helen Bucher and Tom Manning

Jean Paul King

* * *

I'M JUST about knee deep in letters asking about Jean Paul King. Mrs. S. of Dayton writes, "Here I come with a burning question about Jean Paul King. Won't you publish his picture. He rates high in this household." A. F. P. of Rockford, A. E. G. of Reading, Phyllis of Jackson, Mich., Miss Fogan, Mrs. C. J. Williams of Ottumwa, Iowa; Lucille Bolinger of Kankakee, Mrs. A. M. Beach of Earlville; Mrs. Bert Myers of Bloomington, Ill., Helen of Peoria, Mrs. Lyle of Marseilles, Ill.; Marie Hummel of Detroit; and MCRK, all swell the grand and noble chorus for a picture and some dope on Jean Paul King. Well, Jean was born at North Bend, Neb., on December 1st, 1904, the son of the Methodist pastor there. In 1928 he married Miss Mary Cogswell, a Radio writer, who was graduated from the U. of California. Sorry to disillusion so many hearts, my dears, but he *is* married and from all appearances, Mrs. J. P. King is terribly healthy. Some Radio fans think that Jean's voice is second to none in the field (I wonder what would happen if we took a vote on that), but there is no doubt that he is entirely individual in his work. Jean has now taken pen in hand to write his "imprints" of the Sisters of the Skillett for our next RADIO DIGEST. He was educated at the University of Washington, where he was active in the University Players, the glee club and the varsity baseball, wrestling and track teams. Member of innumerable fraternities. Believes in wide general education for announcers and is quite opposed to specialization.

Francis MacMillen

Francis MacMillen, whose $30,000 Stradivarius is known to NBC audiences, began meddling with the fiddle when just three. He was born at Marietta, Ohio, and at seven was taken to Europe for musical training. At 16 he won first prize at the Brussels Royal Conservatoire, with a purse of five thousand dollars. When Gamba, musical writer of London, heard MacMillen at his debut in Brussels, he proclaimed him a genius. The Stradivarius violin now in his possession once belonged to the Spanish crown and was used by Sarasate, the Spanish violinist, and other famous musicians. Hobbies are baseball, football, and a good punch at the heavy and light bag. (See his picture on previous page.)

* * *

Harold Stein

HAROLD STEIN may be a photographer but he's a character and a personality in himself. He has snapped the picture of more than 57 varieties of celebrities and these include kings, princes, presidents and Radio stars. He doesn't just turn these "celebs" out of the door when he's through with the flashlight; he likes to discuss things with them. And so that he may know about these personages, and about Radio stars especially he has equipped his car with an auto set and tunes in on half-hour programs when the red traffic light is turned on. There is a story that Harold Stein loves to tell about Rudy Vallée. The Prince of Photographers sent his young new assistant to the Paramount studios to get some good shots. The youngster arrived with his camera at the studios but being less experienced was unable to place the instrument in the right place. A bystander seeing the awkwardness of the lad, took the camera from him, snapped the necessary pictures, patted the boy on the shoulder and whispered, "Tell Harold that Rudy was glad to help him out." It seems as if I hear deafening applause from the Rudy fans. And while we're on Rudy, I might say that we really ought to establish a Rudy corner right here in Marcella. Here we go: Elizabeth Trayner, Rudy never broadcast the Heigh Ho Club from WOR. Difficult to estimate how many songs he has written. February 22nd was WOR's ninth birthday. M. C. Miller of Pleasantville, Rudy has no steady lady friend—can you imagine how many suicides there would be if he had! I. T. H., you can buy Rudy's book, *When Vagabond Dreams Come True*, at any book store. The volume is published by Grosset & Dunlap. F. V. H., over 35,000 copies of Rudy's book have been printed. Sorry, Therese Meyer, I can't give you his home address. Rudy is at work on another book and he *is* Master of Ceremonies at the Villa Vallée, New York. Would like to answer your other

H. Studebaker, B. Congdon, Don Parker

questions, but I mustn't answer queries that are too personal. I. T. H., Rudy was married to Leonie Choif but the marriage was annulled a short time after that. He studied French and Spanish at college. Agnes, and the dinner was swell! Mary Hanlon will find a picture of Rudy and the original Connecticut Yankees in this issue. He comes back from his tour just today, as I am writing this, my dear. Sorry. Ann Smith of Philadelphia, but Rudy does not broadcast more than twice a week. Rudy announces in Spanish, Robert Longnecker, just to lend a little variety to his program, don't you know.

* * *

HERE you are Ruth Adams and Agnes. At last! Two more in the Happy Hollow Group at KMBC. Hugh Studebaker, who takes the part of the *villyun*, Harry Checkervest, and Bertina Congdon, the romantic Annie Laurie Blackstone. Versatility is Hugh's middle name. He is organist in "Between the Book Ends" and "Midnite Muse" programs; is dignified announcer and dramatist in the Salon Hour and in between these acts he is heard in character songs. Outside of that he has nothing else to do. Bertina, or Chic as she is better known to her friends, my dears, is just five feet tall, has yellow hair and blue eyes. Outside of her Happy Hollow role she is heard as Jane in the Town Crier Dramalogues and when she is not all of this she acts as secretary to Dick Smith, KMBC's Program Director.

* * *

DON PARKER, popular crooner at WMCA, is a study in brown, Beatrice Butler of Pleasantville, N. J. And because, perhaps his eyes and hair spell such color harmony, it is just natural for him to get it over in his songs. He is just twenty-one and has been on the air now for two years. Drives hither, thither and yon in a dark gray Chrysler roadster.

* * *

LEE SEYMOUR, formerly with the Majestic Hour, is now connected with a New York Insurance Company, Patsie, and Arthur Snyder left WCCO a year ago last fall to go with the NBC in its production department. He left there about two months ago and has not been seen or heard of since.

Mum's the word about Enna Jettick songbird, R. E. D. Mustn't tell who it is. And Milton J. Cross is not of t Tribe of Israel.

* * *

STAN LEE BROZA of WCAU is one the best known Radio personalities Quaker Town. Way back in 1923, wh WCAU was just a wee bit of a babe only 500 watts, Stan broke in as an a nouncer. He worked his way up and now Director of Programs of WCAU, t largest station in Philly. He was bo reared and educated in this city. H his hand in real estate, advertising a now Radio. Hobby is his Sunday Mo ing Children's Hour. And what d' know about this? Stan discovered Bob Dukes, four-year-old screen and stage st

* * *

Stan L. Broza

MY DEARS, am simply embarrassment. am blushing to t very roots of r feathers. First put my foot into by calling Martin Campbell of WH an artist. Then had to get my oth pedit in by calling him an announc But, my dears, he does not belong either of the species! He is *Assista Manager* of the station and is very mo est about his accomplishments, as witne his letter, "Dear Marcella: Your apologi for calling me an 'Artist' are accepte Now, what are you going to do abo calling me an announcer? I do not kn whether to smile or to cry . . . I am t assistant manager of the station and such try to stay behind the scenes." not having had any success with M Campbell himself, I turned to his se retary, Catherine Steele, who says th one of her boss' pet aversions is givi out personal information for publici purposes. However, I did get some in about Mr. Campbell and you can gu for yourselves who gave it to me. T hero of this sketch is a native of Ash ville, N. C. Took up show business f a time, then dropped it to take up h pen for the Louisville *Times* as Rad Editor. Took a decided interest in t ether business and three years ago becam assistant manager of WHAS. Mr. Camp bell is very good looking (no pictu available to bear me out, but, my publi you'll simply have to take my word for it In his late thirties, has black hair an black eyes. Quite reserved, but withal h cheery disposition and fine personalit A wife, a six-year-old boy and daughte four years older, complete the famil circle.

See you subsequently.—Your own Ma cella.

* * *

" Wilson, NBC impersonator.

Chinning *with the* Chain Gang

By Jean Dubois

Therese Wittler NBC actress.

Graham McNamee, Walter Damosch, Major Bowes, Rudy Valée, or ny one of a long list of NBC celebities should be held up in traffic n day, there's some one in the stu- who could hold the fort until the arrival. He's "Hack" Wilson, newnd up at National. He was and s one of their best engineers, but ay news of his remarkable gift for ry percolated through to the powat be, and he went on the air. I him in the April Fool broadcast, as "Graham McNutt" he introl himself as "Walter Gotmerung", "Major Bellows" "Rudy Chevrolet". Tone ty, mannerisms, even inflecwere perfect imitations—lls me long hours spent at controls when the celebs on gave him a swell opnity to get their little idiorasies down pat. H. Wars Wilson is the name on the oma he received from the neering school of the Uniity of Pennsylvania in 1929. nits to twenty-seven years, is six feet tall.

* * *

OLUMBIA'S newest quick-change artist doesn't do onages like Wilson, she (yes, female) does types. Elsie e Gordon takes off ragaffins, chorus girls, seri--minded clubwomen or whate-you in great style on the llace Silversmith program urday nights. She worked r way through dramatic ool, and one of her first jobs s in a "five and dime" store. at gave her a good chance to dy character, visited as it s by everyone from cooks to nd duchesses.

* * *

DID he commit a murder, or was he listening to the well Thomas broadcast on the night of January 6th when the attack was made? That's the question before a court in Norfolk, Va., which is trying a man who tells of listening to the broadcast in the home of friends. Affidavits support him and tell the subject matter of the broadcast. NBC officials have rushed a copy of the continuity to Norfolk to prove who's right. As this is written, the court has not yet made decision. With the new vogue of program murder trials what could be more apropos than a real murder hearing being identified with a broadcast?

Elsie Mae Gordon, Columbia's quick-change artist, as (from left) a tomboy, a French dancer, a small-town clubwoman and herself.

ANOTHER popular local act has been grabbed by the networks. Buffalo's WKBW bids a cheerful but envious farewell to F. Chase Taylor, alias Col. Stoopnagle, and Budd Hulick, who have been signed up by Columbia for a Green Brothers program to go on coastwise waves beginning May 24th. Six years at it makes Taylor a real Radio veteran, but Hulick has been in Radio just a year. Louis Dean, Columbia announcer, once was Taylor's partner, and thinks it would be grand if "they" will let him announce the new program.

* * *

PUT this in your Album of Funny Coincidences. Not long ago Columbia announced the building of a special audition room where Big Business executives could listen to prospective entertainers. Furnished like a living room, to make Mr. Executive feel at home. A month later NBC announces a living room in its quarters, too —but this one is for "timid Radio speakers" who find the big bare studios too much for their nerves. Not being a Big Executive, I haven't been in Columbia's sanctum, but I hope it has more ash trays than NBC's. I have heard complaints from gentlemen that the big NBC living room has only two! Every well-equipped living room should have at least six.

* * *

THIS month's milestone . . . May, 1931, is exactly one year from the date of Therese Wittler's arrival in New York with the Morse Players of St. Louis, who competed for a Little Theatre Cup. She decided to stick in the metropolis and contrary to tradition, got a dramatic job. She plays "Gypsy Carter" in NBC's *Moonshine and Honeysuckle* on Sundays.

(*Continued on page 97*)

Mr. and Mrs. H. Felton Williams, of the studio staff, whose marriage ceremony was broadcast over WPTF.

Met in Studio, So They Broadcast their "I Do's"

IT WAS a complete surprise to WPTF staff members when Margaret Fussell and Felton Williams announced their engagement and early marriage. And it was more of a surprise when H. K. Carpenter, manager of the Raleigh station, invited the young couple to use the studios for the ceremony and asked their permission to broadcast it to the thousands of listeners to the North Carolina station. On February 28th the nuptial knot was tied.

The studios were a mass of flowers, and the broadcast lived up to all the traditions of a simple home wedding. It was one of the most solemnly beautiful half hours ever placed at the service of WPTF listeners. Kingham Scott at the organ, played the Lohengrin *Wedding March*, while the Blue Bird String Ensemble contributed several romantic selections. Mrs. Williams is a pianist and popular "crooner", while Mr. Williams is one of the members of the engineer's staff. Both have been with the station for over a year.

* * *

TWO renowned artists of the concert and operatic world are now heard regularly over the air from WBAL in Baltimore. Mabel Garrison, who retired from the Metropolitan Opera to devote herself to her home (she is the wife of George Siemonn, conductor of the Baltimore Symphony) sings on a Tuesday evening program sponsored by the McCormick Company. And Frank Gittelson, eminent American violinist is on the air every Sunday morning. He made his concert début abroad in Berlin under the direction of Conductor Ossip Gabrilowitsch, and appeared with Nellie Melba as co-artist when that famous singer gave a concert in London. While not all of the WBAL artists have such brilliant public appearances, the station is noted for the high calibre of its entertainment and the genius of its musical staff.

* * *

JAMES JOHNSON is only seventeen years old, but he's already one of the most popular staff members of CHML in Hamilton. The young Canadian xylophonist and pianist appeared recently in a local picture house. He admits to becoming confused at the end of the performance . . . tried to leave the theatre through a fire exit . . . then made for another door, which he thought led to the stage, only to be met by a shower of brooms and dust-pans. To the audience's amusement, the soft-soap pail fell down and spattered on his manly chest. That's why he feels more at home in a Radio studio.

A Circle Tour *fro*

NEWS from Boston . . . Ben Had of the WNAC staff recently brated the fifth anniversary of his d as a Radio announcer. Ben was on stage, when he heard the call of the n He is still with his first love and has longer service than any other W announcer. . . . Hazel Story, assis program director at WEEI is goin for physical culture. She has let i known that in June she will marry I Fernald, physical director of Wallingi Conn., High School. . . . It wasn't Patrick's Day, at all, but all in one WLOE offered: Francis X. Rooney, or; Fahey Brothers in *Emerald Ge* Edward J. WPEN Announcer Speaks From Bellanca Plane

LOUIS JACKOBSON, who is known to the Radio world as program manager and organist at WPEN, has now added to his titles that of "flying announcer." He uses the big Bellanca plane owned by the station to convey to the neck-craning public on the streets below the latest programs featured over the station. The plane is equipped with an amplifying unit, permitting Jackobson to sit behind his mike thousands of feet in the air and talk to the crowds below.

This is but one of the three airplanes owned by WPEN, the other two being used to promote the station through the medium of the press. The ships, another Bellanca and a monocoupe plane, are at the disposal of the local papers, who have covered many major stories by using the planes to fly photographers and reporters to the scenes.

* * *

Another of the collegiates who will join the Radio world after graduation in June is Miss Marcia Feinberg of Thomasville, Ga. All during her college course at Brenau College she has been broadcasting, and has appeared on WSB, Atlanta; WJAX, Jacksonville, and WQDX in her home town. She has a soprano voice of exceptional range and quality and is a talented violinist. She writes "College and education came first, now my music comes into its own."

Handsome men and beautiful women seem to gravitate to Western studios. From left, José Bohr, KFI and KECA Argentine Tenor, Agatha Turley, Pacific NBC soprano, Pinkerton "Pinkie" Day, a former theatre headliner now at KEX; and Hélène Tourjee, who is accompanist, singer and organist at KFWI . . . she also does comic and serious monologues.

Pacific Coas

THE "Andy and Virginia" team are now up at KOIN, Portland, but they have appeared on a half dozen other coast stations from Los Angeles northward. Virginia Lee hails from Covington, Kentucky, which of course accounts for the tinge of southern accent in her speech. One of the cast of the original New York company of *China Rose,* she has studied vocally in several parts of the country, to say nothing of practical experience on the Keith Albee circuit and a few records for Victor.

Andy Mansfield studied at Penn State College, Cornell (New York State) and worked in various orchestras composing, making arrangements and playing the piano. The Andy and Virginia program features piano and song and pianologues in happy, informal mood.

* * *

JEAN CHOWN (Williamson) becomes prize contralto for the enlarged United chain on the west coast. Already music circles of the Southwest know her through various recitals and broadcast programs. Gene Inge, who dispenses information from the chain, writes that she studied in England and that . . . "her last appearance before an English audience was at a musicale held under the patronage of Her Royal Highness, Princess Louise, Duchess of Argyle, the Duchess of Norfolk, the Duchess of Somerset and Dame Margaret Lloyd George" . . . which, of course stamps Jean as somewhat of a highbrow. But she seems to have dropped any ritzy idiosyncrasies by the wayside.

* * *

BLONDE, petite Kay Van Riper, KFWB lady impresario, writes the series of French miniatures, directs it, and takes three or four different roles. This is quite some task for the 95 pound energetic Radio girl.

* * *

DR. LAWRENCE L. CROSS, doing a coast NBC program of an inspirational nature, mornings, is tall and lean and has wavy blond hair. Pastor of the North Brae Community church in Berkeley, college town, he was born in Alabama and was graduated from a college in Tennessee. Dr. Cross married a Yankee girl and is the father of five small children. During his "cross-cut" talks his little birds chirp . . . Alabama and Louisiana mockers and a pair of German rollers.

* * *

STUART BUCHANAN, now directing drama for the United chain out on the coast, achieved considerable fame as a member of the Pasadena Community Playhouse Players but, even before that, he was with Stuart Miller in Indianapolis and in stock at Denver. Before entering Radio, Buchanan played football at Notre Dame; taught in the Universities of West Virginia and Florida.

* * *

NELSON CASE, suave blonde announcer for KFWB . . . son of Managing Editor Walter Case of the Long Beach (Calif.) Morning Sun, once had his own college band . . . and had a composition of his own, *Waiting in the Rain* . . . hot dance tune which gallops unrestrained up and down the piano keyboard.

Dorothy Warren, once of the Pacific Repertory Company and several seasons with the Pasadena Community Players, is doubling up on drama parts for KFWB this spring . . . with the *French Miniatures* and the *Romancing Racketeer* weekly continuities.

From left, Harriet Pool Branham, KROW organist, and Announcer (also KROW) Frank Killinger, who has been cameraman, electrician and world traveler in the past. Winnie Fields Moore, KFI and KECA travelogue artist, and Ronald Graham, KFRC baritone . . . born in Scotland but likes America.

Pick-ups

By Dr. Ralph L. Power

RL TOWNER goes back to his first Radio love . . . KFRC. Some four ago he was singing basso with the ers male quartet. Then he went other fields, but came back early this with the Buccaneers. another male et. Others: Elbert Bellows, and Nelson, tenors, and Morton Gleason, one.

arion Boyle, KHQ's 21-year-old st, was born in Vancouver, but she ived in Seattle since the tender age iree. Just now she is studio accom- t for KHQ and is also an amateur er. Eyes of blue, stylishly thin, hair—Marion is one of those ener- girls who are the "life of the party."

* * *

MA MORROW, of KPO, has just written *Lyrics in Lavender*, off the s early this year, with some of her nal poems. She does the continuity in e for "harp harmonies", once-a-week- ram of the San Francisco station.

ot many Radio entertainers have ever e their act for the Duchess and Grand hess of Luxembourgh. In fact, lots broadcast folks never even heard of 'em. But Elbert Bellows, KFRC tenor, has. Serving with the 5th division, A. E. F., Bellows went with a troupe of A. E. F. players after the armistice touring the various units. The royal duo witnessed a performance where the young soldier sang. Later he went into Germany with the American army of occupation.

* * *

PAUL BERGMAN, KMTR's trick saxophone player, wrote *Wild Fire*, usually played as a sax solo . . . three years in this country, he is a robust German.

Sam Hays leaves the climate of Oakland (KTAB) and goes to Los Angeles to announce for the new United chain. A year or so ago he played the male lead in the only open air performance of the *Peer Gynt* suite given in this country . . . at Mt. Tamalpais, California.

* * *

TWO Southern California stations planned to do spring house-cleaning by moving completely very soon. KMTR, early in June, plans to move its studio to the United Artists lot in Hollywood, while KMCS (formerly KMIC, Inglewood) figures on moving to inside the gates at the Metropolitan studio.

KTAB's newest tenor, Paul Hammet, is another auto salesman gone Radio. By day he goes up and down the well known peninsula selling America's popular family car, and at night he does his song act for KTAB. Married; two children.

nother one of those trick photos, for Tom and Wash are both Tom reneman of KFWB. In his noonday sketch he announces "matmonial bureau, insurance, divorces arranged for, janitor work."

KJR believes in playing golf the year round . . . that is, its staff does. Jean Kantner, tenor, headed the list at the last accounting, and some of the fellows at the Northwest Broadcasting System hope to get in good enough shape to challenge the boys at the United chain in Los Angeles pretty soon.

* * *

RANCH HOUR at KTM gets a new recruit in the form of Dan Cypert, cowboy singer from the range lands of southeastern Arizona, where he worked on the Lazy Y ranch near Wilcox, tiny cow town. Cypert is an old-time friend of Cactus Mac (Curtis Mac Peters) also on the station's ranch program nightly. The new Radio ranch hand, lean and lanky, is in his late twenties and has also been an exhibition rider at rodeos and country fairs, while his musical efforts have been gleaned from the ranch bunkhouse and around campfire gatherings.

* * *

EILEEN ROBERTSON is now staff pianist for CKWK up in Vancouver. Born in London twenty-three years ago, her family moved to Salem, Oregon, the next year and to Vancouver in 1917.

Besides a talent for the piano, she is likewise a professional dancer and commercial artist and, as such, made a number of vaudeville tours . . . Pantages and Capitol circuits . . . and several years ago won the pianoforte gold medal at the British Columbia music festival.

* * *

MAURICE KOEHLER, director of the new KGFJ little symphony, hailing originally from Verviers, Belgium, drops his violin for the time being to direct the group for the station which operates some 24 hours a day.

The bushy haired, bespectacled musician has been studying since the age of eight when he came to this country, although he returned to the continent to study in the Royal Academy in Munich and under Christian Timmer, Amsterdam.

Betty McGee Broadcast

HERE'S a blow to many tender feminine hearts among WLS listeners—the Maple City Four bids fair to become a double mixed quartet. "Pat" Petterson, basso, started it. In January he was married to Miss Helen Kiff of La Porte, Ind. This inspired Fritz Meissner, first tenor, to join the ranks of benedicts so in February he took as his bride Miss Dorothy Davidge, Cairo, Ill. And now Al Rice and Art Janes, the other two quartet members, report some progress. Incidentally, this aggregation of singers claims the world's record for early morning broadcasting. During the last two winters they have broadcast programs from 6:30 to 7:00 a.m., six days a week, without missing a single engagement.

Al Rice, who is also a "lead" in many WLS plays, is another one of those people who has done his bit toward entertaining the Prince of Wales. It seems that Al once directed a popular orchestra chosen by His Royal Highness to accompany him on a two months' Canadian trip. It was in Vancouver that the Prince heard Rice's band in a large hotel and was so pleased with their American style of playing that the tour was arranged. In 1929, when Rice was passing through Chicago to join a western orchestra, he met the three original members of the Maple City Four in search of a lead tenor,—so that's the "how" of that story. By the way, he sold his saxophone and bought a 10-cent flute which is now known as his "shower-bath wheeze".

* * *

AS RADIO goes into deeper dramatics, we are told, the need for realistic sound effects grows most important.

Urban Johnson, xylophonist extraordinary and member of Leon Bloom's studio orchestra for WBBM, is their newly appointed Director of Sound Effects. . . . His job it is to figure out the means of reproducing anything from a rattlesnake's ominous buzz to a baby's whimper or an elephant's sneeze.

Recently, Urban was suddenly called upon to make a noise like a chain and padlock. Nothing in the usual sound equipment would do. With a flash of inspiration he grasped a string of beads from one of the actresses and dangled them over a plate. And the drama's realism was preserved!

* * *

THE hurdle from society teas to the microphone is a short one for Dorothy Peffer of Battle Creek, but on the way she masks in the anonymity of Miss Melody. For four years she has been the outstanding entertainer of WELL, Battle Creek, but never disclosed her identity in any of her broadcasts, steadfastly refused to have her picture appear in the paper and declined to consider personal appearance offers. RADIO DIGEST is the first publication to publish her picture. In recent months she has appeared in a daily morning program *Shopping With Sally*, over her home station, during which she describes smart things to wear and bits of gossip about the smart places of the community. Although these talks are essentially for women, she recently received a request from a man "just over from England who wants to know something about men's fashions over here." She is a member of the Hunt and Saddle club, exclusive organization, and not only does she ride well but is an excellent dancer.

THERE'S a new member in the Gordon Van Dover family (yes, Gordon is a member of the Tom, Dick and Harry Trio, WGN). The little newcomer arrived in town on Lincoln's birthday and his name is Marlin Arthur—you guessed it—after Marlin Hurt, also of the famous trio. Little Marlin Arthur has brown eyes like his daddy and red hair like his mother—and a brother, Gordon Jr., 4, and a sister Lila Mae, aged 2 years.

* * *

IRENE WICKER, petite star of numberless roles originating in the studios of WBBM, consulted a numerologist, who suggested that she add another "e" to her name. It may spell more success, anyway, she's had plenty of that in numerous Daily *Times* dramatic skits and is fa

First published photo of the mysterious "Miss Melody" of WELL, Battle Creek, Mich., now revealed as Dorothy Peffer, society girl, fashion authority and expert equestrienne.

WLS Maple City Four may soon become eight. From left they are Pat Petterson, already wed, Art Janes, on the verge, Fritz Meissner, also wed, and Al Rice (?).

From the Great Midwest

red in *Story In Song*, *The Carnival* and *he Band Concert*, which are WBBM offrings to the Columbia Farm Community etwork programs. Irene, or rather eene, was in the University of Illinois ass of '24 and was a member of Chi mega sorority.

* * *

THE secret's out now! "Homesteader Budge" who has been mystifying Farm and Home Hour" listeners has en discovered to be none other than one arry J. Budinger, whose scintillating ncopation has attracted notice on the *east Foamers* and other NBC productons. Budinger is also featured on KYW rograms as a member of Rex Maupin's *ces of the Air*.

* * *

FRIENDS of "The Smith Family" are tuning in on WMAQ on Wednesday ghts at 8:30 since WENR was purchased the NBC and this program became a ature of the Daily *News* station. They ent to WMAQ with the wind-up of an ection for mayor of the town (Glendale ark, a suburb of any city) in which Mr. nd Mrs. (Smith) ran against each other. . . When the race for mayor was being m the station on which they appeared. 'ENR, received almost 600,000 votes. atistics show this is without a doubt the rgest return from any weekly feature aged on any single station in the county.

Admirers of Marion and Jim, who do ketches and songs, will find them also at WMAQ. They are presenting "Smack Out" at 6:00 each night over that station. The program finds Marion and Jim in a country store with an old New England character who always has plenty of wagon tongues, plasters and what not.

* * *

SOMEONE is always wanting to know if "Herr Louie's" accent well known on the popular WGN "Hungry Five" feature is real, and the answer is that he certainly comes naturally by it. For although Henry Moeller, which is Herr Louie's honest-to-goodness name, was born in Davenport, Iowa, his parents were born in Germany. Henry not only directs the "leetle German band" but writes the continuity for the feature.

Coming to Chicago after finishing school in Davenport, Henry met Hal Gilles, the famous Weasel. Hal hails from Evansville, Indiana, and has been a black face principal, a singer of Negro dialect songs and an ace of sentimental ballads. He is also a clarinet player and a hoofer of no mean ability.

Henry and Hal used to play together in musical comedy, and some seven years ago these two enterprising young men entered into partnership as producers and stagers of home talent plays. And it was in March, 1928 that the two first appeared as Radio entertainers over WGN as the principal characters in *Louie's Hungry Five*. . . . Last October Moeller and Gilles began making electrical transcriptions of their Radio act. Today the feature is heard over more than forty stations in the United States, Canada and Hawaii.

* * *

THE latest addition to the dramatic and announcing staff of WHK, Cleveland, is Victor Dewey Lidyard, who claims to have gotten away with a one-man dramatic sketch featuring no less than 22 individuals. His picture appears on this page. Although Lidyard has been doing dramatic work for quite a long time in Akron, he made his first bid for Radio fame not many years ago by giving a most impressive interpretation of Ida M. Tarbell's "He Knew Lincoln".

Lidyard is somewhat in doubt as to what his Radio nom-de-plume should be. He has answered variously to Dewey, Victor and Duke. In stature he is rather slight with hair inclined to an auburn tinge; a very pleasant microphone voice and manner, and a smile that is contagious. WHK listeners have heard him frequently of late on remote dance programs and he will be featured soon in dramatic offerings from the Studios.

* * *

MENTION interest to listeners and we bring to mind Helen Wyant,

(*Continued on page 97*)

Cumberland Ridge Runners of WLS National Barn Dance. Standing: Gene Ruppe, Hartford Taylor, Ed. Goodreau. Lower: John Lair, Doc Hopkins and Karl Davis.

Victor Dewey Lidyard plays Punchinello. He's the newest addition to WHK, Cleveland, dramatic and announcing staff and claims to have done 22 characters in one skit.

William Braid White

The Enjoyment of Classical Music

Lovely Chamber Music vs. Bang-Bang Rhythm—
"Those Trembly Singers" Are a Menace

By
WILLIAM BRAID WHITE
Doctor of Music

ALMOST any bright student who has taken a few terms of lessons in harmony and counterpoint under a clever teacher, can write music for one hundred and twenty instruments or thereabouts. But when it comes to writing significant music for four or five instruments, then our clever youngsters are simply nowhere. Music for the small ensemble is of all kinds the most delightful, the most elusive and the most powerfully appealing to refined tastes.

Every one of the greatest composers, save only Wagner, who devoted himself entirely to the composition of music-dramas (operas), has written trios, quartets, quintets or sextets, that is to say, music for three, four, five or six instruments. Beethoven wrote a septet (for seven) and both Mendelssohn and Schubert octets (for eight). Schubert wrote several quartets, a trio, and an octet for four stringed and four wind instruments which has been played in every part of the western world by enthusiastic musicians during a hundred years. Columbia made a beautiful phonograph recording of it, a few years ago, which has sold very well. Beethoven wrote eighteen quartets, besides trios and the famous septet. Mozart delighted in chamber music. So did Schumann. So did that little giant Brahms. Chamber music, in fact, has attracted and fascinated the greatest musical minds during the last two hundred years.

I have said something in previous articles about the meaning of the terms, "trio", "quartet", etc., as these are used in describing chamber music. Let me now add that the distribution of the instruments in these small ensembles is not a matter of chance, or even to any extent of the composer's fancy. Long experience has shown that the combination of two violins, one viola and one violoncello is well-nigh perfect for the purposes of chamber music, and this particular grouping has therefore become universal for the performance of what are called "quartets".

Unhappily we use the same word to describe both the music written for four instruments in the grouping mentioned, and for the grouping itself. This is of course illogical, but like a great many other illogical customs it survives. One has to judge by the sense whether the reference is to the music itself or to the group of instruments, when one speaks of a "quartet" or a "trio".

Chamber Music in Electrical Transcriptions

Happily for us lovers of chamber music, the National Broadcasting Company and the Columbia Broadcasting System are steadily giving us more frequent opportunities to hear the playing of first class ensemble groups, especially of quartets and trios. And a good many performances of chamber music on local stations are from phonograph records, but I think no one need worry about that. Recorded music has been produced in conditions the most nearly perfect that can be imagined. The music has been played again and again until each of the artists has proclaimed himself entirely satisfied with the result. Only then has it been published.

I have two thousand phonograph records and am adding steadily to their number. In fact I have to keep a card index record of them. Among these are some four hundred records of chamber music. I have often compared the recorded playing as given out by my big electric phonograph with the same music played direct into the microphone at the broadcasting studio by the same artists. It is not usually easy to decide which one likes better. At any rate, whether from records or directly, we are getting a fair amount of chamber music these days through our Radio sets and I think we all ought to be happy for so great a privilege.

Trios, quartets and quintets, in fact, are, so to speak, sonatas for ensemble, or to put it in another way, they are symphonies in little. A symphony for orchestra, a quartet for four instruments, a trio for three or a sonata for two or for one—all are founded upon the same fundamental plan. All alike have (usually) four movements of the same general character. All depend in the same way upon the development of distinct musical themes. A symphony written for a great orchestra is powerful, large and complex to an often extraordinary extent, while a quartet or trio will always in comparison be short and simple. Of course, you cannot get out of four instruments, or three even when one is a piano, the sonority and power of a symphony orchestra. So the composer, writing a quartet or trio or quintet, knows that he must depend upon clarity of plan, clean-cut ideas and masterly working out of them, to capture the imagination of the players and of the hearers alike. Chamber music is never noisy. It is usually not even exciting. But it is pure beauty. And that is what counts.

I am all for persuading my readers to listen at every opportunity to all kinds of chamber music, especially to trios and to quartets. More and more the opportunity is being given to you to listen to this greatest of musical styles. Chamber music is the finest of all music because it is music stripped of meretricious trappings, music which comes to you in stark simplicity of lovely sound where that to which you listen is the sheer beauty of the tone patterns quietly and simply weaving themselves before your ears, free from blare of trumpets or thunder of drums.

Of course if music is to you nothing but noise, glitter and bang-bang rhythm then you won't like string quartets. But if you have begun to sense the divine beauty of musical pattern-making as it is done by a master musical mind, then you will more and more like chamber music and you will less and less be thrilled by mere bursts of sound, no matter how magnificent.

I have just had a most interesting letter from a most interesting man, one of the oldest piano tuners on the North American continent. He is Mr. Joseph

---

Dr. White will answer readers' inquiries on musical questions in his columns. Address him in care of RADIO DIGEST, *420 Lexington Avenue, New York.*

Whiteley of Moncton, N. B., and he has ...tten on a question which must have ...acted the attention of a good many ...lio listeners. He refers to the prev... ...t and detestable practice among ...lio singers of producing excessive ...rato". Why so many singers should ...k it necessary to make their tone ...duction sound like a wheezy church ...an with the tremolo stop pulled out ... going full blast, is something I do ... pretend to explain. Yet the thing ...pens continually.

Those "Trembly" Singers

...n fact, most of those Radio singers ... are not merely crooners, whisperers ... similar vocal criminals seem to think ... point of necessity to impart a con... ...ous and senseless tremolo to their ...es. I suppose that this is done by ...n for either or both of two reasons. ... first reason undoubtedly is found ...ad tone production, brought about by ... teaching. There are probably more ...mples of bad teaching among singers ...n among all other musicians put to... ...er. The second reason probably lies ... belief that the public likes this sort ... singing. If this be the case, then of ...rse nothing can be done about it, ...il the public changes or rather, im... ...ves, its taste.

...At any rate, this can be laid down as ...ule: A singer who makes every tone ...o a tremolo is not a good singer.

...Mr. Whiteley makes another point. ... says that Radio listeners who hear ...s sort of tremulant vocal tone all the ...e will fall into the error of supposing ...t it is actually correct. If so, thinks ... they will suppose also that the piano ... the living room, which has not been ...ed for years, and which because of that defect gives out an excruciatingly complete tremolo whenever a key is touched, is really sounding just as it should.

Well, this may be the expression by Mr. Whiteley of a somewhat excessive fear, but when one considers how few pianos are ever in tune, and how the masses of the people seem to have hardly any idea of the difference between intuneness and out-of-tuneness, it is easy to see that his fears may be justified after all.

Which brings me to another matter. Radio and pianos in the home are drawing together. A very interesting new project is under way. Probably most of my readers have already heard about it and no doubt very many of them have begun to listen-in. At any rate the thing is so tremendously interesting to all who really care for music, and it carries such great possibilities in the way of helping to develop latent musical talent, that I consider myself quite justified in talking about it here.

Piano Lessons for a Nation

Of course, I am referring to the Saturday and Tuesday broadcasts which were led off on March 28th, and to the first of which Dr. John Erskine made the principal contribution. In these programs, which are going on regularly each week, noted musical amateurs, men and women of affairs who play the piano as hobby, relaxation, fun, are joining to demonstrate to the millions of Radio listeners how easy it is for any person who has a piano at home and a little stock of common sense in his or her head, to learn to play tunes and accompaniments for personal pleasure and satisfaction.

This is a very fine piece of work which President Aylesworth of the National Broadcasting Company has started. He, like other men who think and look ahead, realizes that the art of music would simply curl up and die if the time should ever come when no one should take any longer an interest in personally producing music. Should this time ever come, which God forbid, music as a living, growing art would come to a standstill and the millions of listeners would find that their greatest pleasure and standby, music on the air . . . was dying on their hands. Now, I am not an alarmist, but the truth is that we have been traveling a good deal too fast for comfort or safety along this line of passivity and apathetic absorbing.

We, and I mean to include the millions of Radio listeners, have shut up our pianos, have banished music lessons from the home and have said, "Oh, why bother when we can get all the entertainment we want by turning a button?" What has been the result? We have begun to find . . . and that this is true evidence accumulates daily to show . . . we have begun to find that merely to listen without ever trying to take part, is a sure way to boredom. No one would sit for hours, day after day, looking on at others playing bridge or go out to the golf links just to watch others playing golf. Occasionally, when a Bobby Jones comes along we are willing to go and watch his play, but that is largely because we hope to pick up a few hints towards improving our own play. Just so, music students will crowd to hear a great pianist or violinist or singer; because they will be learning while they are listening.

If some one could only start the fashion of cultivating an amateur acquaintance with practical music! After all, the thing is neither impossible nor necessarily very difficult. There are communities by the score all through this great land of ours where little groups meet to sing and play music together. Just think for a moment of that marvelous movement which has produced the bands and, still better, the orchestras of our High Schools. I have listened with astonishment and genuine admiration to the playing, under Professor Maddy's baton, of five hundred boys and girls, drawn by competition from high school orchestras all over the country, playing in one great symphony orchestra under Professor Maddy's baton; and playing with amazing freshness and enthusiasm. Again last Fall I had the delightful experience of hearing almost as many youngsters of both sexes drawn from the school orchestras of one single state, Iowa, playing after just a few days' rehearsal at the meeting of the Iowa State Teachers' Association. It was, I tell you, a wonderful experience to see pretty young girls playing the big bull-fiddles, the French horns, the trombones, the clarinets, as well as the more usual violins. It was as wonderful to see fine

(*Continued on page 98*)

Leopold Stokowski, conductor of the Philadelphia Orchestra, is also a fine pianist.

A Post-Script on ETIQUETTE

P. S. Musts and Mustn'ts of Convention Should Be Observed. They're Signs of Good Breeding

By Emily Post

WHEN I joined Mrs. Blake's column, which broadcasts over the Columbia network every Friday morning, I promised my Radio listeners that I would try to point out which rules of etiquette are vitally important, and which are not quite so important.

Every rule to be of importance must have for its object the smoothing of the social machinery, or the considerations of taste or of courtesy. Rules for social machinery include all details of dining-room service, table manners, introductions, leaving cards, the unending details such as when to sit and when to stand, and the conventional—practically mechanical—thing we do and say on various occasions. The purpose of this class of rules is best illustrated by a church service.

Emily Post, Author of popular book, *Etiquette*.

It would be shocking to have people trotting in and out of pews, talking out loud or otherwise disturbing the dignity associated with church ritual. For this reason, we have set rules of procedure for all ceremonial functions, so that marriages, christenings, funerals, as well as Sunday services shall be conducted with ease and smoothness.

Among the conventional forms for instance, that allow no deviation we must include introductions and greetings. The formal introduction is, and has always been, "Mrs. Stranger, may I present Professor Brown?" The semi-formal introduction, which is the introduction in general use, and equally correct (whether on formal or informal occasions), is the mere repetition of two names: "Mrs. Stranger, Mrs. Neighbor." Both names said exactly alike. When introducing a man to a woman her name is said first. A woman is never introduced to a man—not even if he be eighty and she eighteen.

When you have been introduced, you say "How do you do?" Once in a while, if introduced to some one you have heard much about, and who has also heard about you, you perhaps say "I am very glad to meet you", or "I've heard so much about you from Mary". But you must never say "Pleased to meet you" or "Charmed" — both of these are socially taboo! Nor do you cooingly echo "Mrs. Smy-uth". Best Society says "How do you do?" Nothing else.

A hostess always shakes hands with her guests when they arrive an when they leave. She should never shak hands at face height or in any other awk ward or eccentric fashion. A proper han shake is at about waist height. After introduction you merely clasp hands ar after a brief raising and dropping mov ment, let go. Of course, if you a shaking hands with a friend—especial one whom you have not seen for a lo time, you shake hands with a warm pressure and for a long time. A hoste greets her guests with the inevitab phrase "How do you do?" to which s adds "I'm so glad to see you," or "M Older, how good of you to come".

When you say good-bye to your hoste you say "Thank you for a very pleasa evening," or "Thank you so much f asking me," or a young girl says "Go night, I've had a wonderful time!" "It's been a wonderful party!" Hoste answers "It was a great pleasure to s you" or "I'm so glad you could come," "How nice of you to say that"—whatev naturally answers what her friends ha said.

At a dance, a man asks a girl "Wou you care to dance?" She says "Yes, like to very much," or if he cuts in, says "May I have some of this?" H present partner releases her. She s nothing. When they finish dancing, always says "Thank you." Or he p haps says "That was wonderful". either remark she answers "Thank yo

AND now let me say few words about another and even m important division of etiquette, which s that of courtesy. In a nut shell, court means unfailing consideration of the f ings of others—it is the very spirit good breeding—the outward expression innate kindness. The only example discourtesy that has threatened po society in over three hundred years that of the hostess who helps herself o the untouched dishes first, and then her leavings passed to her guests. T example of unknowing, or at least thinking, rudeness cannot be over phasized, because it is spreading around the outskirts of society, and

w to set a table for tea. This ow Mrs. Post prepares for her sts. Photo taken in Mrs. ost's New York apartment.

n invaded the homes of certain few well-bred but elessly absent-minded hosses who fail to notice at their improperly trained vants are doing. And as se of highest position are . to be those who pay least ention, Mrs. Nono Betta icing that Mrs. Richan reless served herself first, ls her butler or waitress to the same. Others in turn by Mrs. Nono Betta and it s on—except, of course, the houses of those whose rtesy is innate, or those whose ial position is founded on the traditions culture. The only occasion when the ditions of courtesy permit a hostess to p herself before a woman guest is when has reason to believe the food is poied. It must otherwise be remembered t the dish of honor is the perfectly garhed untouched dish, with fresh unched serving implements laid upon

And the guest of honor, or whoer is the oldest woman guest pres-, has the honor of breaking into s dish. For the hostess herself to op out a hollow, or to cut a gap, or to ak a crust—cannot be defended; since bite into an apple and then hand it to guest would be no greater breach of rtesy. Imagine a child at his own party ng allowed to help himself to the pieces likes from the dish of cakes or in the of candy and then hand the dish or box his guests!

A THIRD division of etitte is that of taste. This naturally indes the clothes we choose, and where wear them, the house we build or buy furnish, and of still greater importance (since choice of home or clothes is limited by money) is the taste with which we choose our words and their pronunciation. In short, our standing as persons of cultivation and social distinction (or the contrary), is determined in the first few sentences we speak. In making the briefest list of mistakes to be avoided, one might put at the top of the list all characteristics of sham and veneer. A would-be-elegant pose, a mush in the throat voice, and any such expression as "I beg you will partake of refreshment before retiring," or "I will be charmed to attend" are all to fashionable people, taboo. By fashionable I mean those who have for generations known widest cultivation. Such people as these would say "Will you have something to eat before you go to bed?" "I will go with pleasure", and all other Anglo-Saxon expressions.

Pronunciation taboos include flattening and perversions of the vowels. "Jest" meaning "just", "ben" for bin or—pronounced by the very high-brows "bean" but by most of us, "bin". Foreign is right—Foureign is wrong. We drink water—not watter. Thought should be "thowt" not thot; film—not fillum; athletic—not athaletic. And no one with the least pretention to cultivation could ever say "girlie", "little woman", "in the home", "pardon me", "gentleman friend", and so on.

As for subjects of conversation, society might discuss pathology, but it taboos physiology. Any abstract subject could be admissible but should any one mention blemishes on toes by actual name he would find himself outside the barred door of every society that could possibly be admitted as Best.

QUESTION CORNER *for Women Readers*

THE Woman's Feature Editor of RADIO DIGEST *is opening this Department with a desire to assist women readers in solving problems, large or small, which arise in daily life.*

SHE will be glad to answer any questions that may be troubling you from some domestic problem to the latest in fashion hints. Address your letter to Woman's Feature Editor, RADIO DIGEST, *420 Lexington Avenue, New York, N. Y.*

Mrs Miriam Finn Scott

The

He Always Has Something Valuble to Offer to the World and Must Be Given More Than Ordinary Consideration

By Miriam Finn Scott

THE following article is one of a series of broadcasts which Mrs. Scott gave over the NBC. If you have any problem with your child, write to Mrs. Scott in care of RADIO DIGEST, *420 Lexington Avenue, New York City, and she will be pleased to advise you how to handle it. Mrs. Scott is the author of several books on the care of the child and is a recognized authority on children's problems.—Editor.*

THE most difficult type of the unusual child to handle is the child with the original, inventive mind, great mechanical ability, an insatiable curiosity and an almost ruthless urge for experimentation. A child with these qualities is on the one hand utterly fearless, recognizes no physical limitations either within himself or outside of himself, goes to any extreme, stops at nothing in order to attain his ends. But on the other hand he finds it almost impossible to conform to the necessary routine of daily life. This kind of the "unusual child" is, of course, a very trying, disturbing member both in the home group and in the school, but parents and teachers must realize first of all that the child of this type cannot be held responsible because he is endowed with powers beyond his physical control; he cannot be blamed. He must be helped to acquire control of the driving forces within him so that they will become a constructive and not a destructive contribution to his development. But such control cannot be taught to a child by mere words, by threats, by punishments or by rewards. It can be achieved only by taking an interest in the child's deeply rooted interests. He requires the most thoughtful, the most sympathetic and at the same time the most definite training. It is very important for parents as well as teachers to realize that from this type of child perfection in the commonplace details cannot be expected. If he gives a reasonable amount of cooperation, if he learns to understand and admit his thoughtless conduct, if he shows a willingness to do better—these efforts, however weak, should be appreciated and encouraged. It is a slow, a most difficult task to help this type of the unusual child to get command of himself. It takes time, patience and endless courage, but in my opinion no child is more worthy of the best thought and training than the unusual child, because it is invariably out of this child that the man or woman springs who makes a worthwhile contribution to society.

To the parents who believe that the school can and should do everything for a child, I wish to say from a rather wide experience that no school can undertake this almost overwhelming responsibility of training the unusual child. The school should certainly give understanding cooperation; it should give special attention, in so far as it is able; but it has neither the time nor the facilities to give to the unusual child that individual, intensive training which must be done at home, in all the hours that he is outside the school.

THE story of Bob will illustrate the problems the unusual child presents from various aspects—it will also show how he has been handled, how his unusual qualities are being developed, but not at the expense of the comfort and happiness of others.

Bob started to show his adventurous spirit at the early age of two and one-half years. He was for the first time sitting on a float, carefully watched by his father. Bob was apparently quietly enjoying the new experience when he saw his sister (ten years old) dive into the water. Before the father could move, Bob jumped up and dived into the water. There was a momentary scream of terro from those on the beach who saw th incident. To be sure, there was littl danger of the child's drowning, with hi father right there, but Bob needed n assistance—he bobbed up, caught hold o the rope and pulled himself up on th float. This little incident is typical o the way Bob never misses a chance o trying a new adventure.

FROM his earliest yea Bob was interested in boats. He carve them out of wood with a knife, fitted ther out with sails and sailed them. Storms an winds made no difference to him, much t his mother's discomfort and anxiety. The began his engine creating period, whe fire explosions and short circuits kept th household in a turmoil. From that h went into the building of aeroplane Whatever happened to interest Bob at th time, that interest held him almost spell bound from the moment he opened h eyes in the morning until he went to be at night. Every scrap of wood, met and string that he came across he save for his inventions. School had no a traction for him, although he learned read and write, or print, at the age five. His eldest sister was his teache Learning to write interested him becau it helped him to understand the advertis ments of the things which he loved, a at a very early age he began to correspo with various concerns requesting cat logues and illustrated pamphlets.

At the age of six Bob's mother decid to enter him in a school. She chose o of the foremost modern schools. T mother was very frank. She told t principal of the school that she did n understand how to handle Bob, that was too much for her. The principal e amined the child, found him very int esting, admitted him, and in accordan with the ideals and methods of the sch Bob was given full freedom for self- pression. This ideal freedom for se

Unusual Child

pression played havoc with Bob. The ool, as such, was just a fifth wheel to b's wagon. He almost took the school rt! After one year in that school he was hattered, thoroughly disorganized child.

THE second school he ented was a school of high academic standd and splendid discipline. Bob passed intelligence test with flying colors. He s admitted with the school's full knowlge of his past history. This school nd Bob a willful, wild, undisciplined , behind in all class studies and terri- anti-social. The amazing skill of his nds, his keen interest in all scientific l mechanical devices, was not even iced by his teachers. He was intering with the routine of the class work l the parents were requested that he be noved from the school because he could make the necessary adjustment.

The discouraged parents were vised to enter Bob into a very all school where he could have ensive individual attention. was taken to a school that d only about a dozen pupils. had been founded for the ecial purpose of developing the ritual nature of the child and give particular attention to unusual child. Here Bob nd himself among a group of ildren, the majority of whom re definitely deficient. Some the children, although two or ee years older than Bob, were a much lower mentality. The hool held nothing for Bob exot boredom. Since nothing was ovided for him by the school keep his keen mind legitiately interested and his skillful hands sy, he was driven to find an interest for nself. During his play periods in school b spent the time building aeroplanes. work the propeller he needed rubber nds. In his eagerness to finish the plane went searching around in the schoolm for the rubber bands. He found ne in the supply closet and took them. was caught and pounced upon by one his teachers—was lectured on the subt of honesty—was practically branded hief. Not until it was too late did the chers realize with what outrageous stulity and injustice they had handled a all boy. The parents, in despair, reoved Bob from this school, and it was at s point that he was brought to me.

I found Bob fascinating—alert, intered in everything, keenly observant, and th an almost uncanny skill in his ten gers. He had brought some of the models of the aeroplanes that he had built. Designers of aeroplanes have pronounced these models to be extraordinary work for a child of ten. But with all his skill and intelligence, I found Bob nervously worn, chaotic in all his habits, absolutely irresponsible, thoughtless in his contacts with others and cruelly demanding.

I REALIZED that here was an unusual child who was the victim of almost vicious handling. What he needed was freedom to express his valuable powers, but he also needed definite discipline to help him get control of his powers. He had to be aroused to a sense of responsibility; he had to learn to conform to certain rules of conduct for the benefit of others, and unless he did so he could not have the things that were most precious to him. His parents were made to understand that in his physical habits

A child at play in the quietude of the Children's Garden.

they had to deal with him as though he were six years of age. He had to learn to dress himself properly and quickly; to be willing to take his bath on time; to come to the table promptly and observe good table manners. For a while he was tutored at home to get a solid foundation for his school work. All this training was given Bob with regularity, with definiteness, but in a spirit of sympathy and true consideration—it was never overdone. At the same time he was given a reasonable opportunity to experiment and adventure.

Bob gradually learned to appreciate that, hard as it was for him to conform to the routine of every-day life, conforming brought him release from being nagged and tormented all the time for doing this and for not doing that. In the spring he entered a school at the head of which is a man of true insight and fine feeling. It is now two years that Bob has been at that school. He is taking a genuine interest in his school work; he is physically stronger than he has ever been; he is more considerate and responsive; he is entirely self-dependent as to his personal care. Because he has gained better control of himself, his unusual gifts express themselves more fully and more accurately and bring him and those about him greater joy.

Here is one case of an unusual child where his wings were not clipped while he was learning to gain control of them.

From my rich experience with children of all ages and under all sorts of conditions, I was brought to the realization that the education of the child does not depend on the period the child spends in school, nor for that matter does it depend upon any one particular period or factor in his life, but that his development, his education depend upon all factors in his life. Every contact, every influence, every impression—whether the child registers it consciously or unconsciously—is a basic influence in his entire development; the very commonplaces of his everyday existence, his eating, his dressing, his bathing, his playing, hold the greatest riches for his growth and progress.

THE parent who has not learned the importance of allowing the child to express himself freely in order to understand him better, but who always dominates, directs, corrects, nags and admonishes, will reveal himself by such innocent interruptions as, "John, be careful!", or "Mary, have you seen this beautiful game?", or, "Don't do that on the table—you will scratch it!", and so on.

When parents with their children come to The Children's Garden, they enter a very simple home, but they all can at once sense that whatever advice I might give is based on a first hand knowledge on my part of practical living conditions.

In The Children's Garden, there is one room set aside which is my laboratory. In appearance it is just an attractive playroom equipped with the simplest furniture —different shaped and different colored tables and chairs which comfortably fit the body of any child from the age of two to fourteen years. Materials, games and toys are attractively arranged on the shelves. Every motion of his in this Children's Garden reveals his physical, mental and emotional capacities and weaknesses.

How men and women listeners responded to WTIC's invitation to attend a public cooking demonstration by Miss Bowering at The Mixing Bowl.

POT LUCK?

No! You Can't Say to Food Ingredients "Come on Seven 'leven" and Expect an Ideal Angel Cake

"THERE is no such thing as luck in cooking."

Such is the contention of Florrie Bishop Bowering, director of "The Mixing Bowl" of Station WTIC of Hartford.

"A cake does not 'come out well' because the cook had good luck, nor does it 'turn out poorly' because she had poor luck," Miss Bowering maintains. "Much of cookery depends on chemistry, and in chemistry certain ingredients act upon others in the same way every time. A pharmacist wouldn't dare concoct a prescription without accurately measuring each ingredient to be sure it was in proper proportion to the others. And neither should a cook, if she desires success."

A half-teaspoon more or less of baking powder than is specified in a recipe, or too much beating or stirring, or just ten degrees more or less heat than called for, will frequently spoil a cake. The three important factors of the art of cooking, according to Miss Bowering, are: first, the effect of one ingredient upon another; second, the method used in combining the ingredients; and third, the application of heat to the mixture or plain food.

In order that she may put her theories into actual practice, a model experimental kitchen has been built for Miss Bowering adjacent to the studios from which she transmits her programs. In this kitchen she tests every recipe she imparts to her listeners and tries out recipes and hints passed on to her by members of the Mixing Bowl audience.

The WTIC kitchen is in keeping with Miss Bowering's ideals of efficiency. The tables are adjusted to the "working level" best suited to her and are equipped with rubber casters so that they may be rolled silently and swiftly to any part of the room. The surface of every piece of furniture that would lend itself to such treatment is covered with porcelain to make it easy to clean, and almost every bit of metal is plated with chromium, rendering it immune to rust, tarnish and stains.

AT THE right of the sink stands a kitchen cabinet, and directly above it another cabinet with sliding doors, containing the soap, scouring powders, dish mops and other articles used in washing. The kitchen cabinet is equipped with outlets so that the electric mixer, toaster, waffle iron, coffee percolator and other appliances may be plugged at this convenient point. The ran is the last word in electric stove being equipped with units that he with triple speed, an automat clock that turns the heat on at a temperature and shuts it off wh desired. The refrigerator is hous in a steel cabinet, is equipped wi a temperature control, contains special compartment for vegetabl and—wonder of wonders!—is high enough from the floor to all "broom-room" so that the linole underneath may be mopped easily as the rest of the floor.

"It must be borne in mind," s the charming mistress of the Mix Bowl, "that my kitchen at Stat WTIC is not supposed to be model for the ordinary home. It is l out on a rather large scale because th is so much research work done in it to accommodate visitors. The princip involved in the arrangement, howe may be applied to any home. The sa convenient compactness could be int duced into a smaller room with e better effect."

"The aim of the Mixing Bowl is help women to live more beautiful says the charming director of home e nomics for Station WTIC, "to per more leisure time for culture, entert ment and companionship with their f ilies; to show how, with modern labor time-saving equipment and food produ they may find short-cuts to efficient m agement of their homes."

Dispatched over the ether by a tr mission power of 50,000 watts, the Mi

George Malcolm-Smith *Reports WTIC Mixing Bowl Activities*

is the domestic forum of
keepers throughout the
of New England. It has a
audience in the southeast-
Canadian provinces, New
State, Pennsylvania and
Jersey. Recently Miss
ring received thanks for a lemon pie
heard by a housewife in Pueblo,
ado. She has entertained in her kitch-
ousekeepers who have listened to
n several western states, including
is, Ohio and Wisconsin. Recently
ttained a record for fan mail. The
nse to one broadcast totaled 1,032
s requesting a certain recipe. This is
ved to be the largest bundle of mail
received for one domestic science
am transmitted from a single station.
ss Bowering's personality is a rare,
t paradoxical, combination of charm
efficiency. Reared in Nova Scotia,
e men are men and demand good
ng, Miss Bowering's training for her
nt capacity was propitious. Follow-
ier education at Boston University,
lual talents as public speaker and cu-
y expert won her executive positions
veral public utility concerns. She also
ucted cooking schools spon-
d by newspapers throughout
East, addressing as many as
00 women a week.

ast March she was chosen to
ess the National Electric Light
ciation convention held in Chi-
. Her speech won her an as-
ment to outline a bureau of
e economics for the Electric
ply Board of the Irish Free
e. During the past summer she
red a class of Columbia Uni-
ity co-eds. Several cookbooks
many articles in national peri-
als manifest her ability as a
estic science authority.

An interview

her in her kitchen is just about
most pleasant assignment any
orter could desire. While he is
ting a luscious piece of pie or
e where it will do the most
d, he is regaled with an enthu-
tic account of her work.

t came as a surprise to learn
t many of her letters come from
n. Those who keep bachelor
rters request recipes for simple
hes, such as meat loaf or choc-
te cake. And here's one revela-
n that may give you a shock—
n are as fond of that dainty,
minine delicacy known as angel
ce as they are of any other form
dessert. That's what Miss
wering's mail would indicate, at
y rate. But the real, he-man
h, the most popular that may be
ced before a member of the
rn sex, is steak smothered in
ions.

Requests for all manner of advice in gastronomical subjects are contained in Miss Bowering's mail. One woman craves to learn new sandwich-fillings, explaining that she puts up seven lunch boxes a day for her husband to take to work, for three youngsters in grammar school and three more in high school. Another listener is anxious to obtain a satisfactory diet for a son who is suffering from injuries received in the World War. No less than a dozen letters came from members of the congregation of a certain church in Troy, N. Y., all of them beseeching Miss Bowering to send them the recipe for a chocolate fudge cake that won the acclaim of everyone who attended a church supper.

According to Miss Bowering, there is a very definite need for educating women in the use of the new household contrivances, and to illustrate her point she tells several amusing mistakes made by women with whom she has come in contact during her lectures and demonstrations.

There was, for instance, the case of the woman who believed that the dust picked up by her new vacuum cleaner was carried away by the electric cord plugged into the wall. It was with considerable amazement that she learned that the waste was accumulated in the dustbag, for she had imagined that the dust was "burned up by the electricity in the electric wire."

Then, too, there was the case of the woman who wanted to know where she could buy the tiny cubes of ice to be placed in her electric refrigerator. More ludicrous perhaps than either of these cases was that of the housewife who called her washing machine a "fake" because it did not clean the clothes she placed in the tub. It was discovered that she had dumped them into the machine perfectly dry, expecting the electricity to remove the dirt.

These, of course, are extreme examples. But there are thousands of women, Miss Bowering contends, who are not getting full benefit of twentieth century household appliances because they do not understand how they operate.

Often Miss Bowering receives splendid recipes from her audience. These she passes on to other auditors, The Mixing Bowl being a sort of "give and take" arrangement. Any suggestions submitted by one listener are tested and then imparted to other listeners.

Perhaps the most sensationally popular of all the recipes that have come from members of her audience was Mrs. Smith's Mystery Cake. Believe it or not, it substitutes tomato soup for milk! It requires no milk, no eggs and only a tiny bit of butter. Nevertheless, it is one of the most delicious, fluffiest, daintiest cakes ever made.

One of the most popular of Miss Bowering's own creations is her Cubist Cake. When this masterpiece of the culinary art is cut, it reveals a cubistic maze of pink, green and white, with a central square of yellow. Each color constitutes a different flavor, such as orange, lemon and pineapple, with raspberry, vanilla or almond as the center piece. The icing is a vision of appetizing loveliness and daintiness and is as fragrant as an exotic perfume.

Because many readers have protested against the broadcasting of recipes we are not publishing here the "key" to the cake which Mr. Malcolm-Smith included in his article. However, the Woman's Feature Editor will be pleased to supply the recipe for this luscious, creamy, mouth-watering dessert to those who write for it.

M-m-m-m. "Would you like to have a slice?" asks Miss Bowering as she cleaves the scientifically prepared cake into tempting portions.

"This Changing World"

Leading Suffragette Believes Modern Thinking and Teaching are Bearing Fruit of Long Desired Ideals

By Mrs. Carrie Chapman Catt

SCHOLARS have found a new phrase which they like better than any other—"this changing world". They tell us that men are no longer thinking the same thoughts nor doing the same things as were their habits before the Great War.

They point to a very ancient history when they claim men of highest development could only manage to adopt on the average one new idea in a thousand years. Even so, the process was painful and was invariably accompanied by the incidents of assassination, murder, exile, war, confiscation of property, destruction of towns and cities, fire and brimstone.

The time came when men thought faster and here and there clever nations actually achieved a new idea about every five hundred years. Long after, an enterprising nation like ours, well stuffed with education and enlightenment, often hurried a new idea through all its necessary stages at the rate of one to a century. For example, it required a hundred years of very hard work and much eloquence to stop the importation of slaves and another hundred years, including a Civil War, was needed to free these slaves. From the time when the American Colonies first tried to prevent the sale of rum to savage Indians down to modern prohibition lies two hundred years. It took 150 years to get woman suffrage sufficiently discussed to persuade statesmen that it might safely be put into the constitution.

SO IT happened that the first step onward in making over the old world into the new was the determination to put war out of it. Thousands of men and women ranged themselves on the side of the new idea and thousands more said war always had been and, therefore, always would be. For eleven years these two groups, in forums, conferences, schools, classes, lectures, and round tables, have discussed the war and peace problem up and down, back and forth, and the statesmen of the great nations have led the world forward along staple trails.

In 1925 another conference, among many, took place in Washington. It was different from all the others. Nine dignified women sat in a row upon the platform and each was the president of a national organization with an enormous membership. In that first convention of 1925 two hundred and fifty-seven causes of actual wars were listed.

The Woman's Conferences on the Cause and Cure of War have le three things and learned them well First, the 257 causes of war four 1925 have been reduced to one. one is the competition of the war tem of nations;

Second, all possible cures of war likewise been reduced to one; th mobilization of the war institution by ruthless destruction, but, bi bit, as fast and as far as it ma replaced by a well constructed, cessfully operating peace instit War, then, is reduced to one one cure; and

Third, the work yet to be ac plished before there will warless world is the demob tion of the war system an mobilization of a substi peace system.

Mrs. Catt, pioneer in the women's suffrage movement, who broadcast recently over the NBC.

CERTAINLY in the past ten years more structive progress has been toward permanent peace tha all the fifty millions of years ceding it. A League of Na with most of the world's s in its membership, has pledg self to find a way to abolish A World Court, first suggeste our own nation at the Hague ference in 1899, and again in has been established with nation members. The Briand logg Pact has been ratifie most of the nations of the w agreeing to renounce war a settle disputes arising with an nation by peaceful methods. ies of arbitration have been s by the dozens until a virtual pact binding all the nations world together has been eff The demobilization of war ma ery is under way. Yet, no have men ceased marching, f building ships, making muni and everywhere taxpayers not despite peace conferences, the of war rises each year.

Stanley, Musical Comedy Star. Her Perfect Poise From the Assurance that She Knows She is Beautiful

Willing to be Beautiful

It's Not the Features that Make for Pulchritude. It's the Awareness of Being Attractive That Counts

By

FRANCES INGRAM

Consultant on Care of the Skin, Heard on NBC Every Tuesday Morning

WILLING to be beautiful—but, of course, who isn't? Well, as a matter of fact, there are thousands men who do not will to be beauti- They are willing to be beautiful, ut they do not will to be beautiful, his is something else again.

xander Woollcott, writing about a known actress in one of the national n's magazines lately, makes this illuminating statement in regard to will to be beautiful. Speaking of actress who has a reputation for beauty as well as great talent, he

. . she made rapid, fortunate, and ging progress, and since it seemed mportant thing in the theatre, she led to be beautiful, too, achieving a formation by sheer act of will, I ."

iy sheer act of will"—willing to be tiful.

ella Ryan teaches the same doctrine ne of her recent short stories when writes the following dialogue for the ine and her confidante:

But you got to have something,' said , 'eyes or hair or something.'

Not necessarily. Often a reputation beauty counts more than its posses- ; it helps if you act as though you had it,'" says the story.

"'Oh. I couldn't do that,' said Enid. 'I'd never get away with it.'

"'You must first convince yourself,' said Miss Sokarki. 'You *must* say firmly to yourself. 'I have a great but hidden beauty waiting for the eye of the discoverer.'"

In other words. the heroine of the story was to have the will to be beautiful. She was to believe first of all in her own attractiveness and so persuade other people to take her at her own valuation.

Clever women have done this since time immemorial. It is a matter of record that one of the most famous beauties in history was lame, and that another had a bad squint. It goes to prove that often the girl who draws forth the remark, "she thinks she is pretty", has both common sense and psychology on her side. She believes she is pretty and invariably you are willed to believe it, too.

Even experts on beauty can be deceived. This story is told of Florenz Ziegfeld who once took a famous artist to admire a popular show girl.

"Isn't she beautiful?" he demanded.

"No," said the artist. "She isn't even pretty, but she feels beautiful. Darn clever girl!"

And these clever girls keep right on drawing rings around their more beautiful sisters, too. At parties, at dances, in schools, on shipboard you see them all the time—willing to be beautiful and forcing you unconsciously to accept them at that valuation.

I had a splendid opportunity this winter to observe this psychology at work when I made a short trip to Bermuda. The most beautiful girl aboard that ship was not beautiful at all by Ziegfeldian standards, but it would have been very difficult indeed for me to convince anybody on board of that fact. Her confidence in her attractiveness was such that I am sure no one thought of questioning her unspoken claims. There were many more beautiful girls on that ship, but lacking confidence in themselves, they inspired none in others.

Clothes do not make the woman. Neither do regular features, nor a perfect figure. They help—they contribute to feeling beautiful. But no woman can feel beautiful or look beautiful who has not the confidence inspired by a beautiful skin. A blemish of the complexion has made many women lose their belief in themselves—in their own attractiveness. Smart clothes, in instances of this sort, defeat their own purpose because they call attention to defects of the skin.

A beautiful complexion is really beauty insurance. It inspires women with confidence in themselves. Its possession leaves them free from selfconsciousness and allows them to be unaffected and charming.

Even the elegante, or perhaps I should say, especially the elegante, will admit the truth of this. There are some dresses which the sophisticate does not dare to wear when her skin is not at its best. An evening dress by Maggy Rouff, for instance, demands perfection in the matter of complexion. The smallest blemish would ruin the effectiveness of the gown and its wearer.

This is not discouraging however—Skin can be improved. It can be beautiful. Then *will* to be beautiful.

Free booklets on the Care of the Skin by Frances Ingram will be mailed to readers of RADIO DIGEST. *Send your request to Miss Ingram, in care of* RADIO DIGEST, *420 Lexington Avenue, New York.—Editor.*

Scientific Progress of the Radio Art

By Howard Edgar Rhodes, Technical Editor

Past, Present and Future of Television

AS WE LET our thoughts glide backward over the years, we find men who are eternal dreamers, thinking and working on things unknown but hoped for. And from the time that the ancient Greeks told of the shafts of light shot by Apollo, men have concerned themselves with the nature of light and means of transmitting it to a distance.

Back in 1884 in the days of kerosene lamps and cigar store Indians, an obscure and still almost unknown Russian scientist, Paul Nipkow, filed a patent for an "electrical telescope". Nipkow was a dreamer, but no idle dreamer, for in his patent he not only anticipated television but described a system with considerable precision. Add to Nipkow's devices a few modern electrical tools and you have the essentials of a modern television system built almost bolt for bolt as Nipkow would have built it if modern equipment had been available for his use. Alas for some theories that germinate in the minds of men—they wilt in the light of advancing knowledge. But Nipkow's devices have stood the test of time; a resume of television history without credit to Nipkow's vision would be blasphemy. We can almost say that in his mind the concept of modern television first found light; Nipkow was not only a scientist but a poet, for he breathed life into the facts which he discovered.

A complete summary of all the early scientists who devoted their thoughts to television and the closely allied art of picture transmission would fill many pages. In France, Italy, Germany, Russia, Austria, the problems were studied. But today most of the development work is concentrated in England, France, Germany and the United States.

The modern scientist, to produce our present day television transmitters and receivers, has in effect taken a number of individual units and assembled them into a television system. The néon lights used in television receivers are old; the foundation work on the photo-cell or "television eye" was done in the latter part of the nineteenth century by Hallwachs, Hertz, Elester, Geitel, Schmidt, names probably entirely unknown to the reader. The néon tube, the photo-cell, Nipkow's scanning disc and the vacuum tube; these are the essential elements of all television systems. The first three units had to await the development of the vacuum tube before they could efficiently be utilized in a complete television system.

And so television is the product of many dreams, of many hopes, of many failures. But, as Oliver Wendell Holmes said, "What have we to do with our time but to fill it with labor, to work, to know, to discover, to create." To this sentiment the scientist heartily subscribes.

Modern television, as we know it today, began about 1923. Actually this first modern work was concerned more with the development of picture transmitting systems, but much of the experience and practical knowledge which engineers obtained from this work in still picture transmission later proved almost directly applicable to the problems of television.

TELEVISION and the motion picture too, for that matter, would not be possible were it not for a certain characteristic of the eye known as "persistency of vision." Examples of this characteristic of the eye are familiar to all of us. Thus the glowing end of a match swung rapidly round in a circle looks like a complete ring of light and not a single glow of light changing its position every moment. Motion pictures and animated cartoons consist of many still pictures flashed on a screen in such rapid succession that we get the impression of continuous motion. If only a few pictures per second are flashed on a movie screen, we get an impression of motion but the image has a bad flicker. But when we reach a rate of ten or fifteen pictures per second the eye responds as though it were seeing a continuous picture. Were it not, therefore, a c teristic of the human eye to *retain* c *pression* the reproduction of movi jects would be utterly impossible.

Probably the first modern demo tion of television was given in E in January, 1926, before the Roy stitute. The apparatus used was de and built by J. L. Baird, who h years been identified with the de ment of television apparatus. Baird use of a modified Nipkow scanning The results were quite poor, due l however, to crudeness of the app rather than to the use of improper ods, for Baird used the same prin that have been used in all later ty television apparatus.

In this country the first imp demonstration occurred on April 7, when the Bell Telephone Labora

Television as the New York *Herald Tribune* artist sees it. The actor and actress stand before brilliant lights, with prompter and technician "off-stage".

ve a public demonstration of television
ween New York City and Washington,
C. Again we find in use the all im-
rtant Nipkow disc for scanning the sub-
t's face being televised. For the tele-
ion receiver use was made both of a
all néon glow tube in combination with
other scanning disc to produce small
tures and of a very large tubular néon
be to produce images several feet
uare; the detail in the large image was,
course, much poorer than in the small
age. That the engineers of the Bell
lephone Laboratories had to overcome
inconsiderable problems in developing
e apparatus to the point where it could
publicly demonstrated may be realized
the fact that the output of the "tele-
sion eye" scanning the subject had to
amplified as much as 1,000,000,000,-
00,000 times, but it is interesting to note
at the quality of the television images
ansmitted a distance of 250 miles from
ashington to New York was not inferior
the quality obtained during preliminary
boratory tests over distances of but a
w feet. In this first demonstration by
e Bell Telephone Laboratories the sig-
ls were transmitted both by Radio and
wire.

IN JULY of 1928 the Bell elephone Laboratories demonstrated an utdoor system in which outdoor subjects ere televised. Television in color was xhibited in June, 1929.

More recently the Laboratories demonstrated a complete two-way television system combined with a regular telephone channel making it possible for two persons to see and talk to each other over a distance. The television images were quite small but of remarkably fine detail, making it possible to note even the slightest change in expression of a person's face. The reproduction was in fact so good that deaf persons who had acquired the art of lip reading could carry on a conversation simply by reading the other person's lips.

We have always had a lot of respect and admiration for the lone experimenter outside the laboratories of a large company whose lack of equipment and facilities are a constant goad to his ingenuity. Such experimenters choose their line of endeavor because it interests them rather than because they have been assigned to the task, and in the past no inconsiderable part in the development of new fields has been due to their work—and we don't believe the research laboratory of the industrial corporation will ever entirely replace the lone experimenter. The person with an inventive and ingenious mind is almost invariably a free lance and only with difficulty can he be caged in the laboratory of a large company. Though the laboratories of the Bell Telephone Laboratories, the General Electric Company and others have been responsible for major contributions to television, due credit must be given to the lone efforts of J. L. Baird in England and C. Francis Jenkins in America.

As early as 1923, Jenkins was giving demonstrations of picture transmission by Radio and more recently he has been actively engaged in the design of simple home television receivers. It was, if we remember rightly, about two years ago that Jenkins became identified with the Jenkins Television Corporation, organized to carry on his work and to produce simple television apparatus. Since that time this company has been actively engaged in the design of home television apparatus and now manufactures several different types of television receivers and regularly transmits television programs from its television stations in Washington, D. C., and New Jersey.

WE ALWAYS recall with pleasure a visit we made some years ago to the small laboratory in Washington where Jenkins was then carrying on his experimental work. We found very contagious his eagerness, and intense absorption in his work. Jenkins essentially is a pioneer; he pioneered in picture transmitting and in television experiments. To him also is frequently credited the design of the first motion picture machine. During our visit he showed us a new slow motion picture machine that took 2500 pictures per second; the ordinary slow motion machine takes about 300. He had taken some pictures of pigeons in flight and, when seen in slow motion, their graceful movements, the very slow open-

(*Continued on page* 101)

Television Reaches Broadway

REGULAR television programs over WGBS and W2XAR were made available to listeners in the New York City area beginning April 1st. At least this was the plan according to an announcement received just as this issue of RADIO DIGEST went to press. The television signals are transmitted from W2XAR, television station of the Jenkins Television Corporation and the accompanying synchronized sound from station WGBS key station of the General Broadcasting System, Inc. A 60 line system with 20 pictures per second is used and is capable of giving comparatively excellent reproduction. We understand that in the future most of the regular and experimental television programs transmitted by various stations will use 60 lines and 20 pictures so that a number of television programs should henceforth be available to owners of television receivers in the New York City area. Many new stations will soon be added to the growing list of those already broadcasting television programs.

Voice of th

GREAT BIG HAND FOR LITTLE JACK LITTLE

HERE are a few lines I would like to see in print to answer the person who signed a letter in your February issue under the name of M.F.L.C., Indiana. For my part, Little Jack Little is the best entertainer on the Radio. I admire his technical skill at the piano, and while his singing is not that of a well trained voice, it is very smooth and different from many other voices you hear on the air. I also admire his stage performances—he packs every theatre in which he is billed—and the songs he writes!—Mildred Bradley, Cincinnati, Ohio.

* * *

THIS is the first letter of its kind I have written, but the letter signed M.F.L.C. is so unjust and untrue that I cannot resist writing. I have traveled from coast to coast, and everywhere I go, have heard expressed great admiration for Little Jack Little as an artist. We think his voice and style of talking bright. Our greatest disappointment is when distance prevents us hearing him.—E. E. A., Vancouver, B. C., Canada.

* * *

THIS is one family that certainly would miss Little Jack Little if he were off the air, and I think there are millions more like us. At our house we never miss any of his programs.

What do the listeners think of Gene and Glenn, or to call them by their Radio names, Jake and Lena? We really like those two boys better than Amos and Andy.—Mrs. J. R. S., York, Pa.

* * *

RAH! RAH! RAH! W-A-B-C

I ENCLOSE my nomination blank and ballots for "Station Champ." I have been instrumental in making many friends for WABC. I try to know every feature. Example:

Me (to my wife): "Who is that announcing, Min?" Min (disgusted with me and the Radio): "How do I know, and please don't keep asking me about this voice and that voice."

That was a little while back. Now it is—Min: "Stan, who is that talking, George Beuchler or Frank Knight?" See? Well . . . look at this.

Frank Knight, Don Ball, Harry Vonzell, David Ross, John Mayo, Lewis Dean, George Beuchler and Ted Husing are the regular evening announcers. Men with personality, equal to any task in delivering a well-defined talk evenly, close to the point and with clarity.

For WABC's selection of programs—oh my! Why compare? . . . Tony's Scrapbook, Hamilton Watch, John P. Medbury, Annette Hanshaw's singing, True Story, Daddy and Rollo, Nitwits, Hank Simmons, Guy Lombardo, Jack Denny, Bert Lown . . . oh, how many! And—the symphony programs. Long live Radio, CBS, NBC, and last but by no means least. . . WABC. . . WABC. . . WABC! —Stanley Kroberger, 1429 Walnut Street, Philadelphia, Pa.

* * *

INFORMATION WANTED

CAN you tell me the calls of any Radio station that broadcasts Spanish lesson? I will appreciate it very much if you can furnish me with this information, giving me the day and the hour of broadcast—(Miss) Iva V. Pickering, Glockner San., Colorado Springs, Colo.

* * *

COULD you please give me the names of stations which broadcast question and answer games? Also stations which conduct English classes. And the hour Eastern Standard Time.—E. G. Hill, Rosina, W. Va.

We will appreciate it if readers or broadcasters with the required information will answer Miss Pickering and Mr. Hill.—Editor.

* * *

CATFISH BAND

(Dedicated to Jimmie Wilson's Catfish Band, Station KVOO)

THE music starts and we're all in a clatter,
Then someone speaks up, "Why what is the matter?"
Oh, it's that old, old song that is always new,
Moonlight and Roses bring Memories of You,
No song could be sweeter than this is each week
When played by this band down on Pole Cat Creek.

Next we hear jazz with plenty of pep.
With Jimmie announcing they don't need any help,
They play, and they sing, and they talk quite a while,
But what makes us sore is that fake Fish Fry,
They make us hungry, then invite us down
When they know we're all a thousand miles from their town.

Etta Fitzgerald, Birmingham, Ala.

* * *

HEY! MR. INSPECTOR!

I WONDER if it is possible to beat the fact into those bone-headed station operators' heads that they can't be heard satisfactorily, even in their home cities, when three or four stations are raving at the same time on the same wave. Take, for instance, the 550 to 560 kilocycle range. All those stations are strong enough to be heard anywhere in the U. S. on a good night. They should get together and divide nights and also hours of the day. There are a number of wave bands in this section where it is impossible to tune in any one station because three or four are broadcasting at the same time—H. H. Adolf, Sherman, Tex.

* * *

REGUSTED WITH ANDY

I AM an enthusiastic listener to Amos 'n' Andy and never miss an episode, but this Andy stuff is going too far. He acts like a half-wit, and some of his sayings are simply idiotic. They seem to be put up to fill in space. I hope every V. O. L. reader sees this (if it gets to the V. O. L. page) and that it soaks in.—Jack Davidson, Box 110, Manitou, Manitoba, Canada.

* * *

CONTINUITIES WANTED

YOU ask in your February issue if we would like drama continuities. I say yes, especially those of Arabesque presented by Columbia, which I regard as the best feature on the air. (*An Arabesque continuity appeared in September, 1930. We try to present a new air-drama in each issue—Editor.*) Continuities of the Silver Flute presented by NBC would also be welcome.—George W. Shepard, Marion, Kans.

PRAISE FOR OUR LITTLE BI

MARCELLA'S Columns are very enj
able reading matter, especially th
devoted to the great announcers. Upon he
ing these voices over the Radio one form
mental picture of the men, and that's w
we enjoy seeing their pictures and hear
about them.

One Radio feature we certainly enjoy
home is "Gene and Glenn", and have loo
forward to seeing a picture of these two
RADIO DIGEST. (See October, 1930. New
coming soon—Editor.) Why not publish o
—Betty Van Derheyden, Coeymans, N.

CANADA ENJOYS BUFFALO

YOUR magazine makes Radio much m
real, with its pictures of favorites
Radio news. I have one little objection
make. Each month I open up my copy
my favorite magazine, with the hope of see
some of my favorite Buffalo announcers
entertainers. Do let us have some pict
of the Buffalo Broadcasting Corporation
nouncers. They also have some very
entertainers. I'm sure they deserve s
representation in your ranks. I shall w
patiently. (*Coming Soon—Editor.*)

Your articles on network programs
great. I certainly liked *The Golden Ba*
and we all miss *The Old Curiosity Shop*
wish it would start again. I like the l
however you run them.—Another Radio F
Grimsley, Ont., Canada.

* * *

OPINIONS DIFFER ON "CANNED MUSIC"

MAY I have space in your valuable ma
zine to register a vigorous compl
against this so-called "electrical transc
tion" mania which has hit most of the Ra
stations. The advance that Radio has m
in the past decade is one of the marvel
our day and age, but it is like taking a
backward* with seven league boots to h
Radio programs made up of phonogr
records. The tonal quality of these progr
should be sufficient to keep them off the
Not only that, but you tune in on the s
program from four or five stations on
same night, and on most every night in
week it can be heard from at least two.

Everyone connected with Radio, be
manufacturer, broadcaster or only the
knows that the available air channels
being constantly demanded by more stat
than can be allowed. I believe the Fed
Radio Commission should put these stat
off the air who use these so-called "electri
transcriptions" to excess and let stations
on the air who would be glad to furnish
with flesh and blood talent.

Our family and many of the fans in
city will not listen to this "canned" m
and I do not believe we are alone in
matter, so let more of the fans speak up
fore all we have is "electrical transcriptio
—Robert J. Doyle, 605 Litchfield St.,
City, Mich.

How about it, fans? Opinions differ. A
good one on wax or a bum one through
mike—if you have to choose? Or could
really tell the difference if the announ
didn't tell you? What do you think? W
and join V.O.L.—*Editor.*

Listener

) THE INTERWOVEN PAIR

.LY JONES and Ernie Hare
Got famous through the air
do not fly, that isn't why
are known most everywhere.

ear them every Friday night
y minutes—what delight!
vish to state that they are great
line, their songs are sure *all right!*

lso want to submit twelve reasons why I the Radio is the most wonderful inven- in the world. Here they are:— Ruth Etting singing any song (she's nparable). (2.) The Interwoven Pair. The R.K.O. program with T. Kennedy ng the theme song. (4.) Guy Lombar- orchestra. (5.) Effie Watt's singing. Rudy Vallee's soothing voice. (7.) De- police drama. (8.) Harold Keen, Ra- sunshine boy. (9.) Guy Lombardo's il Canadians (again). (10.) Baby Rose e (unusual child). (11.) Norman e's excellent voice. (12.) Harry Rich- singing his own songs.—Gladys Allan, ia, Mich.

* * *

)CTOR LAUDS MRS. SCOTT'S ARTICLES ON CHILD TRAINING

THE March issue I note an article by Mrs. Miriam Finn Scott, and I wish to ratulate you on having her among the tributors. Her broadcasts on child train- -struck me as quite unusual because of the ndness of her ideas, clearness and direct- of her presentation and the freedom from so much abused and misused scientific on of the psychologists.

think Mrs. Scott's articles will be of endous value to many of your readers, cially to those mothers who honestly t to give to their children a sound basis future happiness and success.—Dr. Leo- Watter, 443 E. 87th St., New York, N. Y.

* * *

OUR magazine appeals to me because of its broad scope. I think the educational ures are particularly interesting, and I cially like "Do You Know Your Child?" Mrs. Miriam Finn Scott. She knows w to make her point clear—please give us e more articles by Mrs. Scott.—(Mrs.) lene Edwards, 179 Harrison St., East nge, N. J.

* * *

ORE ONE AGAINST "CRANKS"

THE biggest laugh each month comes between the covers of RADIO DIGEST. me of these fan letters remind me of the ry of the two maiden ladies who com- ined to the village authorities that the all boys were swimming without bath- suits. "But the swimming hole is back the pasture, away from the road," said puzzled official.

'Oh, yes, but sister and I can see them l plain from the attic window with our ld glasses," said one of them! No one ts the cranks to listen to any special pro- gram and the manufacturer put those little buttons on the front of the Radio for use, not ornament.—Radio Bug (H.C.L.) New York.

* * *

ATTENTION, "DX" FANS!

SINCE I enjoy the RADIO DIGEST so much, I would like to make a few suggestions on how, in my opinion, it could be bettered. Why not have a DX department? Readers could become members and submit interesting bits of DX news that would prove a benefit to all members. I am a DX fan and would like to receive letters from all DX'ers, especially from those in the Mid-West.—Eddie G. Erlewine, Box 675, Tekamah, Neb.

* * *

I AM a shut-in, and sure like the RADIO DIGEST. I have logged 186 stations on 94 wave lengths. I had my first Radio seven years ago.—C. L. Swafford, Pratt, Kans.

* * *

HAVING started in 1926, I consider myself an ancient DX'er. Some Radio critics were astonished at that time when I heard WSMB, New Orleans, KOA, Denver, and KSD, St. Louis on a crystal set made on a thread spool. This winter I again started DX'ing on a new set. I have heard 170 stations in two months and have a mighty book, two feet by two feet and six inches thick, filled with verifications, pictures, stamps, etc. I do not belong to any DX clubs but would like to hear of any such organizations, and would like to hear from any DX'ers who cannot get stations to answer them, as I would be glad to help them. Radio bugs should stick together.—Frank E. Howell, Lynch, Neb.

* * *

THE suggestion of Mr. Erlewine is a mighty good one, and the editors of V. O. L. will be glad to throw these columns open to any DX fans who wish to send in news or communicate with other fans. In this connection, readers are invited to write to the three DX fans whose names and addresses are given above.

* * *

PANNING AND PRAISING THOSE ORCHESTRAS

RUDY VALLEE and his Connecticut Yankees are my choice. I think he has one of the best orchestras in the whole U. S.—M. R. V.—Philadelphia, Pa. . . . I was very much surprised and disappointed when I glanced through the March issue and found but one article and picture of the King of the Air—I mean Rudy Vallee. Why should a few old grouches begrudge us fans pictures of the World's Champion Radio Crooner—Marian Harvey, 130 Todd Place, N. E., Washington, D. C. . . . Being a member of the Vallee Krusaders I thought I'd have my say about him.—Georgia Waldman, 210 19th St., Union City, N. J. . . . Men hate him and women love him, but I want my name put under the Voice of The Rudy Vallee listeners—Edith Sagmiller, 109 Third Ave., N. E., Mandan, N. Dak. . . . Here's my two cents in defense of Rudy. He has the best orchestra on the air.—K. V. Brooklyn, N. Y.

* * *

GUY LOMBARDO—Listen, young and old, if you want to enjoy your Radio programs, listen to this boy's orchestra. Give me Guy, his three brothers, and keep the rest of the orchestras.—E. J. Starsinic, 596 S. 4th St., Steelton, Pa. . . . I am a Guy Lombardo fan, and my vote goes for Guy & Company.—Viola Perez, 635 Lindenhurst Ave., Los Angeles, Cal.

* * *

BEN BERNIE—My opinion of the finest dance music entertainment on the air is that of "Ye Olde Maestro" and his boys. A combination of his pleasing personality in his announcing plus the splendid organization of musicians to back him up leaves nothing more to be desired. Do I have to face this cold world alone with this opinion or have I some followers? (*Plenty—See April V. O. L.*)—Gordon R. Davidson, Manitou, Manitoba, Canada. . . . My favorite orchestras are Phil Spitalny, Rolfe's Lucky Strike, Husk O'Hare, Coon-Sanders and Louis Panico—Sylvia Schugren, 205 Iron Mountain St., Iron Mountain, Mich. . . . I would like to see pictures of Wayne King, Isham Jones, Guy Lombardo, Ben Bernie, Dan Garber, Maurie Sherman.—Richard Glazier, Bunker Hill, Ind.

* * *

ECHOES FROM THE STATIONS

HAVE we pretty girls on our staff? You should ask! Why, Connecticut was full of pretty girls long before California was ever thought of! And Station WTIC had had pretty girl entertainers for more than six years—ever since the station went on the air in 1925. (*The proof's in the pictures—see WTIC answer to Beauty Challenge in this issue—Editor.*) Please don't take me as too much of a braggart when I tell you that in last week's mail we got four letters from Paris, France, twenty-six in one mail from New Zealand, all sorts of letters from the British Isles.—George Malcolm Smith, WTIC, Hartford, Conn.

* * *

ADDRESS WANTED

Harriett Irwin who asked for a horoscope is requested to give address.

* * *

CHALLENGE! WCOH CLAIMS IT'S MOST POPULAR LOCAL STATION

IT ISN'T the purpose of this letter to dwell on the pro and con of the beauty contest; except in so far as our slight vanity and desire to promulgate the truth leads us to remark in passing that, as for feminine beauty: well, you haven't seen anything yet. Some day we may overcome our bashfulness and submit photographic evidence of our superiority against all comers. Ah, well, enough of this.

But this challenge on the part of KROW gave us an idea. We heartily believe that our station is the most popular "local" station along the Atlantic Seaboard. And by local, we refer to the usual 100 watt plant, operating on part time. We know the residents of our community aren't of the particularly "gushing" type, still with only thirty operating hours a week we manage to ring in a hundred or more phone calls and requests per hour. During 1930 we totaled between 3,000 and 4,000 "fan" letters.

There's the challenge! Who'll take it up? —Frank A. Seitz, Jr., Program Director, WCOH, 35 South Broadway, Yonkers, N.Y.

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

Well May comes around with all her lovely green sprouts and May parties and maypole dances but somehow or other all Indi-Gest can think of is revenge.

Revenge on the terrible person who started that new game that everybody is playing. You know, they're even dragging it into the NBC press rooms. The other day, when we all should have been working, Mr. Aylesworth, Mussolini, Lindbergh and myself were trying to figure out a way to get all the words beginning with May in the dictionary into one sentence. We had all the press typewriters snowed under with our attempts so that the Continuity Department had to write typewriters into every act so the boys (Mr. Stone, Shea, Sorenson, Miss Sullivan †good thing I don't lisp† Wilkerson, Hevessey *et* Mr. *Cetera*) could go up to the broadcast studios to turn out press releases.

The best we could do was "Mayhap if a Mayan committed mayhem upon the mayor with a stout Maypole—well, that was as far as we could go so we topped it off with—maybe mayonnaise isn't delicious on mayflowers, and I'm to be Queen of the May, tra, la.

Which brings up the old controversy. Am I (me, Indi-Gest) a man or a woman? Not that it makes any difference to me. But some of my fans want to know. Prizes given for the best answers, as follows:—

First prize . . . 3 brazil nuts
2nd prize . . . . 3 walnuts
3rd prize . . . . 3 peanuts
4th prize . . . . 3 pistache nuts
5th prize . . . . 3 INDI-an nuts

PHEW!

Gilmore circus (some Pacific station):

Spark: I hear they're going to cut Sharkey's nose off.

Plug: What for?

Spark: So he can stop Schmeling.—*John Kita, 846 Ramona St., Palo Alto, Cal.*

I'm burning up over this one. Ray Perkins, the Pineapple Prince, takes a package of cigarettes out of his pocket, removes one cigarette, and makes the package a Cigarette Lighter.—*Helen Healy, Douglas Ave., R.F.D. 3, Waterbury, Conn.*

The next one wins the prize for long distance contributions. All the way from China. We hereby announce a prize of two (2) cancelled stamps for the longest long distance contribution each month.

CURRENTS IN THE CAPITOL

Physics Teacher: Now you understand what A.C. and D.C. mean. Tell me which city has D.C.?

Little Jimmy: Washington.—*Liu E. Lo, Custom House, Newchang, China.*

THE RADIO MOTHER GOOSE

Bye, Baby Bunting!
Daddy's gone a-hunting,
To get himself a rabbit skin
To trade in on a good, inexpensive,
European-radio-broadcast-receiving,
three-tube, super-sensitive
short wave converter unit.

* * *

There was a man in our town,
And wisdom filled his attic:
He twiddled at his Radio dials
And tuned out all* the static—
BUT when he heard what was to hear
He choked (with might and main)
That crooning tenor's lovesick moans—
Tuned static in again!

* Well, most of . . .

John Douglas Leith, Grand Forks, N. Dak.

GET THE SMELLOVISOR

From the KOA Coons:

Mr. Talbot: I thought you were in the chicken raising business, Sambo?

Sambo: Ah am, suh, but you know, ah had hard luck yestiday. Ah found me a polecat in mah chicken coop.

Mr. Talbot: Were you angry?

Sambo: Yes suh; I wuz completely incensed.—*Don Peterson, 151 Pepin Street, Wisconsin Rapids, Wis.*

HANDLING A WOMAN ELECTRICALLY

Russ Gilbert's suggestion for a st in feminine psychology, on Cheer hour, NBC:—

When a woman is sulky and will speak—*Exciter.*

If she gets too excited—*Controller*

If she talks too long—*Interrupter.*

If her way of thinking is not your *Converter.*

If she is willing to come half wa *Meter.*

If she will come all the way— *ceiver.*

If she wants to be an angel—*Tra former.*

If you think she is picking y pockets—*Detector.*

If she proves your fears are wron *Compensator.*

If she goes up in the air—*Conden*

If she wants chocolates—*Feeder.*

If she sings inharmoniously—*Tu*

If she eats too much—*Reducer.*

If she is wrong—*Rectifier.*—*Mrs. A. Jones, Locke, N. Y.*

PIPE THIS DOG STORY

Lowell Thomas (NBC) drew a p ture of comfort thus:—"Sitting befor open wood fire in my easy chair, wit good book to read, my dog in my mo and my pipe at my feet!"—*Mrs. J. Reece, 331 Jackson Ave., Des Moi Ia.*

UT OF THE MOUTHS OF BABES

rom Orange Disc Smile Club, YR:

ittle Girl: Mamma, when I grow up get married will I have a husband Daddy?

Mother: Yes, dear.

ittle girl: And if I don't get mar-l, will I be an old maid like Aunt ry?

Mother: Yes, dear.

ittle Girl: My, what a mess I'm in! *Radio Bug, Fulton, N. Y.*

T FOR THE SUDS OF YESTER-YEAR

Recited by Charles Buster Rothman, TICA:

The boy fell off Anhauser Busch
He tore his pants to Schlitz
He rose a sad Budweiser boy
Pabst yes, Pabst no.

est Spanking Song: "It's Never Too te To Go Back To Mother's Knee".

GOSSIP SHOP

Radio artists at WABC are nothing if not modest. Witness the following conversation between announcer Harry Vonzell and Harry Swan, noted character actor in Columbia's radio playlets.

"The best talent on the air," argued Vonzell, who hails from Los Angeles, "came originally from California."

"The devil I did!" retorted Mr. Swan.

Horoscopes for horses are the latest. A stable-owner wrote to Evangeline Adams, Forhan's astrologer, and asked her to chart his horse's life, to determine whether or not his entry would be a winner in a not-far-future race.

Some of the prettiest girls in New York are NBC hostesses. But life isn't all easy for them. Here's a sample of the fool questions they get:

"Can I talk to Mr. Napoleon?"

"He is on the air but will be at liberty at three thirty," said the good-looking blonde on the 13th floor.

"Oh! thank you. Could you give me the telephone number so that I can call him at Liberty?"

Is it true that "Mary" of the True Story hour, has changed her "Bob"? Answer me yes or no! (? ? ?-Editor)—*E. C. Baird, Box 223, St. Joseph, Mo.*

Drawing by Stephen V. D'Amico, Pittsburgh, Pa

I WILL NOW SING "*JUST A GIGOLO*"

WJZ Blackstone program:

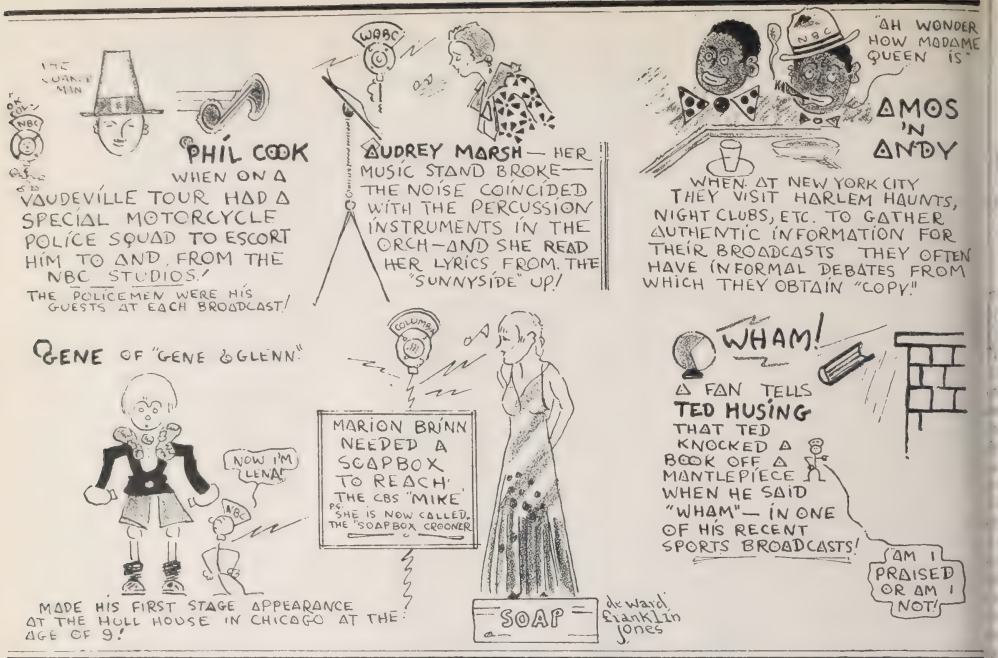
Young girl gets $50,000 award from ury for broken heart. Same girl es-apes with serious injuries after auto cident. Gets only $500.

Moral: Never break a girl's heart. reak her ribs instead.—*Dolly Dia-ond, 730 De Kalb Ave., Brooklyn, Y.*

SLIPS THAT PASS THROUGH THE MIKE

ALL RIGHT, AS LONG AS HE DIDN'T RUN THROUGH A RED LIGHT—Lowell Thomas said, "I was driving from Poughkeepsie to New York City, and ran through the morning papers . . . " That's a new hair breadth escape for him.—*Reverend Thomas Walker, 174 Carteret Avenue, Jersey City, N. J.*

TREADING WATER—The WTIC announcer, reading names of orchestral numbers and the place from which the requests came, "We now hear '*Walking my Baby Back Home*' from England"!—*Edward Kocsau, 1445 Franklin St., Johnstown, Pa.*



NOT WORTH YOUR SALT—Jimmie Paten, WEBC announcer, "A small boy has been lost. His name is Billy Blank, he has light hair, etc., etc. Anybody finding the little chap, please notify the distracted parents. We continue our program with '*He's Not Worth Your Tears*'."—*Mrs. K. L. Wornstaff, 1514 19th St., Superior, Wis.*

THEY WERE NOT RUGGED RUGS—WMCA announcer, "We have a most unusual bargain today. Velvet rugs at only $1.95 each. They can't last long at this price."—*Esther Lynn, Route 2, Richmond, Va.*

BATTER OUT—Charles B. Tramont struck out the other night in announcing the Aunt Jemima Pancake Flour program. He dwelt enthusiastically on the ease of making pancakes according to directions, and wound up with "drop the batter on the girdle!" We like ours better hot off the *griddle, inside* the vest.—*Nell C. Westcott, Chestertown, Md.*

(Mrs. Westcott was first at the tape with that slip. It was also reported by Mrs. A. E. Waldrop, Thrift, Tex., Elsie McCloskey, 231 W. Market St., Marietta, Pa., Henry J. Polzin, Saginaw, Mich.)

BY WHOSE REQUEST? — Said John B. Gambling of WOR: "We now play, '*I'm Up On A Mountain*' by special request."—*Grayce A. Brush, Dayton Ave., Box 33, Basking Ridge, N. J.*

RADIOTIC PRATTLES

Good evening listeners-in. We introduce to you Miss Lydia Valley of the Lehigh Valleys who sings for you over NWN, and is accompanied by the Four Cymbal Clashing Sisters. Here they are—

"How can I leave thee?"
Sang the lovesick swain.
"Shall I take the New York Central
Or a Pennsylvania train?"

One more song we bring, holding a hint of sadness and the touch of a frustrated life. Miss Lydia Valley—

"It's not so much the soup you make
That makes me love you true.
It's thinking of the pains you take
To give me crackers too."

We are trying to perfect the tonal qualities of our music and this has come to you from a special device by courtesy of Mr. Leopold Kebitzer, who likes to mix the music of his Tinpanny Orchestra with his own egg beater. This is NWN bidding you God Speed.—*Fitzhugh Watson, 346 So. Smedley St., Philadelphia, Pa.*

TONGUE TWISTER

On NBC recently—Compositions of Tadeusz Jarecki were interpreted by Madame Marya Bogucka, concert soprano. Imagine the poor announcer stuttering over that!

Mr. & Mrs. GEORGE D. LOTTMAN

HAVE THE HONOR TO SPONSOR

THE DEBUT OF

THE NEW ARRIVAL

EVAN ALAN LOTTMAN

IN THE HOWLING SUCCESS

"IT'S A BOY"

Seven pounds of mellifluous and tuneful harmony

FIRST SHOWING
MARCH 20th, 1931
8:30 A. M.
At 901 Walton Ave., New York

Production under the Supervision of MORRIS BLUM, M. D.
Midnight performances nightly — with sound effects

CAST OF CHARACTERS

Happy Mother	BETTY LOTTMAN
Proud Father	GEORGE D. LOTTMAN
The New Arrival	EVAN ALAN LOTTMAN
The Deposed Ruler	HERBERT R. LOTTMAN
Mysterious Man With the Knife	Mr. X

BOTTLE-HOLDERS, PIN-BEARERS, DIAPER-FOLDERS, FLOOR-WALKERS, CARRIAGE-WHEELERS, BLANKET-CARRIERS, ETC.

MUSICAL NUMBERS

Cheerful Little Earful	Crying Myself to Sleep
After the Bawl	Out Where the Wet Begins
You're Driving Me Crazy	Manhattan Serenade
Walkin' My Baby

Costumes by American Diaper Co., Best's and Macy's. Evan Alan Lottman's costumes in first act made by his grandmothers. Whoopee dance by father. Tea dances into star's chamber by relatives and friends.

Our own Pipes of Pan columnist has an offspring and here is the way he announced it. As one columnist to another, Indi-Gest would like to know if the producer expects to make any money on this show for the next twenty years or so.

WANTS JOB AT STATION BARKING LIKE DOG

Here is a copy of an honest-to-goodness letter received at Station WOBU Charleston, W. Va. It is reproduced exactly as written. Indi-Gest vouches for its verity:—

feb the 6th dear sir
Mr. Manager of this Broadcasting sa siton if you Please ans my LETTER i return to let me know if you May us me in your Bissness as BARCKING like a dog as I can inatat a Big NEW FOND LAND that it can not be tol from one the Store manager has got a me to rite you Mr. Bell at Red Jacke W. Va

He said he know that i was the bes he EVER heard as he has heard dog on talking Mechines But not like me s if you ples ans and let me know as would lik to have a job with you an let me know how and what way yo could use me that is all i can do Yours truly Ples ans soon W. M Mc Donald Red Jacket W Va. House n 153

READ THIS OUT LOUD

Cal Pearce of KFRC:—

"What's the difference between a bal of hay and a mouse?"

"No difference! The cattle eat it!"

If at first you don't succeed, tr reading it out loud again.—*Jasper E Sinclair, 318-20th Ave., San Francisc*

The Pipes *of* Pan

The Guest-Star Racket Gets a Dig —Should Little Listeners Hear Amos and Andy Court Business? —Where Does O. O. McIntyre Get That Stuff?

By GEORGE D. LOTTMAN

T'S readily understandable that the lesser local stations, unaffiliated with the large chains, have difficulty in getting choice talent. "Remote con-", in the shape of night clubs and the important hostelries, and "new" talent lined at auditions, are the best they hope for.

hey are to be commended for carry- on under those difficult conditions. ty of them compete quite successfully . the huge broadcasting corporations, ite their handicaps. Others, how- , we are forced to report, flounder t helplessly in the face of their dif- ties, readily accepting the services of mediocre entertainer or orchestra that broadcast "for the glory of it". The ious result is that many of their pro- ns are ludicrously amateurish.

he consequence also is that the station ers irreparable harm, and those that e tuned-in "just to see what was do- ' resolve to abstain from such tempta- s in the future. Difficult as it may be present programs of merit on a *con- uous* basis, the success of any station the long run will be determined by *sistency* in the quality of programs sented.

* * *

AVING done little welkin-ringing this season, we now lift our sten- ian and sonorous voice to protest ve- nently against a current practice that islators ought to classify as a mis- neanor.

We refer to the "guest-star" racket, ich is the present "ace-in-the-hole" of vspaper and magazine columnists from rock-ribbed Coast of something to the n-kissed shores of something else.

A columnist, with a weekly air period fill, solicits a star playing in his town "just come over and say 'hello' to the ks." The artist, mindful of the lin- ge that come with favors of that sort, nsents.

Comes the night, and an impressive in- oduction by the gentleman of the Fourth tate. Whereupon the son or daughter Thespis dashes to the "mike", says low've you been?" and then explains at, by the terms of his or her contract, will be impossible to do anything else. Naturally, the fans are disappointed. r there were other periods they might ve tuned in, which would have brought greater entertainment. But the columnist is satisfied, the artist has lost nothing, and the management of the attraction which features the artist has gained some valuable publicity.

Don't, puh-leeze, give us guest stars unless they're ready to do something in return for our courtesy in tuning in. There's no room on the air for them.

* * *

LATEST bulletin on the cut-in situation: Very soon John Royal, director of programs on WEAF and WJZ networks, will call a general meeting of all orchestra directors on those chains, at which he will ask them to cooperate for the purpose of avoiding repetitions on their dance programs.

"Arbitrary orders will not be given," he explains, "but they will be asked to arrange some sort of alternation."

Good news, indeed. Organized control of programs and elimination of repetition are the strongest weapons with which to combat the cut-in menace.

* * *

IF IT be true that the kiddies must be considered, then why does an early evening program like the Amos 'n' Andy period, play up a subject like "breach of promise," as they did for so considerable a spell?

The genial duo told interviewers recently that they're now selecting subjects of more general interest. Hence the breach-of-promise twist.

Wrong, all wrong. Kiddies should hear nothing on the air but fairy tales, unless they've been unusually good that day, in which case, as a reward, they may listen in to the stock-market quotations.

* * *

OUR distinguished contemporary, O. O. McIntyre, is evidently beginning to suffer from that journalistic disease known as over-syndication.

In a recent column, the omnipotent "oom" delivers himself of the following amazing observations:

"The most fleeting of all popularity in the amusement world is that of the Radio artist . . . The Radio's audience, more than any other, demands change . . . So far, few Radio stars have maintained top furore for more than a year."

Let's interrupt the lad who sees-all-knows-all at this point to mention a few names which occur at random of Radio lights who have occupied top position for at least a quintette of years. Roxy, for example. The effervescent Jones and Hare. Lovely Vaughn de Leath. Major Bowes and the talented Phil Cook. Jessica Dragonette of the golden voice. Good ol' Rudy of the Vallee. Some more? Well there's Harry Reser, of the Clicquot Club Eskimos, Olive Palmer, Paul Oliver, Harry Horlick, Vincent Lopez, Welcome Lewis and Sam Lanin. There are scores of others, but space won't permit us to list local favorites, so we confine our rebuttal to those on chain programs.

Of course, if we wanted to engage in a long-winded controversy, we could also adequately refute your observation that "a stage star has often twenty fruitful years, the cinema star will hold audiences for five years and longer, but the Radio star cannot hope for more than two years as things are today."

Without resorting to musty archives, we could readily name half a hundred legitimate and screen stars whose careers have been ephemeral—merely "pan-flashes."

And as for your allegation that stage efforts on the part of Radio folk have been disappointing, we respectfully refer you to the box-office records of the Paramount-Publix organization, for example, which has of late been employing Radio "names" in their stage shows, resulting in "stand-up" business.

Tch, tch, tch, Mr. McIntyre.

* * *

IN LINE with the above, one of the half-dozen most prominent Radio officials in the East told us the other day that a peculiar thing about Radio fans is that they forget quickly. "If some of our greatest features went off the air for a month," he observed, "they'd be completely forgotten."

Which, if true, doesn't astonish us one iota. No more rabid, and apparently loyal set of fans exists, in our opinion, than movie devotees. Yet it took them no time at all to consign to oblivion the flicker idols who couldn't make the grade when the talkies debuted.

Audiences—"mobs" of any sort—are fickle the world over, we suppose.

Blue Ribbon Chain

Throughout the Week

8:00 a.m.—WEAF—Gene and Glenn. Quaker Early Birds. (Daily ex. Sun.)

8:30 a.m.—WEAF—Cheerio. Beloved Gloom Killer, incog. (Daily ex. Sun.)

10:00 a.m—WJZ—Ray Pineapple Perkins. Old Topper with piano patter and a squirt of broadcastor oil. (Thurs. and Fri.)

6:45 p.m.—WEAF—Uncle Abe and David. Two retired merchants from Skowhegan, Maine, with a bagful of quaint New Englandisms. (Wed., Thurs., Fri., Sat.)

6:45 & 8:00 p.m.—NBC and CBS—Lowell Thomas, gentleman reporter of Literary Digest. (Daily ex. Sun.)

7:00 p.m.—WJZ—Amos 'n' Andy. Lovable pair of Negro Dialecticians—"Ain't dat sompin!" (Daily ex. Sun.)

7:00 p.m.—WABC—Morton Downey with Freddie Rich and his orchestra. (Daily ex. Sun., Mon. and Tues.)

7:30 p.m.—WABC—Evangeline Adams, astrologer, interprets your destiny. A Forhan's period. (Mon. and Wed.)

7:45 p.m.—WABC—Daddy and Rollo. J. P. McEvoy humor when little Rollo puts daddy on the spot for a question mark. (Tues., Wed. and Thurs.)

8:00 p.m.—WABC—Arthur Pryor's Cremo Military Band. B-r-r-m. Only twenty words of advertising. Count 'em! (Daily ex. Sun.)

8:00 p.m.—WEAF—Sanderson and Crumit. Julia and Frank at the Blackstone Plantation. "Foolish facts and crazy cracks." (Tues. and Thurs.)

8:15 p.m.—WEAF—Radiotron Varieties with "Bugs" Baer, master with or without ceremonies. (Wed. and Sat.)

10:00 p.m.—WEAF—B. A. Rolfe and his Lucky Strike Orchestra. "Everybody knows—" (Tues., Thurs. and Sat.)

10:30 p.m.—WJZ—Clara, Lu and Em, Super Suds Girls, speak of kings and goldfish. (Daily ex. Sun. and Mon.)

Sunday

11:00 a.m.—WEAF—Roxy Concert. One of the world's greatest orchestras.

1:45 p.m.—WJZ—Little Jack Little, Master of Melody. Favorite songs. "Here 'tis."

8:00 p.m.—WEAF—Maurice Chevalier, Play Boy of France. Songs with Zis an' Zat. (Chase and Sanborn.)

8:15 p.m.—WJZ—Collier's Radio Hour. A cocktail of short-short drama, serious comment, nut comedy, wit, and a lively dash of music.

9:15 p.m.—WEAF—Atwater Kent Hour. Orchestra, direction Josef Pasternack. De luxe talent. Graham McNamee, M. C.

9:30 p.m.—WABC—Edgar Guest. Detroit Symphony Orchestra under direction Victor Kolar. For Graham-Paige.

9:30 p.m.—WJZ—Floyd Gibbons. "Hullo, Everybody." World adventures.

10:15 p.m.—WEAF—Famous Trials in History re-enacted under modern conditions of court procedure. For National Dairy Products.

10:45 p.m.—WEAF—Sunday at Seth Parker's.

Monday

8:30 p.m.—WJZ—Simmons Hour presents operatic stars to Diamond Horseshoe of Radio.

8:30 p.m.—WEAF—A. & P. Gypsies. Orchestra under direction Harry Horlick.

9:30 p.m.—WJZ—Chesebrough Real Folks. Excitement never ends for simple folk at Thompkins' Corner.

The Rise of Carol Deis

(*Continued from page 20*)

found, produced the best results.

Her teacher was confident she would win. Her voice was sure and dependable now. To hear her was to sense, as she had seen that gracefully circling plane years ago, a lifting exaltation into the ethereal blue.

Soon came the first of the elimination contests. Singing from behind a screen directly to the judges Carol Deis won the Dayton contest with ease. At WAIU in Columbus, the state capital, it was the same story with the Radio audience participating in judging the merits. She felt slightly nervous as she progressed to the broader district elimination at WGN, Chicago. But she was soon advised that she had qualified to represent the Midwest in the New York finals.

With other district winners she enjoyed a visit to the White House in Washington. Even there it seemed she was picked as a winner, for one of the columnists remarked: "Were this a beauty contest there would be no doubt about the Dayton girl."

What a broad world—and after all how much alike were humans wherever you find them. The young woman from Dayton was beginning to shed her self-consciousness. She welcomed the day for the greatest test of her life—her last chance to win an Atwater Kent prize.

The *Bell Song!*

Clearly, distinctly she remembered Galli-Curci on that eventful day. She prayed to be a Galli-Curci just for an hour. And, perhaps, her prayer was answered.

Madame Schumann-Heink was stirred to the depths of her soul. She had done it, she had done it—this unknown youngster from a Dayton law office, a stenographer, not only had presumed to choose the *Bell Song* for such an occasion but she had gone ahead and sung it—marvelously, thrillingly. Brave, enduring Schumann-Heink paced the floor striving to contain herself while the other judges were making up their minds. At that it was the quickest decision in the four year history of these annual contests. All were unanimous for the Carol Deis. It was all settled in fifteen minutes.

These were incidents I recalled as I sat and chatted with the girl who had dreamed and wondered if two years of high school would be the end of her higher education. I had read of the great reception tendered to her on her return to Dayton; how the newspapers had commented: "her intonation of the aria, which makes most exacting demands upon the voice, was limpid and flawless . . . Miss Deis sang 'E' above high 'C' with the same sureness and clarity characteristic of her notes in the lower register."

Accepting her check for $5,000 and choosing Curtis Institute at Philadelphia, she began her studies last January. Voice, piano, languages, dramatic art and opera are a few of the subjects included. She has a three year contract with the NBC Artist Bureau and will receive $500 every time she sings. This summer she goes to Europe to study under the French and Italian maestros.

STATEMENT OF THE OWNERSHIP, MA
MENT, CIRCULATION, ETC., REQUIRED E
ACT OF CONGRESS OF AUGUST 24, 19
of RADIO DIGEST, published monthly at Ne
N. Y. for April 1, 1931. State of New York, C
New York, ss.

Before me, a Notary Public in and for the S
county aforesaid, personally appeared Raymo
who, having been duly sworn according to law,
and says that he is the Editor of the RADIO
and that the following is, to the best of his knowl
belief, a true statement of the ownership, man
(and if a daily paper, the circulation), etc., of t
said publication for the date shown in the above
required by the Act of August 24, 1912, embodie
tion 411, Postal Laws and Regulations, printe
reverse of this form, to wit:

1. That the names and addresses of the p
editor, managing editor, and business manag
Publisher—RADIO DIGEST PUBLISHING

The Countess and Her Stars

(*Continued from page 54*)

Neptune trine Mercury, trine Mars that means a very active mind, ready elve into any subject, no matter how erious or difficult. Saturn in Aqua- gives her balance and profundity. e's a square between Saturn and s which is responsible for her abil- to read people, analyze them.

o people (that's what the astrologers persons born in that sign) are extravagant and impatient, but the ntess doesn't possess the latter fault. has infinite patience to accomplish hing she sets out to do, but she is fond of luxury and beautiful things it will be difficult for her at times ay "no" when she's tempted to spend e than she should. From the out- , however, she'll probably be able have anything her little heart de- s; for Leo people just naturally at- t wealth, position and fame, and she ow coming into some of the best as- s she has ever experienced. The good iences will surround her all through 1 and 1932 and if she should make her mind to "go west" there is no er time than now.

etty McGee Broadcasts

(*Continued from page 69*)

anist of WHK, and a few of the inter- ng things her recent programs have ught her. The Saturday midnight gram is an all request hour. From P.M. till the end of her program, let- , telegrams, and phone calls pour in ping the office staff busy. Miss Wy- 's programs are all memory work and rarely carries any music with her. teners delight in trying to stump the satile Helen and, when they fail, as y most usually do, their answers are que. An odd note from Novia Scotia, ive dollar gold piece from a fan she er knew—Helen calls it her "believe or not" piece.

* * *

NOW enters the Radio woman's hour director who never is heard on the . She is Mary Kyle of station WLW o has just taken over the duties of ly Fisher who left the Crosley station be married. Miss Kyle is a director of Crosley Homemakers in every sense the word. She plans all the programs LW broadcasts for women, engaging erts to talk on specialized subjects and anging entertainment features for men. Instead of spending much of her ne before the microphone, she delegates broadcasting to people selected be- use of their voice appeal.

WALLY COLBATH, graduate of Northwestern in the class of 1930, the "Lilacs" of Harold Teen, WGN feature, is one of the nation's outstanding divers. He was on the Olympic team in 1928 and was former national intercollegiate diving champion . . . He often hurries into the studios in the Drake Hotel with his hair still wet from diving at the Lake Shore Athletic or Medina Athletic Club.

Chinning with the Chain Gang

(*Continued from page 63*)

When Lula Vollmer brought her into the play she was supposed to be the villainess, but fans refused to hiss her and sent applause cards instead.

* * *

ALWAYS be on your best behavior and enunciate clearly in restaurants, even when your mouth is full of soda crackers, for the man at the next table may be a Radio manager in search of new talent.

Six men were singing in harmony in a Rochester restaurant one night . . . a Ford salesman, a school-teacher, a banker, two insurance agents and a realtor. William Fay, manager of WHAM and Jack Lee, the station's ace announcer, heard 'em and signed 'em on the dotted line for the Barbasol Barber Shop Ballads, now on the Columbia system. Their names are George Doescher, Robert Woerner, Ted Voellnagel, Jim Carson, Earl Remington and George Culp, and they take their broadcasting as a side line to their regular occupations.

Radio Theater Columnist

Douglas Brinkley is the magnet who attracts theater celebrities . . . actors, authors and producers . . . to WGBS Wednesday nights for his "Theater Going" column of the air.

Learn RADIO, TELEVISION, TALKING PICTURES

Don't spend your life slaving away in some dull, hopeless job! Don't be satisfied to work for a mere $20 or $30 a week. Let me show you how to make REAL MONEY in RADIO—THE FASTEST-GROWING, BIGGEST MONEY-MAKING GAME ON EARTH!

Jobs Leading to Salaries of $60 a Week and Up

Jobs as Designer, Inspector and Tester, paying $3,000 to $10,000 a year—as Radio Salesman and in Service and Installation work, at $45 to $100 a week—as Operator or Manager of a Broadcasting Station, at $1,800 to $5,000 a year—as Wireless Operator on a Ship or Airplane, as a Talking Picture or Sound Expert—HUNDREDS of Opportunities for fascinating BIG PAY Jobs!

Without Books *or* Lessons in 10 Weeks

By Actual Work *in* Great Coyne Shops

Coyne is NOT a Correspondence school. We don't teach you from books or lessons. We train you on the greatest outlay of Radio, Broadcasting, Television, Talking Picture and Code Practice equipment in any school. You don't need advanced education or previous experience. We give you—right here at Coyne—all the actual practice and experience you'll need. And because we cut out all useless theory, you graduate as a Practical Radio Expert in 10 weeks.

TELEVISION

Talking Pictures

And Television is already here! Soon there'll be a demand for THOUSANDS OF TELEVISION EXPERTS! The man who gets in on the ground-floor of Television can make a FORTUNE in this new field. Learn Television at COYNE on the very latest Television equipment! Big demand in TALKING PICTURES and SOUND REPRODUCTION! Hundreds of good jobs for WIRELESS OPERATORS! Learn ALL branches of Radio at Coyne—the one school that has been training men for 32 years.

Earn as You Learn

You get FREE EMPLOYMENT HELP FOR LIFE! And if you need part-time work while at school to help pay expenses, we'll gladly help you get it. Coyne Training is tested—proven beyond all doubt. You can find out everything absolutely free. Just Mail Coupon for MY BIG FREE BOOK!

Sometimes WE *are surprised*

BUT we try not to show it... This time a husband said his wife was arriving in 10 minutes, and could we help him arrange a surprise dinner party for her? Here was a list of 12 guests... would we telephone them and "fix things up" while he dashed to meet his wife at the station? There were 14 at that dinner... and his wife *was* really surprised!

It's our belief that a hotel should do *more* than have large, airy rooms, comfortable beds, spacious closets. Beyond that, we daily try to meet the surprise situation *(without surprise)*, no matter what the guest wants.

matter whom you hear before or after you are certain to remember her . . . especially if she sings "Kiss Me Again". * * * Fritzi Scheff will ever remain in the heart and memory of her public as a great artist, a great woman, and a credit to the theatre. * * *

And now here's a lady I neither have to *introduce* nor *welcome* to Radio. * * * She saw it first. * * * Miss Vaughn de Leath. * * * Vaughn de Leath was the first American woman to broadcast. * * * An Italian opera singer radioed a song for Marconi in 1920 and shortly after that, Vaughn took the air and has been on it ever since. * * *

Miss de Leath has a further distinction. * * * She is the originator of the crooning type of singing now so popular. * * * She tells me that crooning was born of necessity. * * * In those days the microphone wasn't so perfectly adjusted to the human voice as it is now. * * * Delicate and costly tubes in the transmitting panel were often shattered by a soprano's high note. * * *

So Miss de Leath sang with a *new* note to save tubes. * * * It was a throaty modulation, well within the mike's range. * * * The result was most happy. * * * The tubes liked the new style of singing . . . and so did the public. * * * And that's where we women beat the men to at least one field. * * *

This mike-made queen even looks the part. * * * Vaughn de Leath is tall, handsome and majestic. * * * (Has dark hair and eyes and, I might add, above the average size.) * * * She was born in Mt. Pulaski, Ill., and her father was a manufacturer of windmills. * * * So she naturally accepts the benefits of the air as her rightful heritage, whether they come through a wind-mill or a mike. * * *

Diamond Horseshoe

(*Continued from page 10*)

ironed out, hark to this bit of prestidigitation.

On at least one occasion when the Metropolitan is on tour it has been found necessary to make arrangements for bundling Mr. Pelletier and the artist of the evening into a fast "ship" at an airport for the long jump to New York. A quick airplane hop was the one and only way out of the difficulty—but it went further than that.

It was equally necessary to rush them back to the air field once the Simmons Program was concluded at the Columbia studios and to shoot them away through the night to rejoin fellow artists and there go on with their parts with the sang-froid that might be expected had they merely taken time out for a nap.

In other instances, when the distance of the company from New York was not so great, fast trains have been found to meet requirements of the time element.

In the case of Sigrid Onegin, for instance, the only one of the artists so fa "booked" who is not at this time con nected with opera, she found that he coast-to-coast tour concluded on th very day of the broadcast. It was case of rush on to New York. Then, th program over, she blithely sailed away t Europe the very next day to fill anothe series of concert engagements.

But hark—all is not gold that glitter and the confines of full dress do not a ways lend themselves to that freedom the thoracic pipes which an opera sta desires when he is about to give way t those rich and sonorous tones whic have made name and voice famous.

Radio is Radio, be the man of th moment a world-renowned opera singer a song plugger from Tin Pan Alley. An so it was at the premiere of the Simmon program, when the artist to whom w given the honor of inaugurating the serie Beniamino Gigli, got down to business.

There was a flutter of lorgnettes ar laces, a coughing into coats—in fact general and audible gasp and a moment awful silence.

Gigli with no ado was shedding co and waistcoat, dress collar and tie, ar loosening the neckband of his shirt!

And so, though the diamond horsesh of the Metropolitan may move to t broadcasting studios—and there is eve indication that the process is under w —Radio stays Radio and sticks by i own conventions and quixoticies—infc mal though they be. The tiaras a trappings of the one will have to assi ilate the shirtsleeves of the other.

And that's that!

Classical Music

(*Continued from page 71*)

manly boys playing violin, viola, cel flute, oboe, bassoon and all the rest them. What is more, these young peop played well. They were having a marv ous and happy time; and their playi showed it.

Well, what is true of other instrume is true also of the piano. As the emine amateurs who are helping in the NI piano broadcasts on Tuesdays and S urdays are showing, any intellige person who cares to take a little trou can learn to produce a tune with accompaniment from the piano k board; and to read simple music. Af that much has been accomplished why, there are plenty of piano teache The piano is, after all, the finest of musical instruments, because it alone reproduce both harmony and melo May a million of grown-ups take this n fad to their hearts and become pia strummers. There is no better fun be had, and no finer occupation for sp hours. Get this started and there w be less complaint about home and s dullness. There will be less craving morbid excitement, less jazz madness, l discontent, less unhappiness.

pular Announcer

A. L. Alexander of WMCA.

'E Radio is a comparatively new d, most of the popular announcers l out in life to be something quite t, but not many have studied for inistry! That is just one of the to distinction of WMCA's popular nnouncer and studio director.

stage, newspaper work and social e are some of the other things ' has tried his hand at since he left me town, Boston. He's been with lew York station, however, since where his abilities at spot news-g, sports reporting and the enter-g use of words have been recognized. ts prodigious quantities of fan mail.

, American Women Are Happy

(*Continued from page 22*)

anyone for a livelihood, she can to postpone marriage until a man s along who measures up to her ards. And if when she marries she finds she has made a mistake. loes not have to endure punishment he rest of her life. She can divorce and try again.

recently met an American friend had just procured a divorce from her and. 'Just think,' she said, her eyes cling, 'I can have another chance! that just too marvelous? It makes eel that life is worth living again.' here is little sentiment about pean marriages. They are arranged arily for economic reasons. The ionship may last longer than the rican one does, but it has no flavor beauty to it. Naturally men look de of marriage for love and the wife o condone extramarital relationships. I cannot see how such a state of affairs makes a woman happy.

"Because a *dot* is necessary in a European marriage, it means that parents have to work themselves gray and gaunt in order to save the money for it. For that reason they cannot afford to travel or to have any luxuries. Every spare dollar must be put away for the *dot*. When you further realize that the European woman has none of the labor-saving devices to help her in her work, you can see what a grind life is for her. By the time her children are married, she is too worn and spent to start to lead a life of her own.

"But in this country one finds the older woman as active as ever. Because she has kept abreast with the trend of the times and has not let her mind stagnate, and because she continues to exercise and diet so that she retains her health, the joys of life are still hers."

Mr. Hamilton next took up Miss Loos' statement that European husbands and wives have a closer companionship than do the American husbands and wives.

"It is true that the American man devotes more time to busines ," he said, "and the wife has many interests which are not shared by her husband. But I believe that when husbands and wives are together too much, they are apt to become bored and fed up with each other. Before long they are seeking love affairs to relieve the monotony of their marriage. Perhaps that is one reason," twinkled Mr. Hamilton, "why the European husband has so many adventures.

"I find that when the American husband and wife are together, there is a splendid comradeship between them. The wife can readily discuss any topic with her husband, whether it is politics, finance or prize fighting. She has an intelligent understanding of his problems and knows what he has to cope with in the business world. On Sundays and holidays they take the car and go to the country or seashore or to the golf links.

"However, if, as Miss Loos claims, American women are not satisfied with their men, and there is disharmony between the sexes, you must realize that the women have advanced so far that today they would not be satisfied with any man. The hand kissing and the flowery effusions of the European man which the American woman likes, would soon pall on her, and the circumscribed life which he would demand of her, would make her miserable. As it is, when an American girl marries a foreigner, she generally gets a divorce in a few years.

"But I do agree with Miss Loos in this," smiled the famous author. "If women are not satisfied with their relationship with men, they have it in their power to change the men. Let the women start right now with their sons to make them the kind of men they would like them to be!"

(*Continued from page 17*)

from an overall input of 2 kilowatts. The large valves are specially mounted to avoid vibration. There is a studio with two microphones, one for announcements and discourses, the other for items of music. Items are also relayed from other stations. The huge multicone loud speakers have a wide range—in certain circumstances up to six miles.

Listeners to Algiers broadcasting are already familiar with the concerts of Arab music given every week—music so simple and at the same time so complex, with its piercing and alluring melancholy. But perhaps they have never seen skilled Arab musicians. In the wireless studio at Algiers native broadcasters rarely wear their long and flowing robes; they prefer a dinner jacket, and usually keep their heads covered with their red chechia or fez. It seems to give them real pleasure to sing and play before the microphone, broadcasting their love songs or the cradle songs sung by their mothers. Many natives in Algiers have wireless sets and gramophones in their homes (usually obtained on the hire purchase system), for music and visits to the cinema are welcome reliefs from their monotonous toil in the vineyards and factories of North Africa.

Sigmund Spaeth

(*Continued from page 7*)

or. He made it a feature of the "stu- parties" at Chickering Hall, New k. also broadcast by WOR, introduc- many a celebrated musician of the in an informal, chatty fashion which ned to make a great hit with the ers as well as the artists.

The first long distance broadcast of athletic event also went to the credit Sigmund Spaeth. He had written ch on sports for the New York *Times* the old Evening *Mail*, and when tion WGBS (which he had helped open with an all-star program) ar- ged with the Daily *News* to broad- the Stanford-Notre Dame football ne with the help of a direct wire from adena, the Spaeth type of announcing med a logical choice.

t was quite a feat, as it turned out. Spaeth sat in a little room in Gim- 's New York store and was handed m time to time a few telegraphic lines h as "Miller gains three yards around ht end." This material he had to matize and turn into a vivid story for the eastern football fans. Of course, was familiar with the work of both ms (he had seen the famous Four rsemen play against the Army) and knew football well enough to talk it his sleep. Fortunately, also, it was a ry exciting game, with Leyden twice cerepting forward passes for touch- wns, and Notre Dame once taking the ll on downs six inches from the goal e, against the line plunging of the eat Ernie Nevers, and finally winning a small margin. Spaeth was on the for nearly three hours continuously. he had to talk even through the long rmission between halves, summing , recapitulating, and making wise com- ents on plays which he later proved to ve guessed quite correctly. People still lk about that broadcast.

Among the thousands of letters and legrams that came to our office at the me was one from Roxy, who had been ck in bed that afternoon and listened the entire game. He said later that was his one and only fan letter, and mphasized his admiration by writing the troduction to one of Dr. Spaeth's books, *Words and Music*.

John McCormack still later sent us a tter from Japan, written by an Ameri- an who had heard the Irish tenor and he Irish football victory on the same New Year's Day. It happened to be Mc- Cormack's first appearance on the air.

Another sport broadcast in the Spaeth ecord was that of the fifteen round fight etween the present middleweight cham- ion, Mickey Walker, and the late Harry Greb. At one stage in the proceedings here was a delay of over twenty minutes, which had to be "stalled" somehow. Dr. Spaeth had used up all the ringside celeb- ities, the description of the crowd and other bits of color. Finally, he turned in desperation to the current rumor that Greb did his training to a musical accompaniment, and enlarged on this topic till the fighters appeared.

"I told you so", said one of his friends, listening in. "I would have been willing to bet that old Sig wouldn't let the evening go by without some reference to *The Common Sense of Music*." (That was the name of his first popular book.)

There are many other details of pioneer Radio days that linger in the memory, but they cannot all be included here. One of Dr. Spaeth's books, *Read 'Em and Weep, The Songs You Forgot to Remember*, started the craze for old ballads on the air and has been used by every studio in the country. His own programs of old songs are still popular and have been widely imitated.

He was one of the earliest broadcasters at KDKA, Pittsburgh, to be heard in England on the short wave-length. In Chicago he was selected by the *News* to entertain the Radio audience while waiting for Lloyd George to start his speech at the stockyards.

Meanwhile Sigmund Spaeth was doing a tremendous amount of general lecturing and writing, appearing in successful Movietones, composing and arranging music and an occasional lyric, such as the theme song of the Colman-Banky "Magic Flame" and "Down South" in "Show Boat", which also appeared as the musical signature of the Maxwell Coffee Hour. For the past two years he has been almost completely absorbed by the exacting and difficult work of creating musical audiences throughout the east under the Community Concert Plan. But he finds time to direct and act as Master of Ceremonies for the Happy Wonder Bakers' Hour on NBC each Tuesday night; so when old Sig Spaeth decides to tune up his vocal chords and takes a fling at the ether-waves, his struggling secretary simply makes the best of it and starts right in to sort the fan mail.

Television

(*Continued from page 81*)

ing and closing of their wings proved delightful to watch.

One of the first demonstrations of television in a theatre was given by Doctor Alexanderson of the General Electric Company in the Proctor Theatre in Schenectady. Through the use of a high intensity arc light it was possible for Dr. Alexanderson to throw the television images on a large screen some six by seven feet in dimension.

This demonstration is of special interest because the television receiver utilized a new method of varying the intensity of the light. In the ordinary receiver the light itself is varied in brilliancy in accordance with the picture. In Alexanderson's receiver the light intensity was constant but the amount of light striking the screen of the receiver was varied by means of a special light cell developed by Karolus. The use of the Karolus cell made it possible to use a high intensity arc light and in this manner obtain very brilliant images. At various times during the past few years the General Electric Company has given television demonstrations, most of them using the ordinary type of transmitter and receivers.

Demonstrations of television have also been given by other companies and by various broadcasting stations and at present there are a number of television stations transmitting regular programs. Many companies have also assigned some of their best engineers to research in television. Practically all of the large electrical and Radio manufacturing companies have staffs of research engineers devoting most of their time and thought to this intriguing subject. In addition, in Boston we have the Short Wave and Television Corporation, in New Jersey, the Jenkins Television Corporation, in Chicago, the Western Television Corporation and Farnsworth in California.

Everyday television broadcasts in America received their greatest impetus from Chicago. Incentive was furnished when Eastern experimenters withheld demonstrations shown in Madison Square Garden from the Chicago Radio Show in 1929. Whereupon WMAQ of the Chicago Daily *News* installed its own television demonstration. The first television "commercial" program was broadcast by this newspaper station in 1930. Stations WIBO and WCFL in Chicago also broadcast regular television programs during the past year.

To see some of the better demonstrations of television is to realize that the work of the modern engineers and the tools of modern science have changed television from a dream, a vision, to a

F. & H. CAPACITY AERIAL

Price $1.25 Complete

Every Instrument Tested on Actual 1000 Mile Reception

The F. & H. Capacity Aerial Eliminator has the capacity of the average 75 foot aerial [illegible]. It increases selectivity and tone quality [illegible] and brings distant stations is absolutely guaranteed. It eliminates unwanted noises, gas motor, modulation of wires, etc. It does not connect to the light socket and requires no current for operation. Enables set to be moved into different room, may prescribed by [illegible]. We predict this type of aerial will be used practically entirely in the future. Installed in a minute's time by anyone. Return in three days if not satisfied.

reality. With proper apparatus it is now possible to transmit and receive what can justly be called high quality pictures. The apparatus required is expensive, but commercial television as an adjunct of the telephone is probably not far in the future. But as we study all of these demonstrations we find that the advance of television has largely been due to an improvement in detail, an improvement in technique, rather than to changes in methods. The best and most recent demonstrations use fundamentally the same system used in the earliest demonstrations. Now, if the methods we are using are sound, we are on the right track in improving detail and simplifying operation; but out of all this work we cannot help but hope that some new and better method will evolve.

Television for the home? That is another problem. Scientists who have devoted thought to the subject would agree, we believe, that we must go somewhat further in experimental laboratory work before television can be brought to the public in a large way. To the world at large, perhaps, pep and a hearty laugh are the attributes of the stock promoter, a fish-tail handshake, absent-mindedness, and a narrow viewpoint the attributes of the scientific outlook. Such views must, however, be held only by those who have never been on the inside, for the scientist gets as much joy out of looking through a spectrobolometer as does a baseball fan when he catches the ball that Babe Ruth knocks into the stands. They merely get their joy in different ways. The scientist knows the importance of television and is only too anxious to bring it to practical realization. That's the biggest thrill a scientist can get, for science does not ask man to live in an empty world. Science is not a hod carrier but a torch bearer.

Do you want to get into television? Then for the time being you will have to be satisfied with small pictures of comparatively poor detail. Thousands of experimenters get pleasure from present day television reception. Can you? Or do you have to see the previously mentioned Babe Ruth knock a homer to get a thrill?

Radiographs

(*Continued from page 59*)

And all the time in the fields of literature and philosophy, he was snatching at beauty; he was writing poetry himself. Magazines that have accepted his poems are *The New Republic, The Nation, The American Caravan, This Quarter,* and *The Herald Tribune Sunday Magazine.*

About four years ago he happened to drop in at a Radio studio. In those pioneer days programs had a habit of going wrong at the last minute. On the particular day that David Ross happened to be there, there came a sudden gap that had to be filled. To fill it, David Ross offered to give a dramatic reading. So well did he do it that he was put on Columbia's staff as a regular announcer.

Among the programs that he now conducts are *Coral Islanders; Arabesque; True Story; Russian Village,* and *Around the Samovar.*

Georgia Backus

"GORGEOUS GEORGIA," they call Georgia Backus up at Columbia. The day I saw her she was sitting in her very plain, businesslike little office up on the nineteenth floor of the Columbia building. She had on a simple black and white jersey suit. But even so, there was about her that same exotic quality that one sees in pictures à la harem. She would come under that special list of people whom I classify as having "purple in their souls", and I can't define it any more than that.

Tall, slender, slightly curling light brown hair brushed off her face, nice smile, nice teeth, nice eyes—she gives the impression of having been places and done things.

She has had an interesting background. She comes of a theatrical family. Her early life was the roaming life of stage folk on the road. Schooling had to be sandwiched in between tours. She got in a year at Smith College. She also went to Ohio State University.

It was only natural that she should go on the stage. Through the training school of stock she graduated to Broadway. *East Side, West Side; In the Next Room; The Shanghai Gesture,* are some of the plays she has worked in.

Incidentally it was while playing stock in Schenectady that she had her first chance at Radio. But she scorned it. What, go into Radio, she, Georgia Backus, who was going to be the great American actress!

But somehow, as happens in stage life, the great American actress found herself without a job. Temporarily she turned to writing. She wrote special aviation stories, fiction, publicity, anything.

"I always turned to writing for immediate funds. But I never intended to make it a permanent thing. I didn't want to write. I made up my mind I wouldn't write. And that's a good joke on me, isn't it?"

It is; for if there's one thing Georgia Backus does up at Columbia it is write. One of the company's continuity people, she writes original programs, edits others that are not original, does any little odd job that happens to come along. For eight weeks she was in charge of Columbia's experimental hour, in which new forms of Radio writing were tried out. One of the forms tried was the "aside", the showing of a character's thoughts—the thing Eugene O'Neill did on the stage in *Strange Interlude.* Another experiment was called *Split Seconds,* and gave a dying man's impressions of his whole life. Again an attempt was made to carry drama to a certain point with words, and then let music tell the rest.

One conclusion she has reached from her experimental work is that Radio is not yet ready for exceptional writing. It sounds like heresy, but what she means is that Radio with its appeal only to the ear and often an inattentive ear, cannot as yet put over the subtleties of fine writing.

Miss Backus directs and acts as well as writes. As has been said before, she is in *Arabesque.* She is Aphrodite Godiva in the *Nit Wit* program. But writing is her forte. And not alone for the Radio. She has a play that she has been working on for four years and which will probably see Broadway very soon.

AMERICA'S PREMIERE REGIONAL STATION

WMCA

NEW YORK CITY

570 K.C. 100% Modulation 500 Watts

13,000 square feet of modern broadcasting facilities . . . . . 7 perfect studios . . . . . the WMCA THEATRE, first Radio Theatre of the Air with auditorium comfortably seating two hundred . . . . . studios overlooking the Great White Way . . . . . a staff of more than one hundred experts to prepare and present your programs . . . . . a truly modern broadcasting plant.

THE AIRLINE TO THE NEW YORK MARKET

Twelve million people live within the trading area of New York. Nowhere else in the world is there a greater concentration of buying power. The yearly consumption of luxuries and necessities of these New Yorkers reaches a staggering total.

New York is the world's richest, most compact market for every kind of product and service that human ingenuity can devise. The New York market *alone* has made millionaires of men.

Because of its size—the many-sided angles of its life—the cosmopolitan character of its population—some advertisers believe that the New York market is difficult to sell successfully.

But radio broadcasting through WMCA has shattered this prejudice; has proven, through actual *results* for a varied clientele of advertisers, that New York is *now* one of the *easiest* markets in the world in which to gain a firm foothold.

NEW YORK'S OWN STATION

WMCA covers practically *every* event—*every* happening that is of *interest to New Yorkers*. If there is an important New York news story WMCA broadcasts it. Banquets of local importance and significance, outstanding ring and sport events, theatrical performances, the smarter night clubs—these are a few of the things that New Yorkers expect WMCA to cover.

We believe that no station has more friendly and personal relations with its army of listeners than WMCA. Because they are always sure of finding something of immediate and local interest on its program, New Yorkers have an exceptionally warm regard for WMCA.

Knickerbocker Broadcasting Co. Inc.
1697 Broadway at 53rd Street

Commander of the Smiling Army

(*Continued from page 53*)

ous to know how he got the idea. In the front line trenches, one day during a lull in the fighting, Doc and his comrades heard music coming from the German lines, and not to be outdone Doc decided to give the "Jerries" some music too. Thus the Canadian "Tin Can Band" came into being, comprised of biscuit tins and dish pans for rhythm, and harmonicas and tin-whistles for melody. That band grew in popularity until it became a permanent part of the army's musical division.

Hesitantly I asked Doc how he lost his arm. He smiled, and said, "It was during the second battle of Ypres, I took charge of a company whose Commander had been killed—six out of 168 survived—and while directing rifle fire into the oncharging enemy, a machine-gun got me—five bullets in the left wing—a dizziness—sweet distant music—a pleasing sensation of floating in the air—then the next thing I remember was hearing guttural voices that grew louder and louder. I couldn't talk and I had a horrible fear that they might bury me alive. Finally my voice came back enough to let them know they weren't to bury me—that I was alive. I was taken later to a Convent in Rouliers, Belgium, where my arm was amputated by a German doctor, and where, for a few weeks, I was nursed by Belgian Sisters of Mercy. Then I was sent into Germany to the prison camps."

Doc's sojourn of five months in the prison camp was climaxed by an exciting experience which took him and a Scotch comrade into Holland. They feigned insanity so that they might be included in a group of prisoners booked for exchange, and from which, so they had been told, all non-commissioned and commissioned officers would be barred. Their scheme discovered by the German doctors, they were told by an attendant that they would be returned to the prison camps. That night five prisoners made a break for it, Doc and his Scotch friend taking one road, the other three taking the road furthest from the guard house—Doc and his friend made it—the other three were not so fortunate.

Being greatly handicapped by wounds, Doc was forced to lay under a bridge all night and the next day while the whole country-side, soldiers and civilians, combed the fields and hedges for him. A little dog came sniffing under the bridge and gave a growl—a bark would have cost Doc's life—but Doc put out a friendly hand and the dog went to him. As Doc said, "The hardest thing I had to do during the war was to hold that little innocent puppy under the water while I drowned him—but you see, it was either he or I."

In recognition of Sergeant Wells' valiant service, and because he could no longer serve at the front, having been severely wounded, gassed and shell-shocked, the Canadian Government appointed him Official Lecturer. He toured the United States and Canada with the official war film, "Canada's Fighting Forces". Later when America entered the World War, he was engaged by Red Cross and Liberty Loan committees to give a series of lectures throughout this country, during which tour he was accredited with the sale of more than $8,000,000 in Liberty Bonds.

Recently one of the members of t "Smiling Army of the Air", a Fren war hero, presented his treasured a hard won Croix de Guerre, which co tains sixteen citations, to Sergeant Wel saying "I wish to decorate the 'Smili Army' for bravery in this great battle life, even as regiments were decorat for bravery on the battlefield." I added, "My friend, you who have t courage to keep smiling in this hard c life, are far braver than I, even in dee of valor on the field of battle."

"Why do I broadcast smiles?" sa Doc. "Because I've seen so much su fering, both on the battlefield and everyday life. Many times I've be in great need of a cheery word or friendly smile. As a stranger, hung and friendless in a big city, those smil were not forthcoming, and many tim I've wandered off by myself, and tried tell myself that 'The easiest way o was the best. Yes, I know the feeling happiness that a bright cheery smile a cheery word of encouragement brin and I want to give freely of mine as walk my path along the highway of li

"Then again, it would seem that du ing that brief lapse of unconsciousne caused by the pains from my ma wounds, that I had stood on the thres hold of eternity, and in that brief spa of time, I had seen many smiling fac —it may have been, of course, the me fancy of a fevered brain—nevertheless. —well, I somehow want to 'hold th picture'—hence my concluding words my broadcast—KEEP SMILING!

"The thing that makes me happiest all, is to broadcast smiles to my budd in the veterans' hospitals—to any, fact, who are ill and to receive th grateful letters of thanks.

"Sometimes I stay up all night answe ing each and every letter personally, my own typewriter. All the letters receive are wonderful, each one a doc ment of great human interest."

Doc has a great number of anonymo contributors to his popular broadca including "The Hill Philosopher", "T Old Eagle"—"The Vagabond Troope "The Little House on the Hill", "Bosc and "Sergeant Bea".

As a Past Department Commander the Disabled American Veterans of t World War, and a Life Honorary Me ber of The Veterans of Foreign Wa of The United States, "Doc" rates hi in Veteran circles on the Pacific Coa

Friend Husband

(*Continued from page 11*)

sters were sent to Graham when he as away one time, and the last thing said before he left was, "Now, dear, hen the oysters come treat 'em right." o for three days and three nights (and vo or three times a night) I gave them esh water, put ice in the tub, and fed em their corn meal. And I didn't lose oyster.

One of Graham's hobbies is sprinkling e pent house porch and flowers. He ed to borrow the neighbor's hose—where ave I heard of that being done before—id have a grand time. So one day I ought him a hose for a present. I think was the next evening that the superinendent of our building telephoned to say: Mrs. McNamee, please ask your maid to e more careful. The people on the street re getting all wet." Well, it happened ie maid was standing near me as I was alking. So I had my suspicions. And was right. There on the roof, twenty oors above Broadway, was Mr. Graham IcNamee very calmly and very deliberately aiming the hose not at the porch, ot at the flowers, but at the sidewalk elow. He explained that it was very ifficult to estimate the rapidity at which eople were walking, to take accurate im, and then considering the velocity of he wind, hit the target.

Before I stop I want to tell you just ne thing more. From the minute Gram comes in the house until he leaves, he Radio is turned on. I might say, one f the five sets we have is turned on. I uess he's just like the mail man who always takes a long walk on his day off.

Broadcastor Oil

(*Continued from page 27*)

where in the vicinity of the point, the hing that is really holding Radio back is he taxicab business. What with traffic nd careless driving, a Radio artist (or a erformer, as in my case) can't get to he studio in time to stage an argument with the production director before going on the air. You see the crux of the situation lies with the taxicab drivers. Ah, my friends, they are the crux! The solution is to have the production director meet the artist (or performer, as in my case) at his or her home so that they can come to the studio in the same taxicab and have the argument finished by the time they enter the studio.

In summing up I might say that it's all very poignant (pronounced pwanyant). Now there's a word. I got it from Ted Jewett, my personal announcer. We use each other's words because we both take about the same size. His are a little broader in the vowels, but I make them do. You have to watch announcers though. They take words from you when you're not looking. I used the word zestful two years ago while speaking of eating noodle soup, and would you believe it they've been using that word ever since to describe Brahms' Hungarian Dances. And the joke is really on them because I really said zestful by mistake. What I meant to say was vest full. When eating noodle soup you have to lean over the plate or you'll get a vest full.

My next program incidentally will be put up in a cellophane wrapper and the opening signature will be more legible to encourage forgery. I shall insist that my sponsors shall have plenty of maps on the walls of the sales department because I have a deep seated passion for sticking bright-colored pins in wall-maps that has never been fully indulged.

My present sponsors have their offices in Chicago and keep all their maps there, and if you've ever tried standing in New York and sticking pins in maps that are located in Chicago you know what a pet one can get into. If my present sponsor and I ever get a divorce, I shall not sign up with any advertiser until after many meetings of the board of directors in conference with representatives of the advertising agency. It's well to have these things understood. And do you know what will happen after all these conferences? The prospective advertiser will conceive the brilliant idea of putting on a new and startling original idea, to wit, a dance orchestra with a singer.

So then I'll look for still another new sponsor.

Jest for Fun

(*Continued from page 51*)

the girls. But I have a system that works pretty well. If you happen to meet someone that you are in doubt about, you tell it a story about a traveling salesman and if you get a slap in the face—you know it's a boy.

"The women of today are just like the men; they drink, smoke, gamble—why I was out with a girl the other night to dinner and when I asked her if she would like some corn—she passed her glass.

"But I know a girl that I'm going to fall in love with—some time after Christmas. She is a wonderful girl—and beautiful too. Miss America. In fact, she looks like several of our moving picture stars. She was taken twice for Greta Garbo and once for grand larceny. And she has those Gloria Swanson eyes and those Clara Bow-legs; she's really lovely. And speaking of eyes, she has one of the most beautiful eyes I have ever seen. I was up to her house the other night and her father threw my hat out the window. I wouldn't have minded so much, only I had it on."

That hat must have been a straw that didn't show which way the wind blows, because Richy Craig, Jr., as Radio's newest wit, is finding his way back to the audience he won in his trouping days. As he would put it himself, he is making his mark, even if it is an easy mark.

Encouraged by $100

"Perhaps you will be interested to learn that I have succeeded in selling a short story to 'War Birds,' aviation magazine, for which I received a check for $100. The story is the first I have attempted. As the story was paid for at higher than the regular rates, I certainly felt encouraged."

DARRELL JORDAN,
Box 277, Friendship, N. Y.

How do *you* KNOW *you can't* WRITE?

Have you ever tried?

Have you ever attempted even the least bit of training, under competent guidance?

Or have you been sitting back, as it is so easy to do, waiting for the day to come some time when you will awaken, all of a sudden, to the discovery, "I *am* a writer"?

If the latter course is the one of your choosing, you probably *never will write.* Lawyers must be law clerks. Doctors must be internes. Engineers must be draftsmen. We all know that, in our times, the egg does come before the chicken.

It is seldom that anyone becomes a writer until he (or she) has been writing for some time. That is why so many authors and writers spring up out of the newspaper business. The day-to-day necessity of writing—of gathering material about which to write—develops their talent, their insight, their background and their confidence as nothing else could.

That is why the Newspaper Institute of America bases its writing instruction on journalism—continuous writing—the training that has produced so many successful authors.

Learn to write by writing

NEWSPAPER Institute training is based on the New York Copy-Desk Method. It starts and keeps you writing in your own home, on your own time. Week by week you receive actual assignments, just as if you were right at work on a great metropolitan daily. Your writing is **individually** corrected and constructively criticized. A group of men with 182 years of newspaper experience behind them are responsible for this instruction. Under such sympathetic guidance, you will find that (instead of vainly trying to copy some one else's writing tricks) you are rapidly developing your own distinctive, self-flavored style—undergoing an experience that has a thrill to it and which at the same time develops in you the power to make your feelings articulate.

Many people who **should** be writing become awe-struck by fabulous stories about millionaire authors and therefore give little thought to the $25, $50 and $100 or more that can often be earned for material that takes little time to write—stories, articles on business, fads, travels, sports, recipes, etc.—things that can easily be turned out in leisure hours, and often on the impulse of the moment.

How you start

We have prepared a unique Writing Aptitude Test. This tells you whether you possess the fundamental qualities necessary to successful writing—acute observation, dramatic instinct, creative imagination, etc. You'll enjoy taking this test. The coupon will bring it, without obligation. Newspaper Institute of America, 1776 Broadway, New York.

The Play's the Thing

(*Continued from page 23*)

that are not built around an idea.

"When I add the next necessity, that a play must have 'Radio adaptability'," Mr. Radcliffe says, "I eliminate most plays at once. The only way to tell whether a drama will or will not be suited to Radio, is experience. It has taken me a year to find out what a Radio play is. The best way I can describe it, is to say, that one thing it must have is concentration in its scenes. It must have a gripping struggle between two people to make good ether material. 'Michael and His Lost Angel', which we did in the Guild, is ideal in this respect. The scene between Michael and the woman he loves never went over so well on the stage, but in Radio it was perfect. 'L'Aiglon' we found not so good; there were too many characters and they were too dispersed."

Mr. Radcliffe adds, that when he says a play must have Radio adaptability, he means that its structure must be so compact that you can shorten it, you can write in scenes, and the play will still be there. The ether director says you must be able to reduce the idea of the play to three or four sentences or it isn't a good Radio play anyway.

Mr. Radcliffe feels that Shakespeare's plays are ideal for Radio. They have all the qualifications,—highly dramatic content, great ideas and issues, proven worth, a well known author and a perfect structure.

A third point of view is expressed by another man, a most attractive young man with an instinct for the theatre, who chooses most of the Radio dramas you hear over the Columbia chain and writes many of them himself. I refer to the gentlemen who has sometimes been called the Ronald Colman of the air—Don Clark, Continuity Chief.

Don tells me that he thinks suspense and situation are more important in our theatre of the air than with its legitimate sister, because on the ether, we have no lights, no costumes, no gestures nor sets to help create the glamour—little else, in fact, but just suspense. And moreover, Mr. Clark believes that the success or failure of a Radio drama depends largely on the reality of its characters. We cannot have artificial characters on the air,—they show up like a bad complexion in the sun. Mr. Clark likes the surprise-ending in a Radio script. He says in this sense O. Henry would have been the ideal Radio dramatist.

Stories about romantic royalty and deposed noblemen are good material for microphonic dramas, according to Don, as are fairy tales and the fields of psychology and mythology. He prefers the half hour period to the hour.

Joe Bell (Joseph, to you!), who is responsible for your favorite Radio play "Sherlock Holmes", tells me that the prime necessity in this field is an author who understands dialogue, who makes it human, intelligent, and of such nature as to make the story progress."

For dramatic contrast, let us present NBC's Continuity Editor, Burke Boyce, who tells me, that "Radio dramas must have a good story. Just smartly written dialogue won't do. We must have conflict", Mr. Boyce says.

The only thing about which all of these men are in perfect agreement is that the scripts that pour in from east and west, not to mention north and south, are on the whole utterly useless.

Now you've heard the views from Olympus, write me what you consider a good Radio drama, won't you?

RMA

ANNOUNCING BUSINESS FOR YOU AT THE FIFTH ANNUAL

BLACKSTONE HOTEL

RMA *Trade Show*

AND 7TH ANNUAL RMA CONVENTION

CHICAGO

JUNE 8 *to* 12 *th*

RADIO MANUFACTURERS ASSOCIATION RMA

EVERYBODY WILL BE THERE

Every branch of the radio industry will be at Chicago during the week of June 8th. This will be the largest gathering and biggest annual event of the industry.

Thirty thousand (30,000) square feet of radio exhibits in Grand Ball Room and Exhibition Hall of Stevens Hotel.

ADMISSION TO THE TRADE ONLY. NO VACANT BOOTHS—ALL EXHIBITORS REQUIRED TO SHOW CURRENT MERCHANDISE. The newest and latest receiving set models and accessories will be displayed and demonstrated at the show and in hotel demonstration rooms, for the trade to see what the manufacturers offer for the coming season.

25,000 radio manufacturers, jobbers and dealers expected to attend.

Reduced railroad rates—special trains.

Official hotels—Stevens Hotel (headquarters), Blackstone, Congress and Auditorium Hotels, all within short walking distance on Michigan Avenue.

INDUSTRIES AND EXHIBITIONS

Radio industries, June 8-12—RMA, National Federation of Radio Associations and Radio Wholesalers Association.

Music Industry Convention and Show—June 15-17.

Institute of Radio Engineers Annual Convention—June 3-6.

Annual national "Furniture Mart" with 25,000 furniture buyers, jobbers, dealers and manufacturers—June 1-15.

•

Entertainment galore for visitors—Make a trip to Chicago for business and vacation combined.

Apply now direct to hotels for room reservations.

Invitation credentials for the trade show will be mailed to the trade about May 1st.

RADIO
made easy to learn
AT HOME

RADIO is a fascinating profession. Now you can become an expert in any one of its twenty different branches. Simply by studying in your spare time at home or at any of the four resident schools operated by RCA Institutes, Inc.

It is not hard to study radio the way it's taught by RCA Institutes. You learn radio by actual experience on the latest type of radio equipment. And you need not give up the position you now hold. You can study an hour a day or any number of hours a day, at home in your spare time.

The RCA Institutes' Home Laboratory Training Course teaches you in a most thorough manner. You learn about servicing, operating, radio telephony and telegraphy... also instruction in sound motion picture installation, maintenance and repairs. And you receive at no additional cost the complete RCA Institutes' home laboratory equipment, a modern outlay of apparatus furnished to every student, enabling you to easily solve radio problems.

Send for our FREE BOOK Today!

Caught in the Act

(*Continued from page 30*)

by Commissioner Roche himself, who always plays his own rôle. He's quite an actor, for in his youth the commissioner played juvenile parts in Broadway shows, and many years in police fields have not dimmed his histrionic talents.

Commissioner Roche explained the purpose of these broadcasts and the nightly police reports to our correspondents.

"Many mothers have called to thank us for broadcasting information that has opened their eyes to a dangerous thing their children have been doing. We have located stolen cars, missing persons, reunited relatives who have been separated for years."

Automobile accident prevention is another side of the Buffalo broadcasts. Police announcers will occasionally intersperse their remarks with rhymes:

"Grandpa in a speedy car,
Pushed the throttle down too far
Twinkle, twinkle little star
Music by the G.A.R."
"He thought his car would never skid
He left behind a wife and kid."

Many "missing" persons have been found through broadcasting. Even mules have been recovered through Radio broadcasting! In the little township of State Hill, near Harrisburg, Pa., George Miller sought his two mules, Jimmie and Jennie, gone astray.

He broadcast his forgiveness to the erring ones and begged them to return home through "The Voice of Pennsylvania," WBAK, the state police station at Harrisburg. Sure enough, Jennie and Jimmie heard the summons and returned (or perhaps some farmer found two strange mules hanging around his feed bins and sent them home).

Of course, such cases are docketed as minor ones on the records of the Pennsylvania State Police, with their five stations on the air. Michigan, too is another progressive state which utilizes Radio to keep its state police cruisers in touch with every criminal incident in the remotest rural districts.

At the East Lansing, Mich., barracks, broadcasts are made to eighty receivers in sheriffs' offices, municipal police departments, state police detachments and the cruising Radio cars as well. Where it formerly took a telephone operator two hours to call all the offices and make reports, instantaneous information is now broadcast.

What a deterrent it would prove to desperate criminals if the other forty-six states would follow Pennsylvania and Michigan's splendid example! In the meantime, not waiting for state action, city officials and bands of business men are meeting every day to curb crime, and deciding to employ Radio to keep their urban precincts free.

In New York at the moment, a general shake-up and clean-up process is being gone through in police and other departments. But perhaps when refor are made, consideration will be given the efficient method of tracking crimi by Radio cruisers. Meanwhile, Inspe Donovan, the department's spokesma the press, states, "The good old-fashio patrol box system is still in force and we feel it is better than the Ra system, which we have tried out. We have a police broadcasting station, it is used only for broadcasting orders harbor patrol and fire boats."

Pioneer in the field west of Chicago been the small city of Tulare, Califor with but 7,000 population. Since cember 1929 its police department been on the air, under the supervis of Chief of Police John R. MacDon This small city has two Radio cruisers duty each night, and since their incepti only one burglary of major importa has been committed in Tulare. This spite the almost daily reports of b holdups, burglaries, and safe-blowi coming from surrounding valley to

SO REPORTS from all c the country show what the Radio po systems are doing to prevent crime capture criminals. And a glimpse i the crystal ball of the future envisi the further extension of Radio pat to air police cruisers. The West Electric Company has perfected a ceiver for airplanes, and in a test dem stration in New York City air pa planes showed the feasibility of method of patrol.

Looking ahead, we can imagine a c blooded murder in a remote section the country, miles from any cruising A receiver off the hook will warn telephone operator of some mishap a quick call to police Radio headquar is made and the operator tells her picion. "Airplane Cruiser No. 8, w for suspicious fleeing cars on lo country roads!" is the broadcast.

The aviator-policeman arrives in vicinity in a few moments, sees a burning up the road, and by telepho Radio tells headquarters. Headquar answers, "Follow car and report prog We are dispatching Radio cruisers intercepting road." In the meantime unsuspicious of its aerial watcher, crime car speeds on . . . to be caught a combination of auto and airplane tr ing. A vision of the future, perhaps, it is feasible, and who knows, we may it not too many years hence.

FALSE TEETH ARE A GREAT INVENTION *BUT*
KEEP YOUR OWN AS LONG AS YOU CAN

Humanity has good reason to fear *pyorrhea*

MANY people are self-conscious and uncomfortable today with false teeth who might have been spared the loss of their own.

Pyorrhea, which comes to four people out of every five who pass the age of forty, can rob you of your teeth and break down your very health if permitted to go unchecked. The first symptoms are tender gums that bleed easily when brushed. As it progresses, it makes gums soft and spongy until teeth often loosen in their sockets and either fall out or must be extracted.

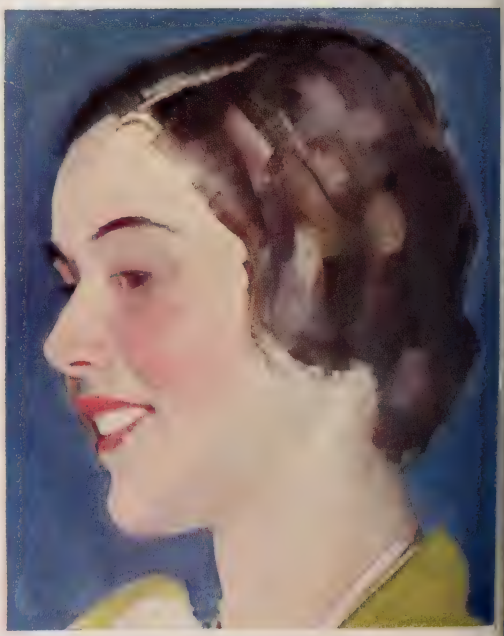
But don't wait for these symptoms. Many people have the beginnings of pyorrhea in their mouths for ten years before outward signs appear. To be safe, see your dentist at least twice a year and brush your teeth twice daily with Forhan's.

The formula of a pyorrhea specialist

In your own home your teeth are your own responsibility. It is up to you to give them the finest care possible.

Forhan's was created by R. J. Forhan, D.D.S., who for 26 years specialized in the treatment of pyorrhea.

It is unique in that it contains the benefits of an ethical preparation developed by Dr. Forhan, which thousands of dentists use in the treatment of pyorrhea.



Don't gamble with pyorrhea

Start using Forhan's today. You can make no finer investment in the health of your mouth and the safety of your teeth.

False teeth are a great invention, but keep your own as long as you can. Forhan Company, Inc., New York; Forhan's Ltd., Montreal.

NOW ON THE AIR!

New Forhan program—featuring Evangeline Adams, world-famous astrologer—every Monday and Wednesday at 7:30 P.M. Eastern Daylight Saving Time—Columbia network.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

False teeth often follow pyorrhea, which comes to four people out of five past the age of 40

FOLLOW MY STARS OF YOUTH TO A ★ ★ Clearer, softer skin

Frances Ingram herself tells how to keep the skin lovely at its 6 vital places

"YOU are just as young and attractive, or just as old, as your skin looks," I told a charming woman who recently came to consult me. "Keep your skin immaculately clean... Keep it youthful at my six stars... And *you* are youthfully lovely."

Then I explained to her my method with Milkweed Cream.

"To cleanse the skin, spread my Milkweed Cream generously over your face and neck. Let it remain for several minutes, to allow the delicate oils to penetrate deeply into the pores, and then remove every vestige of it with soft linen.

"Now—apply a fresh film of the Milkweed Cream. With outward and upward strokes pat it into the skin at the six points starred on my mannequin.

"There are special *toning* ingredients in this Milkweed Cream. These penetrate the cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

* * *

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

* * *

I have recommended my Milkweed Cream and my method to so many women, and I have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to a clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES — *If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

MICROPHONE SNAPSHOTS FROM WESTINGHOUSE RADIO STATIONS

PUTTING THE ROMANCE OF INDUSTRY ON THE AIR

The romance of America is the romance of industry. Under industrial guidance science conquers time and space . . . cities rise overnight . . . great business groups work miracles in manufacture, research, transportation and civic development.

In Westinghouse Salutes these threads of modern magic are woven into the fabric of a novel series of radio programs. Every Sunday evening, 9:45 P.M. Eastern Daylight Saving Time, countless radio fans from coast to coast listen to these broadcasts.

The Westinghouse Electric & Manufacturing Company, in paying tribute to forward steps taken by industry and culture, combines educational features with entertainment. The story is dramatic, interesting. The music captures the spirit of its objective. The entire program, radio fans will tell you, is typical of those broadcast from Westinghouse Radio Stations. The forty-piece symphony orchestra is characteristic of the musical talent popular not only in America, but also, through shortwave Station W-8-XK, around the world. Since the opening of Westinghouse Station KDKA, pioneer broadcasting station of the world, the reputation of programs from Westinghouse Radio Stations has made them favorite points on the dials of countless sets.

Advertisers have found the reputation established by Westinghouse Radio Stations an invaluable aid in gaining response

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

LADIES and gentlemen of the Radio audience, the meeting will now come to order. The chair recognizes Mr. I. I. Ego, the ancient sage and philosopher who has tucked his long gray beard beneath his vest and is now anxious to address you. Mr. Ego.

"I arise, Mr. Chairman, to make a nomination. But first let me explain. We have heard through the air and by the public prints that certain well known broadcasters are considering whether or not they will be forced into the publishing business. Well, and what's to hinder? Why not, instead of going into paper and ink, publish a great magazine of the air by broadcast? Issue 180 pages, each page a minute long, each second an agate line, during the period from 8 to 11 p. m. Organize this great book into fact articles, fiction, art, editorial, columns, humor, cartoons, comic strips. Design a well balanced format and follow that structure through every night. Dramatize all the prose. Let music serve for illustrative art. Advertising would be placed with "space" rated by minutes, or seconds. The advertiser would not have to worry about talent—that would be the editor's job. But he could negotiate for 'preferred position'. The listener would set his dial at 8 o'clock and be sure of a well diversified program from 'cover to cover'. He would avoid tiresome repetitions of the same tunes and disorderly or incongruous advertising. It would all be arranged by a master mind editor. And I arise, Mr. Chairman, to nominate Mr. Floyd Gibbons as editor-in-chief of this great magazine of the air."

You have heard the nomination of Mr. Gibbons as editor-in-chief of the proposed magazine of the air. Do I hear a second to the nomination?

Listeners who are interested in Father Ego's proposal may write to the editor, either seconding the nomination of Mr. Gibbons the highpowered headline hunter; or offering other nominations.

* * *

THE next point of business at this meeting concerns your health. Are you one of the 4,000,000 members of the Tower Health League? Or do you take your *getting*-up exercises from some other tower of strength? It would be interesting if our committee on vital statistics could tell us just how many thousands of citizens are alive and active today because of their morning exercises through Radio direction. Who can tell just how effective that extra ounce of strength may have been in throwing off a cold or infection that might have resulted fatally? The Metropolitan Life Insurance is back of the Tower of Health League. While you live, if you are insured there, you pay them. When you die they do the paying. It's good business for them to keep you alive and well. And that's quite satisfactory to you of course. They have put this matter of keeping you fit in the hands of Mr. Arthur E. Bagley who is physical director to the 4,000,000 members of the Tower of Health League. He has been putting them through their paces for six years now. And it's a real story. You will see it in July RADIO DIGEST.

* * *

WHICH reminds us at this point we had expected to have a most interesting article in this issue by Merlin H. Aylesworth. As some of the original conditions mentioned in the article were changed since it was finished it had to go back for his revision. We hope to have it back in time for you to read in your July issue.

* * *

IT'S all so blamed intangible, boys. First you think it's one thing and then it's something else that makes you feel that way about Her. When it's love why it's awful, of course. But it isn't always necessarily love. How are you going to define it? There she is and you don't know whether to worship like an abandoned idiot or kick yourself down stairs. Her eyes? Her hair? Her exquisite symmetry? Her manner? Her voice, or the magic of Her smile? Don't believe even Old Man Ego could tell you what it is. But She has a word for it. And that word is CHARM. No mere man could possibly get very far with the question "What is the secret of Charm?" But give the assignment to our Miss Lillian Genn and she will go right to the most charming women in the world and talk to them in the language they all understand. So we are going to discover what she found out about the *Secret of Charm* from personal interviews with Miss Grace Moore, Miss Irene Bordoni, Miss Mary Pickford and Miss Ruth St. Denis. It's promised for your July RADIO DIGEST.

* * *

PETER DIXON, who knows all about Radio writing, has written a book called *Radio Writing*. It seems to be the first book of the kind in the field. Book reviewers have given it the highest praise. Writers, ambitious to understand the technique of writing for Radio production, will find Mr. Dixon's *Radio Writing* invaluable . . . Raymond Warren, author of the *Prairie President* has completed a sequel to the first series which will be published in book form. This life story of Abraham Lincoln heard over WLS, Chicago, is said to be one of the most popular dramatic historical subjects ever presented by an independent station . . . We are in receipt of an autographed copy of *Bread and Love* by Betty Ross who has had many exciting adventures abroad. She has been heard on various networks . . . Our own Peggy Hull is just finishing a book of her adventures. She has been correspondent in nine wars since the Pancho Villa disturbance in Mexico. Just now she is all excited about reporting the "air attack" on New York for NBC. She has been assigned to the top of the Empire State building for observation.

"it's NEW radio . . . new, vivid, absorbing as TIME itself!"

The news of the week *dramatized* on the air! The whole radio nation is wiring, writing, telephoning applause to TIME for its new weekly radio program—

"The March of Time"

TIME has once again upset tradition—invented NEW radio—a new kind of reporting of the news—*on the air*—the re-enacting as clearly and dramatically as radio will permit, of memorable scenes from the news of the week. Henceforth, for a half-hour every Friday evening, these thrilling scenes will live again in your living-room—more dramatic than fiction, because compounded of vivid reality and the history-making drive of destiny. It is the living story of your lifetime. Tune in! THE MARCH OF TIME. Each Friday evening pick up your nearest of the 24 Columbia stations—join the MARCH OF TIME.

Don't miss THE MARCH OF TIME—EACH FRIDAY—10:30 P. M. E. D. S. T.—THE COLUMBIA NETWORK

Columbia Star Meets the Breaks, Good and Bad, with a Stout Heart and Surges Forward from Obscurity to Popularity, Fame and Fortune

By

GRENVILLE RICHARDS

'UST an ingenuous kid!

There—in the fewest possible words—is he of the silvery larynx, Morton Downey.

s if there were not enough color and ety and drama packed into his mere nty-nine years already, Radio comes ıg when by all signs his value as an ertainer in this country is completely shed up" and lifts him high to the iest peaks of popularity.

)id I say ingenuous?

'hat little word covers a multitude of , traits and varied qualities, and ıns far more than mere artlessness. instance, I am rather sure that some- ere you will find that it is a synonym not only a rough diamond but), according to our French cousins oss the seas, an *enfant terrible.* Or, get downright and poetically high- —*Davus sum non Oedipus; liberavi mam meam;* or again "as frank as ı on cherry blossoms." Now ain' 'at nepin'?

That is Morton all right, but when he s really going he is to me more remi- cent of the frankness of a fire hose ying with a field full of daisies.

There is one thing he has never learned, d here is one of his friends who hopes never does; and that is to say a thing ıer than that which he really thinks. other words, if he has anything to say will say it, let the quips fall where they ıy. Be the recipient of the moment a ıshing maid, she may still blush, but cing full account of the possibility that auty and brains are not compatible, she ll still, methinks, though still blushing, mble to the fact that it is refreshing ınkness and not freshness.

From other angles the lad is a para- x. All too often the man who makes ends very easily loses them with an equal or greater facility and rapidity. Not so Morton—for although he makes many friends—just like that—he keeps them year in and year out, and they grow closer and dearer with each cycle of the seasons.

Take your humble scribe, for instance. Two paragraphs ago I referred to him as being a friend of Downey's. He is—or rather—I am! Yet I never laid eyes on the man until one day not so long ago when I ambled up to his apartment, way, way over East on 86th street.

Down at the door two things struck the observing eye with a wallop. Parked at the curb was a shiny black phaeton (touring car to you), a Chrysler Eight of decidedly modernistic trend, which fitted the description passed on of what Downey's pet plaything looked like.

Second was a neat sign at the door informing one and all that Vincent Astor was still in the business of building and renting doggy apartment houses.

Inside the lobby it was borne in upon the alert faculties that Vincent had either transferred all the manservants from the defunct Fifth Avenue manse to this project or had hired an army corps of generals and aides de camp.

NOW it has been this fellow's experience that, as a rule, so the surroundings so the man.

While being shot up in an elevator after having passed muster and run the gauntlet below decks, I endured a mental panorama of just another singer who would talk of his "art" and his "public" with a dreamy, faraway look in blue eyes —who would be surrounded with funny furniture and things—divans that turned unexpected corners—chairs that might take a head lock on an imprudent sitter, and bookcases that climbed up and down and then lost themselves in an indeterminate curve—to say nothing of rugs bearing huge and impossible flowers that might well be the product of an exotic dream of a Ben Hecht.

What actually happened was a cordial greeting by a slender and wholly charming lady. Meet Mrs. Downey, née Barbara Bennett, a daughter of the inimitable and unexpected Richard Bennett. There was advice to throw coat and hat on a convenient and antique settle and to come in and make myself at home.

THAT was easy, for it was a particularly homey sort of a place. This feeling of ease and comfort was magnified a moment later when Downey hove into view from some unidentified region in the rear of the apartment, a Downey wholly at his ease and who immediately clicked in my mental classification as a regular fellow.

Quite at his ease was right —in rumpled hair, shirt-sleeves and house slippers. He had not even bothered to don a coat on my impending arrival, thanks be to all the gods of the ancient Romans and Greeks. After chatting for awhile we repaired at his suggestion to those regions from which he had first appeared and which proved to be his holy of holies, his sanctuary from a laudatory and hero-worshiping world.

Here we got down seriously

Luxury, wealth, grandeur are reflected in the magnificent appointments of the Delmonico, Morton Downey's famous Park Avenue night club.

to the business of getting really acquainted. Here I could see and study—and enjoy—the man as he really was.

It is not amiss here, perhaps, to make note of the fact that this visit was made on the afternoon of the first day that he had been out for two weeks after a severe attack of laryngitis. That is what the papers called it—his physician spoke awesomely of a streptococcus throat.

Nor is it out of place to say that right off the bat, so to speak, Downey made it clear just why he was living where he was, behind the protective phalanxes of the Astor organization. So far as became discernable his one and only reason for picking out the apartment house he did was that it was situated out on a bend of the East River—water on three sides as it were—with all the attendant breezes and other emoluments of such a situation, no doubt including the musical voices and personalities of various and sundry towboats and this and that of a city river's life.

THE man intrigued me—he was a distinct surprise—and wholly refreshing in view of what, from prior and similar experiences with subjects of my study I had every right and reason to expect. I called intending to stay perhaps half an hour and stayed more than two. As our friendship ripened I was in for more surprises.

But enough of that for now.

Let us get down to brass tacks—in other words, to a consideration of the background, the life of this greatly intriguing fellow.

From his very earliest days Downey's life has been one of breaks both good and bad, of chance and mischance. Often it was mischance and the breaks went against him. Sometimes the fickle goddess smiled and he got the breaks.

To be wholly conventional it would be fitting and proper here to state at the very outset that Morton was born of poor but honest parents who were resident in Brooklyn, N. Y.

And so he was, but not in Brooklyn. Never did find out what part of Brooklyn they lived in—Flatbush or Red Hook or where—but that really does not make any difference as things turned out.

His parents hied themselves off one day to Wallingford, Connecticut, for a visit with relatives. They stayed longer than they had at first intended, and when they did come back to Brooklyn they brought Morton with them.

From then on for the next few y his life was that of the average yo ster in the early years of this centur not too bad and not too good— healthy and happy most of the ti Even then his voice was marked, tho not so noticeable in a youngster, by peculiar and insistently high range thin sort of clarity which spelled not but purity of tone.

WELL—he has been u that voice to sing with ever since—sin most of the time. More than once it got him into no little trouble. Late brought him moderate fame and finan independence. Then for a time it see to let him down—though more prob this was due to a fickle public which Morton pine in obscurity while ot forms of entertainment became the r

More recently—very much so in fa Downey "came back". Radio did Did I say Radio alone? No—with was coupled an unfaltering faith in own ability to put himself over an confidence bolstered by marked succe abroad.

Be that as it may, here is Mor Downey, riding the crest of a wave popularity with all that he undertal and which, unless I know nothing wh of I speak, will continue to carry l high, wide and handsome for at l two years.

All that, however, is way ahead of st story. So back to the good old sch days when the lad known as Mort str gled through readin', 'ritin' and 'rithma

HERE gather Elite of New York Society for Sparkling Evenings of Romance and Pleasure—Morton sings them his own songs. His musicians are the best

re than once he was kept after school write fifty times on the blackboard—must not sing in class"—even though singing had been but a whisper.

long about the time of high school rton got the idea in his head that he uld be of far greater value to the family vork than at school. He summoned all arguments that a youthful mind can jure to its aid and finally had his way ut it.

after casting about at this and that he lly settled upon the precarious and bile existence of a train "butcher"—ugh whether he hawked his wares in se, poetry or song, history does not e nor can Morton be so persuaded.

He was assigned to an express train ning from New York to Springfield, ssachusetts, at which point he had but ut five minutes to get to the other end the train yard and aboard the other ress, New York bound, which he orked" coming back. It was often a se call, particularly if his incoming in was at all late.

Morton developed the trick of sliding of the baggage car door as the train ered the Springfield station, pulling his nk of wares after him, and running as he devil were in pursuit to the other of the station with his trunk on a id truck.

All went well for a time despite a sta- master with a perpetual grouch inst train butchers who looked on the ly foot race with no kindly eye.

Come the day, however, when the in pulled into Springfield at a goodly . Morton got out safely but the trunk got completely out of hand, sailed through the air, and landed with nearly the force of a coast defense shell square into a truck piled high with crates and crates of—eggs.

Compared to the net result all of Mack Sennett's custard pie classics pale to mediocrity. The truck, the trunk, the station platform—and Morton—were a swimming, gleaming, gluey sea of yellow and white.

With the passing years that dimmed the awful tragedy of the moment and left the comedy predominant, Downey has figured out that there were at least 15,000 eggs on that truck and that barring perhaps a dozen or so they were all very thoroughly broken—one might almost say scrambled.

IT WAS a moment for quick thinking and quicker action. The kid wiped his eyes clear, got a strangle-hold on the trunk, and set out for his train—figuring—and rightly, that in this particular instance discretion, and flight, was the better part of valor.

He did escape capture by the station master, but not that worthy's eagle eye. He was doomed—convicted and sentenced without trial—and it was many a long day before he dared set foot in that station again.

This was where some of the early breaks went against him, for about this time the youngster began to have thoughts of using his voice for something other than a means of letting off surplus energy and pent up feelings.

Thus it was that one early summer day when life seemed gay and bright and full—and birds and trees and brooks and beaches sent out their siren calls to a myriad of pleasure seekers—and the day coaches were intolerably hot and stuffy and crowded—that Morton heard the call as well.

The call of the great outdoors seemed far more alluring than that of "Cig'rs—cig-rettes—cendy—choongum" up and down the swaying, dirty, smelly aisles. Trouble was that Morton failed to comprehend that his boss might also feel the urge to take the day off.

Even so, how was he to know that the boss, who could hand himself a day off while mere "butchers" could not, would pick out the same amusement park which Downey had chosen as the scene of his straying?

Moreover, Morton had real reason for his choice and the boss had little. It was obviously unfair. Morton had learned

Lily Pons in the title rôle of "Mignon"

Lily Pons *Unspoiled Child of Fame*

Glory shines on obscure French Girl who becomes American Operatic and Radio Star

•

By Lillian G. Genn

A BREATHLESS air of expectancy hung over the Metropolitan Opera House on January 3rd when its heavy gold curtains parted. A new and youthful coloratura soprano was to appear in the title rôle of *Lucia di Lammermoor*, and it was said that at the dress rehearsal she had moved Gigli, the great tenor, by her singing. Naturally everyone was eager to know whether this could be merely a rumor.

Soon a slender, petite girl appeared. Her voice rose above the orchestra limpidly clear and beautiful, like that of a bell. Higher and higher it soared, until one had the feeling of being wafted upward by its spiritual-like tones. After the difficult "Mad Scene", which she sang in a higher key than had long been heard of, the young singer was greeted with tumultuous applause. Cries of "brava" were heard from every part of the house and she was recalled before the curtain more than thirty times.

The new star that had appeared in the musical firmament was, as music lovers now know, Lily Pons. At twenty-six she is a full fledged operatic singer. She has won the hearts of her audiences not only with her voice, but with her simple, unassuming manner and her charm.

There has been considerable speculation as to the history of her career. All kinds of stories have circulated, the chief one being that she had been a poor French girl who had been discovered in an obscure opera house.

Romantic as this tale is, it is completely overshadowed by the amazingly true one. Amazing because until five years ago, Lily Pons had never sung and had never dreamed of operatic heights. Her rise was a meteoric one, singularly devoid of the weary struggles and the heart-breaking disappointments that usually beset the path of an artist.

The story was told to the writer by Lily Pons and her Dutch husband, August Mesritz, when they were visited at their hotel apartment in New York. The young prima donna was resting on a sofa prior to leaving for a concert tour. She is small and almost fragile looking, with large, sparkling eyes, and quick birdlike movements. While she understands English, she does not speak it. Her husband, though, is an able interpreter, since he has a perfect command of the language. He is a mature, cultured man, with a manner as friendly and as simple as his wife's.

LILY PONS quaintly apologized for not being able to converse in English. Her days, she explained, have been busy ones since her début. Rehearsals, practicing, shopping, singing at the opera and concerts, making victrola records, giving interviews, sitting for photographers, receiving distinguished visitors and getting in a proper amount of rest, completely take up her time. But, she promised, she would take a teacher in South America, where she was going for a few operatic performances, and when she returns here next season, she would be able to speak to her many new American friends in their language.

Lily was born in Cannes, the famous French resort on the Riviera. While there was no indication, when she was a child, that she would be a singer, yet she showed a talent for the piano and for the stage which augured an artistic career for her. Her parents were well-to-do French people, with a sincere interest in music and they were only too willing to cultivate their daughter's taste in that direction.

Lily had two younger sisters and it was her greatest delight to play ma[ny] believe with them. In school and church she never missed an opportun[ity] to take part in plays. Even when [she] went to study at the Paris Conservat[ory] of Music, she continued to be interes[ted] in amateur theatricals.

She graduated from the Conservat[ory] at sixteen and decided to make piano [her] career. But she fell ill and the do[ctor] advised her not to return to her m[usic] studies for two years. Lily was too [ac]tive a person to remain idle for so l[ong] a period. She wanted to occupy her[self] with something. It happened tha[t a] friend of the family was the manage[r of] a theatre in Paris and since he had [a] Lily act, he offered her a place in [the] company. She remained there for [two] years playing ingenue rôles.

YET much as she l[oved] the theatre, she was drawn back t[o the] study of music. It seemed to giv[e her] more satisfaction than acting. She [then] turned to Cannes with the intention [of] resuming her piano work. But that [was] the summer when August Mesritz, [a] Dutchman and resident of Paris, c[ame] to Cannes for his health. He was a l[aw]yer, economist, writer and publisher [of] a newspaper. He had traveled to alm[ost] every part of the world and spoke [se]veral languages.

One evening his physician invited [him] to have dinner with some of his fri[ends]. Mr. Mesritz went with him to the h[ome]

LILY PONS, the young unknown whose thrilling voice roused lethargic New York critics to huzzahs in print. She remains simple and unaffected through showers of praise.

of the Pons family and there met Lily, who had just returned from Paris. He was at once enamored with this charming and talented young girl who shared his enthusiasm for art. A few months later they were married in Cannes. Little did Lily dream that the hand of Destiny was in that match, guiding her to the path of fame.

THE couple had a comfortable home and servants, and Lily spent much of her time shopping for pretty clothes. She had given up all thought of a musical career, but she continued to play the piano for pleasure.

One day, when she had been married about a year, Lily sang a few songs. Mr. Mesritz, who had been a music critic for his paper and who had heard many famous voices, was at once struck by the beautiful quality of his wife's voice.

"You have a lovely voice," he said. "You ought to study."

Lily was surprised at the suggestion. But managing the house took so little of her time and she was so bored with shopping, that she thought it would be nice to have another avocation. Her husband took her to a well-known teacher and when he heard her sing, he said: "Avocation? No, no. It must be your very life's vocation."

Signor Gatti-Casazza, whose praise is sparing, was enthusiastic over Lily Pons

Under this teacher's instruction her voice developed marvelously. She then went to Alberti, in Paris, who is considered the greatest voice teacher in the world. After she had been studying for two years, she made her opera debut in *Lakme,* in a French opera house. Her musical education, her theatrical training, and her exceptional musical taste, combined with her unusual voice, at once made her a unique and outstanding artist. She sang in noted houses in France and in Belgium and in private audiences before royalty. Many impresarios offered her contracts to sing in various parts of Europe and South America. But Lily had her eyes on the Metropolitan Opera House in New York—that gleaming goal of singers from every corner of the world.

Last year Alberti, her teacher, had some artists from the Metropolitan Opera Company at his studio. He told them of his gifted pupil and they asked to hear her. After her recital, they cabled to Gatti-Casazza, the impresario of the Metropolitan Opera Company, and urged an audition for this young girl. Since the retirement of Galli-Curci and Marion Talley from the opera, Gatti had been eager to find another coloratura soprano and he was therefore glad to invite Lily Pons to come for an audition.

Mr. Mesritz was unable to leave Paris at the time. So, alone, Lily boarded a steamer for America. She was very seasick and frightened all the way over and when she arrived here it took her two weeks to recover.

Finally she was ready for the audition. Gatti saw before him a small, slender girl, very pale and nervous. It was difficult to believe that she had been called "The Nightingale of the Riviera". But as soon as she began to sing, her qualms dropped from her and she was in complete control of herself. She sang the arias "Caro Nome," from *Rigoletto,* the "Mad Scene" from *Lucia di Lammermoor,* and the "Bell Song" from *Lakme.*

There were about twenty people gathered in the dim auditorium of the Metropolitan, including several conductors, and singers and Gatti-Casazza. When she finished, there was silence in the vast house. Then:

"ARE you too tired to sing again?" asked Gatti.

"Not at all," Lily replied.

Gatti went to the telephone and called Otto Kahn, financier and head of the Metropolitan Opera Company, requesting that he come at once. When he arrived there, Lily sang her arias again.

Otto Kahn turned to Gatti and said: "Don't let her get away from us."

When Lily returned to Paris she had three contracts with her. One was for five years with the Metropolitan, the second for concert engagements, and the third for making victrola records. The next few months were busy ones for the young singer. She knew the operas in French and now had to learn them in Italian. She had never seen *Lucia di Lammermoor,* the opera in which she was to make her debut, and she had to create her own interpretation of the rôle. That it was an artistic and intelligent one, was proved the momentous day of her debut.

"Lily has a great sense of responsibility toward her work," said Mr. Mesritz. "When she returned from her debut, she took the score of *Lucia* to see whether she had done as well as she could."

"Success," put in the young prima donna, "is a one-night butterfly. You have to capture it every night again."

"Yes," agreed her husband. "L wants to give the best of herself. T American public is very appreciative fine music and it is a stimulus for h to work hard to improve herself. S gives up everything which may in a way hinder her progress in her art."

While the singer won success quick yet it has by no means been easy. S puts in long hours of hard work, a when she is not rehearsing or practisi she is reading books on literature, h tory, art or music. She goes frequen to the Museum of Art to study the pai ings and to get ideas for her costum She designs them herself and the crit have said that they are "masterpieces good taste".

Lily is fortunate in that she has m ried a man who shares her interests a who has been an encouraging influen in the development of her career. Art their great love and bond. Indeed, c would have to seek far to find a m congenial and devoted couple.

Mr. Mesritz looks after his wife's creasing business affairs so that she give her entire thought to her music. also helps her to overcome those ner wracking, tense periods that she fa before every performance and wh usually make her ill. Once on the sta though, the response of the audien helps her to forget her fears.

It is because she misses the perso touch of the audience that singing o the Radio terrifies her. The "mike" ne gives her a chance to lose herself in singing. It is a cold, indifferent strang Her fear of it, however, proved to be her advantage. For at the time of audition with the Metropolitan, she h another one at a broadcasting stat and she was offered but a small contra She refused it because she felt she co not sing over the Radio. Now the stat has paid her many times that amount her Radio recital. She has appeared on Simmons and the R. C. A.-Victor p grams.

LILY PONS has alre sung in many cities of the country, that she has had a good opportunity see something of American life. She lo it here and hopes next season to estab a home of her own in New York.

Her phenomenal success has changed her. She is a genuine, frank p son, and her husband confided, with twinkle in his eyes, that "her hats fit".

With the pride of a little girl, singer brought out a present which been sent to her by an unknown admi The card was inscribed, "To a sec Melba." On the fan was the signature the great diva, Nellie Melba. May it be significant that at a time when one the most famous songbirds of the passed away, her fan should be given Lily Pons?

The Prodigy who Grew Up

Toscha Seidel is one Child Genius who Fulfilled the Promise of Early Years—Columbia's Musical Director and "First Violin"

By David Ewen

LITTLE boy in sailor-suit, led by the hand by his mother, approached the great Leopold Auer at the Conservatory of Music at rad. A violin-case, slung under his old what his mission was; and ing about those brilliant eyes, that intelligent face, seemed to con- ully reassure that this mission could unrealized. Would Dr. Leopold it was the mother speaking, in g accents—give her little boy an n? Leopold Auer beckoned to to come to him, and placed him is lap.

at is your name, my boy?" d Auer asked kindly, as he affec- ly stroked the curly head.

boy lifted his small pug-nose, and with his two bright blue eyes at at teacher.

name is Toscha—Toscha Seidel.

w old are you?"

m ten years old, sir!"

w long have you been playing the "

ha looked at the master with e brightening his eyes; it was as this were a most absurd ques- "Why, sir, I've been playing all e, sir!"

what can you play?"

again Toscha was to be sur- by the absurdity of the question. sir, I can play everything!"

y well," Leopold Auer said lowering the boy, "we shall hear e shall hear. Will you play some- or me, my boy?"

e was no nervousness or fear as opened his violin-case, tuned his and then placed it under his chin ing but a cool confidence and a ing faith in himself. He lifted his the strings. He was playing the bars of the Brahms *D Major to!* Now his fingers flew across erboard with impeccable precision. where did this lad procure such a ng technique which magically in- those tender fingers? From where procure that tone of silk—thin, silk? From where did he pro- maturity, a depth, an intelligence trating the profundities of so great cal work? As Leopold Auer sat there, his head in his hands, tears in his eyes, he realized that the answer to such questions was far beyond human powers.

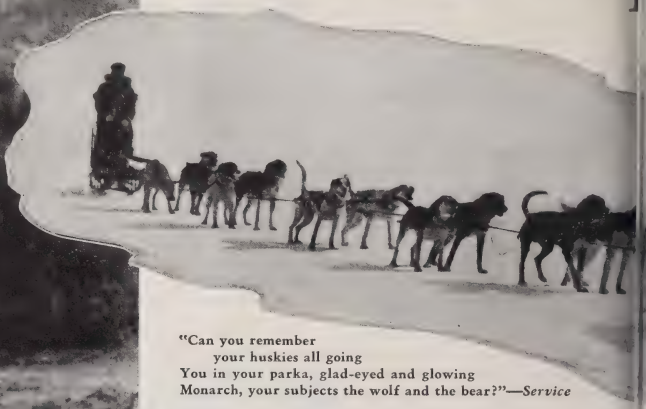
"You are a genius, my boy," was all he said when the boy had finished his playing. "and I am proud and happy to be your teacher!"

From where had this boy come? He was born in Odessa, Russia. His mother,

Toscha Seidel and his violin

a school-teacher, and his father, a business man, realized almost immediately what Fate had entrusted into their hands. For the boy was born with a fiddle in his hand. At the age of two, the child delighted in plucking the strings of his uncle's violin, and piecing together little melodies; the following year, his first teacher, Max Fiedelman, began to give him his first regular instruction. But the boy seemed to learn his music instinctively. Both under Max Fiedelman and, shortly afterwards, at the Stern Conservatory of Music he learned with a rapidity and ease which terrified his teachers. They realized that there was only one teacher in Russia who could do justice to such a genius—the great Leopold Auer, foremost violin-teacher of the age. And the great Leopold Auer had welcomed him with wide open arms!

Under Leopold Auer, Toscha matured. Native talent he already had; the entire violin repertoire was already well under the grasp of his chubby fingers. What he needed now was the gloss which Auer put upon all of his prodigies—that, and the maturity that comes only with years. When Toscha was fifteen years old, he was the full-fledged virtuoso. Auer passed favorably upon him and said he was prepared to concertize. And so, in his fifteenth year, Toscha began his first tour of Europe—and a tour of triumph it turned out to be! Finally, he reached Christiania, Norway, where his overwhelming success became converted into a rousing triumph. Each of his concerts was sold out far in advance. "Tosca"—for so his audiences called him—was the idol of the hour. The story goes that two gentlemen in evening dress met, one evening. "Are you going to hear the 'Tosca' of Puccini?" asked one of the other. "Oh no!" the other answered, "I'd much rather hear the 'Tosca' of Seidel!"



Simultaneous with Seidel's triumph in Christiania was the equally rousing success of another wizard of the fiddle, also a pupil of Auer—by name, Jascha Heifetz. All of musical Norway was now divided into two parts: there were those who still stoutly maintained that Seidel was God's greatest genius, and there were those who, at least, were skeptical after hearing Heifetz. The Queen herself was eager to solve this problem, and so she invited both prodigies to her palace for the purpose of judging for herself. They played the Bach Concerto for Two Violins, and separately each played a set of solos—and when they finished, the Queen was more perplexed than ever. "Every time I hear Jascha I am sure that he is superior, and then Toscha plays a solo and I am just where I was before!" And when, sometime afterwards, the Queen was asked which she really preferred—Jascha or Toscha—she answered simply: "Why, the one I hear last!"

From Dog Whi

Bob Crawford of the Arctic was tall, bronzed and sinewy. Guitar, pack, and powerful youth were his only assets.

"Can you remember
your huskies all going
You in your parka, glad-eyed and glowing
Monarch, your subjects the wolf and the bear?"—*Service*

Today Robert M. Crawford conducts ... His Cutaway was a Caribou Parka, H...

LATE evening of March twenty-sixth this year found me searching out the owner of a name—a name that came to me over the air from the lips of a Radio station announcer—a name that took me back to Alaska, within a hundred miles of the Arctic Circle—a name I had not heard since the year before the Great War.

Following the station announcer's lead, I found the Mutual Benefit Auditorium in Newark, New Jersey, brightly lighted. Music lovers of three cities filled the seats, and on the spacious stage were assembled the voices of the Newark Foundation Chorus, the Bach Singers Club of New York, the Barrington Girls' Choir and the Oratorio Society of Elizabeth.

From the throats of this great chorus came Johann Sebastian Bach's profound expression of eighteenth century religious emotionalism—"The Passion of Our Lord, according to St. Matthew," and on a raised dais, directing the music, stood Robert M. Crawford . . . so the program said.

Robert M. Crawford . . . the name that had come to me over my Radio, but . . . could this be the Bob Crawford of my distant home?

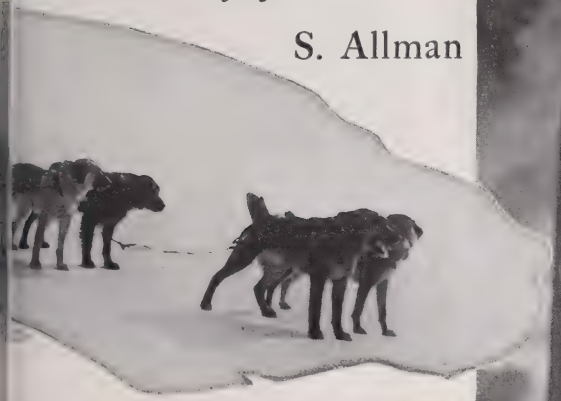
I had arrived late, and slipped quietly into a rear seat. As the beautifully blended voices filled the hall, I sat back, closed my eyes, and pictured Bob Crawford as I had known him.

He was tall and bronzed, and sinewy with the flat muscles of youth. His hair was dark and unruly . . . his eyes clear and gray, and behind his high forehead there was stored a knowledge of trail wisdom and woodcraft that would have taxed the prowess of the best hunters in the neighboring Indian camps.

He was a typical "Sourdough Kid" . . . born within a hundred and fifty miles of the Arctic Circle, and knowing no other life than that which he saw on all sides as America's last frontier opened up under the hands of such pioneer families as the Crawfords.

The cutaway coat that he now wore was then a caribou calf parka . . . his patent leather shoes were the soft moosehide of native moccasins, and the hand that now wielded a conductor's baton was then swinging a whip over the backs of a team of slant eyed, pointed nosed malamute sled dogs. Those powerful arms, that were now beating ou... measures of this stirring music ... wrestling a sled over drifted trails.

I opened my eyes . . . feeling t... must be mistaken. The contrast w... great. I tried to retain the pictu... my mind, but the magnificent ... brought me back to the present, and ... added to my doubt.



I tried to picture those wide sho... swinging a paddle as a fragile canoe ... down the white water canyon of ... nameless river . . . tried to visua... hundred pound pack strapped to ... broad back as a trail was being l... through a country where the ri... White Man's axe had never before ... heard. My uncertainty increased. ... this couldn't be the man I sought! ... master of beautiful music couldn't l... lad who had shared my youth in ... Alaska. Then, when he turned his ... I saw that it was, indeed, the same ...

mphony Orchestra —Yesterday
ourdough Kid" of Frontier, Alaska

Robert M. Crawford is now director of the Newark Symphony Orchestra of 82 pieces and conductor of the New York Bach Singers Club.

c, are one and the same person. I tiently awaited the end of the sing- that I might renew a friendship en fourteen years ago. And while ng, I asked myself a question. I ong known of Bob's ambition along cal lines, but . . . "But by what possi- ssociation of circumstances could this ge have taken place?"

youngsters in the North our trails often crossed and now I rehearsed I knew of his early life.

He was born in Dawson 899, when this roaring gold camp naking the third year of its turbulent ry. Dawson . . . the Golconda of North . . . the city of cabins and . The heart of the Klondyke, where nes were made over night, and in instances spent almost as fast over ars of the river front saloons. Sa- where a drunken entertainer might ard reciting the, as yet, unpublished is of a certain Robert W. Service, weighed gold dust in a nearby bank. hen the news of rich paystreaks in Fanana district came drifting up the n River, the Crawford family joined tampede and helped start the town irbanks, and it was in this metropolis ntral Alaska that little Bobby's concert talents were first exploited.

Some of the older children in the camp would load their seven year old warbler on a hand sled and moving around among the gathered tents and cabins, would have him sing *In The Good Old Summer Time* (the only song he knew) while they passed a fur cap among the amused miners. Few failed to contribute, and when one remembers that twenty-five cents is the smallest coin we have up there, it looks as though Bobby's earnings might have been considerable for one of his tender years.

I recalled that Sam Crawford, an older brother, had the first phonograph in camp, and hour upon hour young Bob stood before the huge morning glory horn setting the raucous notes of the worn cylinders to the pitifully cheap tones of his mail order violin.

As soon as he decided that he was going to be a violinist he started taking lessons from one of those mysterious characters that one always encounters in frontier mining camps.

Some said that Vic Durand was a political exile. Others, who claimed to know, said that it was a woman and not the French government that had caused him to forsake a title and come into the North to lose himself. I knew him as a gentleman, a linguist and an artist, and as one who enjoyed sharing the hardships of a country in the throes of savage birth.

For three years Bob studied under Vic Durand, at the same time passing beyond the educational facilities offered by the Territory. About this time he found that a piano was as easy to master as a violin . . . his ambitions were divided. He compromised on music . . . music in all its multitudinous branches would be his career. He sat down and wrote the words and music to a song that he called *My Northland*. It was published and unofficially adopted by the sourdoughs of Alaska as their Territorial anthem.

Shortly after this I saw Bob Crawford for the last time before tonight. Let me tell you of that meeting.

The pale Arctic sun slanted its heatless rays down over the frozen landscape. Red, green and purple jewels flashed among the icicles that clung to the eaves of my little log cabin, and the smoke from the stove pipe spiraled straight up into the thin white light.

I COULD tell by the actions of my dogs that some one was coming in on the thin ribbon of trail that led off north a hundred miles to the Circle and the mighty Yukon.

"Mush, boys! Mush!"

The voice came to me faintly through the frozen silence. The biting forty below zero air nipped my ears as I raised the flaps of my cap, the better to hear. A musher was coming up the trail! Who? Where from? Would he have any fresh news?

Visitors are a welcome break in the monotony of long Alaskan winters. I hoped it might be a friend. He would stop with me. We'd have a great talk fest.

A white snow-shoe rabbit hopped into view, hesitated for a moment; his nervous, translucent ears erect.

"Mush, there, Brandy!"

The rabbit hurriedly disappeared as the crack of a whip split the crisp air. A team of seven malamutes swung around the bend, their tongues standing out like pieces of red flannel against the frost coated breath that clung to their gray breasts. They swung up to the door of my cabin.

"Hi, Jack!"

The tall lean musher on the handle bars of the long basket sled didn't have to throw back the wolverine trimmed hood of his skin parka for me to recognize him. I'd know that voice anywhere.

"Better anchor the sled and have a snack, Bob," I suggested. "Pot of moose stew on the stove."

"Won't have time, Jack, thanks." He melted the frost from his eyelashes with the heat of his bare hands before going on.

"I'm going through to Fairbanks," he added. "I want to get there for that Belgian Relief dance, tonight."

"You won't feel much like dancing after another thirty miles of this drifted trail," I pointed out.

"Perhaps not," he grinned. "But I won't be too tired to listen to the music."

We chatted for a few minutes, and then he was on his way, his whip cracking high over the backs of his dogs.

This was to be a big night in Fairbanks. The charity affair for the starving Belgians had been advertised far and wide. All of the town's two thousand inhabitants would be there, as well as many from the surrounding creeks. There would be entertainment . . . dancing . . . music. Ah! Music! There was the magic word. It would take more than drifted trail to keep Bob Crawford away from music.

I doubt if I understood the gnawing hunger that sent my friend over that cold trail that wintery day. I do now, though. It was ambition. The same ambition that surmounted the handicap attendant to getting even a rudimentary musical education in a frontier so sparsely settled that an area one-fifth the size of the United States can only boast of a population of twenty-five thousand whites.

And that was fourteen years ago.

WHEN the singing finished I awakened to the fact that I was in Newark . . . not Alaska. I pressed my way through those of the audience who waited to congratulate Bob on the success and beauty of his oratorio. He recognized me and pressed my hand in the firm grip of friendship. The night was spent in chatting over old times.

As that same Robert W. Service of Dawson put it:

"We talked of yesteryears, of trails and treasure.
Of men who played the game and lost or won;
Of mad stampedes, of toil beyond all measure,
Of camp-fire comfort when the day is done.
We talked of sullen nights by moon-dogs haunted,
Of bird and beast and tree, of rod and gun;
Of boat and tent, of hunting-trip enchanted
Beneath the wonder of the midnight sun;
Of bloody-footed dogs that gnawed the traces,
Of prisoned seas, wind-lashed and wind-locked:
The ice-gray dawn was pale upon haggard faces,
Yet still we filled the cup and still we talked."

It was in rush camps like this that Bob Crawford was raised.

I was to learn a lot more about Crawford during those hours, but only by dint of adroit questioning. facts came out, piecemeal, that after had left Alaska he had set his mind a college education. The next thing of course, to get the where-with-all gether.

About the time I left, the governm started to build a railroad from water to Fairbanks. Contractors v recruited, as far as possible, from trail blazers who had helped survey route. Bob became a contractor made some money and came out to e Princeton, but after the first year f ran short. Work in a Ford service tion filled in the gaps for the ex-Alas musher.

Many men have worked their through Princeton, but I wonder many can look back on a name so de etched into student activities of such enduring nature.

Crawford organized the Princeton C servatory of Music with an enroll of two hundred students. He started Princeton University Orchestra, and seven years has orchestrated and dire the music (written under-grads) of the nual "Triangle" sh He was regular tributor to the *Pri tonian,* and his baritone voice wa demand wherever c harmony was hear or around the cam

SISTERS *of the* SKILLET

The Lowdown on those Two Intrepid "Female" Purveyors of Domestic Wisdom Revealed

By

Their Own Announcer

Jean Paul King

HELLO, Radio listeners. RADIO DIGEST has asked me to tell you a few things you ı't know about those two y funny, funny fellows, Ed st and Ralph Dumke—or as ı may know them better, e Sisters Of The Skillet. Working with them as I do ry day, except Sunday, in t padded cell in Studio C of Chicago headquarters of National Broadcasting mpany, this should be easy. ly one of two things can ppen. The strain of pre- ring this article may kill me before I'm ough or Eddie and Ralph may sue for nder and libel when it appears in print. t in either case it won't make much ference, so here goes.

You've all probably heard the Sisters the Skillet on the NBC network and joyed them. Your 1500 or more en- usiastic letters every week prove it. ıd do the boys enjoy those letters? ily when I arrive for the program I d them roaring with laughter over me new problem sent in for them to ve by a worried sister or over some new ishwater poemtry," as the poetic con- butions have come to be known.

What do they look like? Well, Eddie and Ralph are two good-looking young fellows in their early thirties who enjoy having a hearty laugh and who take great pleasure in passing it on to you, their listeners. You've heard the old saw "laugh and grow fat"—well, it certainly fits in this instance as the boys tip the beam at 260 pounds apiece. (Have you their picture?)

Both East and Dumke are experienced entertainers with many years of successful vaudeville appearances behind them They are both sons of the Middle West; Ed East's advent in Bloomington, Indiana, is still mentioned in hushed tones, but Ralph Dumke's origin in South Bend, Indiana, isn't mentioned at all. High school in their "good old home towns"—then college—Dumke gracing the halls of Notre Dame and East attending the University of Indiana—very temporarily.

The meeting of these two wise crackers makes an illuminating story. The time—a hot summer day; the place—Michigan City, a lake resort not far from Chicago. Being a hot summer day the beach was crowded with bathers. One of these, a flighty female, found herself out beyond the depth where her pink toes could touch good hard sand. She began to splash—to scream—to shriek—and finally to gurgle—filled nearly to the brim with cold, lake water. Two heroes came dashing to her aid. Two enormous heroes—two heroes no eye could miss. They reached the gal and towed her to shore—a frail and nearly submerged craft being piloted to port by two huge and efficient seagoing tugs.

As East and Dumke faced each other across the prostrate form of their salvage, an observer might have seen an identical expression on their faces. It was an expression which said, "Gosh all hemlock (slang, 1921), am I that big?" Without a doubt they were the two largest men

even seen in a pair of bathing suits.

Two years later they really met, show business bringing them together. Eddie was the shining luminary of a band playing in Indianapolis, doing all the singing and clowning as well as playing banjo. Many of the numbers which he was using to "wow" the Indiana folks were his own. He wrote them then as he does now. One day, Ralph, who also plays banjo, joined the band; the second day he and Eddie became acquainted and sang together; the third day they were working on a comedy skit and had decided to leave the band and try their luck in vaudeville. This was eight years ago, in 1923. They have been together ever since.

The summer of 1923 saw the creation of their vaudeville act and on Labor Day they headed for Chicago to meet "Their Future." They were booked on a junior circuit for a week's trial—at $60—and at the end of the week they had impressed the bookers to such an extent that they were told they could continue working—for $60. In the meantime, the head of the Chicago Orpheum office who had seen the act, sent for them and shortly after they were on their way to New York to sign a six year Keith-Orpheum contract. Quoting Ralph—"Those six years were the only ones we didn't have to worry—question mark."

SO FOR six years they toured the country; Keith in the East, Orpheum houses in the West. Probably many of you have seen their old stage act. If so, I know you haven't forgotten it. It was a fast, comedy-harmony act with both boys at the piano, Ed playing very little piano. (As today.) As Dumke says, "Ed knows three chords on the piano, but hasn't been able to place them in their proper relationship, and as I'm a banjo player, I can only see the black keys."

It was not until the time of the Mississippi flood disaster that they became interested in a microphone and as Ed said "saw the handwriting on the wall for vaudeville, and rubbed it off." Sick of one night stands and "the road," East and Dumke found themselves in the devastated flood area where the situation was acute. People were starving and shelterless, so the boys organized relief benefits, gave midnight performances after their regular shows and as some of these relief benefits were broadcast by southern Radio stations which were cooperating, Eddie and Ralph had their first experience on the air.

THEIR second air appearance was over WJR, Detroit, where they were playing Publix time in the beautiful Fisher theatre. It was this appearance in front of the mikes which did much to decide them on a Radio career. Their final decision to leave vaudeville was caused by a fan letter written by a girl who watched for their appearance in Detroit each year and who, since their last visit, had become an invalid and a shut-in. She heard them over WJR and wrote, telling them she was "simply delighted" to hear them as she thought that pleasure was to be denied her since she could no longer visit a theatre. She wrote "You don't kn how much your merry chatter and cle songs have done to make my life m livable. Please tell me when I may h you on the air again."

This human little letter showed boys the possibilities of Radio; t realized how much larger their audiences would be as compared t theatre audience; they saw that t clowning could bring cheer to count ill and shut-in persons and they beca Radio converts. For years they made it a point to appear in hospit penitentiaries and children's homes cities which they visited, so they w fully able to realize the value of a g laugh as medicine.

Their first Radio contract was v WGN, Chicago, where they appeared two years with a harmony act heard e evening. Realizing the value of an which would appeal to women listen Eddie and Ralph conceived the idea *Sisters of the Skillet*, a daily feat which enabled them to retain the si ing part of their act and add to it pa and wisecracks from their stage sho On November eleventh of last year *Sisters of the Skillet* appeared as feature of the National Broadcast Company and proved to be of the Chic studio's most p ular programs.

The Sisters of the Skillet in their bungle-aprons. Left, Miss Pet Plenty (Eddie East) and right, Miss Isabella Fryit (Ralph Dumke).

THE is fifteen minu of fun, introdu and signed off this "poor broken-do Radio announc who has robin's nest in hair. The oper song, written East, is the Ho wives' Lament the words good enough keep over y kitchen sink. H they are—

"While your he are yearning
And the toast burning,
Turn the roast scrape the t
Before the t come home.
Onions keep frying,
Baby keeps crying,
Get the tub rub and scr
That's your ho sweet home.

Helen Keller's Radio Adventure

World's Wonder Woman Although Blind and Deaf Enjoys Movies, Jazz and Broadway Crowds

By Anne B. Lazar

Helen Keller as she was sketched during special interview for RADIO DIGEST

Illustrated by Miriam D. Brown

T WAS a blowy March day. Whirlwinds stirred up the sleepy dust and discarded papers from their winter's rest and did the spiral dance on corner. Men's hats suddenly beanimated and playful and disported selves in front of hurrying autos, ladies' skirts looked like umbrellas ed inside out on a storm-stormy day.

ıe spirit of life could be restrained onger. Miriam and I felt it in our bones. It was grand to be alive healthy—to be able to see the world's less treasures—to catch the slightest of song or melody in the city's mulinous undertones, and to improvise a tune so that we could be in harmony the rest of things.

ı, it was good to exist! Every fibre ur being was touched with the breath fe. We were awake with the newand freshness.

ıd as Miriam and I were thus enjoythe freedom of being born again, we suddenly stopped. Our thoughts ıg immediately to the object of our ıd.

e were both going to see Helen Kel-the wonder woman—Miriam Brown ketch her in pencil and I—to inter- her. Miriam is only sixteen—that en age when happy visions have not been scarred by bitter experiences and n fascinating illusions have all of the nce of reality. She had just come ı her art class at New York Univer- with books under her arms, and a t settled carelessly on a mass of brown hair.

s an interviewer of maturer years, I d not help but catch something of the thrill that was hers in this first experience of sketching a famous person.

But something caught in our voices when we started talking about Miss Keller. It was with a feeling of awe and reverence as if we were approaching something holy, something savoring of the divine and not of this world.

We had just reached the studio. Upstairs everything was in a state of expectancy. Photographers were planting their cameras at acute, right and oblique angles—and scattered about was a variety of microphones.

Helen Keller had just had a thrilling adventure—an adventure in Radio. That was an event—and newspaper offices and photographers were busy broadcasting the news to the world.

She went to Washington with her teacher and her secretary, Mrs. Macy and Miss Thompson—to broadcast for the Better Vision Institute—an organization devoted to the important task of protecting human sight.

The Washington studios of the Columbia Broadcasting System were crowded with curious spectators to witness this modern miracle—a woman broadcasting her voice—a voice she herself had never heard—to hundreds of thousands of eager listeners.

There was a deep suspense in the atmosphere—people held back their breath as if afraid to break the spell of the enchantment.

Miss Keller made her way through the dense gathering and finally reached the microphone. Her firm fingers swept quickly but carefully, so as not to miss a single detail, over the outlines of the instrument. Then, as her hand traced the mike's head, she exclaimed, "It looks like a big eye." Not ever having herself beheld an eye, the significance of her statement made us marvel at her aptitude for forming delightful comparisons from what the ordinary mortal would consider mere commonplaces.

At a glance we read the word, *Columbia,* which was printed vertically on the shield. But Miss Keller's indefatigable fingers had to trace the raised letters carefully to learn what we knew instantly and effortlessly.

Fingers—they are her eyes and ears—and the accuracy of her information indicates that they neither belittle nor magnify the things which she touches.

She had been keeping her fingers busily employed but in a few moments she was to speak. How would her voice sound to these anxious listeners? Could it possibly express in sound the words which she had for her message. Would she have mike fright? Oh, if she could only for a moment—just for that occasion—tear down the dark and dreary veil of deafness—to hear the sound of her voice so that she could be sure she could actually speak and be heard!

And what if she spoke—and nobody could hear her—just as she couldn't hear.

It would be unbearable—the silence on the air—those few minutes in which she would be going through the motions of speaking—but with no sound falling from her lips.

It must have been an anxious moment as she took over the microphone after having been introduced by both Mrs. Macy and Miss Thompson.

BUT her fears were groundless. For as soon as she opened her lips—and although she herself was no witness to the sounds she was uttering—this is what the listeners in every part of the country heard Miss Keller say:

"I am happy to greet you all and to convey a thought which may help to bring greater happiness, comfort and efficiency to you in your daily tasks and recreation. For many years now my work has been aiding those who live in darkness and spreading the message of eye-care to those who are more fortunate.

"If you could meet as I have the hundreds of educated men and women who testify that they were grown up before they knew that it was faulty vision which kept them backward in school, and later in business, you would at once find out all there is to know about improving and conserving your sight. The ounce of prevention is worth many times the pound of cure. So I urge you to investigate at once the true condition of your eyes and those of your children. 'Guessing' or assuming that your vision is all that it should be is extremely foolish and may prove costly. Should glasses be found necessary, they should be worn unhesitatingly, because they are a positive asset and safeguard.

"Do what you can to enlighten your neighbors, especially those who are ignorant and impoverished. Conservation is true economy as well as a humane measure. Prevention of human misery is not an idle dream—do help yourself and help others, that we may all create saner social conditions and a healthier, happier humanity."

Miss Keller stepped away from the microphone. The reassuring handclasp of her friends made her happy. Then she had been heard—and those fears—she must never have them again. There was comfort in the thought that others could hear her voice even though she herself has never known its sound, except—through her wonderful fingers.

Mrs. Macy and Miss Thompson cleared the way for Miss Keller through the gathering throngs to keep a luncheon engagement with the President and the First Lady of the Land at the White House, where they probably discussed the activities of the World Conference, either through lip-reading or through the manual alphabet—spelling sentences in Miss Keller's palms. Then they made a hurried tour through the historic places and points of interest in and around the Capital and Mt. Vernon—and as usual Miss Keller had the time of her life.

After these few days at Washington—fraught with activity—Miss Keller had returned to New York and we were all expecting her at the Times Wide World Studio.

A note of keen expectancy dominated the hustle and bustle at the studio. Then all at once the busy motions ceased. Into the sudden hush a page announced Miss Helen Keller. What a personality! What a miracle of a human being! It was almost like a demonstration of the supernatural just to behold this marvelous woman. And yet there was a feeling that one would like to be of service to her—to help in some way.

She was neatly tailored in a green canton crepe dress. Her low cut patent leather shoes set off her slender ankles to advantage, and except for a slight inclination to expand a bit beyond the generally accepted standard of slimness and for a few streaks of gray hair among her rich brown wavy tresses, Helen Keller would not look over thirty-five. She has passed the fifty mark.

AFTER the first few moments of general introductions among those present, the cameras began to click, and Helen Keller went through the regular process of posing, Miriam in the meantime standing in the background with sketch block and pencil snatching every possible line of character for her sketch. Into this awed circle which seemed almost ceremonial in reverence there suddenly beamed a dash of color with the appearance of Sidney Franklin, renowned American matador.

He had just returned from Spain where he had settled a few public arguments with some mad bulls, but from his appearance we could see that he had the best of arguments. He didn't have a single scar—and well—as for Adonisian looks—I can't understand why those Spanish senoritas ever allowed Mr. Franklin to leave the country.

Mr. Franklin was introduced to Miss Keller. "Oh, I have read all about you," she said. "You must be very brave to fight all of those bulls, but you should be careful." She then placed her hands on his shoulders and felt of his muscles and remarked, "My, but you are very strong."

We could all see that Mr. Franklin doubtless sensed a greater thrill from this momentary meeting with gentle Miss Keller than he did from his ferocious conquests in the Spanish arena. He felt a little richer for the experience.

Finally Miriam and I were able to have a few minutes by ourselves with Miss Keller. The crowds were still around us and we were limited to only a very short interview.

MISS KELLER sat erect in her chair. She has a dignified bearing but withal a tenderness about the expressions around her face and the movement of her hands that betrayed little of early sufferings. She hasn't that em stare that most blind people seem have. Her mind is so intensely active spirit so effervescent that expres forces its way even through her light eyes. You have the feeling of comin contact with a great force when you m Helen Keller—a power so vibrant nothing could hold in leash the ma tude and beauty of her thoughts wh escape through every movement of body. One might as well try to buil wicker fence around Niagara or put sun behind prison bars as for blindn and deafness to limit Helen Keller to realm of darkness and despair.

Between her and Beethoven there great parallel. It is a well-known that this great composer wrote his gr est masterpieces when he was stone d Music came to him not through the ural organs of hearing, but through draughts of inspiration of which drank freely, and which he in turn g to the world in his immortal comp tions.

Helen Keller at the early age of was stricken with a serious illness w robbed her of sight and hearing—natural channels through which the verse pours its infinite bounties to m kind. With all means of communica shut off between her and the rest of world, she presented a lonely and pi figure. The softness of her mother's w was lost in the deep void that engu the young child. She could know parents' love only through their g caresses and handclasps. Deprived sight and hearing the problem of cating this handicapped child wa mighty one. Then her teacher, Macy, at that time Anne Sullivan, c into her life. She needed a reserv patience and perseverance for this who was standing as if on a brink another world, stretching out her for a sympathetic and discerning h

THEN came the slow cess of learning things by name thr her fingers—from the cool water that through her fingers to the outlines of dog. Through this system of educa and with her companion, friend teacher ever at her side to guide and her, and with her own native intellig Miss Keller has come to be one of most prominent figures of our day. mind leaps with amazing alacrity one subject to another and she sho surprising fund of general informa

To those of us who have the hea born privilege of being able to see our eyes it is hard to imagine how Keller can get such vivid pictures thr her fingers. But her fingers have bee her what our eyes and ears are to us. can hear the songs of the birds, laughter of little children, the beau

HELEN KELLER listens to a savant's philosophy of life through her finger tips. She is shown here with Tagore, Indian Poet-Philosopher.

Characters Direct from Life in the Raw, as Fate Has Cast them in a Spinning World Drama, Make up the Personnel of Beloved Mission Worker's Broadcast

Tom Noonan—now, something past middle age, tall, lean, a quick smile, and humorous eyes.

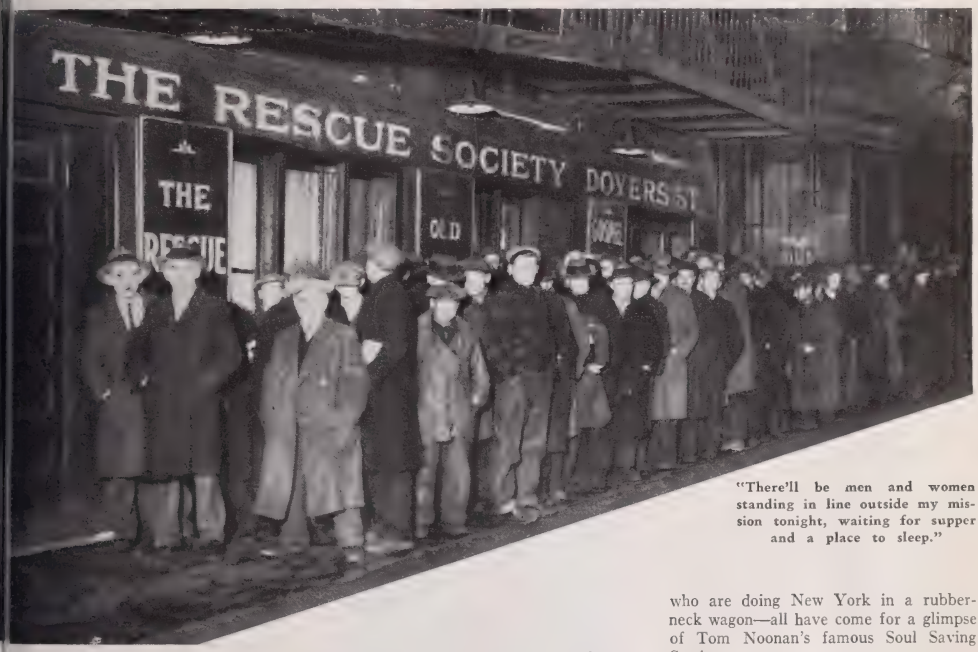
By Dorothy Thomas

IF YOU tune in any Sunday afternoon at 3:30 to WMCA you hear Tom Noonan, the "Bishop of Chinatown", broadcast his cheerful meetings from the old Chinese theater in New York's Bowery. You've probably just eaten a good dinner and you sit in a comfortable chair in a warm, cozy home. Well, Tom Noonan talks over the Radio to anyone who'll listen in, but the men and women who are habitués of his mission probably can't remember when they last had a good dinner or a warm and cozy home—if ever!

At Tom Noonan's Mission every creed, color and race are welcome. There's a feed and a flop for all and no questions asked. If charity is cold, it certainly is inquisitive. It's apt to be the custom, before a starving man is fed, to inquire into his ancestry, his morals and to discover if possible whether it is through any weakness or vice of his own that he has come to this pitiful pass. But Tom Noonan doesn't work that way. If the down-and-outer wants to talk, this practical Evangelist will listen and do what he can to help solve the problems—but he figures a man needs food and rest before he is ready for spiritual advice or help to a better life.

Who is Tom Noonan? Nearly everyone knows by this time, but in case you don't, I'll tell you that he came up from the gutters of the lower East Side, knew starvation and homelessness and all the bitter humiliations that are suffered today by the unfortunate men and women who come to him for aid. He had reached Sing Sing by the time he was seventeen and says he might still be making trips there or to other state hostelries, had it not been for Maud Ballington Booth of the Salvation Army. Working in the prisons, she not only preached the gospel to the inmates, but offered practical aid to them when they left prison. She gave Tom a job helping at a home for ex-convicts. From there he joined the staff of The Rescue Society—organized about thirty years ago by a group of people who believed that some effort should be made to uplift Chinatown—and for the past twenty-five years Tom Noonan has been its leading spirit. Now, something past middle age, he is a tall, lean man with a quick smile, agile movements, and humorous eyes. He has an office in the Bible House where he keeps four stenographers busy answering his fan mail—surely the strangest, most tragic and appealing fan mail any public character receives today.

"See that stack?" he asked, pointing to a white mountain on his desk. "They're mostly from people who're ashamed to stand in a bread line—people who've always had good jobs but are down and out today. I never knew such a depression as this one—I never had so many calls for help—especially from the white collar class."



Sitting there in his busy little office Tom Noonan told me tales that made me shudder—stories that made me scared and ashamed to ever spend another cent for taxis or beauty parlors or any sort of luxury—scared for myself and ashamed because so many people are without the bare necessities of life right

"There'll be men and women sta in line outside my Mission tonight ing for supper and a place to sleep have seen better days than any o prosperous who sit up on the plat and put money in my collection plat

Among those who seek his hel women who were once the toast o town, men who held responsible pos in the business and financial wor secretary to one of our presiden member of a well-known but de Southern family, a newspaper m people who just couldn't get over quicksand called life.

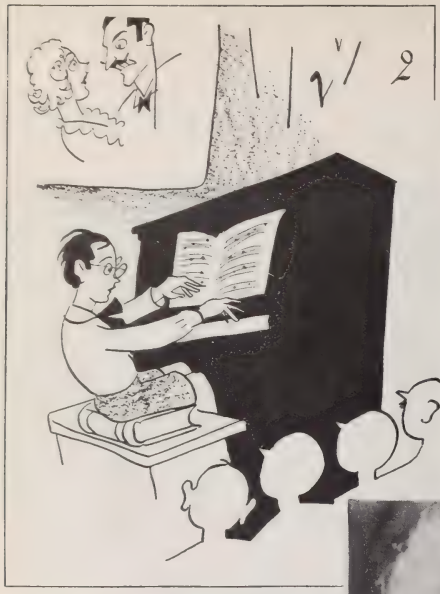
"OF COURSE ther the perpetual bums too," he adm "A certain percentage are just drift probably the inevitable leftovers o present industrial system. They m incompetent mentally or physically, may be lazy or drunken or dopes anyway, here they are with no pla go and we've got to do the best w for them."

Tom Noonan's Soul Saving Station

"There'll be men and women standing in line outside my mission tonight, waiting for supper and a place to sleep."

He told me about "Three Drink Harry" whose name might embarrass someone the Social Register, also of a district orney from California who landed at Mission after his wife had run away h his best friend, of ladies who trod primrose path to be sidetracked to streets and alleys and wharves until y landed in a "flop house" in the wery—a long way from where they rted out to go! "Galloping Nell," lop Head Amy," "Singing Mary," hinatown Gertie" are just a few of the mes some of these ladies go by.

"A lot of people only need temporary lp—a job—a new way of looking at e—a helping hand over the dark places d they're ready to get back into their per sphere in life. Sometimes boys t stranded in a strange city between os or promised money from home. I ink the most helpless are the old men chucked out of a job because they're st forty. There just is no place for ost of them. Nothing but a bleak istence of bread lines, flop houses, park nches, Municipal Lodging Houses, llways and maybe jails."



Such are the men and women who are sitting on the benches of the old Chinese theater when Tom Noonan broadcasts every Sunday afternoon. While you in your comfortable homes are listening in to the Evangelist's lively sallies, rousing hymns, requests for aid, his music and speakers, these others are gratefully looking toward this man who has been for so many years their friend. But instead of tuning in let's look in—

IT'S a rainy, warmish afternoon in dirty Doyers Street—that crooked cavern that winds though the lower East Side like a slimy snake. It's three o'clock and outside of a shabby old hall plastered with signs——"Rescue Mission," "If you haven't got a friend you'll find one here" ——a line stretches itself halfway down the street. Women in sables, men in handsome ulsters—a very prosperous bread line, you think. And you're right. Half right. The people patiently standing out there in the rain are prosperous. They are big hardware men from Hackensack, debutantes from Westchester, clubwomen from Boston, Ladies' Aid Societies from Schenectady, tourists from the corn belt who are doing New York in a rubberneck wagon—all have come for a glimpse of Tom Noonan's famous Soul Saving Station.

This old Chinese theater that had been converted into a Tabernacle for the Lost is inconvenient to get at. It is much too small to hold the throngs who come there to be saved—or help others be saved as the case may be. It is badly ventilated, the heat and breath from many bodies fill the old building. But the dynamic Evangelist can pack the place to overflowing and make Park Avenue and prosperous suburbanites like it!

THE first floor is arranged like any hall for political or religious meetings—a large platform facing a line of benches and chairs. Tom Noonan and the churchly sit on the raised dais and the down-and-outers sit below on the benches. The meeting is opened with a prayer and Noonan's popular theme song, *There's a Rainbow Shining Somewhere.* Then like a genial, informal host at a night-club, he greets various friends who are either present in the hall or listening in over the Radio. He mentions the names of various Ladies' Auxiliaries and Girls' Friendly Clubs that are present,

CONCLUSION

WHAT brings success in Radio? That's the question our untiring reporter, Ev Plummer asked himself. He came to the conclusion that *good voice, dramatic ability or musicianship do not necessarily mean success in Radio!* The important qualification for the would-be star is "X"—air "it".

Background and training don't mean a thing if the aspirant hasn't "X". Amos was a tobacco salesman, Andy laid brick for his father's construction company. Phillips Lord was a teacher, Roxy a department store clerk . . . many other revelations were made in last month's story.

BUT if you missed the first installment, you can start right now and read these bombshells about more of the air famous:—

YOU all know Jolly Bill Steinke of the "Jolly Bill and Jane" programs. Jolly Bill has been a New York newspaper cartoonist for years. Going to the studios to cartoon artists, he caught the mike bug by association, and success was fast in coming.

How about Baby Rose Marie (Mazeppa)? Well, this talented young miss had Radio come to her along with vaudeville and the movies. She talked at nine months of age, won an amateur stage contest at two years, carried on regular conversation at thirty months, and at three years of age was before the footlights imitating Sophie Tucker in "hot mama" jazz numbers!

Big Brother Bob Emery divided time between studying at Tufts College and playing his ukulele at Station WGI, Medford, Mass., from 1922 to 1924. He developed the Big Brother Club idea at WGI, took it to WEEI, Boston, with him in 1925, and to NBC and a sponsor in September of last year.

Ruth Etting was wasting beauty backstage as costume designer. A chorus girl sick—Ruth filled in and her voice "clicked."

Here's how several radactors entered the studios. Marcella Shields made her stage bow at four years of age and trouped as a vaudeville comedienne from then on to September, 1928, when she was given a Radio play role. Other bits followed and in June, 1929, she became a member of NBC's New York staff.

made by David Owen, dramatic tor of the CBS farm network. n was director of the North Shore tre Guild. One day Walter Preston, tor of WBBM, called the guild to in the services of some actors. Owen d to Preston. "By the way," Preston rked, "you have a perfect voice self on the telephone. Why not try n the microphone?" Owen did, and still in Radio.

nd leaders generally seem to have clearly defined ambitions to be cians in their heads. Few wandered it. As for their receiving microphone rs, good and novelty orchestras always been in heavy demand at studios or for remote pickups. Let's over a few of the leaders.

RUDY VALLEE and ard Joy both attended college and the bill by playing in orchestras. and Carmen Lombardo and Fred tzer started the Royal Canadians—eces—in 1918, playing at a mothers' meeting in London, Ontario. Wayne , university graduate account, worked ar at figures before he switched to saxophone hobby as a breadwinner. A. Rolfe for eight years threw his with the movies, and was alternately thy and broke, before he took a band . New York restaurant. Art Kassel, ied in both music and art, went to and returned from France with a ite ambition to form an orchestra. rank Black, chemistry student and teur musician, was pursuaded to fill vacant post of an ill pianist in the estra at a Summer hotel where he vacationing. Harold Sanford wavered veen electricity and music as a youth l a job paying $1.50 nightly for playing the violin decided him for the latter. Eugene Ormandy, Hungarian violinist, is a Roxy protege. Horace Heidt only took up orchestra playing in college in order to pay a hospital bill caused by a football injury. David Mendoza almost turned from music to medicine, but friends and family changed his mind. Freddie Rich's first job, at twelve, was pianist in a nickelodeon.

Said dad to Howard Barlow, "No long-haired musicians in my family!" He cut his hair but became a symphony conductor.

Wanderlust set Vincent Sorey to playing his violin all over South America and collecting folk tunes as he roamed. Except for a few unsuccessful months trying to sell airplanes, Sorey kept to music. Ludwig Laurier very nearly became a druggist in Buffalo, N. Y.

PARENTS would have denied us many noted directors. Paul Whiteman's concert singing family practically disowned him for starting a jazz band. Vincent Lopez' folks would have made him a priest, but the monastery's far seeing father director sided with Vincent. Howard Barlow's dad would have no "long-haired musicians" in his family, but he did, anyway, because of Howard's persistence. Channon Collinge, director of the Cathedral hour, was sent to a textile school by his English family who were prominent in the cotton business. Channon won a scholarship medal and composed a song. He sent both home, asked his parents to choose between the two, and the next month was enrolled in a musical conservatory. Incidentally, during his career, Collinge spent six years as a comic strip artist.

Among the fair sex who thrill you at the loud speaker, Jessica Dragonette climbed her first rung when she applied for a soprano role in Reinhardt's "The Miracle". Olive Palmer (Virginia Rae) was singing at five years of age and was a concert and opera success before the advent of Radio. Lois Bennett sang on the stage at the same age as Olive, and had her first chance when she was nineteen in a tour of vaudeville with Carrie Jacobs Bond. Ruth Etting was cabaret

show costume designer in Chicago until she jokingly filled in a vacancy in the chorus one night. Local station singing helped to bring her to the attention of Paul Ash. Recording and the Follies followed. Vaughn De Leath, crooning contralto and "original Radio girl", won her title by singing from a "wireless room" atop a New York skyscraper in 1915, history shows. She crooned then and later in 1920 to keep from "blowing" tubes of the early transmitters costing $110 each.

MARY CHARLES, revue star and character impressionist, got into Radio by applying for an audition and doing better than 149 other aspirants tried out at the same time. Lillian Taiz, of CBS special productions, was "discovered" by at least five impresarios, including Leopold Stokowski and George Gershwin. Mary McCoy made her first public appearance at nine, and when Schumann-Heink made her golden jubilee tour four years ago, Mary was honored by being selected by the beloved Ernestine as her assisting artist. Operettas immediately sought her and Radio followed. Muriel Wilson had a hard struggle to train her voice, and to pay the bill, she worked as deputy collector of internal revenue. She's been with NBC so long she's forgotten how she started on the chain. Harriet Lee sold sheet music behind a Chicago store counter to pay her vocal teacher. A violinist friend accidentally learned she was studying voice and offered to take her to a broadcasting station. For years she broadcast in a girl duo and then Wendell Hall gave her the push that put her on CBS programs.

Ruth Lyon completed her college education in which she majored in French, and was seeking a job teaching the latter when friends convinced her that she should follow singing, her hobby. The Ponce Sisters, who are really sisters, were trained to sing by their mother. They laughed at friends who told them they "ought to go on the stage" but finally went to the studios for an audition which discovered their voices to be of excellent quality for Radio. Annette Hanshaw, who started singing at private parties, and finally was singing for four recording companies, was signed by CBS because of her phonograph fame.

The announcers came from more assorted occupations than perhaps any other branch of Radio entertainers, for there was no such "thing" as an announcer before Radio. Mr. Graham McNamee was a salesman in the Central Northwest until he went to New York to finish his voice training. Applying to the young WEAF for a job singing baritone, he was heard and given one as announcer instead. David Ross almost became a poet instead of an announcer, and broke into Radio one day by happening to be in the studios when something happened that left a hole in the program. He volunteered to do a dramatic reading, and his voice won him an immediate post as mikeman.

Ted Husing was athlete, amateur boxer, boxing instructor for the U. S. Army, professional football and basketball player, furniture salesman, aviation instructor for the New York police force, gymnastics and Charleston dance instructor, and finally one of 609 other applicants for the job of announcer at old WJZ. John S. Young graduated from college and flipped a coin to see whether he would follow law or write the great American drama. Playwrighting won but his play couldn't find a producer. Disappointed Young tried out for Radio and here he is. Bill (W. G.) Hay was a successful vocal instructor and piano merchant until roped into Radio announcing to fill out Radio programs at KFKX, in Nebraska. Then the fans wouldn't let him desert the mike. Henry M. Neely, the "Old Stager", was drama critic, arctic explorer, seaman in Uncle Sam's navy and Radio magazine publisher before his magnetic Radio personality was discovered. Sen Kaney, one of KYW's first announcers, practically grew up with Radio.

Vincent Sorey wandered all over South America playing his fiddle, learning folk songs and singing for his supper.

What Louis A. Witten, guest announcer for CBS, did before Radio is not known to the writer, but it is common knowledge that he broke into it as announcer at a small station in Patchogue, L. I., some six years ago. Neel Enslen, of NBC, is an Ohio State University graduate who was taken under the wing of George Eastman, the music philanthropist, along with eleven other singers, in order to start an American Grand Opera Company. For a while he taught piano and voice in Chicago, next he starred in an opere and finally in February, 1929, he w to New York for further musical st and to sing in many of the import churches. In May of that year he granted an audition by NBC and one of the first announcers to qua without previ Radio training any sort. Ke Keech, who gradu as a chemical engi who knew how sing and play the ukulele and m dolin, decided make his living an entertainer. A years of doing more or less, du which one of high spots was te ing the Prince Wales to strum a he decided to tr break into NBC a performer. broke in all r but as an annou a job he took seriously but at which he made g Norman Brokenshire, ex-soldier and mer mechanical draftsman, was sittin a New York park reading the want-ad tion of a newspaper when his eyes that WJZ was in need of an annou "experience not necessary". He and other young men applied, but Broken was selected.

Channon Collinge supported himself while studying music by commercial art work—he was good at that too.

Most of Radio's masculine star song trained for singing early in lif not for the unheard of broadcast r but there are some exceptions and o with interesting pasts. Among the Frank Luther, NBC tenor and memb the "Men About Town" quartet, rode herd on the Kansas prairies he was ordained as a minister. The marriage required more money th minister's remuneration, so he tool professional singing. Theo Karle, tenor, punched cows on his father's r until he was eighteen. Wilfred G NBC soloist and bass of the Rev was in Alaska with the salmon fle representative of a salmon packing pany when the gold rush started. I James, NBC tenor and another Re failed by a point to become a cad West Point, so he became an engi This profession he continued until fr persuaded him to take up singing.

Billy Hughes thought he would wall street operator until Radio cla him. Darl Bethmann, NBC bari worked in Pennsylvania steel mills to money with which to finance a mu education.

So, you will see, many of the pr favorites of the dial had as common beginnings as perhaps many of you will be reading this article. Non them expected to be bigtimers in R It just—happened.

Wuxtry!

Brokenshire

Elected Mayor of Mirthquakers

THIS is Inside Story No. 1 on the "Making of a Radio Program." Written because Anxious Letter Writer and Mr. Vox Pop ask, "Do the Presidents of big business Corps. scratch their noodles and wonder, 'Will a soprano or a ventriloquist or an animal act sell more for us?'" Do they worry about what you like, Mr. Vox Pop? Of course.

You hear the Mirthquakers program now with Brother Brokenshire and Brother Macy. But only lately the Garcia Grande cigar company wondered what Mr. Vox Pop likes and staged a contest to let Mr. V. P. and the rest of the Public vote. Did the listeners like Norman Brokenshire as an announcer and M. C., or did they prefer him in bigger doses as Chief Entertainer? Everybody was invited to vote by mail.

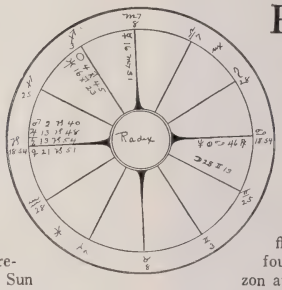
The election was crooked, because every ballotteer was paid. One cigar was the bribe. But one party was as black as the other was burnt-corked, so neither demanded a legislative investigation.

Faster and faster came the votes! If all the mail ballots in the station mail bags had been piled end to end and the ink squeegeed out and used in a rain machine there wouldn't be any drought problem for the farmers. But the result was apparent from the first. Norman Brokenshire (right) won, hands down, with the second man on his ticket, Everett Macy, pulling another record-breaking vote.

Mr. G. Grande heaved a sigh of relief, put Norman and Everett to work in a padded, sound-proof studio where the gags would rebound harmlessly and the "Mirthquakers'" result can be heard via electrical transcriptions any day now via WOR in New York, WFBM in Indianapolis, or if that doesn't suit you, try WHK, Cleveland, WSTP, Minneapolis, or WFBR, Baltimore. Welcome back to Radio, Mr. Pioneer Brokenshire! We're glad to hear you again.

Abe Lincoln Was a Rail Splitter but Norman Sweeps into Office on Reputation as a Side Splitter—Everett Macy (Left) Cleans up in Second Place on Ticket

Ted Husing



May Become President

If Blustery old Planet Mars isn't Talking through his Helmet, this Boy may Land in the White House!

By Peggy Hull

Here's a chart of the dusty diamond which to Ted is more thrilling than all your sparklers. With his eye on the ball, his pencil follows players in their course from base to base.

TIPS from Ted Husing's horoscope.

Don't call him by his first name the first time you meet him.

Don't step up to him and slap him violently on the back to show how glad you are to see him.

Don't call him up at any old hour and invite him to a party just because you have met him a couple of times.

And don't think because I have given you these tips that Ted Husing is a snob, a highbrow, or an orchid. He is just darned exclusive, extremely conservative and abhors familiarity.

Where did I get my dope? Right out of the natal chart which you can see for yourself. That funny little curlycue at the center of the left side of the circle is the sign Capricorn and it is this sign with Mars, Jupiter, Saturn and Venus posited therein which makes Mr. Husing that way. He can't help it and as a matter of fact there is no reason why he should. Surely, in spite of his exclusiveness, he is one of the most beloved sports announcers on the air. It may be unusual for a man who goes in for all the outdoor sports to be formal and reserved, but after all, that expresses Ted Husing's personality. He is unusual. Oh, so unusual!

From an astrological standpoint he has a remarkable horoscope. His Sun in Sagittarius gives him a jovial, genial disposition. A love for animals, horse races and sporting events of all kinds. The Sagittarians, or those having Sagittarius strongly posited in their charts are the people who really make the sporting world. The position of the Sun also makes it possible for him to talk about sports events with fluency and enthusiasm.

Uranus, the planet of invention and originality, also in the sign Sagittarius emphasizes this gift and augments it by giving him the ability to express himself in a novel way. He has a ready wit, an excellent memory and a gift for talking.

If it weren't for the cold and conservative and exclusive Capricorn on the horizon, Ted Husing would be an entirely different chap. He would wear flashy clothes, conspicuous jewelry and be the life of the party through the simple expedient of being the noisiest person present. But you all know that Ted Husing is just the opposite. Capricorn the sign of the Tenth house, the house of honor, of public position, of ambition, of dignity, strongly [illegible] fluences the rays of t[illegible] four planets on the ho[illegible] zon at birth.

It is very easy to be deceiv[illegible] by the informality of that first nam[illegible] Ted. It is perfectly natural for eve[illegible] one to assume that anyone with the na[illegible] of Ted expects to be called "Ted" a[illegible] nothing else. But it would be far m[illegible] in keeping with his inner nature to spe[illegible] of him, even after you have known h[illegible] twenty years or more, as Theodore!

THE Sun and Uranus [illegible] conjunction give him a public care[illegible] As long as he lives he will be bef[illegible] the public in some kind of work. La[illegible] on it may be politics. When he h[illegible] reached middle age he will find [illegible] thoughts, ambitions and desires turn [illegible] from the sporting world to the m[illegible] substantial and constructive affairs [illegible] state, and if he ever goes in for pub[illegible] office he will make a popular and s[illegible] cessful representative of the people.

At present he has a love of adventu[illegible] a longing for change, an ever pres[illegible] restlessness that makes it difficult for h[illegible] to settle down in one spot. He li[illegible]

d. excitement and sudden
ges. Nothing gives him a
ter kick than a telephone
to catch the next plane for
other side of the nation.
long as he lives he will
act many people and from
alks of life. He will always
ct many, many would-be
ds. They will come from
walks of life and from all
s and conditions. Every-
will like Ted Husing but
Husing will not like every-
. He will be known as a
fellow, generous, agreeable
pleasant to meet but his in-
te circle of friends will be
emely small and carefully
ded. In other words he
have thousands of ac-
ntances and very, very few
ds.

THIS tendency is
ently a safeguard put up by
for Uranus in the eleventh
e, house of friends, to pre-
his undoing through friends.
could be held responsible for
ts over which he had no
rol but which involved per-
close to himself, if he were
kind who mixed easily with
classes. Fortunately for
self and his future he is ex-
ive, for he'll never be tried
murder, or anything else
easant just because he was
nd when the event occurred,
fter it had taken place, or
use the actual murderer's
was found in his apartment.
if you don't think people
get in a lot of trouble by
ng too many friends, or
wing too many persons whose

use they had been visitors
er apartment.
Ir. Husing's later years
bring him much more
sfaction than the present, although
is now in one of the best periods
will experience. His popularity
increase this year and continue
the upgrade for some time to come.
s is a splendid time for him to make
ey, to take advantage of every op-
unity which presents itself and to
serve his assets for the future.
his is his big earning era and he will
perfectly justified in adding a couple
zeros each time he makes a con-
t.
Iars in Capricorn gives him that
ngth of character which amazes so
y who think, having met him a few
es that they know him. He possesses

This is Ted Husing—but MR. Husing to you!

a peculiar quality of character which the casual or superficial observer never would suspect. On the surface he is friendly, almost, we might say, easily impressed. Or at least that is what you think. You might even say to yourself, here is a chap I can wind around my little finger. But try and do it. Beneath that pleasant, affable exterior is solid granite. Nothing under the sun will ever be able to make Ted Husing do or be something he doesn't want to be. Courage, indomitable courage, and will power are the two qualities which Mars strongly posited in Capricorn gives the people who receive its reflected rays. It also gives perseverance, well nigh inexhaustible energy, and patience, so if you have ever wondered how Ted Husing was able to shake the alkali dust of Deming, N. Mex., from his shoes and land right in the middle of the "big time" in New York, there is your answer.

And here are some of the other things Mars in this position contributes to a horoscope. It arouses the esteem of the community and brings honors from public posts so who knows? Perhaps one of these days Mrs. Husing's little boy Ted will be the head man at the White House. Certainly if there is anything in astrology the natal chart would indicate nothing less than presidential material in Ted Husing.

JUPITER, the ruler of his horoscope is also posited in Capricorn. This makes him very ambitious, self-reliant and self controlled. It crystallizes the Martian influence and makes his strength of character stronger. He could manage a large corporation with great efficiency and success. This position of Jupiter is the stamp of honesty and integrity. If Mr. Husing was the head of a big bank it would never fail and neither would a depositor lose a penny in any institution for which he was responsible. Saturn, the ruler of Capricorn occupies almost the same degree with Jupiter. This tends to strengthen the splendid influences of the benefic planet Jupiter and to add to his determination and will power.

Whenever I see a chart with the planet Venus in Capricorn I always remember one of the first examples given me in Astrology. I was at the theater and Ann Pennington, the diminutive and lovely Ann who has been the darling of Broadway for several years, was twinkling her pretty feet across the stage and occasionally giving us a delightful glimpse of a pair of dimpled knees. My companion who was well versed in astrology said, "Ann Pennington has Venus in Capricorn. That's why she has dimpled knees. Everyone with Venus in Capricorn has dimpled knees."

Mr. Husing has Venus in Capricorn but of course, I can't tell you whether he has lived up to this ancient rule of the stars or not.

His Moon in Gemini is significant. It is the one restless note in his whole horoscope. However, Mr. Husing is a fine example of one who controls his stars instead of being controlled by them.

WMBC Broadcasts Buckley MURDER TRIAL

Gerald E. (Jerry) Buckley, prominent WMBC Radio announcer who is credited with the recall of Mayor Charles Bowles. He is also responsible for the closing up of the larger gambling houses in the vicinity of Detroit.

THOUSANDS of persons have listened to murder trials in the courtrooms of this country, but never before have they been able to listen to a real one through the loudspeaker of their Radio set.

Radio station WMBC, the Michigan Broadcasting Company, of Detroit, has made history for itself and Radio broadcasting. WMBC is believed to be the first station ever to broadcast actual word for word description of a murder trial—that of the alleged killers of Gerald E. Buckley.

Known to thousands of Radio listeners as "Jerry", Buckley acted as announcer for WMBC, conducting a daily broadcast from 6:30 to 7 p.m. He was shot and killed on the morning of July 23rd. 1930 when three men entered the lobby of the hotel where the Radio station is located.

Investigation got under way, which resulted in the arrest of a number of suspects. The Grand Jury later indicted three men, Ted Pizzino, Angelo Livecchi and Joseph Bommarito, all of whom have police records. They were placed on trial February 25th, 1931. Testimony in the case was completed April 13th. Tuesday the 14th, WMBC was given permission by presiding Judge Edward J. Jeffries to broadcast the closing arguments of the defense, prosecution and the judge's charge to the jury.

Judge Edward J. Jeffries delivered a Radio address to his audience in the courtroom and the invisible audience of Radio, saying:

"The microphone or the Radio as a means of disseminating the details of a lawsuit probably found its first introduction in the murder trial of Gerald E. Buckley, slain Radio announcer of WMBC, Detroit." While this may be a new thing, it is thoroughly compatible and in policy with the law.

"I cannot conceive," Judge Jeffries added, "of anything more satisfactory than the broadcasting of not only the testimony, but the arguments of counsel and the charge of the court and the entire proceedings, so that people of this city, especially in as important a trial as the Buckley trial, should know what their jury is doing, what their officials are doing, what the officers of the court are doing; so that they too, at the end of a lawsuit, may be able to pass with some degree of accuracy, upon the outcome of the trial."

The facts developed in the trial showed that for several months, Buckley had been giving a daily digest of news, carrying on a crusade to rid the city of vice and racketeers, gaining for himself thousands of friends who were loud in their praise of his fearlessness. Later, [illegible] devoted more or less of his time secur[illegible] positions for the unemployed.

Then came the movement for the re[illegible] of Mayor Charles Bowles.

Buckley severely criticized any pu[illegible] official who had not lived up to his pr[illegible] ise and received various threats, both o[illegible] the telephone and through the mails. [illegible] had exposed the larger gambling est[illegible] lishments which resulted in raids [illegible] padlocks. But still he carried on—[illegible] people were for him and the po[illegible] praised him.

CONFINING his critici[illegible] later to Bowles, who had held office [illegible] six months, Buckley alleged that the [illegible] mer mayor had been in league with [illegible] underworld.

Then came the recall of the ma[illegible]

The grand jury, shown at the right, was composed of eight men and four women. The WMBC microphone in the foreground was the same one used by "Jerry" Buckley during his crusade over the air against racketeers and the minions of vice and crime.

FOR the first time in the history of American Radio, a real murder trial has been broadcast. Jerry Buckley, a friend of the poor and beloved Radio announcer, was slain by gunmen. Nothing was more fitting than that the accused be tried in "full hearing" of that great public which knew him in life

By Ted Dawood

"The Arabian Knight" of WMBC

All photos courtesy of Detroit Times

These three gentlemen from left to right are Joseph Bommarito, Ted Pizzino and Angelo Livecchi, all of whom were accused of killing Buckley. However, all three were found "not guilty" after a jury had deliberated for more than 33 hours.

on his return to the studio from the Hall, where Buckley had broadcast s of the election returns, the Radio ncer received a mysterious tele- call. A few minutes later he was d in the lobby of the hotel. He newsboys crying out an extra. Pur- ng a copy of a paper Buckley re- d to the lobby and started reading count of the recall election.

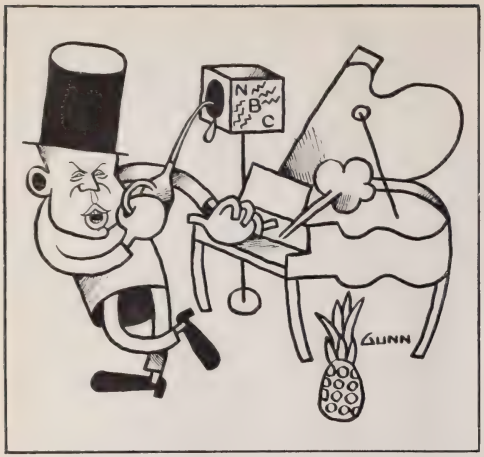
veral minutes had elapsed when the gunmen entered through the side nce of the hotel. One of the men aid to have opened fire at close range behind, the shots taking effect in Radio announcer's head. The other gunmen walked around facing ley and poured a volley of lead into ody. Employes of the hotel, who l the shots, disappeared. So did the s.

commenting on the Radio broadcast- ing of the trial Judge Jeffries said, "Honest judges, honest lawyers, honest jurors, can have no objection to a broadcast of the testimony, the argument and the charge of the court. It is of public concern. It is not only of public concern but is highly beneficial in the protection to not only the state but to the defendants on trial.

"WHEN the people of the city of Detroit are watching or listening, officials are more likely to be respectful in their conduct and more accurate in their statements.

"I want to say further that the sessions and proceedings of the Legislature of the state of Michigan as well as the Common Council of the city of Detroit should be broadcast, so that the people of the state of Michigan and the city of Detroit would know first hand regarding the conduct of their public affairs."

In delivering his charge to the jury, Judge Jeffries gave orders to either bring in a verdict of "guilty in the first degree" or "not guilty." However, after 33 hours and 5 minutes' deliberation the jury, composed of eight men and four women returned a verdict of "not guilty", acquitting the three defendants.



The foreman of the jury spoke through the microphone used by Buckley when he announced the verdict of "not guilty," for the WMBC microphone in the courtroom was the same one used by "Jerry" Buckley during his crusade over the air against vice conditions and racketeers. A new style "condenser" type of microphone was also used in the courtroom to pick up the voices of the defense, prosecution and judge.

Nothing was more fitting than that the men accused of the murder of "Jerry" Buckley be tried in full view of the public who knew and loved the announcer. It was a great achievement on the part of Radio Station WMBC, and listeners from all over the country sent in congratulations to the sponsors of the dramatic broadcast.

They expressed their thanks for the opportunity given them to pay last respects in a new fashion to the memory of "Jerry" Buckley. The general consensus of opinion, as shown in the letters, can be expressed in a few words——

Radio is a great thing, but—the mystery as to who killed "Jerry" Buckley, beloved Radio announcer, remains unsolved.

Broadcastor

OIL

More Squirts and Smears from the NBC Lubricator who Lets Drip a Few Deep, Dark Radio Secrets

By Ray Perkins

MY DEARS, you have no notion how difficult it is for an old dyed in the woof micro-phony like myself to open this thesis without chimes or an opening signature. You know what an opening signature is, don't you, a bright reader like you? It's a cute bit of musical fol de rol that precedes and identifies a program as smell does a cheese. Sometimes a whole festive board of directors of some prominent firm get to wrangling and snarling among themselves for days just because they can't agree on an opening signature.

It was that way with the editors when I suggested having one for this series. The managing editor had an aunt who loved zithers. so he wanted a zither. Then one of the associate editors thought we ought to have a mystery tenor wearing nothing but a silver gas-mask, singing "We're the voice of the Broadcastoroil articles," only we couldn't find a word to rhyme with articles and anyway we were afraid of being sued by RKO because they've used the idea. RKO is related by merger to NBC, in fact it's one of NBC's rich relatives and it wouldn't pay me, as an NBC artist, to offend it. For awhile it looked as though we'd open each article with one of those rip-snorting, razzle dazzle flourishes of brass. You know—blow your hat off. Well, I and the editors got to thinking that people don't wear hats anyway as a rule while reading this type of magazine, so we dropped that idea.

We even got as far as engaging the band. It was a band of low frequencies, and we consulted Arthur Pryor about engaging it. The real reason why we abandoned the flourish in brass for our opening signature was because it was a full brass band and nobody felt equal to flourishing it. And besides, by purest coincidence. someone had fired the band a week before we started this series. Even the bass drum was all lit up by a roaming candle, and had a picture painted on it of an Indian girl bending over a waterfall, which made a mighty pretty effect at night, I can tell you. That bass drum will be valuable when Television arrives. The drummer had got so expert that he could hit the drum, manufacturing the highest quality bomboms, with *or without* striking the Indian girl where she bent over, depending on the mood of the audience and the requirements of the music.

(Note to our readers: Kindly do not send insulting or disrespectful letters to the author of this series. The mere fact that you have paid a paltry 25c for this stylebook of studiodom hardly warrants unbridled license on your part. Do you want to hurt my feelings? Of course you don't. There, there now, dry your tears and we'll forget all about the four scurrilous invectives I received since last month's article.—R. P.)

SO THAT'S why we don't have an opening signature at the top of this essay, though why I should pour forth these intimate confidences to you who are perfect strangers, I cannot understand.

The signature I use in my Radio lectures as Prince of Pineapple is not the same as that with which I sign checks, there being no rubber in my programs, despite the tendency of Ed Strong, control engineer extraordinary, to snap back at me. When we started my programs, the sponsors (whose pineapples are the Hawaiian, not the Chicago variety) agreed that we should open merely with a chord-in-G. The NBC for some time h out for G-and-a-half, but we h them down. But alas for the l laid plans of mikes and men!

The very first time we went on air, just as we were ready to give Chord-in-G, Ted Jewett, announcer p appletentiary to the Prince of Pineap got nervous and hollered "Good M ing Everybody." Then with a naug toss of his head, quicker than you c say your prayers, assuming that you do, he was scampering through the o ing announcement fast as his little to would carry him. So we never used Chord-in-G and if it's of any use to you're welcome to it, because it's as g as new.

FOR a long time we lowed the Parnassus trio on the Never mind wondering what Parna means. Neither do I. For heaven's s if you're going to take time out to fi out one little word, you'll lose the of this whole treatise and then how you expect to get anything out of Any words you don't understand, skip. Tush, child, what's one wor 1500? (Note to editor: that's jus rough estimate, but I'm sure there's n than enough.) Well anyway, the nassus Trio is made up of three of best looking stringed instruments ever saw, playing on girls.

For love interest they use two can named Dickey and Blue Boy, tenors, who are paid to sing by p work while the trio plays pieces. never forget my embarrassment one when I stopped to ask Dickey if he k of a canary whom I could get to h an egg. Olga Serlis, head girl of trio, insisted on giving me the bird. been given the bird by experts an

'TenSHUN! Guess ATTention would be the thing you'd be doing the most of, what, Doughboy? Look at those lucky goose-steppers! O-kay, Colonel Anita (maybe she's a general)—and here's to you over the Musical Cocktail on the CBS from California.

Lee Morse

DON'T blame this little lady if she seems to have a predilection to whoop a little now and then. She grew up next door to an Indian reservation in Idaho. Her well trained soprano voice can put a gold tip to a nice lady-like whoop. She's only five feet tall but packed sole to crown with the dynamic energy of her famous ancestor, Zach Taylor. Besides that she's a minister's daughter and her two brothers opposed each other in race for governorship of Tennessee. She sings on CBS programs from New York.

Welcome Lewis

Lew Conrad

SOMETIMES you may wonder how these two popular NBC stars manage to infuse so much sincerity and enthusiasm in their delightful croonsongs. But, now that you have seen this picture, you will understand. It is only fair to state, however, that the picture originally showed a microphone as a third party directly in front of Miss Lewis. When Mike, Welcome and Lew get their heads together your dial is immovable Their fame reaches from coast to coast.

Jesse Crawford

LIFE is just one key after another in the Royal Crawford family. What with being Poet of the Organ and everything at CBS poor Jesse must help eke out an existence by rhapsodizing short stories on a typewriter. His lovely wife serves tea as his fingers strum over the keys and Louis A. Witten scowls at the script he has produced.

Andy Sanne

BIG time on air at NBC-N. Y. is an item in the life Mr. Sannella who fi his greatest thrill home in the attic wh he talks with hams Australia and C Town over his 150 v transmitter. "Sax" cat stands by to abs any stray static.

Ben Alley and Ann Leaf

IS BEN ALI an Arabian sheik? Mebbe so, but not our Ben Alley of CBS who lolls thus casually over the windshield of Little Organ Annie's organ. You know them—Ben of the tender and bewitching tenor voice and Miss Ann Leaf of the lyric pipes.

Gloria Caruso

ENRICO CARUSO took to his grave the greatest tenor voice the world has ever known. But perhaps his little daughter, Gloria, may some day become similarly renowned. Here she is with her mother waiting to broadcast at WABC for the American Child Health Association.

Ann and Phil Brae

THERE'S no use g to account for ure that lurks in a oiled saxophone. ld Ann and Phil who play the parts retired vaudeville at CBS, N. Y., ng these ducks into ing they're cana- The quacking cho- was heard from e to California.

Colonel Coffee and Captain Bean

JAVA hear these two old sidesplitters at WTMJ, Milwaukee? Such predicaments! They wanted to adopt a baby. Then decided they would have to have a mamma for the baby. Colonel Coffee is negotiating with a matrimonial agency as we go to press. Who'll be Colonel Coffee's sugar and cream?

Floyd Gibbons

HELLO everybody! Just got a cablegram from a little town up near the Arctic Circle in Siberia. Think I know about where it is but guess I'd better roll out the old world and take a look—yep, here it is, and I think we're going to get a lot of hot dispatches from this sector before another Sunday night comes around—Jimminy rickets, Floyd, hope we get to hear you every night again.

Gertrude Lawrence

THIS English comedy star was one of the delightful entertainers on the Vitality Personality programs over the CBS a few evenings ago. Remember? If you saw her on the stage it may have been in Charlot's Revue, Oh Kay, Treasure Girl or Candle Light. Her voice was a Radio find.

Georgia Backus
Teddy Bergman

IT'S up and away if you try to keep all the dates mapped out for the boys and girls who put on the Henry George programs. They are supposed to be in a different city each Tuesday night—and with the aid of a good Stout pair of wings they are, thank the heavens!

Adele Ronson

IT TAKES bone and sinew as well as laryngeal power to properly function into the iron throat of the microphone. So row, row, row, Miss Adele Ronson, and may your biceps bulge big enough to lift that spiked ashcan over on the other side of you. Mr. M. H. A., note the zeal of this little lady to be well worthy of the NBC dramatic staff.

Alois Havrilla

WELL, well—and where are you going, Alois Havrilla, all dressed up in your feathered bonnet, fancy vest and velvet pantaloons? "Going to Czecho Slovakia, sir," he said. That's where he was born. Click! And he was there via NBC microphone, talking to the home folks in their own language. He is just now getting his applause mail from Prague

Puzzle Man

THEY'RE putting puzzles on the chains now, but here's the man who started it. Elmer Hanson at KFJM, Grand Forks, N. D., casually dropped a few puzzles in the air and look what happened! Now he's puzzled to know how to get out from under such an avalanche of mail. Is your answer there?

Glenn Sisters

MANY listeners write for information concerning the Glenn sisters at WLW. How do they look? Are they really sisters? The answer is, yes. Ruth is the red haired young mischief on the left. Catherine, with the light brown hair, smiles at you from the right. Both have blue eyes and they harmonize as well in appearance as vocally.

HARDLY need to introduce you to Sally if you happened to see Once in a Lifetime. Besides her musical comedy fame she is well known to Radio audiences in all the major cities. The picture was sent to Radio Digest from WIP-WFAN, Philadelphia

Sally Phipps

Rondoliers
(right and below)

RADIO DIGEST takes special pride in presenting to you The KDKA Rondoliers and their director, Zoel Parenteau, who present a special Radio Digest program each week over this First Radio Broadcasting Station of all the World. Letters complimenting them have come from all three Americas.

Arkansas Woodchopper (left)

FOR years and years Luther W. Ossenbrink, famous as the Arkansas Woodchopper, has been entertaining Radio listeners from WLS, Chicago. He's either guitaring in the Barn Dance or seconding fiddlers with his banjo. "Arkie" also calls off the old square dances.

Helen Nugent

LOVELY Helen Nugent is one of the most promising stars o
he CBS staff in New York. She sings in five languages and she ha
vhat the directors call a perfect microphone voice, which equips he
it only for Radio but for the talking pictures. You may have see
ur recent Radiograph about Miss Nugent.

Zeta Harrison

NATURE so designed this harming little lady that she fits in any kind of a program at KPO an Francisco. She can even do crobatic dancing, but she prefers ilating the Children's Hour. She elongs to the KPO Dramatic Guild.

David Rubinoff

THIS virile director is so radiant with energy and unceasing activity we can't even begin to give you an idea about it here, so just take a look across to the opposite page and read what a hard working interviewer has to say.

A Busy Day with "Dynamic" Rubinoff

"Hurry" He Prods the Slow Taxi-Driver———
"R-r-r-rrr" Screech the Sirens of Motorcycle Cops who Escort the Batoneer from Theatre to Studio and Back

By Harold E. Tillotson

THE irresistible music of the youthful maestro David Rubinoff, emanates from the d speakers in millions of nes every Sunday night. Many of se listening in have seen and heard binoff in their favorite motion picture atre. Many more, who have not had s opportunity, may now hear his music ough the magic of Radio.

A "human dynamo" is this fellow binoff. As we sit in our easy chair, ening to his programs, we give very le thought to the hours of work that has spent in arranging his program.

The writer had been told of the un- sing energy that Rubinoff possessed. ey even told us that he slept but six rs a day and spent the remainder of t time at hard, strenuous work.

Skeptical of these reports, we decided pay a visit to the NBC studios and d out just how hard Rubinoff did rk. Before we describe it, let us say t we are perfectly willing to go down record as saying that David Rubinoff one of the hardest-working individuals t we have ever seen. And so to the dio.

First of all, we telephoned NBC to d out the time of the Rubinoff re- rsal. We fell out of bed when we nd that even though it was eight lock on Sunday morning, Rubinoff and men had been at work since seven! essing hurriedly we ate breakfast on run and arrived at the studio at ex- ly eight-thirty.

WE found Rubinoff, sur- nded by a large group of musicians, essed in an athletic sweater and sport users. We made particular note of sweat-shirt that he wore underneath sweater. But here he was standing in nt of his men, his baton waving in air, then tapping on his music rack, then in the air again like a magician.

Another group of musicians entered the studio and took their places throughout the room. It was then that we first noticed that Rubinoff had merely been rehearsing the brass and reed sections of his orchestra. Upon inquiring the why and wherefore of this procedure we were informed by the drummer that Mr. Rubinoff always rehearsed each section of his orchestra individually. Well, here is a new one. We had never considered this method of rehearsing an orchestra. But it sounds logical doesn't it? By rehearsing in this manner, Rubinoff knows that each section can play its respective parts perfectly.

THE maestro continued rehearsing each section separately until he had gone the rounds of the entire orchestra. He then tapped his baton on his music rack. I believe there were five taps. This evidently meant that every member of the orchestra was to join in on the next bit of rehearsing, for each and every one of them quickly took his place at his instrument. It was then that we could see the value of Rubinoff's idea of rehearsing the sections individually.

The entire orchestra swung into the first chord of the overture. All eyes were virtually glued upon their conductor.

Thus, did Rubinoff go through a final rehearsal for his evening Radio program.

Wiping the perspiration from his brow, the maestro rushed over to us and invited us to lunch. Incidentally he told us that his time would be rather limited, but when we informed him that our time was his and not to let us interfere with his regular routine he grabbed us by the arm and, with his other arm picked up his $10,000 fiddle, and yours truly, Rubinoff and his violin were in a taxi the next minute darting through the heavy traffic of Fifth Avenue. Rubinoff shouted to the driver, to hurry "I have twenty minutes to make my next overture at the theatre," said the violinist, "and I have to change clothes."

Arriving at the theatre, we found Al, Rubinoff's faithful valet, waiting with coat, trousers and shirt in his hands. The conductor changed quickly and rushed into the pit just as it was slowly raising. We scurried around through the side door and watched him conduct the overture. And, if we had thought Rubinoff was working his hardest in the studio, we were wrong. No sooner had the pit raised than he swung his magic baton and conducted his theatre orchestra with all the vim, vigor and vitality of a prize-fighter going through his training exercises.

The overture finished, Rubinoff suggested lunch. It was then two o'clock and we felt the need of nourishment. And perhaps at last we could sit down for a few minutes and talk quietly.

BACK to the dressing room we hurried and Rubinoff grabbed his coat and we rushed across the street. To a fine, big restaurant where we could sit down for an hour or so and eat slowly and talk at leisure? No siree! Across the street—but not to a big restaurant. Into a sandwich shop we dived and, much to our surprise, we found that our orders had already been taken. Al, the valet, had ordered over the telephone.

Before the waiter was halfway through, Rubinoff was folding his napkin and lighting a cigar. Sensing our apparent distinction as a procrastinator we hurried through our meal and no sooner had we drained our coffee cup than Rubinoff said

(*Continued on page 89*)

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

THE story of William Paley, President of Columbia Broadcasting System, is the story of a young man who had a business and wanted to advertise it, and who ended up by buying the advertising medium and letting the business go. The business was the Congress Cigar Company, the advertising medium was the Columbia Broadcasting System.

William Paley's father was in the cigar business, and the boy had been studying tobacco from an early age. When he was only eighteen his father left him in charge of a just-started branch factory in Philadelphia. Young Paley weathered the difficulties of organization, a general strike among the workers, and soon had his branch producing as many cigars as his father's factory in Chicago.

For the next three years he studied at the University of Pennsylvania. Upon graduation he entered his father's business, as he thought, permanently.

But now advertising enters the picture. Radio was in its early stages. Mr. Paley knew very little about it, but it struck him that here was a new method for telling the world about Palina Cigars.

So impressed was he with the results of the Radio campaign that he decided to buy the organization which had made it. CBS at that time happened to be on the market. Mr. Paley bought it, took a three months' leave of absence from his cigar company, and planned to reorganize the Radio company in that time. He had every intention of going back into the tobacco business.

So much for the plans of mice and men. Mr. Paley, although he is still a director in his original company, has never gone back to active management. To him Radio brings a thrill and fascination that nothing else can.

CBS, which had sixteen stations when Mr. Paley bought it, now has seventy-seven. Its chief executive is particularly interested in the American School of the Air, and in international broadcasting. He feels that Radio is the greatest medium we have for the development of international goodwill. Although not a pacifist, he has all the energy of a missionary when it comes to ways and means by which nations may be brought closer together.

Columbia's President is a very shy man who dislikes interviews and shuns publicity of any kind. He has made one speech in his life and swears it will be his last.

He is a young man, not yet thirty. He does a tremendous amount of work without seeming to. He has already that ability which so often comes only with age—the ability to delegate authority. Results are all that count with him. Methods h leaves entirely to the individual.

He never broadcasts. He says he i microphone-shy. He has written article for such magazines as *Nation's Busines* the *Yale Review* and *Radio Revue* (no combined with RADIO DIGEST). H only hobbies are book collecting and t theatre.

He is a bachelor and lives at 480 Pa Avenue.

As to the future of broadcasting a television, he refuses to make prediction

William Paley

Lee Morse

(A full page rotogravure picture of Lee Morse appears on page 34)

LEE MORSE. Lee Morse, of the de sad voice. Red hair. Peaches a cream complexion. Five feet. One Hu dred Pounds. Looks all of nineteen a a half. And yet she's been singing a acting, as she says, "for years and ye and years."

Want to know her secret for keepi young and beautiful? No, it isn't a special kind of tonic, exercise, or fa packs. Nothing so simple. Her recipe more glamour, and by glamour she mea change, excitement, interesting things do, the expectancy of something thrilli just around the corner.

Certainly the road she has traveled her own life has been glamorous enou —a road that has led her from an Ida ranch, through vaudeville, stage a movie engagements, up to her pres position as one of Columbia's featu artists.

"If it were possible to do it," says M Morse, "I should start the movement put more glamour into people's lives, pecially women's. Most women's d have such an awful sameness. That's thing that ages them. It isn't the we ing out, it's the rusting out that trace the wrinkles.

"And yet," she said with a little p zled smile, "just how would you go ab this bigger and better glamour moveme It's a thing that either happens or doesn't happen. Take my own case. might have spent my days on an Id ranch, but my father happened to t

Floyd Gibbons

on a visit to California. A theatre nager heard me sing, and put me on Pantages Circuit. That was the be- ning of the excitement, and there's n excitement ever since. Good breaks l bad breaks, but always something eresting."

Yet, even on an Idaho ranch I think Morse would have had an adventur- life. She is that sort of person. Her d strikes you as eager, and alert and apathetic.

t is that sympathetic quality which is st evident in her singing. Her voice a note of sadness, of wistfulness, ich is hard to describe, but which is y appealing. Perhaps it is that com- ation of southern drawl and western ng. Her family came from Tennessee, she was brought up in the west.

Her father was a minister, one of those neer missionary preachers. In those ly days, in Idaho, little Lee would e beside him as he made his calls. He ght her the tunes of some of the nns, and they would sing them to- her. This teaching and the songs she rned from the cowboys made up her y formal musical education, which t goes to prove that in some cases a mal musical education isn't necessary.

r Lee Morse has been leading lady with ymond Hitchcock in *Hitchy-Koo* and s a featured singer in the first *Artists l Models*. She has made dozens of ords, and although she now has an ex- ordinarily good diction, she says that when she first started her record making she had to labor over her s's and t's and d's.

She loves Mexican tamales and hates shopping. "Oh, I like the result of shopping," she admits, "but the process bores me to death. I let it go till my wardrobe is in such a state that I literally haven't a thing to wear. Then I grit my teeth and drive myself to tour the shops. 'Spose it goes back to my early training on the ranch. I spent too much time in overalls. Maybe some time the Radio companies will fix it so I can broadcast from that ranch. I'd like that."

Miss Morse's husband is Bob Downey, her accompanist. "Nice, steady person," she says of him—"just the kind I need." She has a young son who has already decided he wants to be a civil engineer, and who, despite his talented mother, can't sing a note.

You may hear her lovely deep voice over the WABC-Columbia network every Friday night on the Van Heusen Program.

Peggy Hull

SHE'S a mere scrap of a person, is Peggy Hull, the astrological lady of Radio Digest and who also gives such fascinating talks about her adventures in Mexico, China, France, and Siberia in the Radio Digest programs over WMCA on Tuesday afternoons. She is addicted to saucy little nose veils and absurdly high heels and frilly feminine dresses. She doesn't look at all the sort of person to be a war correspondent.

Peggy thinks it is a case of heredity plus environment. Her ancestors fought in the Revolutionary and Civil Wars. A minister grandfather gave up the soft life of a rectory in Boston to go live a rough pioneer life among the Indians. Then at sixteen Peggy left the little farm in Kansas, where she was born, to work on a newspaper in Junction City, and Junction City was near Ft. Riley. It was then and there that Peggy learned to love the army.

At seventeen it was westward ho for Denver, where a $15.00 a week job seemed large in her eyes. At nineteen it was again westward ho. This time to Honolulu.

She went to the editor of the paper. Said Peggy, "I want to give you the first women's page in the Hawaiian Islands." Just like that—short and definite. She got the job.

When, in 1914, the European war broke out, she came back to the United States, determined in some way or other to be a war correspondent, and report the greatest story of all time. No way materialized. In 1914 editors weren't sending girls to cover wars.

Peggy bided her time, joined the staff of the Cleveland *Plain Dealer*, took a little apartment with her mother. 1916, came a lovely June morning, the scent of roses just outside the window, the morning paper on the breakfast table, big

Peggy Hull

headlines, "Ohio National Guard Mobilized to be Sent to the Border."

And that was that. Overboard went her safe, comfortable, life in Cleveland. Peggy beat the Ohio National Guard to the Border.

The generals, colonels, majors, etc., who didn't die on the spot finally got used to having her around. She went on marches with the troops. She was nearly captured by Mexican bandits.

In all, she was a year on the border before she sailed for Europe as correspondent for the El Paso *Times*. She was in London four days after General Pershing. She saw the first American troops arrive in Paris.

Her first story was a short, simple one of some English people on the boat crossing from New York. It, of course, had to be censored. Sir Douglas Brownrigg, chief censor of the British Admiralty, took the trouble to write her a letter about her story. He wrote, "After thirty-five months of this war work, I want to say that I have enjoyed your story."

Peggy found out afterwards that it was the only letter of commendation that had ever come out of his office.

Before the war was over, Peggy came back to America, and was sent—this time fully accredited by the War Department, and the first and only woman to be so accredited—to Vladivostok to cover the movements of the American Troops in Siberia for the N. E. A. Syndicate.

(*Continued on page 88*)

Broadcasting from the Editor's Chair

RADIO broadcasters have been a little amused but not altogether surprised at the naiveté, not to say downright irritation displayed by certain members of the American Newspaper Publishers Association during its recent convention in New York. Some of the spokesmen seemed to be running around in a fog, unable to discern the facts or assert them. One thing stood out clearly: Statistics from their Radio committee showed that during 1930 some advertisers had cut their newspaper appropriations moderately, and increased their broadcast advertising appropriations substantially over the previous year.

There was a great deal of stamping around during which considerable stress was laid on the declaration that the newspapers had nurtured Radio through its infancy, feeding it to the public through long columns of "free publicity." And now the blame thing has turned and bit the hand that fed it!

Is it any wonder that broadcasters smile at such comment? The newspapers are not nurturing anything except their own well being. If they print anything about Radio it is not because they want to serve Radio but because they want to serve their readers who are interested in reading news about Radio. Occasionally you will find a newspaper running along on the momentum created by a virile founder which can tamper a little with the news and get away with it. But most newspapers consider it of first importance to get the news, be sure that it is right, and print it. Their threat to throw out Radio program listings except as paid advertising is just about as absurd as it would be to exclude sporting and financial pages because sports and financial institutions operate for commercial gain.

Nothing could be more vacuous than the whine about "free news" to the broadcasting stations. A "free news" flash on the air serves the same purpose as the advance "trailer" showing flashes of a forthcoming picture production at the theatre. The circulation manager is the man behind the "free news" because he is getting free advertising on the air. As a matter of fact broadcasters not infrequently beat the newspapers at their own game. They have been known to put certain news copy down on the editor's desk, gratis, before he could gather it from his own sources.

It is puerile for newspaper publishers to whimper around about Radio. They may be deceiving themselves, but certainly they are not fooling anybody else, least of all the broadcasters. And yet there is an awe, a smothered tread, when one dares to approach the sanctum of the newspaper in a spirit of criticism. Even the strongest broadcasters seem cowed by a long line of inhibitions—"be careful what you say about the newspapers, they can ruin you."

That's more bugaboo. Take them away from the influence of mob psychology at conventions and you will find newspaper publishers just as smart and intelligent as leaders in any other kind of business. And when it comes right down to dollars and cents a newspaper is thoroughly practical. In the first place the publishers have to sell the paper. To sell the paper they have to figure out what will be of the greatest interest to the greatest number of possible readers in their circle of distribution. That's a matter requiring careful study and analysis. What do people talk about on the street corners, on the trains, in the restaurants—and in their homes? Some of the greatest publishers and editors have spent hours day after day wandering about just to eavesdrop on conversations. They seek first hand information about popular discussion.

Then there are certain things that obviously are very much on the public mind. For instance the enormous distribution of Radio receivers makes it obvious that a great many people are interested in Radio. Is there a way by which a newspaper can be of service to this great army of Radio listeners? Can it give them the news of the day as to what they can hear on their receivers for that day—in advance? It can. But the mere publisher says maybe he won't. If the publisher happens to be by instinct a real editor he'll see far enough ahead to follow his instinct and print the news so long as it is decent—and he won't even think of hooking somebody to kick in for the space it takes.

The debate between the newspaper publishers and the Radio broadcast interests takes too little account of the public concern in the matter. The publishers talk of putting the screws on sponsored broadcast programs by cutting them off from free notice and by calling on the Government to make them toe the line with respect to lottery practices.

But the situation is not so simple as these suggestions indicate. If the public wishes to know about these programs, newspapers will publish them since it is the function of newspapers to supply information the people demand. If some newspapers elect to pursue a different course the issue will be determined by popular vote reflected in circulation figures. . . . It is doubtful, however that such a pass will be reached for it is by no means clear that any real conflict exists between newspapers and broadcast stations. The newspapers have sold less advertising space in the last twelve months or more, not so much because advertisers have preferred the broadcast medium but because general business has been poor; and the broadcast stations have sold more time to advertisers mainly because their medium is still in its first growth, a comparative novelty and still affected by dramatic interest. But relatively few large users of time in the air have reduced their space buying to pay the added bills, and few still believe that talk in the air is a substitute for the printed word. At best, with few exceptions, broadcast advertisers look upon the new medium as a means of stimulating newspaper and magazine advertising. To assume that it has any other effect is to assume that the printed page is in danger of losing its place in human life—a thing unthinkable.

RADIO DIGEST has no axe to grind in this matter. Its chief interest is the service it can render to the listener. Perhaps it is less practical than the newspaper, because if Radio pages were abolished from the newspapers RADIO DIGEST would find many, many new readers. But fundamentally RADIO DIGEST is for the genuine welfare of the listener first. And the listener would be seriously inconvenienced if he could not check up his daily program in the family newspaper. In the long run we believe sincere adherence to one fundamental purpose as a magazine will prove to be the best policy. It may be too that nervous newspaper publishers will get over their heebie-jeebie hysterics and settle down to the good old axiom of service to the reader, look bold your Radio square in the eye and say, "put her there, son, you've growed up to be a man. God bless ye!"

Sour notes displease Rudy, so as crooners he strongly believes Amos and Andy would make good black-face comedians. Amos is on the left and Andy on the right of the "Tuneful Topics" author.

Tuneful Topics

By RUDY VALLEE

Who Chooses For You the Ten "Song Hits of the Month"

ere Should Be A Moonlight Saving Time

NOTHING delights my eye more than to see that someone has really scratched his head to dig up some- g new in titles. Whether Harry man or Irving Kahal deserves the it for this clever title and thought eside the point—the fact is they given us one of the most tuneful s it has been my pleasure to talk it.

oming out just at the time when we le our change from standard to day- saving time, it is very appropriate, will probably prove to be quite pop- . Of course, nothing is selling in sheet ic any more, but whether we can ne it on Radio, depression, or just eral disinterest in sheet music, with pianos remaining dust-covered, is be- the point; the fact is, nothing is sell- not even the hit songs. This will do vell as any of them, and unless I miss guess you will hear a lot of it during months of May and June.

t is extremely danceable, especially n played at about fifty seconds a rus, which is about the best tempo for cing, though not always the best for song. There are some songs with the cs fitted to certain rhythms which, if played slowly enough, cause the lyrics sound extremely hurried, but this is one that can be done quite brightly, and for that reason will probably prove quite popular with the dance bands, where many other songs have failed to suit the dance orchestras' needs.

It is published by Leo Feist.

Poor Kid

THE lyrics were written by L. Wolfe Gilbert, composer of *Ramona, O Katerina, My Sweet Adair, Waiting for the Robert E. Lee, My Little Dream Girl,* and a host of others, one of the old-timers of the song world who used to be featured in song contests opposite Irving Berlin at popular Coney Island eating and dancing places. He is a man who knows his songs and who is mainly responsible for the tremendous vogue of *The Peanut Vendor* and the rumba tempos themselves—this is his thought, and the lyric is done extremely well. Jesse Greer, composer of the melody of *Just You, Just Me, Blondie, Freshie, Song of the Fool, Cheer Up, Good Times Are Coming,* and a score of others, fitted the melody to Gilbert's lyrics, and did a good job.

The song is really a "great piece of material", as the vaudeville writers and actors say, meaning that it is a great asset to the vaudevillian as he steps out in the spotlight, with a darkened stage, for a very sentimental type of song to pull at the heart-strings of the theatrical audience. How it will fare on the Radio and with the song-buying public at large is another question, but it is extremely musical and different, and should catch on to quite an extent.

One minute for the chorus is not any too much to allow the singer to enunciate every word perfectly and to linger on some of the phrases, which is one of the requisites for putting over this type of song, though I suppose most bands will hurry through it quite swiftly.

It is published by E. B. Marks, Inc.

The Waltz You Saved For Me

ONE of the most promising of the younger generation of band leaders, in fact, a boy who is often referred to as the "Personality Boy", and who has carved a niche for himself in the hearts of all Chicago people, both young and old, through his Radio and public dance hall work, is Wayne King. At the present time he is just completing his fourth year

at the beautiful Aragon Ballroom in Chicago.

Wayne has surrounded himself with a group of young boys, but unlike so many of the young bands his boys are all really "virtuosi", and when I use that very much-abused Italian term, I mean that they are really capable instrumentalists and vocalists, but added to that they put on practically a show by themselves. They do *The Three Musketeers* song with all the band lined up in front, very much like a male chorus in a musical comedy. Wayne secures all sorts of weird effects, from a lighting angle, a staging angle, and a dramatic angle, not to forget the comedy hokum stuff which is done so well by Ted Weems and Mal Hallett.

Wayne himself, one of the finest saxophonists in the country, plays a beautiful bass clarinet, but especially excels on his alto. His obbligatos are played in the Wiedoeft vein, and his embellishments and tone on the saxophone are something to marvel at. But aside from all these accomplishments at so youthful an age, he is a composer, and among the various songs that he has authored is this waltz, which has climbed steadily up the list of best sellers until it is second from the top in Chicago and fifth from the top in New York—*The Waltz You Saved For Me*.

I had the pleasure, during our visit to Chicago, to be Wayne's guest for an evening, and to have him go through a routine of their wonderful dance music for me. Especially was I impressed with this waltz, which I subsequently featured on my programs, and I hope that I can feel that I have helped bring it into popularity. I am sincerely hoping it will be a Number 1 song for the firm of Leo Feist, which will show New York that Rocco Vocco can pick them just as well in the "big city" as he did in Chicago.

It is a beautiful waltz, especially for the end of an evening's dance. The song is a particularly sentimental and tender one, and the title tells the story of *The Waltz You Saved for Me*.

Please Don't Talk About Me When I'm Gone

HERE is a song which personally I couldn't see when it first came out, but I have learned to like it and have been somewhat surprised to see it climb up in a short time. From the looks of things it will be the outstanding hit in a few more weeks.

You may be surprised when I tell you that we who sing songs "feel" certain songs, and cannot seem to "get the feel of" others. For example, you could hardly picture John McCormick singing *Walking My Baby Back Home*, although he could probably do it, and do justice to it; it is just not his type of song. Although I feel that I could do justice to *Please Don't Talk About Me When I'm Gone*, because of several bad renditions done in a sort of "hotcha" way that were my first impressions of the song, I have an antipathy toward it.

Whether I like it or not, the song is certainly there, at least with the public that buys, because it is doing extremely well, and after all, that's all that matters.

It was written by two young men, Sydney Clare and Sam Stept, both well known to Tin Pan Alley; the former is especially well known to the RKO studios where he has been writing for the past year. Mr. Stept, partner of the firm of Green & Stept, together with Buddy Green, wrote *I'll Always Be In Love With You, That's My Weakness Now* and a list other big hits.

It is sponsored by the house of Remick, one of the Warner Bros. song publishing group, and Joe Keit, its head, may take credit for having picked it. Keit has been picking songs for Remick for the last ten or twelve years, and has certainly picked a long roster of hits. He may take the bow again this time.

If we played it, I think we would give about fifty seconds to a chorus.

Wabash Moon

LAST night, as one of those who contributed to the N.V.A. array of talent at its annual benefit, I felt the chills run up and down my spine as the gorgeous ensemble which the Columbia Broadcasting System turned out to accompany its array of singers, played as a cue for the entrance and exit of Morton Downey, the CBS featured Radio singer, this beautiful melody of *Wabash Moon*.

Morton himself is part-composer, and I am indeed happy, not only at his marvelous comeback into the field of theatricals and Radio, but that he has authored a Radio signature which is also one of the best sellers on songs today.

Morton is a real Connecticut Irishman, coming from a little town called Wallingford, just a short distance from New Haven. Several of my classmates at Yale were Wallingford boys, and from them I came to know a bit about Morton even before I met him. I can remember the days when he sat in the Leviathan Orchestra, waiting for his time to rise and sing in that beautiful Irish-quality voice of his. At times Morton's voice reminds me of a young choir boy's; its high notes are like those rich, childish voices of which the Vatican choir boasts.

For a time Morton seemed to be resting on his oars very quietly; then he began a period of sustaining programs over the Columbia Broadcasting System around the same time as the appearance of Amos 'n' Andy on the NBC chain. That Morton had something for Radio listeners is clearly evidenced by his quick rise to the big-money class, with Paramount Theatres paying him over five thousand dollars a week for his appearances. He is considered one of the greatest delineators of songs on the air today!

Although my own favorite of the air Ben Alley, especially on his Noctu Hour with Ann Leaf at the Wurlitzer gan, yet Morton, with his own type voice, stands absolutely unrivaled quality, pitch, diction, and personali I think I enjoy him even more at his o night club at Delmonico's and noth gave me such a wonderful, pleasura surprise as when he went into an I song one evening at the club when I h pened to be there dining and dancing. is one of the most regular, clean-cut, well-liked boys in our profession, an am very proud of his friendship.

That he has made *Wabash Moon* sin handed was evidenced in the terrific ception he received when it was pla last night, and later on when he sang I hope it sells a million copies for him

It is a beautiful waltz, and is publis by Irving Berlin, Inc.

It Must Be True

ON MY Fleischmann Hour from Rc ester I went into a "rave" ab the Victor record of this particular s as played by Gus Arnheim and his coanut Grove Orchestra. From all rep that drift back to me, and from pe that I know in California, Arnheim the finest dance aggregation on the W Coast, and to my way of thinking, haps the finest in the entire world. may sound like a rather broad statem but I would be willing to back his or ization against any other in any o part of the world. Although I have n seen them perform on the stage to what they have in the way of showm ship, from a pure musical standpoin feel that they are unexcelled.

Perhaps my great admiration for t is increased by the presence of Crosby, formerly the lead in Paul Wh man's "Rhythm Boys", who, in my h ble opinion, has the finest recording v to which it has ever been my pleasur listen. If he doesn't capture all the fe nine hearts in America through his ords, no one ever will. He has the u unique style of singing I have ever tened to since I used to enjoy the rec of Charlie Kaley.

I have a few records put away i fireproof record safe—records which I some day treasure as antiques, and record will be among them. Fron standpoint of rhythm, sheer melody, strumentation, orchestration, and v work, it is perfect!

The record has caused me to go over the song, and only last night I w Arnheim asking him to send me his chestration so that I can play it here week at the Brooklyn Paramount, an our small way try to bring out som the wonderful effects he does on his tor record.

The song is one of two hit songs lished by Freed & Powers, a new

(*Continued on page 86*)

Nellie Revell's GABALOGUE

OWDY, friends, both old and new, I'm glad indeed to be with you, f, perchance, my chats you like, I hope ou'll let me thru the mike, come into your home, and tell of hap- enings where I roam, rom I see, and whom I know, of those ou meet on Radio.

VE just dodged in from Broadway. . . . And when I say dodged—I *mean* dodged. . . . Between the tab- loid newspapers, and the traffic one y has to watch his step these days. A pedestrian starts to cross the t. . . . The lights suddenly change—he finds himself knee-deep in Austin (I stepped on three coming over . . . . And if it hadn't been ne of our much-maligned traf- quad, I wouldn't be here at all. I guess the only way to get he other side of the street is e born there. . . .

hile on my way home from a nee today, my taxi got caught he traffic. . . . Cars of every make and color were stalled block. . . . Impatient drivers n shooting backward and for- l in an effort to find a way out. Horns honking and screech- in every key, and drivers ring in every language. . . . ently, however, the blockade broken and the stream of ic was on its way. . . . I dn't help but think how many ur troubles are just like traffic s. . . .

e lose our jobs and think we never find another. . . . That's affic jam. . . . We think we sick and fear we never are g to get well. . . . That's an- r one. . . . But finally the kade is cleared and again we ier the momentum of living. Three or four squares farther in life, the trouble doesn't n nearly as serious as it once . . .

HOWEVER, since I ame a verbal aerialist, I've ned that street crossings aren't only places where you must ch your step. . . . Radio, for ance, is where you've got to ch your step also. . . . In one adcast I happened to say that, ng to the lateness of the hour, esumed most of my friends had red. . . . You'd think I called them bad names, or told a fib. . . . Letters, wires and phone calls poured in. . . . "What do you mean, your friends have gone to bed", they demanded. "Some of us are just getting up". . . . I all but had my mouth washed out with soap. . . . I'll never say that again.

It's amazing, though, the nooks and crevices that Radio penetrates. . . . I've had letters from towns that I never even heard of. . . .

Well, I was at the game Monday and saw the King of Swat, Babe Ruth, knock out those two homers. . . . While the crowd was cheering and going mad with joy at Babe's second clout in the eighth inning, I started thinking. . . . I was just wondering what that mob of hysterical fans would have done to me if they knew I had once refused their idol a meal. . And when he was hungry, too. . . .

Now, I maintain that I'm not a particularly hard-hearted person. . . . In fact, there are people who think I'm rather tender-hearted. . . . And it would be hard to make them believe that I ever refused a hungry man food . . . but I did, and Babe Ruth was the hungry man. . . . But wait . . . and don't shoot. . . . I can explain everything. . . .

The Babe and I were fellow patients at the same time and at the very same hospital some years ago. . . . The morning he was to be operated on he was pretty nervous. . . . And rather than wait in his own room dreading the ordeal he dropped into mine. . . . While he was there, the nurse brought me my breakfast tray . . . and on it were some luscious strawberries. . . . Babe hadn't eaten for 24 hours while getting in condition for the operation. . . . He spied the strawberries. . . . "Oh, please, Nellie", he pleaded, "let me have some of those berries; I'm nearly starved. . . . "Never", I answered, "Doctor King would kill us both, if you ate now". . . .

Poor Babe Ruth begged so hard I almost weakened. . . . Fortunately, the nurse came in at the right moment to take him away to another adventure. . . . But when I saw him hammer out those homers Monday, I forgave myself for my stony-heartedness some years ago. . . . Had I responded to his appeal for something to eat, the mighty batsmen might not have been here today to wallop in home runs when they are most needed.

GRANTLAND Rice is about the busiest man I know. . . . He is editor of the *American Golfer* magazine. . . . He writes a daily column of sport comment for the Bell Syndicate of newspapers, which goes to 85 papers, including the New York *Sun*. . . . He makes 26 short reel pictures a year on sporting themes, which are released through RKO-Pathe. . . . He contributes a weekly article to *Collier's* Magazine. . . .

(*Continued on page 92*)

EVERY Wednesday night at 11 o'clock Miss Revell takes her WEAF mike in hand and rattles off a good old fashioned chinfest about the great and near-great of Radio and stage circles. On this page you will read some of the things she broadcast in case you did not hear her on the NBC network that Wednesday when you were "just getting up".

Babe Ruth, King of Swat, and Nellie Revell, taken on her first appearance at a ball game after her long illness.

Voice of the

THE AYES HAVE IT
(Stars, Don't Be Afraid To Tell You're Married)

OUR untiring interviewer, Mr. Evans Plummer, who tells "How They Started" in this issue, asked all the big stars their opinion on this marriage question for April DIGEST. Half the stars said they believed the public should be told about a headliner's marital status, half said no. As for the public, well, the ayes have it, 'cause here's what "they" have to say:—

"SILENCE lends assent" we are told in an old adage. Generally men and women marry because they feel that the Great Master of Happiness, Love has entered. There should be no shame if it is true love. Is popularity such a menaced article that people must be deceived in order to hold it? Deceit doesn't last, but popularity will and does last longer if there are no hidden shallows into which the maker too often slides himself.

If I didn't care about Radio as a whole, from Walter Damrosch to the Time announcements, I'd take no interest in this subject. But the average fan feels these people are new friends. Then it is that he is interested in knowing about whether they have happy homes. But I feel the woman or man who lets knowledge of marriage interfere with enjoyment is a FOOL.—(Miss) Betty Jamieson, 635 Stibbs St., Wooster, Ohio.

* * *

SOME of my favorites are married, and that doesn't make any difference to me. Little Jack Little, Morton Downey, Ted Husing—they're all married.—Margaret A. Gimbert, Du Pont Ave., Newburgh, N. Y. . . . As for the crooners that are married, I like to think of them as crooning love songs to their wives and husbands as well as for the public's entertainment.—Wilmay May Bitner, Ligonier, Pa. . . . In my opinion the listener is entitled to know all about the artists who are merely voices. There's no harm in it.—Vera A. Starkey, 1209 Starkweather Ave., S. W., Cleveland, Ohio. . . . Marriage is sacred, and because it is I think the stars should tell. It may save a lot of time and trouble, both for the stars and the listeners. Everyone hopes to reach the married stage some time or other and naturally one can take a fancy to one of the owners of the beautiful voices one hears. So I really think it would be wise to answer the simple question, "Are You Married?" and save disappointments.—Beulah A. Teich, Fresno, Cal. . . . I wouldn't care if Rudy Vallee and Guy Lombardo and his brothers were all married with fifteen children. Their music would have the same appeal to me. I say we like to know about their private lives for we feel nearer to them then.—Mrs. Rosamond C. Andrews, 212 W. 14th St., Palatka, Fla.

* * *

JUST TWO "NAYS" ON MARRIAGE

THE answer depends solely on the artist himself—whether he wishes publicity or not. But leaving that angle of the matter, allow me to take as example a certain beloved soprano; her songs are generally of the sentimental type and her voice is of unusual purity, tenderness and tonal perfection. As yet she is unmarried, and I *know* that untold thousands entertain the hope that she will remain so indefinitely. Her voice has built up an illusion—we know and think of her as ethereal. If she were to marry this would crumble the illusion. She has every right in the world to marry *but* do not publish it to the audience.

In the case of a team such as that of Sanderson and Crumit the knowledge of their marriage tends to enhance their popularity rather than lessen it. But all in all, I quite agree with Lucille Wall's opinions. As Collier's Love Story Girl she glows with romance, and I feel certain that many who hear her wish her to continue in this state of single-blessedness.—Dorothy Lee Glass, 113 Alger Ave., Detroit, Mich.

I say it is an artist's business to please his audience, that being his life work and bread and butter. Why should his home life enter into it? I certainly agree with Ben Alley. My favorites are Wilfred Glenn, Charles Thomas, Lawrence Tibbet, Elliot Shaw, Reinald Werrenrath. I do hope they are all happily married, but it's their business. —Edna E. Dell, 444 Crescent Ave., Buffalo, N. Y.

* * *

'TENTION! DX FANS

LET'S get together everybody and start a "Digest Correspondence Club". I should like still more Radio friends. So won't some of you readers write to me? Prompt reply guaranteed. I have the names of some Radio enthusiasts I should like to pass on.—John M. Hilgers, Middleton, Wis. . . . I am writing to you in regard to my new eight tube set. I began dialing in October and in six months have received 240 stations:—216 in 38 states of the U. S., 11 in Mexico, 8 in Cuba, 4 in Canada, and one in the District of Columbia.—D. Anastasio, 8306 Panola St., New Orleans, La.

* * *

IN READING the March issue I noticed many fine and rare DX records and I would like to add mine. I built a one-tube set four years ago and to date have logged seventy-three different stations on it. In 1929 I logged WENR, Chicago, from California! I have ninety per cent of my stations verified. All reception was on earphones and I challenge the world to beat my one tube set. Come on!—Bill Ray (age 19), 5811 College Ave., Oakland, Cal. . . . I would like to receive letters from listeners about the distant stations they receive and the programs on their local stations—or anything about Radio. I will gladly answer.—David Andrews, 293 Catherine St., N., Hamilton, Ont., Canada.

* * *

A MAYOR CONGRATULATES NELLIE REVELL

HUMOR that contains both real wit and philosophy is seldom expressed within understanding of the masses as well as the classes. This unusual condition has been achieved by Nellie Revell, who to my way of thinking, is becoming one of the outstanding Radio personalities. Over here we are so much interested in her weekly broadcast that I am violating one of my set rules not to write congratulatory letters.—John Pollock, Mayor, Borough of Leonia, New Jersey.

* * *

PICKING THE PULCHRITUDINOUS . .

IN THE RADIO DIGEST Beauty Popularity Contest for April, I choose Miss Loyce Whiteman of KFWB and Miss Laura Lee Berry of KGER as the two best "[illegible] lookers".—(Miss) Grace M. Custer, 24 Clyde Pl., S. W., Canton, Ohio.

* * *

TO RADIO

NOW I am old and gray
Do I sigh softly all the day
And look with dimming eyes
(In memory) back to the sunny past,
And drop a tear now and then,
Wishing I might live it again?
Not any more—not me. At last,
With head-set on, I shout with glee
Once in a while, because that little Radio
Does so beguile each rapid hour—
Or breathe in rapture when the power
Of majestic music grand, swells forth,
And lifts me in ecstasy to heights of supreme:
Or else I close my eyes and dream, a dream.
As old sweet melodies breeze softly by—
That's how it is with me, why should I sig
And I am lame—yet happy all the same
My chief companions now, you know
The multitudes by Radio.
Now listless hours of yesterday
Have taken wings and flown.
Why should I sigh!

—Lettie Francis Bartlett,
3814 Avenue D
Council Bluffs,

PUNK, ARE WE?

I THINK your magazine is punk. I in Pittsburgh and as long as I have getting it, I never saw anything in it at one of our stations. What's the matter? I see is stuff about stations I never he of. (*Ever see anything about KDKA?—itor.*)—Jimmie Fagan, 121 Sixth St., B dock, Pa.

* * *

SEE IF WE CARE

IT IS a pleasure to return your sp offer concerning the renewal for y publication. I wouldn't read the "bolor you publish if it was the last reading m ter left in the U. S.—Fred D. Emory, Bo of Trade Bldg., Kansas City, Mo.

* * *

ANYWAY, WE'RE NOT JUNK

PLEASE publish this reply to Mr. Pat letter:—I read your letter in R DIGEST, and I venture to say I think went too far in saying it is all junk. If had one fourth as much brains in your l as the R. D. evidences by its reading ma you would have too much to allow you to write such insulting letters.—Orrin Case, 403 Clairmont St., Port Huron, M

* * *

WELCOME TO THE FOLD

A MONTH ago I had intended to wr letter of congratulation to a rival R magazine. By accident I discovered a superior one—it was none other than RADIO DIGEST. In my opinion your m zine is to the Radio listener what the phone directory is to the business ma Roland E. Dimler, 118 Patapsco Ave., dalk, Md.

Listener

O MUCH ADVERTISING ON THE AIR?

manufacturer of a product wishes to ace his advertisement he makes it as as possible. While the reading matr which the magazine has been purmay be placed beside it, it is not d up in the text in such a way as to any of the continuity of the story or you read. Why then must we have ncers breaking in every fifteen minutes of the wondrous wares they sell? It es the average listener. Offenders are eneral Electric and Atwater Kent hours, of which are otherwise splendid and table programs.

the other hand the Interwoven Hour Vestlé' and Gene and Glenn are not at ensive. Because while the advertising re it is in the form of news at the break or of a clever song or talk at and finish.

your March issue some one asks about . In this district, which is about ten via air in a south-westerly direction Philadelphia everyone is troubled, not fading but distortion.—Leslie P. Sawn, homson Ave., Paulsboro, N. J.

* * *

PPRECIATION OF RADIO PULPIT EDITORIAL

UST congratulate you on your editorial the Radio pulpit. You have a very conception of what Radio listeners are g for from the Radio pulpit. I have wondered if the preachers and pasvho broadcast realize how we, the uncongregation, read the voice and how we can read the depth of sincerity spirituality of the speaker.

at I have said for the Radio pulpit s also to the singers of sacred songs. songs of Zion cannot be sung as they d be unless the spirit of Christ is felt e singer.—Mrs. M. C. H. Symmonds, and Ave., So., Galt, Ont., Canada.

* * *

AT KIND OF TALL STORY DO YOU MEAN?

S easy to appreciate the difficulty with ich sound effects are broadcast from tudio but when I read that "Over at National Broadcasting Company, real ine guns are fired atop the Merchandise ' it seems to exceed the limit of my nation. Doesn't that qualify for the Story Club?—H. B. Gladish, 829 Fost., Evanston, Ill.

n't be such a Doubting Thomas, Mr. .! Or do you mean it's a tall story se it happens in the penthouse stu-

HELP!

N anyone help me locate some old proams and data I want for my Jessica onette scrap book? First: Old Philco ams listing light opera. Second: Pho-Dragonette in a Mozart costume (publ in old program). Third: *Radio Re*of January 1930 with article and cos- picture.

particularly interested in Mildred in's article on Jessica, in your April issue. It gives a more intimate touch than anything I've found.—Carol de Grasse Wharton, Lebanon Court Apts., Overbrook, Pa.

* * *

R. D. MAKES "GOOD BRIDGE PRIZE"

I MUST tell you a joke. It seems that Bay City news dealers have been unable to supply the demand for R. D., but each promised to let us know when we could get one. Well, Saturday morning our bell started to ring and by night one had been delivered to us from every place we had inquired! Last evening friends dropped in to play bridge and as a special "grand prize" I offered a copy to each!—Mrs. R. M. L., Bay City, Mich.

* * *

ISN'T SHE GREEDY?

STATIONS are adhering more strictly to the rule of giving call letters every fifteen minutes. That's fine, but why can't call letters be given after each selection on a local program? It could easily be done on local programs and would take only a second for each announcement. One thing in the "good old days" of Radio: they wanted you to know what station you were hearing . . . If a program is changed to a different time, I think an announcement should be made so that the listener can hear it at the new hour.—Marian Canniff, 2112 S. Cedar St., Lansing, Mich.

* * *

BOOSTING THE LOCAL STATIONS

WHY didn't you print my letter boosting WPEN? If you have not destroyed the letter I would like to see it in next issue. (*Sorry, Irene, we don't seem to have received it—Editor.*)—Irene Bourgemon, Phila., Pa. . . . Have you heard the good news? Station WLEX in Lexington is being moved to Squantum and will go on the air with new call letters, WAAB. It will serve as alternate key station with WNAC and will be the eighth station of the Yankee network.—Grosvenor Calkins, Jr., Derby Academy, Hingham, Mass.

* * *

HAVEN'T seen my Favorite station, WTIC, mentioned (*Oh, where have you been? See May Pages 49, 76, 77; Apr. 71; Mar. 71; Feb. 39, 72; Jan. 68!*) The announcers; the Dance director, Norman Cloutier; Jane Dillon, impersonator; Mr. Christian Kriens, Musical Director—their programs are a treat. No I am not connected with WTIC, but am an ardent fan.—Ruth Spooner Taylor (Mrs. H. E.), Kensington, Conn. . . . WENR takes the cake as the best user of the ether in my opinion. As long as they are on, I'll be all for them. *Who* is with *me?*—Stuart E. Sheill, Glen Ellyn, Ill. . . . Am very glad to see the R. D. giving well deserved space to Bill Simmons and his California Cowboys of Oakland Station KROW. If any one ever deserved praise it's Bill.—Luella Hampton, 2515-24th St., San Francisco, Cal. . . . Couldn't we have a little more news of the mid-west stations—WLW—the Chicago stations, WHAS, etc. (*Watch Betty McGee's stories and Natalie Giddings' stories—Editor.*) May I say that your magazine is very interesting and enjoyable?—Mrs. Ben Jenkins, 1226 So. 8th St., Terre Haute, Ind. . . . I'd like to say a good word for WLAC, Nashville, Tenn. This station has what I call a perfect announcer. I've never caught his name, but one man on their staff has the most soothing voice I have ever heard.—Marie P., Brenham, Tex.

* * *

BATTLE OF THE BLUES

(SEVERAL months ago the RADIO DIGEST published an article entitled "The Battle of the Blues".)

R. D. discussed quite long ago, a simple thing I know,
Yet it has puzzled me since the first day
It's "Whom do you prefer to hear upon your Radio
Osborne or Lombardo or Vallee?"

I'm getting so "regusted" I don't know what I'm about,
The thing gets harder every passing day.
I guess I'll hire "Snoop and Peep" to ferret this thing out . . .
"Osborne or Lombardo or Vallee?"

To tell the absolute truth, I like all of them, and I also like Coon-Sanders orchestra, Denny's, Bernie's and all the rest. So the Lombardo, Osborne and Vallee fans who have been sharpening their carving knives can put them down again, and the fans of other orchestras may do the same.—Janet Prescott, New Rochelle, N. Y.

* * *

ECHOES FROM THE STATIONS

MAY I take this opportunity of stating to you my sincere thanks for the picture and write-up published in the February issue. It was almost impossible to procure copies of this particular issue—they apparently were sold out before they arrived in this locality.—Frank Anderson (The Ne'er Do Well), Station KROW, Oakland, Cal. . . . I was very much pleased to see the picture of the Woten children in the rotogravure section of the March issue.—John P. de Pagter, WNAX, Yankton, S. Dak.

* * *

IDA MAKES V.O.L. THIS TIME —GET OUT THE GOAT

HAVE bought RADIO DIGEST since last July and like it very much. Of course I enjoy some articles more than others—the ones I like being Marcella, V.O.L., Radiographs and the rotogravure section. I have written to V.O.L. before, but it didn't do any good. Had I written to the four winds perhaps it would have been better. (*See what she gets for being fresh—Come on V.O.L. members, get out the goat and give her a real good initiation.*)

By the way, Ray Perkins' "Broadcastor Oil" in April was a humdinger. And I was certainly pleased to read more of Virginia Gardiner, also in April, for she is a very good dramatic star.—Ida A. Martin, 15 First Ave., Huntington Station, Long Island, N. Y.

* * *

MORE, MORE LETTERS, WE CRY

HOW can we make a magazine to suit you unless you tell us what you like? F'instance how do the new full page pictures appeal to you? Which of our authors are your favorites? What air stars do you want to read about? What do you think on some of the questions this month's V.O.L.'ites put up to you? Go to it, Reader, these pages are yours—simply write, "V.O.L." at RADIO DIGEST, *420 Lexington Avenue, New York.*

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

JEFF SPARKS in the NBC ranks of *Gentlemen Prefer Blondes* gave Toddles and myself the key to the city the other day but the durned thing didn't fit. So we had to climb up through the fire escape. Toddles didn't think it looked very dignified but we had to get in. Hal Kemp was waiting for us and we simply could not be late. We finally reached the NBC studios, Toddles quite out of breath, and ran right into our dear friend Hal. He is exactly six and a half feet tall and is rather thin. We were received in the real southern manner—a mixture of hospitality, cordiality and a big broad smile. Hal was born in Marion, Alabama, 26 years ago—which makes *him* 26, of course, and he got his training in the Boy's Military Band in one of the Military Academies down South, when he was twelve. He was graduated from the University of California in '26. While he was a freshman at college he had his own band of eight pieces—called the Caroline Club Orchestra. He got his Radio start at WMCA four years ago and in 1926 joined the NBC staff, where he has been ever since. Hal weighs one hundred and fifty pounds, has blond hair and blue eyes and is single. He intends to enjoy the rest of his existence on this earth as a bachelor—although he admitted that it was rather *tough* on him with so many pretty girls sauntering in and out of the studios every day.

Hal Kemp

Chatted awhile with Norman Brokenshire the other day. Had just returned from Florida and could tell from his voice, almost, that he was all tanned up with southern sunshine. He is vacationing at the moment and can be heard only on recorded programs and in talkie travelogues. In the fall he plans to announce the Radio Follies program.

Redferne Hollinshead, celebrated Radio concert and operatic tenor, has just returned from a very successful tour through Canada. He is known in the Dominion as the John McCormack of Canada. At the present time he is enjoying a much-needed rest at his home in Yonkers. Had luncheon with Mrs. Hollinshead the other day and she said that Radio listeners who used to tune in on the Majestic Hour every Sunday night when "Holly" sang on that program, are still writing to him and urging him to waft his beautiful melodies over the air again. Mr. Hollinshead, by the way, is a direct descendant of Hollinshead, the historian, whose chronicles Shakespeare immortalized in his plays. . . .

My dear Mrs. L. M. and Louise Bock I'll let you in on a secret about Pat Flanagan. I got it straight from Ruth Betz of WBBM. Pat was christened *Carroll* some thirty and odd years ago in Clinton, Ioway-y. Right then and there as he lay in his crib with the big toe of his left foot in his mouth, he declared in the Intelligible Tongue of the Grand Order of Infants, "Nothing doing on Carroll. It's Pat for me." And Pat he is to his friends and Radio audience. Measurements: Six feet tall—lean: Avoirdupois: 170 lbs. Married? Went and did it last June. Graduate of Grinnell College, fought with 132nd Infantry in France, was initiated as announcer over WOC, and now enjoys overwhelming popularity at WBBM.

Pat Flanagan

* * *

ONCE each week, Mrs. Columbia Broadcasting System washes the faces of her dear boy announcers, scrubs them behind the ears, brushes back their hair and waves them a sweet farewell from the twenty-second floor of their little thatched skyscraper as she sees them scampering off to Dr. Vizetelly. The Dr. is the editor of Funk and Wagnalls' New Standard Dictionary and is acting as private tutor to the boys in the all important matter of pronunciation. Ted Husing and David Ross, the Dr. reported to their parent, had some difficulty with the simple "Rzecyzcyany"; Bob Longstreet got a little twisted on "Srinivasa", and many fell down completely on "Mnemosyne". Awful life, *ain't* it! . . . .

Ever since the untimely passing of Al Carney, I've been importuned on all sides to publish his picture. None is available and the only one in existence is in t hands of his family and they refuse part with it. Al breathed his last January 14th and his death is a gr loss to his friends and the many th sands who loved his organ music o WCFL, Chicago. Sorry about the p ture, Mrs. Sharp. . . .

Jimmie Merrell, a good announcer w at the present moment is *at leisure* cuses me thus: "Being an appreciat reader of your *colyum* I have often served that you have a soft spot foot-loose announcers. It occurred to that you might have a voluminous filled with letters from eager stat officials who desire the services of s and kind program and studio direct and station managers. My experie qualifies me for any of the above p tions." Well, Jimmie, I haven't got t kind of a file exactly. My file is fil with good wishes and I hope that so station which is searching for the servi you can give will espy these few wo and say "Mr. Merrell, you're hired!".

Writes Mrs. Empson of Portla "Tell us what you can about Jack C well at KVOO, Tulsa, and get his pict He's wonderful." And Virginia Br of Tulsa wants pictures of KVOO's nouncers. Sorry, my dears, but he the verdict from Roy Duffy, St Director of KVOO. "Regret inability supply material requested in your let Our announcers are somewhat cam shy. As soon as we can run them d and get their pictures we'll send the sired material." Understand perfe Mr. Duffy, just how these dauntless nouncers from the wild and oily West when they have to face the ter birdie in the camera. . . .

"Give us a photo of Oliver Smi requests Hugh McConaghy of Phila phia. Presto! Here it is. He made first public appearance at the age o that is, the people came around f miles to his home just to hear him When he was five his parents move St. Louis and it was here that he got his first training in music. At ten he was the outstanding soprano in that city—I think that this breaks most of the records of the prodigies. In Washington for a while he was soloist at the

Oliver S

incent Lopez

famous "Church of the Presidents." Later he appeared in the Paris Grand Opera, Opera Comique, and the Chicago Civic Opera. Has been on Radio for four years. . . .

Jinny Peters, you're a dear for waiting patiently e many months. And here's your rd at last. Vincent Lopez! And it ld take pages to tell everything about . First of all he is in the "over 30" s. Brooklyn, N. Y., claims him as true son. He doesn't smoke and 't taken a drink since last spring. perfect host. Reads all of his fan , smells all of the flowers his fem- listeners send him and eats the e-made candy he gets. Neckties run the hundreds. gram. on which he was uest artist, to the St. is Hotel where his own gram was to follow im- iately—but he did it. e you passed the old ns with flying colors. y and write me some our nice letters, won't

Jean Goldkett and Dictators to follow soon. By the Vincent Lopez is not married. How- I wanted to be sure, so I called up Thomas of NBC who knows all sorts things and I asked very chirpingly, ave an idea that Mr. Lopez is not ried. In the first place he spends ey very freely, in the second place, ulps his food down very hastily, and ie third place"— at this, Mr. Thomas, like a man, interrupted and said very wingly, "In the first place, haven't heard of married men who spend ey lavishly—although not on their s; in the second place. . . ." Oh, t's the use. You can't argue with anyway. They always want to get last word. . . .

Couldn't we have a picture of 'John' plays in the Seth Parker program y Sunday night?"

Wade Arnold

es Marian Ladd of rietta, N. Y. Here he nd he's none other than ard Maxwell. The r programs on which ppears are: Mid-Week eration Hymn Sing on rsday; Rodeheaver, lnesday; and Pilgrims Sunday afternoon. Mr. Maxwell appeared in such successful stage productions as *Music Box Revue* and *The Lady in Ermine*. He tired of the theatre and tried his hand at real estate in Mansfield, Ohio, but as that field was not so promising he accepted some concert engagements and then began his mike appearances. He has three degrees, A. B., M. A., and Ph. B., and he wears a Phi Beta Kappa Key which he won at Kenyon College.

* * *

WADE ARNOLD, blond, slim, good-looking young man was busy feeding type to press releases up in the Press Relations Department of the NBC when I saw him last summer. Since then he has become Radio playwright producing those interesting episodes of college life portrayed in the *Campus*, sometimes called *Dick Trevor Freshmen*. . . .

NBC and CBS, dear B. McL, are not engaged in any exchange mart with regard to talent. It is only when the artists are hired by sponsors that they can appear on either chain—as, for instance, Lowell Thomas and the Literary Digest. But otherwise the two networks never exchange talent. Georgia Backus' photo appears on page 59 of the May issue and she is also presented with the Nitwit group in the March number. . . .

What with young summer and trees and bees and hornets—this is a good time to know your birds. And we have bagged one for you, Miss M. Walkes of Winnipeg. The *Oriole of the Air on* KFAB is Harriet Cruise Kemmer who has been with that station since 1924. And as for the Don Hall Rose Trio formerly with WLW they have taken bag and baggage over to NBC according to WLW's publicity director. . . .

Attention! March! Count the NBC announcers, Peggy of Erie, as they go by. Ready, one-two-three—go: Alwyn Bach, Ford Bond, Phillips Carlin, Howard M. Claney, Milton Cross, Neel Enslen, Bennett Grauer, Alois Havrilla, George Hicks, Edward Jewett. Step in line there: Kelvin Keech, Patrick Kelly, Ezra McIntosh. And you there, oh beg pardon, it's Graham McNamee, Curt Peterson, Howard Petrie, Marley Sherris. Now, Jeff Sparks, whose predilection for blondes places a gap between him and Harold Sparks of KFJF. Edward Thorgerson, Charles Tramont, James Wallington and John S. Young. Chicago NBC reports its announcers to be William Kephart, Jean Paul King, Ted Pearson, A. W. "Sen" Kaney and—Wallace Butterworth. And here's for the President's Cabinet of announcers over in the District of Columbia: Herluf Provensen, William Abernathy, Arthur Godfrey, S. P. K. Lewis and George F. Roos. Thanks, boys, you may now relax and go on your way

* * *

MARGARET STARR, former organist of WTMJ, Milwaukee, was in Chicago

Smith Ballew

from the last report and not doing anything Radioically speaking. M. M. of Neenah. Dear Margaret Figer, I've been scouting all over these months trying to locate Jimmy Green for you. And here at last. Vollie. my side-kick receives a letter from Bob of Louisville. Bob writes: "Jimmy Green is right here in our own Brown Hotel, Louisville, Ky., and has been here for almost a month. He broadcasts on an average of twice daily over our local station WHAS. I cannot say how long he will remain as the orchestras here hop around like the proverbial hen on a hot griddle." Thanks, Bob, for the info. I'm pilfering your letter from the V. O. L. and hope you'll forgive me. And what do you mean, Bob, by reflecting on the hints Radio Digest runs for housewives. I can see, you're not married, or you'd see lots of room for improvement in your better half. There's nothing like knowing how to fry an egg without breaking the yolk. The result aside from being appetizing is artistic. I know the Woman's Feature Editor of Radio Digest very well and I know that she has nothing but the loftiest of motives when she suggests a new curtain on the kitchen window or two drops more vinegar in the Russian dressing. So do give the women a chance, Bob, please.

Nat Shilkret

"It isn't possible to tell you how much I enjoy your pages—I read every word, Now—won't you please print something or rather everything about Smith Ballew. He's wonderful." writes Marion Brenton. Well, Marion, t'other day I thithered over to Saltzman's Restaurant in the heart of this great city and over a cup of *tay*, Smith Ballew and I solved all of the world problems. He says that he'd much rather not be an orchestra leader. He'd like to be a big business executive and go out to dinner instead of having to work while others ate and wined and danced. He's only 28 and was born in Palestine, Texas. He's six feet five, has brown hair and green eyes. He spends most of his time recording for Columbia and Brunswick. And my dears, just as I was going to broach the very delicate question if he was married, I looked at my watch, just to discover that I had two minutes to keep my appointment with Nat Shilkret.

Louis Kaufman

Mr. Shilkret looks just like a poet. His face is thin and sensitive and is lit up by mirthful little wrinkles playing around his eyes and the corner of his mouth. His work is music and his hobby is music. And there just

isn't anything else that interests him. He is never too busy to give advice and encouragement to your struggling musicians and will go out of his way to help anyone who shows signs of musical talent. When he was seven he played clarinet solos in a seventy-piece boys' orchestra, and at sixteen he was active assistant to Walter Damrosch. His taste runs to bow ties but when I saw him he wore the regular cravat. . . .

Louis L. Kaufman is the senior announcer of KDKA, the pioneer broadcasting station of the world. With his pleasant baritone voice, graceful bearing and gracious manner, he qualifies well as the nation's emissary of the air. He came to KDKA six years ago and quickly gained wide popularity. Was educated at Penn State College and intended to take up educational work but was thrown into the announcing field quite accidentally. . .

Robert Swan

Jack Shannon of the inimitable *Gossipers*, formerly on NBC, and Helene Handin of the *Troupers* shared their original wealth of talent at a charity ball the other day at the New Yorker Hotel. Harry Hirshfield was master of ceremonies and altogether we had a perfectly gorgeous time. Even now there is still a twitch in Marcella's legs as a reminder of her continuous dancing through the night. Oh, ugh, ouch.

And now the story is out. The chorus of sentimental sighs one hears around Los Angeles these days gets its impulse from none other than Robert Swan, Chief Announcer of KHJ. It's just terrible for husbands these days when they come home and find their wives with that far-away look in their eyes—but what can you do about it? Mr. Swan can't help it if his voice affects people like that. Right down beneath that manly breast of his he's not a sheik. He's an idealist, sincere, honest and all that. He's thirty, has a wife and little daughter. Tall, slender, dark hair and navy blue eyes. After the last program every night, Mr. Swan tucks the station very carefully and tenderly into bed.

Paul Lucas

Mrs. G. B. of Ashfield, Mass., wants a photo of Paul Lucas. And here he is, my dear. He launched forth on his career in Radio as a Radio Editor. George Malcolm-Smith, Director of Publicity over WTIC's way, says that Paul Lucas is boss to six other announcers and that he makes an awfully amiable boss. Is married and he and his wife do lots of entertaining. Lucas writes his own continuities and each week he presents an intimate chat entitled *Behind the Scenes* in which studio gossip is broadcast.

Chatter: Pictures of most NBC announcers have appeared in Radio Digest V. V. of Moores. And "those 'as 'aven't" will be published pretty soon. Sorry Thelma Golden, but John McGovern is just as shy of the photographer as he is of the dentist. Not a single picture of him in sight. Mrs. P. S. L., how could you? Why it just seems as if WJZ and WABC have been getting all the lucky breaks these past few months. And the only April 1930 copy we have is for our files. . . .

Lanny Ross is not on any other program, E. M. Post. He seems to be quite busy as the Troubadour of the Moon. Waring's Pennsylvanians are now appearing in *The New Yorkers*, a Broadway production. Maurie Sherman broadcasts over a Chicago station and Ted Weems can be heard over CBS. All of this for the benefit of Gladys. Virginia Walsh will find a picture of Joe O'Toole on page 73 of the April issue.

* * *

WRITES Gene P. Laffler, "In your article about Ted Weems on page 65 of the February issue you stated that Ted Weems was the composer. I believe that should you glance over the music you will find the composer to be none other than Phil Baxter." When I received your letter Gene, I was quite upset, because one thing that Marcella wouldn't like to do is to rob Phil to pay Ted. So Toddles and I put on our Easter bonnets and made straight for Weems' office. Mr. Zugsmith, his press representative, received us with a great deal of gusto and said he was sorry that there was any misunderstanding about the writing of *Piccolo Pete*. Phil Baxter, he admitted, wrote the original tune and sent it to Ted Weems to be whipped into shape. And certain parts were rewritten by Ted and his personal arranger, Joe Haymes, and then and there the orchestration was made for it that has become so famous. His name does not appear on the music sheets because that was his own wish. So I guess that clears up any little misunderstanding, Gene, doesn't it? Mr. Zugsmith promised to help me out with any little thing.

Just as we are going to press, Carl T. Nunan of KPO, San Francisco, wired Marcella of the unexpected death of Virginia Sedberry who recently became the wife of William H. Hancock. This Radio romance which started in the KPO's studios a year ago had been kept secret until the wedding knot was tied some weeks ago. Their married life promised to be a happy one for th had everything in common. To ha been so suddenly separated from h young wife was a great shock to M Hancock and I am sure that his unfailin courage will help him through this s trial. . . .

Mr. and Mrs. Hancock

Uncle Doty Hobart promises to te off the masks of most Radio stars wh personalities are conceal by very unassuming na So Margaret of Iron quoit and Mrs. Blunda Salina, you'd better k out an eagle eye for so thing about Cheerio. Al Pete are not the Sister the Skillet, Margaret. rotund figures of the S.C appear in the front of t magazine. Julia Sanderson and Fr Crumit are presented in the October is of our Radio Digest. . . .

Everett Kemp

And here, my dear Ruth Adams Agnes is the sage of Happy Hollo Uncle Ezry, or as he is known in act life, Everett Kemp. He's the man a million dollar laugh all right, an can wager that that laugh of his been worth more to him than a mil is to some people we know. Until Uncle Ezry was the leading attraction the Redpath Lyceum and Chautau circuit, but now he has retired to old rickety chair which he expounds homely philosophy.

H. E. Warner

Henry Edward Wa is the most modest R entertainer going. He fuses to allow any licity to be given a him unless the editors RADIO DIGEST act think that he is d something worth while. So the other when dear Genevieve Cain of W sent us Mr. Warner's picture, Managing Editor, Associate Editors, visory Editor, Indi-Gest, Marcella an Technical Editor all sat down to ha conference and to determine if Warner's work was of sufficient im tance to have a place in the sun—I in this column. And with one as we voted "yes". "Uncle Ed" is journalist, song-writer, lecturer, Radio artist. When he's not an these he plays "Uncle Ed" to thous of Maryland children.

Tom Stedman of WCHI came in other day to bid farewell to Radio D Gang including your own Marcella Toddles. He's going to Europe to quer everything in sight—queues China, the King's 'Orses in H'En and the monarchy in Spain. Looks he's going to be mighty busy.

* * *

MARCELLA hears all, tells Write her a letter, ask her any o burning questions that are bothering mind. Information is her middle n

rhythm-making University of Texas boys . . . Steve Gardner's Hoakum Kings, who broadcast from San Antonio's KTSA.

uth Has New Network

FTER seventy years, Dixie has finally seceded from the Union, without a Civil War. It's only a partial cleavage, however, and was reached amicably. A sub-network of the Columbia Broadcasting System has been established, WBT, at Charlotte, N. C., as the key station, supplying ms to nine of the foremost broadcasters of the South. The Dixie Network" will bring tunes and melodies characteristic South and dear to the heart of every man born below the and Dixon line.

ving back into past history, it is interesting to note that J. Gluck, now general manager of WBT and the Dixie rk, was one of the pioneers who assembled the first Radio of the South. Donnell O'Connor, program director of and the network, is another old-timer; he has been in Charlotte several years and New York fans will remember him in early days at WHAM and WOKT, Rochester, N. Y.

The associated stations besides WBT are KLRA, Little Rock, Ark.; WWNC, Asheville, N. C.; WBRC, Birmingham, Ala.; WDOD, Chattanooga, WNOX, Knoxville, WLAC, Nashville, and WERC, Memphis, Tenn.; WGST, Atlanta, Ga., and WDSU, New Orleans, La. Additional stations will take special programs, while, of course, many of the stations' features will still originate with WABC in New York.

Some of the favorite special features of the Southern network are Owen Ogborn and his Wurlitzer Organ on Sunday, Pete Laudeman and His Playmates, on Wednesdays, and the Modernists on Thursdays with their special arrangements of popular tunes. The "Musical Memoirs" hour is another Thursday network feature, one which has been heard before and acclaimed on the national network.

t's heaven—one girl and six men! Joan Mars, soprano and t of the Dixie Network's "Musical Memoirs" hour from WBT.

* * *

BIRTHDAY celebration . . . not long Nashville's WLAC celebrated its fourth anniversary. A fan sent in a beautifully decorated cake which would have done credit to any king's pastry cook. Two "broadcasting towers" were erected on top, made of spun sugar, with "WLAC" in frosting suspended between the towers on a "Radio wave". It was addressed to William Perry and Herman Grizzard, tenor-announcer, F. C. Sowell, Jr., Production Manager. Tim Sanders, Commercial Director, wanted to cut the cake into fifteen minute periods and sell them, but was finally persuaded not to do so.

Canada on Parade

A NEW nation-wide program for Canadian listeners is on the air on Friday nights. The artists who will "parade" each Friday night before the Dominion will include the General Motors concert orchestra, the All-Canadian singers, guest artists and singers, and dramatic stars. Because the presentations over 25 stations will be made by means of electrical transcriptions, opera stars from France will be presented, singing in their native language to the great interest of many French Canadians. Rupert Lucas, popular announcer, will "do the honors".

* * *

ONE of the most novel and humanitarian programs on the air today is CHML's "Sanatoriam program" . . . a whole hour each Saturday morning in which requests from invalids receive attention. The "network" of sanitoria has dubbed itself the "Double Red-cross Network" and includes institutions in Ontario and even in New York State.

* * *

THE Dutch Masters, one of the most popular programs on the Columbia Broadcasting System, is still going strong. Jack Smart, the masculine member of the Mr. and Mrs. team, gives atmosphere to the program in his rôle of Peter Zorn. The program offers sparkling entertainment to Radio listeners.

Chain Gang Chatter

From the Big Studios

By Jean Dubois

Phil Ohmann and Victor Arden pop up again in R circles as the piano duet on the Gold Medal Hour

SHE came to New York just three years ago with only $18.00 in her handbag but with much ambition in her make-up—Eliena Kazanova, violinist of Columbia's "Around the Samovar". And only the other night there were festivities in her honor! They were not held around the teapot, but in a swanky New York night club. The Russian Art Restaurant, where Eliena and her violin are favorite entertainers. Celebrities of Radiodom were there to partake of the hospitality offered by Mr. Herbert of the New York *Times*, who sponsored the reception. Eliena has black eyes, black hair and, of course, a dash of Russian temperament and fire which are reflected in her stirring rendition of Russian and Gypsy melodies.

* * *

ADVERTISERS can think up good names! The newest is the "Kitchen-Tested Twins" for Phil Ohmann and Victor Arden, whose piano dueting has been known to listeners since their early days with Roxy's Gang. Ohmann is the son of a Swedish minister and a classical pianist of no mean fame . . . accompanist at one time to Reinald Werrenrath . . . but neither ministerial heritage nor musical education could subdue his sense of humor. Once when he was solo organist in a church he opened the program with *Yes, We Have No Bananas*. Arden, the serious minded twin, met him when both were making recordings for a phonograph company and they occupied neighboring cubicles. First they tried teaming up at one piano, but legs, arms and fingers became tangled and now they prefer two synchronized grands.

* * *

IT WAS only yesterday that the telephone operator rushed in to me all out of breath to find out if it was true that Little Jack Little had been killed by gangsters and that he was an ex-racketeer. She showed me a newspaper picture of a shifty-looking fellow with the caption "Taken for Ride . . . John Little, Long Island racketeer who was shot to death." I was able to assure her that the unattractive rogue was not Little Jack, whose real name, by the way, is John *Leonard*. He adopted Little when he teamed a vaudevillian named Small. Did know a special mike has been built Little Jack and the other crooning ists? It is a regular mike with a curved arm that has a cup-like arra ment at the end. Mike is placed in of the piano and the arm curves ar in front to reach the singer's mouth.

* * *

ONE woman among 110 men—an doesn't even make the most o opportunity! That's because S Goldner, harpist of the New York harmonic Symphony Orchestra and female member, is happily marrie Eugene Ormandy, CBS baton wielde noted musician. Miss Goldner (or Ormandy) is young, attractive, has brown hair and bright eyes and is s larly modest for a woman who ha tained a position many men would

* * *

FRANK KNIGHT is the man listeners confuse with Ray Knight. But with last names th semblance ends. Raymond is or NBC'S prime funsters and couldn serious if a firing squad lined hi against a wall. Frank has a sense o mor, but his rich, cultured voice is the sort to be drafted for things announcing on the Philharmonic phony Hour and such high-foreheac grams. He was born in Newfoun went to war when he was just twent came back not very anxious to ret the small town of St. John's. Tried come a doctor at MacGill Universit felt the allure of the stage. From to Radio dramatics and announci WABC was only a short step.

All the members of the "Samovar" ensemble turned out in full force and bright Russian regalia the other night for a party in honor of Eliena Kazanova, their violinist.

"Buckeye" Briefs

A Page of News About Ohio Broadcasters

Van Sickle, 86 years young, active newspaper woman ho broadcasts regularly over WIAU, Columbus.

CE VAN SICKLE will be 86 her ext birthday, but she's still an ac- eporter and newspaper woman, old- her work in this country. And she weekly Radio talks over WIAU, bus, Ohio . . . to, of all people, confined in the Ohio Penitentiary. an remember when, just out of , she helped her father set up his ials on the Stephen Douglas debates ore the Civil War. And when, soon she started her career as a small- newspaper correspondent.

rty years ago she was ready to give hen she realized that all she was was will power. It wasn't im- ent of physical efficiency—but lack erest in getting ahead. That real- and conquered, she went to work with renewed vigor. Her voice is and her philosophy of life, strong teresting to the Radio audience.

* * *

THE other end of the age scale rom Miss Van Sickle is Cliff Adams, though he's only twenty-three, is announcer at WKRC in Cincinnati. years ago he joined the station staff as grown in popularity ever since. es—for one year he took dramatic with the Stuart Walker Repertory e, and his hobby is giving dramatic gs.

* * *

EEP OUT—all who would remain single". They're going to hang ign up in the WLW studios, because taff members have wed in the last months. The latest applicants for es were Edward A. Byron, produc- manager of the Cincinnati station, Gertrude Dooley, a leading lady of the Crosley theatre. And just three days before. John L. Clark, general manager, took to have and to hold the former Miss Elvira Giersdorf, a recording, vaudeville and stage star.

* * *

JUST ten years ago "8xJ" started regular programs from the campus of Ohio State University with a market report broadcast. Today WEAO, successor to 8xJ, is considered a leader in educational broadcasting. Much of the credit for its success in recent years has been due to the leadership of Director Robert C. Higgy, who is now president of the National Committee on Education by Radio. Ann Charles is program manager and musical director, and many faculty and student members of Ohio State are heard regularly on programs.

* * *

DANCE MUSICALLY speaking, Griff Morris and his Clevelanders are running away with the town. This clever group is heard through WJAY and since they have been on the air—a little over a year—they can't find time enough to fill all the engagements offered them. Griff himself; Jimmy Ague, the crooner, and Art Young, arranger, are the stars of the ensemble.

* * *

THE Friendly Station of Cleveland, WGAR, has turned aggressor in a war . . . to determine the broadcaster with the staff of tallest announcers. They claim the palm, for the midgets of their group of four are Fred Borgerhoff and Steve Cisler, who come up to the six-feet-and-one-half-inch mark on the measuring stick. Next step up is Fred Ripley, six-feet-and-two-inches, and last of the four is Bernie Strang, who beats Fred by another half inch. Their only complaint is that they are getting hunch-backed bending over to mikes adjusted for artists shorter than they are.

Steve Cisler, by the way, is the lad who worked his way through college by announcing at WLS, and many a fair feminine listener rued the day when Steve traveled from Chicago to Cleveland, out of her set's receiving radius.

Twenty-four feet, five and a half inches of announcers, all of whom are over six feet tall. Fred Borgerhoff, left, Fred Ripley, next, then Bernie Strang and Steve Cisler, all of WGAR.

Mid-West "Folk Tales"

By

BETTY McGEE

Chicago Correspondent

THEY tell this tale of heroic poise over at KYW. One night recently when Phil Stewart was reading the news flashes the mike that the orchestra was using on the far side of the studio went dead. Phil, with rare resourcefulness, picked up the mike through which he was broadcasting, walked across the studio with the mike under his arm, all the while continuing with the news flashes and never missing a comma or a proper inflection. . . .

And another thing about Phil Stewart. He is getting a little tired of being known merely as "the announcer with the voice like Billy Hay's". Incidentally, Bill Hay's recent operation for appendicitis was followed up by a similar operation on Phil Stewart . . . Anyway, Phil decided that he was going to do something that the famous Amos 'n' Andy announcer hadn't done so he took to writing songs, one of which is *The Night That You Were Mine,* probably familiar to KYW listeners. The sequel to this venture on Phil's part was a warning to all embryo song writers which appeared on the KYW bulletin board in the form of a bona fide check for 15c made out to Fred Rose, well known popular song writer—this his royalty on a recent song . . . It's interesting to compare this royalty check with the one for $4700 which Fred received some ten years ago as a *part* of the royalties on *Honest and Truly.* But times for the song writer certainly are changing.

* * *

ITEM—Because Ben Bernie, the "old Maestro" who mingles his wisecracks with the melodies of his orchestra, has developed such a wide national following his time on the Columbia Broadcasting System has been doubled. In addition to his local broadcasts over WBBM, Bernie is now "fed" to the CBS chain each Monday, 10:30 to 11 P.M. and each Thursday, 10 to 10:30 P.M.

Donnie Mack, who directs the "Musical Masters" heard over WJJD, has been before the public musically since he was twelve years old. He has the distinct[ion] to be the first to broadcast the Vi[bra]phone and Vibra-harp in Chicago. [His] style of playing the Vibra-harp has b[een] sought after to such an extent that [he] has been called upon by the manu[fac]turers of the Vibra-harp, the J. C. Dea[gan] Co. of Chicago, to write an instruc[tion] course for the instrument. Mr. M[ack] was on the KYW staff for four years, [a] soloist at the NBC studios, WM[AQ] WBBM, and a staff soloist at WGN. [He] has been with WJJD for the past [two] years.

* * *

WHENEVER he plays *The Pe[ar]l Vender,* Ralph Waldo Emer[son] pioneer WLS organist, recalls his boyh[ood] days in Liberal, Kansas. At the te[nder] age of 11, Ralph had his first job, w[hich] consisted of handling the peanut ven[ding] machine and playing the piano i[n] Liberal confectionery store.

Charles W. Hamp, originator of [the] one-man Radio program and who is [also] said to be the highest salaried microp[hone] "single" in the world, is now in our [midst] at WBBM. Hamp abandoned his rô[le] the "Early Bird" over a coast-to-[coast] NBC network to return to his fo[rmer] sponsor, Dr. Strasska's Toothpaste.

* * *

WALTER PONTIUS, golden v[oiced] WGN tenor, just missed ent[ering] the diplomatic circle. That is, [he] working with Harvey M. Watts, an t[ax]

(*Continued on page 95*)

Smile, Lady, smile! Grace Jane Prince (top) pretty and amiable WJJD staff m[em]... plays a triple rôle there—soprano, pianist and organist. . . . Russ Wildey and ... Van (left to right, above) are known as WIBO's Two Piano Songsters. Do the ... arranging, play the piano and harmonize vocally like nobody's business. . . . Al C... Wedding Bells on the Coast

By

DR. RALPH L. POWER

Pacific Coast Correspondent

THERE'S a "reason why" for the glad note in the voice of Jerry Kilgore, announcer in the San Francisco studios of NBC. The on is his new partner, the former Miss en Altomari of Hollywood, now Mrs. ore. They were married in St. Paul's rch in San Francisco, with Cecil Unwood, NBC announcer, acting as best and Helen O'Neill, NBC producer, as esmaid. They tried to escape would-celebrators of the occasion, but the ure on this page shows how ill they eeded.

nd add to Cupid's victims this station mble. Kenneth Niles, master of ceremies on KHJ's Hallelujah Hour, wed ja Vladanova, lovely young Russian inist of KNX. While not long ago a Allman of KHJ married Wesley rtellotte, the KNX organist. Ken Elvia work on the same programs at J, but who ever said propinquity ds romance?

urth on the recent crop of ceremonies that of John Tofolli, NBC Pacific net rdionist. He was married in Richd, Cal., and the whole town turned for the occasion. He was born in y, but came to these shores as a boy. ds a graduate pharmacist's license and ee from the U. of California, but can e more money in Radio!

* * *

UD OVERBECK, new addition to KFWB's baritone staff, first began to the singing bug when appearing in a student operetta at the Hollywood high school. Later he was one of the soloists in the glee club at the University of Missouri. Before finishing the course he decided the stage was the thing and joined a vaudeville vocal group known as *Three Bad Boys*.

In the course of time the trio got back to Hollywood and, since the talkies were just beginning to break out, they made a four minute short for Vitaphone . . . but it took four weeks to do it. Now Bud blossoms forth as one of KFWB's best dressed baritones and, as such, won't even associate with tenors.

Up in the wide open spaces of the great Northwest, Fred Hartley diligently pounds away at the mallets on KHQ's prize xylophone, although he can play three or four string instruments whenever he has the time and inclination. Married, and with one young son, his hobby is making special music arrangements and in composing light, fluffy pieces for concert ensembles.

KPO's cute little blues exponent, Helen Stone, is pretty much up in the air these days. Not that she is at all ritzy, but because she is an aviatrix, has a private pilot's ticket and hopes some of these days to get a full fledged transport pilot's berth.

* * *

WHAT is this thing called Radio, chanted Ray Nealan. But that was long, long ago. When he was discharged from the army in 1918, he began to follow music as a career, and when public broadcast began to function as such he sang from the old Telegraph Hill station in 'Frisco and from the old KFRC seven years ago.

Now he is with KFRC regularly as a soloist and as second tenor with the Buccaneers male quartet. A native son, out where such individuals are rare, he is not only a resident of the golden state but was born in San Francisco and has lived there all his life.

are on a small balcony (the sailors may have

Leviathan!

By Mark Quest

RKO Pilots Listeners Merrily over Bounding Air Waves on Ocean Liner

er name for it, but I don't know what it is any re than you do). Eight or ten small tables set behind us. The front of the balcony opens a great ball room. On the opposite side there other tables.

Below the balcony in the center, as shown here, see the orchestra which plays for the guests dance after the broadcast. During the broad- the orchestra is spread out over the dance r and the microphones and solo numbers are sented in the far end of the room, the space tially hidden by the two ladies in white who id chatting there in front of us.

Below us at the left there is a parked off section the floor level that extends to the entrance. ere you see an usher receiving a lady and tleman just coming in. You can see a similar quet on the opposite side of the room. Back and above the row of front tables that face into room is a terrace. It is just high enough so t the guests at the tables there may look over heads of those who sit next to the promenade that encircles the smooth, gleaming dancing floor.

The tables are all occupied with gay, chattering folk—beautiful women of the stage and their proud escorts. The walls are paneled with ivory, silver and gold. The suffused light of changing tints adds to the glamorous atmosphere. And now it is 10:30, the hour of the broadcast. The lights dim as in the theatre, murmurs are hushed into silence. The master of ceremonies proclaims the occasion to those comparative few who are present and to the rest of you among the hundreds of thousands who are listening across the continent and to those others who are aboard other ships far out to sea.

Famous RKO stars are announced. Some of them sing, others are interviewed—and all the while there is a breezy banter carried on by the master of ceremonies. Harry Richman, William Hanley, Vincent Lopez, and then Lita Chaplin, Dorothy Stone, Peggy Hopkins Joyce, Irene Dunne, Tom Kennedy—and a score of others appear in the spot as all attention is paid to the ubiquitous microphone. The rest of us who sit at the tables are only incidental background to the great, innumerable audience circled far and beyond the tiny beacon of light that rims this room and even the good ship Leviathan.

From left: Giuseppe Di Benedetto, Giovanni Martinelli, Dolores Cassinelli and G. W. Johnstone. RKO-NBC notables on board Conte Grande, another ship broadcast program.

THE June Bride of 1931 is not any different fundamentally from the bride of grandmother's day. Love is the same yesterday, today and tomorrow, and the bride of today steps up to the altar with the same visions of a glorious future that the prehistoric maiden must have had some millions of years ago. Today she holds in her arms calla lilies instead of the customary lilies of the valley

Cupid's Captives

Should a Bride-to-be Kiss Her Fiancé in Public? Oh, my no! Says Prominent Authority on Etiquette

THESE days we must give undivided attention to the answering of questions about weddings! So that we shall not neglect any ...e of this important subject, let us ... with the engagement. The first ... in the direction of wedding prepara... is, of course, the discovery made ...im and by you that without each ... there could be no future for either ...ou, and you decide to marry. This ... the case, it is time for him to tell ... father or your mother—or whoever ...ur nearest relative—how he proposes ... you together propose—to manage ... financial side of a home for two. ... is, unless such arrangements concern ... yourselves. But even so, he should ...e first possible moment go to your ..., or whoever is the head of your ...ly and tell him (or her) how things ...l between you, and what your plans ...

...t us in any case say that your father ...oves—in short, you are officially en...d. It is likely that before talking ... your father, John has told his own ...nts that you promised to marry him ...d it is possible if (as one person ...e me) you and your father are ...cially devoted you will have broken ... news by saying, "John is coming to ...you tomorrow!" Or perhaps you at ... told your mother. Whether you tell ... or both of your parents before John ..., is not a question of etiquette, but ...ely a question of the relationship ...een your parents and you.

YOU know of course that ...ding in your immediate families has ...ing to do with the announcement of ... engagement to the public at large. ... is there any rule as to when an ...gement should be announced. You ... tell everybody at once or you may ... it a secret for years. It is solely ...uestion of personal decision—some...s a difficult one. For instance, if ... date of the wedding be in the in...uite future, the quite serious point ...olve is whether it is wiser to take ... world into your confidence months, ...perhaps years, before you can be ...ried, or to wait until the day can ...et. On the one hand it is pleasant ...ave everyone know you are engaged, you are asked everywhere together, and you can frankly prefer each other's company, and in countless ways your situation is made smooth. On the other hand, if your engagement is likely to run into years, the unending question: "When are you going to be married?"—especially when you have no idea of the answer—becomes increasingly distressful as weeks and months pass by.

TRUE, anyway you take it, a too long engagement is an unsettled, distracting state of existence suggestive of waiting on a station platform for a train that is delayed for no one knows how long! The ideal situation is when the engagement may be announced almost immediately, and the wedding takes place within a few months after that. Let us say then, that your wedding is near enough to consider the announcement of your engagement in detail. Four or five days before the day of the announcement, you and John each write letters to your own friends and to the cousins, uncles and aunts who have not known about it from the beginning. Engraved or printed announcements of an engagement are socially taboo. In best society, notes announcing an engagement are always written by hand and the outline is practically the same. You, for instance, write to an aunt or a school friend, that you want her to be among the first to know, that you are engaged to John Bright and that the news is to be announced on such a day and please not to tell anyone until then. Of course, if nearest friends and relatives live nearby, they are told personally by you or by him, or by you both together. It is always proper that *he* go with *you* to see your relatives and friends—even if they are strangers to him. But you may not be taken by him to see his family or his friends, unless they have themselves invited you. Of course, if certain members of his family are intimate friends of yours, you would more than likely go together and tell them your news. Or if a member of his family (whom you do not know) is an invalid, it would be proper for you to go with him to see her if the invalid has asked you to.

I'd like to make a rather important point on the subject of when a girl may or may not be taken about by her fiancé, because it is one of the really awkward situations that a newly engaged girl meets. Absent-minded or unknowing women are inclined to say, "John, bring your fiancée to see me!". His only answer sounds priggish, and yet he must say, "I'd like to very much—if you'll invite her." Whereupon the unperceiving woman thinks, "How silly John's priggishness about bringing the girl he's engaged to see me". And yet John was helpless. From the point of view of etiquette, a well-bred girl is not taken—even by her fiancé—to the house of a stranger, without an actual invitation or other courtesy having been shown her.

If Mrs. Older put it this way, "John dear, please ask your fiancée if she won't waive formality and come in for tea on Sunday?", it would seem rather ungracious on your part not to go. And in fact, you would most probably go. And in this day of telephones, it would take Mrs. Older but a moment to send a message of invitation, and not many moments more, to write a few lines on a sheet of notepaper, which would have been graciously courteous.

PROPERLY, of course, all of John's family and friends call on you, either at once, or at latest, on the day of the announcement! It's about time that we came to the details of this. As a matter of fact, according to the very best taste, no actual announcement is made except by the notes beforehand. In a city of size and when the people concerned are prominent socially, the announcement is given to the society editor of the papers. On the afternoon or evening of this day, your mother perhaps gives a tea, or a supper or a dinner or a small dance. If it has been announced in the paper everyone knows. Otherwise, the intimate friends who have been told in advance, tell others who congratulate them, and still others notice that you and John are constantly having your hands shaken, ask what it means, or see for themselves and join the line of well wishers. If notes have not been written, or the news printed, it would be quite proper for your father to make the announcement by proposing

The Ancient and Accepted Order of CRAMMERS

By Frances Ingram

Consultant on Care of the Skin
heard on NBC every Tuesday morning

AND ancient and accepted it is—this practice of cramming. Collegians are not its only members—not by any means. The Ancient And Accepted Order Of Crammers includes initiates from every walk of life.

Not all the members of this order admit their membership. As a matter of fact, not all of them are aware that they are members of the Ancient And Accepted Order Of Crammers. But even those who are unaware of their membership become more active at this time of the year. Letters from them pour in to me every day:

"I'm to be married on the fifteenth of June and I simply must do something to improve my appearance before that time. I have been so busy with social activities that I am simply a wreck. Tell me something to do which will improve my appearance as soon as possible."

"Now that my spring cleaning is done, I want to start spring cleaning myself. You have no idea how dreadful I look. My daughter will be graduated on the twenty-first of June and I want to fix up my skin before I attend her commencement exercises."

And this from an acknowledged crammer:

"Talk about a schoolgirl complexion—mine just isn't. If I'm to do credit to the role of sweet girl graduate two weeks hence, I'll have to do some cramming. I've always been pretty successful in cramming for examinations, so I think I should be able to do some satisfactory cramming for beauty, too, don't you?"

Cramming for beauty—all these members of the Ancient And Accepted Order Of Crammers. And all of them, apparently, have just as much faith in the efficacy of the procedure as the optimistic campus co-ed.

Collegiate cramming is as much an institution as the institutions where it is practiced. Cramming for an examination usually means sitting up all night and crowding enough facts into the mind to answer the questions given in a certain specific test. By cramming, lackadaisical students do sometimes manage a passing grade in a course. Whether or not the information they acquire in this way stays in their minds and is of any ultimate value to them is another thing entirely.

Indubitably regular attention to daily assignments would make cramming unnecessary and in time obsolete in our halls of learning. Certainly students would get more real benefit from their courses if they did eschew the line of last minute only concentration.

And the same reasoning applies to cramming for beauty. The Beauty Consultant can give women advice which, if followed, will clear up ordinary skin defects for a wedding, a graduation, or whatever the special event may be. To do any lasting good, the advice must be followed regularly and consistently.

THE student who is graduated *magna cum laude* is seldom, if ever, a crammer. The beauty neophite who includes cramming in her curriculum is seldom, if ever, elected to the Phi Beta Kappa ranks of pulchritude.

Have you never seen the woman who apparently has discovered a fountain of youth? I think you have—we all know at least one—a woman who stands out from other women because of her beauty and distinction. But have you ever analyzed this woman? Do you know why she seems to possess the elixir of eternal youth?

The most fascinating woman in your acquaintance, you will find, is not in the ranks of the crammers. She has achieved her position not by chance, but by design . . . not by last minute cramming, but by regular attention to her self-imposed assignments in the course of beauty. If you examine her carefully, you may discover that her features are not so regular as you thought—her clothes no smarter than yours. But you can be sure that your feminine ideal has a skin which is smooth, lovely, and radiant.

The crammers buy exquisite and becoming clothes and wonder afterwards why they fall short of the smartness they had in mind. The *elegante* is consistently chic and lovely. What is her secret? It is a simple one and within the reach of every woman. She has a skin which is clear and flawless, and h clothes are more effective for this reas

Skin, you see, is the alpha and ome of beauty. It is the first thing peo notice about you. If you would smart—if you would be attractive—y must resign your membership in the f ternity of crammers and care for y skin with ceaseless and unremitting igence.

AFTER all, anyth worth doing is worth doing well. Cra ming is at best an emergency meas It carries its own boomerang. Take prospective bride for instance. An tractive appearance on her wedding —unless it is sustained—will not gu antee the success of her marriage. C sider the mother who wants to look at her daughter's commencement e cises. It is possible for her to app on her daughter's campus in an impro guise, of course, but she will not do self or her daughter justice unless retains this appearance for longer tha commencement week. And the col girl herself will not make adequate us her four years' training for life unless utilizes the self-discipline which reg attention to daily assignments—be Greek or Beauty—requires. The s girl graduate who will make a name herself—in a career or marriage—is a crammer. Few worth while people

The crammers have their day, yes, it is of necessity a pitifully short It is for them, I think, that the mo expression, poignant though colloq was written—"they don't retain." any rate, this phrase may well stan the epitaph for the members of the cient And Accepted Order Of Cramm

Fashion Formulas

Self-expression for Summer Modes is Decreed by Prominent Stylists—
Cotton Frocks Command Place in Women's Wardrobes

By RUTH WITSON

THE time has come for individuality in clothes, and milady need no longer quiver for fear someone will copy the lovely ensemand interesting effects she has been to create. Every woman wants to different, and the couturiers who the fashion top spinning have deed themselves in favor of a fad self-expression. They believe reen eyes and red hair, they e at deep blue personalities, laugh aloud with joy at the t of the woman whose poise bearing remind them of royal ble. The physical make-up and acteristics of every woman are basis of an idea for a new cose. And these style arbiters t keep their discoveries to nselves; they want to tell yone about them. The imant thing is, they are really g that very thing.

ach Wednesday night the pop- Peter Pan Forecasts present the Columbia network a series he outstanding stylists of the ld to tell American women how express their personalities in r clothes. They give the last l in fashion and suggest how ay be best adapted to express ood or suggest a temperament.

THIS group of broads was opened with a talk from s, by Captain Edward Molyc, world famous designer, who ested gay cheerful colors for spring and summer seasons as dvance fashion note.

e said, "Patterned chiffons and gette, which remind one of a len full of flowers, should have lace in every feminine ward-. They give freshness and va- and will be smart all through summer.

Another note of cheer will be ributed by evening gowns," yneux added, "because women have pretty ankles will be to show them once again. I e designed dresses for dancing end two or three inches above the ankle. Others reach the instep, and, for more formal occasions, there will still be the evening gown that just touches the ground. Women in this way, will be able to wear the length of dress which suits their own individual types."

In a later Peter Pan broadcast, Patricia L. Ballard, fashion expert, stressed the modified silhouette as a style trend. "The Paris couturiers realize," Miss Ballard said, "that American women are going to be practical minded about their clothes this season, so they are discarding picturesque extremes for simpler, more wearable designs. Flares are being restrained, in fact they have a very strong rival in pleats, which give the required fulness but a straighter outline. Waistlines are no longer arbitrarily placed, but are adjusted to the figure of the wearer. Skirt lengths, though definitely longer, do not adhere to any hard and fast rules, but are determined by height and becomingness.

An evening frock of white organdie featuring four scalloped skirt tiers

"THERE are many ways of achieving this individuality," she continued. "Fashions this year have affinities. One fabric allies itself to another, every dress takes a jacket for its mate; the shorter sleeve is united to the longer glove, while color, charmingly fickle, finds its most perfect state in not one, but three alliances. So this is the season to indulge yourself in an extravagant bit of color. The note of contrast is a gay scarf, or the subtle introduction of color in the sash of an evening frock, or a combination of colors in the frock itself, gives the discriminating woman a chance for originality.

"Every woman aspires to be well dressed," Miss Ballard commented, "and this season affords her this exceptional opportunity at a very reasonable cost. For among the many lovely fabrics which interpret our new fashions, cottons are one of the most accepted. The favor shown them in Palm Beach confirms impressions that with the arrival of summer we will indeed be very cotton-conscious. This is the first season that cottons have been versatile enough to cover all the occasions of the day. They serve for tennis and golf, they go to the seashore,

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

While many people are anxious to see television developed and are counting days (months or years) until it arrives Indi-Gest is strongly in favor of forgetting all about it. It will curtail too many of our major industries.

The first industry it will hit and practically exterminate will be that of the explorers who go off into Africa and Lapland and other places where people wear no clothes at all or queer costumes. How do I come to that conclusion? Well, the other day I saw in Indi's favorite paper a note saying that a department store buyer had bought some dresses by television. First thing you know Paris will be televising styles to the Congo and the beauties of the veldt and Darkest Africa will be wearing accordion pleats instead of grass plaits and except for color they'll look just like ladies of Paris, France, or Paris, Ohio. There won't be any sense in taking pictures of them and all the photographers will be jobless.

The next industry that will be hard hit will be the matrimonial agencies. Ladies and gents will demand peeps by television of the prospects with whom they carry on hopeful and marriage-inclined correspondences. The shocks will probably be so great that they won't meet their bills and the matrimonial bureaus will all go out of business.

Warden Lawes of Sing Sing says lonesome convicts are the best customers of those bureaus. They write passionate love letters to single ladies, giving the prison's street address. Imagine the disappointment when the recipients see their romantic heroes televised in stripes!

And Indi-Gest's job will be jeopardized! I believe 75% of my popularity is due to the mystery with which I have surrounded myself. Ladies think I am a handsome Romeo, gentleman think of me as a fair Juliet. When television and telephonivision comes, any fan will be able to call me up and see whether I wear pants or skirts and shoot rubber-bands at me on his or her home receiver.

A VEGETABLE COURTSHIP

A potato went out on a mash,
And sought an onion bed;
"That's pie for me," observed the squash,
And all the beets turned red.

"Go 'way," the onion wept and cried,
Your love I cannot be;
The pumpkin is your lawful bride
You cantaloupe with me."

"Oh, give me one cress," the tuber prayed,
"Then my cherryished bride you'll be;
You're not the only skinny maid
That's currant now with me."

Don't turnip your nose at me,
You know you can be beet;
You think that yam just a sap,
But I can be very sweet.

I'll give you a string o' beans
Full eighteen carrots fine;
So you can rice above your lot
As soon as you are mine.

And as the wily tuber spoke
He grasped the rueful prize;
And giving her an artichoke,
Devoured her with his eyes.
—Mollie Zacharias, Kansas City, Mo.

A LESSON FOR LIARS

From WTMJ:—
An evangelist who was conducting nightly services announced that on the following evening he would speak on the subject of "Liars". He advised his hearers to read in advance, Mark, seventeenth chapter.

The next night he arose and said, "I am going to preach on 'Liars' tonight, and I should like to know how many read the chapter I suggested."

A hundred hands went up.

"Now," he said, "you are the very persons I want to talk to —there isn't any seventeenth chapter of Mark!"—*Mildred S. Olsen, 3014 W. Pierce St., Milwaukee, Wis.*

Weber and Fields:—
Meyer (selling life insurance): Do you know, Mike, that every time I breathe someone dies?
Mike: Vell, vy don't you gargle?—*Florence Haist, Box 157, Lindenwold, N. J.*

Cash for Humor!

IT WILL pay you to keep your ears open and your funny bone oiled for action. Radio Digest will pay $5.00 for the first selected humorous incident heard on a broadcast program, $3.00 for second preferred amusing incident and $1.00 for each amusing incident accepted and printed.

It may be something planned as part of the Radio entertainment, or it may be one of those little accidents that pop up in the best regulated stations. Write on one side of the paper only, put name and address on each sheet, and send your contribution to Indi-Gest, Radio Digest.

ASK THE WORM—HE KNOWS

Professor Abe Lincoln Jackson was dri
ing the class in English.
"Erastus, give me a sentence showi
the proper use of the words, 'deba
and 'detail.' "
Erastus, after much head scratchi
"De fishwum am debate what nobo
kaint tell de head fum detail.—*Willis Barrett, Box 951, Rusk, Tex.*

NOT SUCH A GOOD NECKER

The Interwoven Pair:
Billy Jones: I see Mr. Smith died fro
broken neck.
Ernie Hare: Why I thought all he h
was a wrenched back.
Billy Jones: He did, but his wife rubb
it with whiskey, and he broke his n
trying to lick it off.—*Edgar Died 3217 N. 23rd St., Milwaukee, Wis.*

The little man with a big voice makes a heroic expression—on the air!

MY WISH

:nd a gracious thought
ing on its way,
.in a friend or two
hat I write or say,
elp some weary soul
nsolation find,
make the children
gh
n wishing to be kind,
give new hope and
er
he verse I pen,
ll write from day to
y,
try and try again.
lle C. Critchett, 1515 'ana St., El Paso, Tex.

l joking aside, the au- of the lines above has nto words Indi-Gest's inarticulate wish. If n even make one cor- of your mouth crinkle e tiniest bit in a smile l feel happy!

MORNING CALISTHENICS
Announcer: One, two, three . . . put some PEP in it. Touch the FLOOR.

A TELEVISION KISS

You're content before your fireside
To listen (O, what bliss!)
To your sweetheart's voice o'er Radio,
A word you must not miss.

You now can hear her laughter
For many, many miles;
The next thing, I am thinking,
You will even see her smiles.

But one thing I will wager
And that one thing is this,
You'll never be contented
With a television kiss.

—Bertha E. Meredith, 1100 N. Reed St., Little Rock, Ark.

'Tis true . . . kisses by television will not be popular, but how about socks in the eye and spankings?

S LONG AS IT WASN'T *HER* CALF

N.R Minstrels:—
y from the city called on a country
As they strolled through the pas- s they passed a cow and a baby calf ing noses.
Boy: Oh, isn't that sweet? I wish ld do that.
ntry Girl: Well you can if you want t is my brother's calf.—*Etta Fitz- ld, 1615 S. 12th St., Birmingham.*

HAT IS THIS THING CALLED LOVE?

rybody has a different answer to query. But here are some of the nitions reported to Indi-Gest from West Coast, where Dr. Seth Maker ducted a contest on KJR, KEX and A to find the answer:—

ove is a pain you can't locate.

ove is a funny thing
It wiggles like a lizard
nd wraps itself around your heart.
And nibbles on your gizzard.

ove is a little brook that runs up inst a da(m)n.

LINES FROM BUG SCUFFLE

village gossip sez: Annie Brown, onel Brown's old maid daughter who kers to get married, is ticket seller ur local movie temple, Dreamland. na is real religious and having a dio in the lobby, tunes in on all re- al services. Yesterday Anna was rounded by advertisements for the rent picture, "Oh, For a Man", and never did ketch on to why so many patrons went in grinning. The Radio was singing: "God Will Take Care of YOU!"—*Anne Lee Funk, 3421 Rosedale, Dallas, Tex.*

OH, CAN THE CHATTER

A farmer, asked what he intended doing with an enormous peach crop, replied: "Well, we eat what we can and what we can't we can."

"We do the same thing, brother," said his questioner, a business man. "We sell what we can sell and what we can't sell we cancel."—*Lucien Thomas 54373, Box 511, Columbus, Ohio.*

RECORD

Some men start in at the bottom
And work their way to the top,
They are the wizards 'old man fate'
Just doesn't know how to stop;

And others may start at the bottom,
But regardless of how they try—
Simply stay where they started,
And watch the world go by;

Still others, our 'silver-spoon babies',
Start in where the going is nice.
Some stick there, while others slip backward,
Depending on fate's loaded dice;

But I've made a record performance
Which is bringing me great renown.
I started in right at the bottom,
And I'm rapidly working down!

—E. E. Mann, 611 Greenwood Ave., Birmingham, Mich.

SLIPS THAT PASS THROUGH THE MIKE

HICCOUGH ON A NATIONAL SCALE—CBS announcer on Van Heusen program: "Ladies and gentlemen, this program has come to you over a coast to coast 'hick-up' . . . err, er, I mean 'hook-up.'" An epidemic of indigestion?—*Etta Fitzgerald, 1615 S. 12th St., Birmingham, Ala.*

ROYALTY BELITTLED—By the Hon. Mr. Kauffman (speaking in place of the King of Siam) over Columbia: "It is unfortunate that His Majesty the King of Siam is unable to appear before this *microscope today.*" But then, he does weigh less than 100 pounds and is shorter than his Queen!—*Clara D. Lange, 2007 Marquette, Davenport, Ia.*

NOW WILL YOU BE GOOD?—It was near the close of the Tabernacle Hour, a KTAP religious feature—Preacher: "And the wicked and unjust shall be cut off."

(Without further notice the announcer cuts the program.) Announcer: "We continue with the Annanac Hour. —*Charles F. Harris, 537 Roosevelt Ave., San Antonio, Tex.*

NO GOOD A'TALL, A'TALL—It was 2 A.M. and WKBF was broadcasting night club festivities. Announcer shouted above the din, "There will next be played a group of three numbers—*Why Was I Born?—For No Good Reason At All*—and, *You Said It!*" I thought it was a wisecrack, but the orchestra played those numbers.—*Morris J. Shoyer, 916 S. Fourth St., Philadelphia, Pa.*

Dial Hounds

By Charles J. Gilchrist

Secretary of the
Chicago Daily News DX Club

THE game of hunting the ether for far away and little known broadcasting stations came to life again last winter with a bang. Probably the first factor which tempted Radio fans to dial twisting once again was the launching of a new Mexican station, XED, in Reynosa, just across the Rio Grande on the Texas border.

This station came on the air last fall for the first time with such super power that it was heard in all parts of the country. Fans got a real thrill out of hearing the call letters of a station in another country. Then they went to work and developed some expert tuning on far away and little known stations.

The game of DXing revived with all the vigor which had impelled it in former years. To be sure, the long distance fans were not reporting the extremely far distant spots which used to be heard but which are now almost impossible since the United States stations have come to cover practically the entire band of broadcasting. With so many stations in this country and with the high power now being used, some of these spots cannot be found.

However, as the winter developed reports were received from such distant spots as Japan, France, Germany, Central and South America, Australia, Honolulu, Porto Rico, Alaska, and Great Britain. The national networks have done their bit to stimulate DXing by rebroadcasting programs from foreign parts, such as the talk of Pope Pius from Vatican City and the English Steeplechase. From these programs literally thousands of fans developed the DX bug.

Another factor which has done much to bring back international reception has been the general increase of power in all the leading countries. At least two of the German stations are now on with 75,000 watts and one of them in Stuttgart has been heard several times. Then Russia has been boosting its power until it now plans to come on the air with half a million watts in the near future. These Russians are not brought in but the newspaper stories of their continued growth in power have kept DX fans interested, awaiting the time when they will come in to this country easily.

Last winter was particularly good for long distance work. In fact it seems to have been as good as any of the old years back in 1925 and before. Even another reason has been brought forward for this. It is that the sun spots have a distinct affect on broadcasting and are supposed to be at their best for Radio conditions this year. Whether or not this is true is a matter for the scientists to thresh out.

The world is just as full of thrilling Radio catches as the seas are of fish.

Charles J. Gilchrist

And the two games, DXing and fishing are very similar. The fisherman sinks his hook into the waters, hoping and using all his skill to hook the particular kind of fish he seeks. The DXer becomes expert with his dials and uses his talent in trying to hear around the world. Neither can know beforehand what will happen and in that uncertainty is another of the kicks of the games.

Time was when a Chicagoan picked up Kenya Colony, in Nairobi, Africa. The station, 7LO, used both short and long waves and works with the British Broadcasting Company networks in London. Another DX thrill came to the writer when a Royal Mounted Police officer on duty in the wilds of Canada wrote down to join the Chicago Daily News DX Club, having heard one of the weekly broadcasts over WMAQ. The letter had been dated more than six months before it arrived. And it had been dated more than four months before it ever reached a post office.

THE spot from which the officer picked up the broadcast was well within the Arctic circle at a little bay not even shown on any save the largest maps. Apparently it had been held up a third of a year by ice and snow before it could reach the post office some hundred miles away. It took still more time to reach civilization and quick transportation.

A good world log such as the one sent out by the Department of Commerce shows stations in queer spots all around the globe. There is EAR5 in Las Palmas Canary Islands on 1071 kilocycles, and two stations in Cairo, although if you write the Egyptian officials they will answer that broadcasting is barred in that country and there are no stations on the air.

Both Casablanca and Rabat in Morocco are on the air, as are Cape Town, Johannesburg, and Durban in the Union of South Africa. The Fiji Islands have a broadcasting station at Suva and a Radio telephone depot which is listed without wave, location or anything else but the words "frequently broadcasting".

Singapore, British Malaya; Colombo, Ceylon; Istanbul, Turkey, Reykjavik, Iceland; Tallin, Estonia; Caracas, Venezuela; Bogota, Colombia, and Tegucigalpa, Honduras are some of the other queer spots of the world which live on the Radio map.

There is a station, VAS, at Glace Bay, Nova Scotia, whose sole purpose is to inform fishermen preparing to embark for the Grand Banks of weather conditions and the prices they may expect for their catches. This is found almost every morning at about 2 a.m., CST.

J. Agusty in San Juan, Porto Rico, has done more to make his city known than any association of commerce or travel bureau could. He has done it by staging special DX programs for American listeners at regular intervals during the winter. These programs, which end up about daylight, usually on Sunday mornings, have been heard each time with very good volume and quality by many west fans as well as those in the east. He has answered literally thousands of letters and sent out great quantities of verifications to those Radio fans who could tell him just what his station had been broadcasting and just when it was broadcast.

Two others who are rapidly making their particular spots on the globe well known to Radio are in Central America. One is Amando Cespedes Marin, owner and operator of NRH in Heredia, Costa Rica, a very popular DX call.

With such possibilities it is little wonder that the modern knight of the ether turns to Radio as his magic carpet.

(Another DX story next month.)

Throughout the Week

8:00 a.m.—WEAF—Gene and Glenn. Quaker Early Birds. Comedy songs and patter. (Daily ex. Sun.)

8:30 a.m.—WEAF—Cheerio. Irons out frets, frowns and wrinkles. (Daily ex. Sun.)

10:00 a.m.—WJZ—Ray Pineapple Perkins. Silk hat, piano and dash of pineapple with broadcastor oil—program potion for the weary. (Thurs. and Fri.)

6:45 p.m.—WEAF—Uncle Abe and David. Two typical New England merchants in back-store chatter. Stock consists of pins, potatoes, carrots and curtains. (Wed., Thurs., Fri. and Sat.)

6:45 p.m.—WJZ—Lowell Thomas—Reports news brevities in Literary Digest Radio column. (Daily ex. Sunday)

7:00 p.m.—WJZ — Amos 'n' Andy — Now, Amos, is yoh oh is yoh ain't—and Bill Hay shaking with mirth in the background. (Daily ex. Sun.)

7:00 p.m.—WABC—Morton Downey. Accompanied by Freddie Rich and his orchestra. (Daily ex. Sun., Mon. and Tues.)

7:30 p.m.—WABC—Evangline Adams, astrologer, links your fate to the stars. A Forhan's presentation. (Mon. and Wed.)

7:45 p.m.—WABC—Daddy and Rollo. A humorous series of sketches by J. P. McEvoy, portraying embarrassing moments for Pa. (Tues., Wed. and Thurs.)

8:00 & 11:00 p.m.—WABC—Arthur Pryor's Cremo Military Band. Puts life into your bones. Only 20 words of advertising. But don't count—you may find more. (Daily ex. Sun.)

8:00 p.m.—WEAF—Rudy Vallée—the velvet toned crooner and his Connecticut Yankees. (Thurs.) (7:00 p.m. Sunday on WJZ)

8:00 p.m.—WEAF—Sanderson and Crumit. Two stage stars gone Radio—nothing like it say Julia and Frank on Blackstone Plantation. (Tues.) (Thurs. 9:00 p.m. on WJZ)

8:15 p.m.—WEAF—Radiotron Varieties with "Bugs" Baer, inimitable master of ceremonies—the voice with the school girl complexion. (Wed. and Sat.)

10:00 p.m.—WEAF—B. A. Rolfe and his Lucky Strike Orchestra. (Tues., Thurs. and Sat.)

10:30 p.m.—WJZ—Clara, Lu and Em. Leave it to these Super politicians to disentangle international problems. (Daily ex. Sun. and Mon.)

Sunday

12:30 p.m.—WABC — International Broadcast. Voices across the ocean.

1:45 p.m.—WJZ—Little Jack Little who gets the big hand when he sets himself down to that *pi-aner*.

3:00 p.m.—WABC—Toscha Seidel. Famous violinist draws human tones from his fiddle.

8:00 p.m.—WEAF—Maurice Chevalier dispenses songs with real Parisian flavor from the Chase and Sanborn fountain.

8:15 p.m.—WJZ—Collier's Radio Hour. A palatable program with a mixture of everything.

9:15 p.m.—WJZ—Floyd Gibbons. Man of many thrills shares his world adventures.

9:15 p.m.—WEAF—Atwater Kent. Tales par excellence!

9:30 p.m.—WABC—Edgar Guest. America's own poet. Detroit Symphony Orchestra directed by Victor Kolar on Graham-Paige program.

10:15 p.m.—WEAF—Famous Trials in History. A National Dairy Production.

10:45 p.m.—WEAF—Sunday at Seth Parker's.

Monday

8:30 p.m.—WJZ—Simmons Hour. Brings to mike celebrated opera stars, and charges you nothing but a dial twist.

8:30 p.m.—WEAF—A. and P. Gypsies. Orchestra directed by Harry Horlick.

10:00 p.m.—WABC—Guy Lombardo's Orchestra with its slow tempo.

9:30 p.m.—WEAF—General Motors Program. Male Quartet and orchestra directed by Frank Black.

KDKA	WJR	KWK	WRE
KYW	WCKY	WGAR	WBAI

Features

p.m.—WJZ—Chesebrough Real Folks. ys something new at Thompkins Cor- Home town band an' everything.

p.m.—WABC—Ben Bernie. Popular tro and his orchestra from Chicago.

Tuesday

p.m.—WJZ—Sisters of the Skillet. h East and Eddie Dumke—combined ht quarter of ton and you get five hun- pounds worth of fun.

p.m.—WJZ—Paul Whiteman's Paint . Jazz king puts a little fast color on his ram.

p.m.—WABC—Adventures in Words. Vizetelly is great tourist guide through of words. He certainly knows his "P's" "Q's".

p.m.—WABC—Philco Symphony Con- conducted by Howard Barlow.

p.m.—WABC—Mr. and Mrs. Joe and Graybar couple, show how entangled marriage knot can become.

p.m.—WABC—Richie Craig, Jr. Blue on Malt Jester. No famine of fun here!

p.m.—WABC—Paramount Publix Ra- Playhouse. Variety bill.

Wednesday

p.m.—WEAF—Boscul Moments. Mme. ces Alda in program of popular songs Frank LeForge at the piano.

p.m.—WEAF—Palmolive Hour with e Palmer, Paul Oliver and the Revelers rtet.

p.m.—WJZ—Camel Pleasure Hour with y McCoy, Reinald Werrenrath and Billy ghes.

p.m.—WABC—Peter Pan Forecasts. ffy ruffle petticoats of grandmother's day date of modern modes. Gives you latest on fashion market.

p.m.—WEAF—The Voice of Radio est. It's Nellie Revell, the dean of wo- journalists. There's no bottom to her of information.

Thursday

p.m.—WABC—Premier Salad Dressers d Browne and Al Llewelyn in usual rôles ide-splitters.

Selected by the Editors

To provide you with the outstanding features for each day of the week the RADIO DIGEST *program editor has selected the programs indicated as Blue Ribbon. Do you agree with her selections? (For stations taking the programs, see adjoining list.)*

9:00 p.m.—WEAF—Arco Birthday Party celebrates natal day of famous men and women.

9:30 p.m.—WJZ—Maxwell House Ensemble. Don Voorhees Orchestra.

Friday

11:00 a.m.—WABC—Emily Post. Should a girl kiss her fiance in public. Gracious no. And other points of etiquette.

8:00 p.m.—WEAF—Cities Service Concert with Jessica Dragonette—Radio's Sweetheart.

9:00 p.m.—WJZ—Interwoven Pair with Billy Jones and Ernie Hare whose classic theme song featuring socks, socks, socks announces their program.

9:00 p.m.—WABC—Mary and Bob. A real True Story adapted to Radio.

10:00 p.m.—WJZ—Armstrong's Quakers with Mary Hopple, RADIO DIGEST's cover girl for this month, Lois Bennett and a good male quartet.

10:30 p.m.—WABC—March of Time.—Not a mere narration of news—but an actual dramatization of world events. Time Magazine.

10:30 p.m.—WEAF—RKO Theatre of the Air sometimes direct from NBC and sometimes from the Leviathan. With talent deluxe.

Saturday

6:00 p.m.—WABC—Ted Husing's Sportslants. Get inside dope on Theodore in Peggy Hull's article about him in these pages.

8:00 p.m.—WEAF—Weber and Fields. Beloved old stage cronies—just as good on the air.

8:15 p.m.—WABC—Ben Alley—and Ann Leaf at the organ.

9:00 p.m.—WEAF—General Electric Hour with dynamic Floyd Gibbons and Walter Damrosch.

AMERICA'S PREMIER REGIONAL STATION

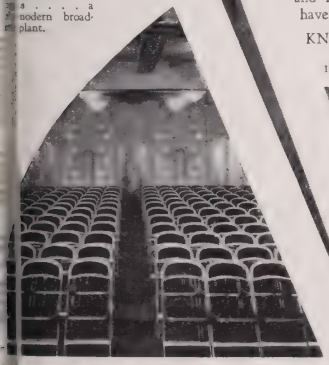
New York **WMCA** New York

570 K.C. 100% MODULATION 500 WATTS

The WMCA Little Theatre of the Air

NEW YORK'S OWN STATION

WMCA covers practically *every* event—*every* happening that is of *interest to New Yorkers.* If there is an important New York news story WMCA broadcasts it. Banquets of local importance and significance, outstanding ring and sport events, theatrical performances, the smarter night clubs—these are a few of the things that New Yorkers expect WMCA to cover.



We believe that no station has more friendly and personal relations with its army of listeners than WMCA. Because they are always sure of finding something of immediate and local interest on its program, New Yorkers have an exceptionally warm regard for WMCA.

KNICKERBOCKER BROADCASTING CO. INC.

1697 BROADWAY · NEW YORK CITY

square feet of broadcasting . . . . 7 per- tion . . . the A THEATRE, dio Theatre of with auditor- fortably seating ndred . . . overlooking the White Way . . . more than one experts to pre- d present your . . . . . a modern broad- plant.

Thorough coverage at moderate rates . . . . perfect transmission throughout city and suburbs . . . . a pioneer station that has achieved a unique record of success for itself as well as for its clients . . . . literature and rate cards will be forwarded to interested prospective clients.

dcasting in the New York Manner

The Airline to the New York Market

Tom Noonan's Soul Saving Station

(*Continued from page 23*)

apliments a member of a Men's Bible
ss on the good-looking lady who is
h him, wisecracks good-humoredly and
kes everybody like it.

Well, folks, here's a letter from a
y in Massachusetts who wants a leg
her husband—now, don't laugh—
wants a leg for her husband so he can
to work—get a job—a fellow with one
can't possibly get a job—now can
I wonder if something can't be done
that poor woman whose husband only
one leg?"

etters are read from lonely shut-ins
over the country who are listening in
. are no doubt made happy by the
ery voice of this broadcaster from
natown. A blind man from up in
mont has requested a certain poem, a
nan in South Carolina writes if she
y had a sewing machine she could
n some money, a couple from Iowa
phone in their greetings from their
den Wedding Anniversary and the
ly Tom is quick to send them back
wishes for good luck and a long life.

conducts a sort of column to the
elorn, he's a mother's helper, a missing
sons' bureau, mender of broken
rts—through his Radio broadcasts he
locate anything from a lost son to
ollar button. An old newspaper man
es he's listening in somewhere up in
ssachusetts and Tom has a friendly
d for him. An Exterminating Special-
from Weehawken sends his greetings

Tom has the hall roaring with
hter as he wisecracks about this pro-
ion. A little girl had a dime for ice
m but she decides she'd rather send
dime to the Mission in Chinatown
which Tom thanks and praises her.
young boy prayed every day for a
promising God he'd give his first
k's salary to the Rescue Mission if
ever got one. The Mission got his
week's salary. A fireman up in the
nx risked his life to save a child and
n praises him over the Radio for his
d deed.

low up the aisle comes hurrying an
er with a telephone message for the
ngelist. He reads it, grins and
aking into the little iron Mike an-
nces—

Here I have a leg already for the
's husband up in Massachusetts. Mrs.
– of Newark has offered to send the
ney for the leg! We thank you,
;——"

hymn is sung—so contagious in
ody and with Tom Noonan's rhythmic
ures that everybody has to sing.

Two more legs for the lady's husband
in Massachusetts. Fine and dandy,
:s—that's quick work all right!"

With the hand-clasping and back-
ping there's a good show too. You
celebrities from the theatrical, social, political—and criminal world to address you. Not long ago Nora Bayes spoke, another day a well-known rabbi, some weeks ago Harry Haines—famous character of the underworld in the time of Big Boss Tweed. Harry is a lusty Irishman whose looks belie his sixty-odd years. He was a successful crook until dope and then religion got him. Mother Mendelbaum—a famous fence of the nineties who began as the humble keeper of a pawnshop and died with five million dollars in the bank—tried to save him both from dope and religion — but listen in next time he speaks from his Mission and he'll tell you what Tom Noonan has done for him. Besides the talent endorsed by the public, Tom Noonan is glad to give beginners a hand —men's quartets from some remote church—a trombone player who brings tears to your eyes with " 'Way Down Upon the Swanee River"—anyone who'll stand on his feet and sing or talk can have his chance at Tom Noonan's exciting and surprising Sunday afternoon broadcasts.

"The boys," as he affectionately calls the more unfortunate of his guests, enjoy the show as much as those who sit on the platform or tune in from their homes. They're glad to get music and good cheer along with "the feed and the flop."

After the Mass Meetings the visitors go on to their comfortable homes and "the boys" (the Women's Mission is at 10 Mott Street) file down into the basement—bare and scrupulously clean—where they are given a hot supper and a place to sleep and any other assistance Tom Noonan and his staff can give them in the way of a job or advice. Even the ushers were once like the boy Tom Noonan and like these broken men who come for help so that they know the Black ways and are better fitted to give a helping hand.

The men eat silently—there is no pushing and shoving—all is order.

"You get docile like that after you've been cold and hungry and homeless long enough," one of the ushers explained to me. He stopped and spoke kindly to one of the men. "That one's seen better days," he said, turning to me. "He hung around outside for days before he had the nerve to come in. It's the old fellows like that I feel sorry for—there just ain't a place for them anywhere ever. Nobody wants an old man."

Shabby and unshaven as he was, the man he had spoken to didn't look to me over fifty!

They were a shabby, unshaven lot in Tom Noonan's basement that rainy Sunday—Japanese, Negro, Jewish, Gentile—you'd have learned something about geography if you knew where every mother's son of them came from. You'd have learned something too about bad breaks, and ill health and tragedy and perhaps even something about the economic depression!

It's a sort of continued serial—the broadcast from the Cathedral of the Underworld. It's like a social club or the corner grocery—only a great deal kinder.

If you listen in long enough you get to wait eagerly to find out if the woman from Maine is going to get that sewing machine she needs to help support her family, or if the man from Indiana will get his spectacles or the little boy from up in New York State his crutches. And if you're sitting up on the platform in the old Chinese theater listening to Tom Noonan send out his appeals for help, you hold your breath wondering how long before a telephone message will respond to that appeal. You might even catch the contagion of helping someone less fortunate than yourself!

Broadcastor Oil

(*Continued from page 32*)

want to come right out and say that I will take no nonsense from a mere wee slip of a girl, piano player or no.

Do you know what I did to Olga then? Don't guess, let me tell you. Well first I cleared my throat gently, like Evangeline Adams, only I did it standing still, whereas Miss Adams does it in passing. Then I deliberately turned on my heel and walked off in various directions. Well, my dears, that marked a turning point in my career, because I've been a heel turner ever since. I can now turn on my heel as they do in true confession stories and if you think it's easy, just try it is all I've got to say.

I'm inventing a patent ball bearing heel of patent leather that will enable YOU to turn on your heel and get somewhere socially. Only first I have to finish up inventing my laughing kimono. It's a garment designed to facilitate sleeve-laughing-up. Take our hostesses at NBC (Note to Columbia Broadcasting System: do you boys have gorgeous women for hostesses? We do. At any rate we should get together and discuss this.) Most of our hostesses don't even wear sleeves, so naturally they don't amount to much as sleeve-laugh-uppers. But my, oh my, have they got talent in other directions, our hostesses! Most of them went to Finishing Schools, and can finish almost anything you might try to start. Of course I don't speak Finnish myself, but they *are* a wonderful race of people, the Finns. Why in the South Sea Islands they eat halibut fins and all and think nothing of it. So am I.

In closing I would like to point out that there are certain restrictions in writing for broadcast purposes. These are relaxed to some extent in writing for print. For instance over the air you're not allowed to say damn. But here I can say it. Look: Damn.

Ain't I a nassy bad mans?

Tuneful Topics

(*Continued from page 54*)

with headquarters in Los Angeles, and branch offices here and in all the main cities in the country. Arthur Freed, co-writer with Nacio Herb Brown of *Pagan Love Song, Broadway Melody, Doll Dance, Singing in the Rain* and so many other hits, is the financial backer and writer for the firm; Powers, one of the best-liked contact men and professional managers in the music industry, is the other partner.

They have two songs which are growing in popularity every day—*It Must Be True* and *I Surrender, Dear*. Although *It Must Be True* is handicapped by its similarity to so many other titles, such as *Can It Be True* and so forth, it is climbing through daily. *I Surrender, Dear,* being a bit sensational in title and thought, much akin to *Body and Soul,* is heard more often on the Radio. *It Must Be True* is one of these short choruses, like *My Ideal,* and is adapted to the schottische type of tempo, which can be best understood after hearing it played that way.

It has a lovely lyric and a lovely melody. It is authored by Arnheim himself, Gordon Clifford, and Harry Barris, who was one of Bing Crosby's partners in crime in the "Three Rhythm Boys".

Faithfully Yours

THERE seems to be a vogue for titles in the correspondence salutation vein —*Kindly Remit, To Whom It May Concern,* and now *Faithfully Yours*. This song has been picked as the hit of the week by the Campbell Hour, which is a signal victory for it just at its outset. They have rarely been wrong in their selection. Many men have to pass on it before the song is featured in that daily plug.

That the song is there, there is little doubt. Everyone in and out of the profession has reassured Phil Kornheiser that at last he has his much-needed hit, and I sincerely hope the public feels the same way about it. Phil has chosen one of the most beautiful covers I have ever seen on any song; it is bound to attract attention to the song, and inside the covers there is unquestionably a hit with a hit melody. If the bands do not rush it through too fast, play it the way it should be played, you will hear a lot of it.

I would suggest that it be played at fifty seconds to the chorus in order to do justice to it. It was written by a trio whose names alone guarantee a good song; Ted Snyder is one of the greatest writers and publishers, the first to give Irving Berlin a break; James Brockman, whose name I can recall on songs ever since I first took notice of names on songs, and Abe Lyman, one of the most charming and capable of West Coast leaders.

In A Cafe On The Road To Calais

ALTHOUGH I am a little late in commenting on this particular song, I feel it is never too late to talk about a really good song. It was written by three boys who wrote *On a Balcony in Spain.*

I think they have done a good job with an extremely dangerous type of song. A road at best is a dangerous thing to describe, and the "road to Calais" which might be, as far as the average lay American mind knows, any place anywhere—well, I think that the boys had a great deal of nerve in writing this type of song. In fact, when they first approached me with it I thought they were crazy!

If the song succeeds, I think it will be on its very lilting melody, as it lends itself extremely well to dancapation, i. e., the tickling of the feet, although most bands rush through it as though they were going to a fire. In fact, I have been extremely amazed at hearing some of the vocalists trying to keep up with the band in singing it.

There is one line near the end which absolutely must be taken very rubato, otherwise it means nothing.

Similarly as in the case of the publishing of *The River St. Marie,* there is a French verse underneath the English. I have not looked at it very carefully, though I intend some time to try singing it in the patois of Calais itself.

This is the Red Star Music Co.'s nearest approach to a hit since *I'm In the Market For You,* and I sincerely hope they make it.

As I said up above, on account of this one line, namely, "Was I the only one you gave your precious kisses to?" the whole song must be slowed down or the singer must race when he gets to this particular phrase. Very often I either change the wording or the notation, or deliberately fight the band in tempo on that particular phrase, but this is often bad as it gives the impression that the whole song is hurried, and at best does not help the vocal rendition of it. So the wisest thing is, as in the case of a chain being no stronger than its weakest link, to slow the whole composition down for the weakest phrase in the song.

Ho Hum

LARRY SPIER is the capable mentor of the Famous Music Co., writer, composer, picker par excellence of song hits. Larry may take the bow for most of Chevalier's songs, *Out of Nowhere, Baby's Birthday Party,* in fact almost everything the Famous Music Co. has had since its organization. Personally I think he is one of the keenest psychologists in the music profession, and I pay that tribute to him very sincerely, with no ulterior motive.

Famous Music is one of the few firms which had a successful year during the past one of extreme depression and bad sales. While in Rochester he sent me a group of four or five songs, but chief among them was this little spring fever tonic called *Ho Hum,* written by Ed Heyman, the boy who worked with Johnny Green on *Body and Soul, Out of Nowhere,* and who gave me the beautiful lyric of *Then I'll Be Reminded of You* for the last song in my picture.

His collaborator is none other than the young girl who seems to be a most prolific young lady, although a newcomer to Tin Pan Alley, Miss Dana Suesse, who already has *Whistling in the Dark* to her credit, and whose name will soon be as famous as Irving Berlin's if she keeps up.

It is a typical spring type of song, dealing with the end of the winter season, the yawning of the individual as he sings the song and tells about various things which he and a girl are looking forward to on beautiful spring nights.

The Lombardos are riding the devil out of the song, with the rest of us close behind them. I think it is done best the way the Lombardos themselves play it allowing between forty-five and fifty seconds for the chorus. Coming out just at the right time of the year, it should be one of our most popular songs. If not from a standpoint of sales, it already is from a standpoint of records and Radio.

Have You Forgotten?

IT ONLY goes to show that one can never tell what is going to happen when one writes anything of a classic nature. It may start out as a classic and end up as a popular song whistled and sung by the masses. Such is the story of *Have You Forgotten?*

Nat Shilkret collaborated with the young lady just mentioned—Miss Suesse —in an idyll called *Syncopated Love Song,* minus lyrics. Just what it was intended for I do not know; it remains for Leo Robin to write the lyrics for the most delightful part of the piece, and call it *Have You Forgotten?* Although it still has its classical flavor, there is something very fascinating about it, just there is about the most beautiful part of the *Rhapsody in Blue.*

One hears a lot of it on the air. Bands play it if no one else does. They realize it is good music and quite different.

Since, like *You Brought a New Kind of Love To Me,* there are a lot of triplets and quarters written in triplets, it is quite essential that the whole composition be slowed down that these triplets may not be made to sound absurd. I think this is one number that the average band realizes must of necessity be played slow.

We do it at about one minute to the chorus, and it is published by Harms, I

The Prodigy Who Grew Up

(*Continued from page 13*)

The European triumphs continued for more years, and then Leopold Auer that his pupil was, at last, ready America. And so, in 1918, a mere —too small for his evening suit— his romantic shock of black curly hanging over his forehead, he made first appearance at Carnegie Hall. v more than ever was there magic in e unerring fingers; now more than was his bow smooth; now more than was there an infinite variety to that shed style of his. Toscha conquered erica as completely as he had con- ed Europe. With that first concert is he was judged to be one of the t violin-virtuosi of the age.

rom that time on, his life became ndless series of concert-tours—and an ess series of triumphs everywhere. year, he reached a new peak in career. The Radio had conquered erica. Seidel, realizing the tremen- s scope of the Radio, associated him- with the new field, as advisory ctor and as performer for the Colum- Broadcasting System. Today, he is io's outstanding fiddler: the magic n of Toscha Seidel is being heard a week from one corner of the ntry to the other in a series of pro- ns illustrating the growth and develop- t of violin music. Few, there are, in whole world who are so well equipped so prodigious a task and who could mplish it so gracefully and artistically he incomparable Toscha!

oscha Seidel is thirty-one years old, the thirteen years he has been in erica have wrought a great change in . Those of us who remember him n he made his sensational debut, re- ber him as a romantic looking boy , in appearance, dress, behaviour, ediately suggested the musician. To- however, there is nothing but that uresque name of his to hint at his ession. He is short, stocky, and gen- ly well-dressed. His once picturesque k of curly hair has now been othly levelled and evened into a neat -comb; even his once delicious sian accent is rapidly disappearing. rything about him—the way he be- s, the way he talks to you, even his point—suggests the American busi- man, rather than the musician.

e lives in a private home at Pelham or, with his charming wife, a home pletely fitted out with music-rooms, ing-pong room, a bridge-room. For cha is not only a devoted musician; s equally enthusiastic over contract- ge and over ping-pong. More re- ly, the latter game has come to the in the list of his preferences. At , Toscha is far better at ping-pong ing than he is at contract-bridge— ough he does play bridge with skill.

And so, just as likely as not, there may be a heated ping-pong game at the Seidel home during the evenings. Only recently, another ping-pong enthusiast—Mr. Jascha Heifetz—was up at the Seidel home to challenge Toscha. "We could never find out which of us two is the better fiddler," Jascha told Toscha laughingly. "At least we can learn which of us two is the better ping-pong player!" The game was a very heated one, but—if you are really eager to know—it was Jascha who emerged as the winner.

Toscha rises methodically every morning punctually at 7:30, and then he drives down to the Columbia Broadcasting Company. He is at his office all day, attending to the vast amount of work which he, as the musical advisor of the System, must complete; at the Columbia Broadcasting Company, too, Toscha does all of his practising these days. For, although Toscha is the consummate artist, he still practises a good many hours every day. The officials, therefore, generally have very little trouble in locating Toscha when they need him; nor do they have any need of asking anyone where he is. They merely prick their ears to catch the sound of a violin, and then they follow that sound until it leads them straight to Toscha.

His favourite pet is Hector, a one-hundred seventy pound dog, who is an all-important member of the Seidel household. His favourite dish is *crepe suzette*, a dessert which, because it is a mixture with cognac, cannot be procured in this country—Toscha, therefore, looks forward to each of his European trips as the time when he can gorge himself with his delicacy. His musical tastes are most orthodox—Brahms, Beethoven and Mozart are his favourite composers; his favourite piece of music is the Brahms Violin Concerto. He does not think very highly of jazz as a form of musical expression, although he does enjoy listening to it.

Toscha, generally speaking, does not care for night life. He would much rather spend a peaceful evening at home with his wife, with Hector, and in the company of agreeable friends.—and indulging in his few preferred pastimes. The pleasures of European trips have long ago palled for him. He is not interested in luxury. Toscha, as a matter of fact, is one of those very rare individuals who believe that their present existence is the best of all possible existences and who have no aspirations or ambitions other than to continue their present pleasant mode of living. Except for one —namely that Hector should some day have a companion in the form of Toscha Seidel, Jr.

To Men who want facts on the Jobs *now open* in RADIO

You will find a true picture of Radio's many opportunities in this book. It tells you where the good jobs are, what they pay, how you can quickly train at home in your spare time to get one. The demand for well-trained men is far greater than the supply.

Many start at two and three times their old salaries

J. A. Vaughn, 4075 South Grand Blvd., St. Louis, Mo., went from $35 to $100 a week in one jump. J. G. Dahlstead, Radio Station K.Y.A., San Francisco, Cal., makes over $400 a month—much more than he could make before. The $50 to $75 a week jobs that are opening now will in many cases lead quickly to $100 to $150 a week.

The course that pays for itself

The day you enroll I will show you ten ways to make money doing easy work to be found in every neighborhood. Tell you how to do the jobs, how to get them and what to charge. G. W. Page, 1807 21st Ave., S., Nashville, Tenn., made $935 in his spare time while studying.

Easy to learn at home

No need to give up your job to learn to be a Radio Expert. I'll bring a training to you that has made hundreds of men successful in Radio. My 50-50 method of training at home, half from lesson books and half from Radio parts gives you practical Radio experience, makes learning at home easy, fascinating, thorough. Sends you out a trained, experienced Radio Expert.

ACT NOW—Mail the coupon

It tells you all about Radio's many opportunities, such as operating on board ship which gives you world-wide travel without expense, the opportunities in broadcasting stations, with Radio dealers, manufacturers, wholesalers. How you can build a Radio business of your own on spare-time earnings and many other chances for success. Tells you how we help you to find a job upon graduation.

$400 a Month

"I made good money before, but I am making more now. I have made more than $400 each month. Your course brought this."

J. G. Dahlstead, Radio Station K Y A, San Francisco Cal.

J. E. Smith, President, Dept. 1FR3 National Radio Institute, Washington, D. C.

RADIO DIGEST One year and your personal Horoscope $3

Radiographs

(*Continued from page 51*)

In Siberia she wore her military uniform with the correspondent's "C" on her arm. She endured hardships with the men. Often she was hungry, often cold. Once when going from one outpost to another she was pursued by bandits and wolves. More than once there was a machine gun battle just outside her window.

All this seems like a very bare outline of Peggy's amazing career. You may hear her adventure tales if you listen in to the RADIO DIGEST programs. Or you may soon read them in her book which she is getting ready for publication.

And where will Peggy go next? Who knows? But it would be hard to keep her away from another war.

Floyd Gibbons

"IT'S the breaks." A lot of people say they count more than talent in this world. Well, Floyd Gibbons has both—talent and the breaks. And what breaks!

Remember back in 1915 the Johnson-Willard fight? The Chicago *Tribune* sent Gibbons to the border to cover it. The fight did not come off, but just across the line General Pancho Villa started to stage some fights of his own. Not such a bad story for a young newspaper man wanting to get ahead.

Remember 1916 and Pershing in pursuit of Villa? Gibbons was with Pershing. Lucky again, you see. For in 1917 Gibbons was in France with the American Expeditionary Force, and the commander of that force, as everyone knows, was that same John J. Pershing.

Before Gibbons ever got to France there was his incredible luck of being torpedoed on the "Laconia." Being blown up in mid-ocean by a German submarine, might not be considered lucky by many, but if you were a reporter and lived to tell the tale, then you would be lucky.

He lost an eye in Belleau Wood, while creeping across a machine gun-swept field to the aid of a wounded comrade. Nothing lucky about that, you say. Still, if one is going to lose an eye, it's quite the best way to lose it, going to the rescue of a comrade. So, one gets the Croix de Guerre with palms, a citation from General Petain. Afterwards one can write a literary classic, "How It Feels To Be Shot." (In his war book, *And They Thought We Wouldn't Fight.*) Also if one does have to lose a portion of one's anatomy an eye is the easiest thing to part with. Losing an arm or a leg would be much more crippling. With an eye gone, one wears a white patch and is unforgettably picturesque.

I first knew him in Morocco, where I was doing some free lance writing for American newspapers.

In September of 1925 the Spanish fleet was bombarding Abdel Krim's capital, Ajdir, in the bay of Alhucemas. Gibbons was one of the seventeen other correspondents—Spanish, German, Portuguese, English—aboard the Spanish troopship, "Escolano." I was on the "Escolano" also, and can give a first hand account of the Gibbons luck at that time.

It seemed that the Spanish governme had provided for the comfort of t press, luxurious staterooms in the secti of the boat devoted to the officers. had furnished them interpreters to e plain operations. It gave them afterno tea. It served hors d'oeuvres and liquet at dinner. It had provided everything, fact, except that one thing all importa to a newspaperman—means of comm nication with his paper.

At first the correspondents had be patient. They had acknowledged th couldn't use the Radio before the atta and so let Abdel Krim know of our whe abouts—though how a fleet of seven five ships could escape notice, I do know—but with the landing made, w the Spanish flag flying from the top Cape Moor, they began to demand fa ities for sending out their despatches, at least to be allowed boats to Ceu Gibraltar or Malaga.

"The world waits," they cried d perately in Spanish, German, and E lish, crowding around the command major.

And the major, unmoved, said p haps "tomorrow after tomorrow," didn't quite know how, he didn't q know when, communications would be tablished and the news could go out.

The correspondents raged in helpl fury. That is, sixteen of them raged. T seventeenth, Floyd Gibbons, late night, was sitting alone on the deck. seemed that his customary luck had serted him. Here he and his story w in the middle of the Mediterranean w no means of getting either off that bo But just then a little launch nosed against the "Escolano" to deliver a m sage. In a second Gibbons was do the gangplank and aboard her. Yes, was going to Malaga.

In Malaga he put his story on the bles, and took one of the daily passen boats to Melilla. There still remai the problem of how to get back to Spanish fleet at Alhucemas. But G bons' luck come to the rescue! Ab cadabra, a French battleship, was in harbor. Gibbons happened to know commander of it. It took him back the Spanish fleet and the bombardm

One more incident—a small one.

In Washington once I was driving a taxi with him down to the Albee bu ing. After the taxi had gone he disc ered he'd left his gloves on the seat. N any ordinary mortal would have ne seen those gloves again. But the v next day in a totally different part of city, as he was crossing the street in fr of a waiting line of automobiles, a driver stuck his head out of a car, yel "Hey, chief, got something for you," handed out the gloves.

Do you wonder that once when he bled his paper that he was in Pisa, prompt answer came back: "Stay in I That tower has been leaning for six h dred years. It will probably fall w you're there."

ynamic" Rubinoff

(*Continued from page 49*)

st get back to the theatre for an on rehearsal. By this time re- ls were just about getting bore- o a mere scribbler.

he theatre again, Rubinoff invited come down to the rehearsal rooms "few minutes" while he arranged eatre program and did some work next week's Radio program. In n snatches of work, in the two we spent in the rehearsal room, he ed to tell something about himself. was born in the little Russian town dna. Before he was five years old wed musical aptitude, but the only nent the family owned was a ka. Imagine little David and the lalaika! But his small fingers must een able to create melody, for one e music-master of the town heard rumming and offered to teach him playing free of charge. For the lent of three dollars in American , Dave's mother bought him a and the lessons began. He had to four or five miles for his lesson— through snow and sleet. His home old, dark and lonesome. He prac- when his fingers were chilled to ne and he was hungry. Those lean under the oppression of the czar t to music in the minor melody uns through the Russian music he sed in later years.

four years he studied diligently on, as a reward, a scholarship to yal Musical Conservatory at War- Then—study in Berlin, Vienna, and . the New World, when he was but years old. More study—then his won recognition and he became hestra leader.

v did he enter the Radio world? ys he owes it to his friend, Rudy . Rubinoff is director of the tra at the Brooklyn Paramount. Rudy appears when he isn't out ir. Rudy arranged for an audition C . . . Rubinoff clicked and he was l up as orchestral director of the and Sanborn Hour.

er two hours of answering our ques- and working on two programs, aestro suddenly rushed out to con- his mid-afternoon overture in the e.

n came a long interview with rrangers, after which Rubinoff sug- l another cup of coffee. We visited me place, ate just about the same and Rubinoff rushed back to the e for his final afternoon overture. e minute he was finished with this n down stairs, jumped in an auto- e and, behind two motorcycle cops their sirens screaming, we were ed through traffic to the NBC s.

binoff then went on the air. The am, lasting a full hour, was one of the finest that we had ever witnessed. There was Rubinoff, in all his glory, in front of his enormous orchestra, first waving his magic baton over them, then playing his inimitable violin solos.

Emerging from the studio, Rubinoff turned to us and said: "My greatest thrill while broadcasting is to think of all the people listening in. I can almost see them sitting by their Radios. While I am accustomed to a theatre audience, my imagination produces my Radio audiences. I hope that each and every one of those people listening in enjoyed my music."

But do you think that this finished the day? It did not. The mounted policemen were there to meet us when we came out of the studio and back through the thick traffic we went. The theatre again and the final overture of the day. When this was finished we looked at our watch and eleven o'clock was only a few minutes off. We must hurry home and to bed as an early appointment in the morning necessitated our arising at eight.

Rubinoff said he would drop us off in Manhattan, as he was going to the Astor to appear at a Benefit performance. What, another appearance? Why it would be long after midnight before he could "hit the hay!" The maestro said that he would try and get away from the Astor by one at least, as he had a rehearsal at seven-thirty in the morning!

And right then and there we said *Bon Soir*. And now we know why they call him "Dynamic Rubinoff" and, though Rubinoff is a mighty fine fellow and all that, we are not so anxious to spend another day with him and try and keep up with his pace.

Wedding Bells on the Coast

(*Continued from page 65*)

KMOX, St. Louis, gets back on the air again after an absence of two or three years. Now resident organist for a Los Angeles mortuary, he is doing a daily program through KMTR.

When a dark eyed youngster was born to the family Alvarez in far-off northern Spain they named him Luis and picked out a mechanical career for the lad. But the opera offered more reward than any machine shop, so he toured most of the continent as a tenor in Italian opera. He finally came to the States and to Los Angeles. Now heard often over KECA.

Mr. Jones Tunes In!

Lemuel Is Taught a Lesson in Economy and Makes a Quick Decision

By Robert L. Kent

LEMUEL JONES was sore—mad clean through, in fact—and he didn't give a whoop who knew it. Now when anything irked Lem he was prone to say a word or two about it—sometimes a whole flock of words. And this happened to be one of the times when he found plenty to say.

"And," he continued, squarely facing Ann, his wife, "I don't think much of a set that always has something wrong with it." Lem, you see, had started talking some minutes before and he was now thoroughly warmed up, so to speak, and he was full of his subject, if one can be full of such a thing as radio. "No," he carried on, banging the arm of his easy chair for emphasis, "I simply can't become enthusiastic about that set. Three times this week it has gone dead and just when there was something on the air I really wanted to hear. If it was some mushy, uninteresting program the darn thing would work fine, but—oh, well what's the use."

"But, Lem," protested Ann, who was placidly doing a bit of darning and at the same time listening unperturbed to Lem, "you know that set is pretty old. We have had it several years now and it has had rough usage, what with the children and all tuning in every day. We have used it every day, from the first thing in the morning until we turn out the lights to go to bed. It simply can't last forever."

"Why, Ann, how you talk," retorted Lem, moving impatiently in his chair. "That set is not so very old. When you mentioned children, though, you told the whole story. Those kids use the radio like it was a-ah . . ."

"Lemuel Jones don't you dare to blame the children simply because

President, National Broadcasting Co.

BROADCAST programs have reached a point of perfection undreamed of a few years ago. Millions of dollars have been spent by the broadcast companies for equipment and facilities designed to perfect the transmission of programs. Millions more have been spent to bring before the microphone the greatest artists of our times. The broadcasters may justly claim that they have brought radio transmission to a point where the listener may expect fidelity of reception provided he has a radio receiving set in his home that is capable of reproducing without distortion what is transmitted. The modern radio receiver will accomplish this. Antiquated radios (including tubes) in homes are the chief factor in unsatisfactory reception. No matter how entertaining a program may be; no matter how well music or speech may be transmitted through the ether, unless the radio set in the home delivers what we send, the radio listener may be likened to the theatre patron who sits in the last row back of a post.

that radio refuses to go on fore

he charges us a dollar and a
d when he tinkers the price is
higher. Economy! Don't you talk. Why you don't know the meaning of the word. This week alone I have paid the service man six dollars. Is that economy? You just figure our service charges during the last three months and you will see where real economy lies. And besides," continued Ann, determined to have her say, "these new radios are wonderful. They're lovely, the cabinets I mean, and the tone makes ours sound like beating on a dishpan. And you can tune in on ever so many more stations." Ann had stopped knitting and she was a little breathless from talking.

William S. Paley

President, Columbia Broadcasting System

RADIO entertainment and instruction have become a salient part of the average American's cultural diet. A nation-wide audience, however, is not merely a cause for pride; it is a tremendous responsibility. The knowledge that microphones lead to millions is a challenge to originality and to every imaginable form of talent—the presentations bringing celebrities of stage, screen and recordings to homes where they heretofore had been strangers. The new blending with the best of what has gone before has kept radio vitality alive and the audience conversant with every phase of modern entertainment. Whatever the individual taste—whether it be for the Philharmonic Symphony or melodic jazz—radio of today is equipped to satisfy it. Lack of a radio constitutes a definite deprivation. An up-to-date receiving set for up-to-date programs belongs in every home; without it the listener cannot possibly obtain maximum enjoyment from the wealth of entertainment that is broadcast.

No matter how good a man may be in an argument a woman can usually stop him, and Lem was no exception to the rule. He was beaten and he knew it, so, wisely, he said nothing. Instead, he reached for the evening paper and retreated behind it. He was doing some serious thinking, however, and while Ann continued her darning he turned the pages of the paper until he reached the radio programs and advertisements. As usual he noticed the programs that were featured that evening as being the most worth while. There was the Happy Go Lucky Orchestra, news comments by the great world traveler, Tom Lowel, and later in the evening a championship prizefight. Lem was unhappy. Of all nights for a radio to go dead it had to be the night of the prizefight. He had been looking forward to that for weeks. "Darn radio," he muttered half under his breath. "Worthless trash." His thoughts rambled on. There was much truth in what Ann had said. The radio had been costing them considerable for service and to make matters worse even then it could not be depended upon to give satisfactory performance. Lem's glance strayed over to the next page—a page filled with radio advertising. "By George, the prices are not so high," he murmured, "and the terms are reasonable. Hang it all, we'll have to get a new set soon and it may as well be now, I suppose.

"Oh, Ann."

"Yes, Lem."

"You know, dear, I've been thinking it over and perhaps we ought to buy a new radio." Ann's eyes twinkled. "But, Lem, darling you know we can't afford it. Times are hard and we must economize."

"Now, Ann, be reasonable. Don't rag me. I've admitted I was wrong. Shall we order a new radio tomorrow. What do you say? Some fine ones are advertised in this paper" . . . and Ann and Lem had a glorious time deciding.

Next month Lem gets into another peck of trouble. Be sure to read about the Million Dollar Program that caused this typical Radio listener to tear his hair in anguish.—Editor.

Sometimes WE *are surprised*

BUT we try not to show it... This time a husband said his wife was arriving in 10 minutes, and could we help him arrange a surprise dinner party for her? Here was a list of 12 guests ... would we telephone them and "fix things up" while he dashed to meet his wife at the station? There were 14 at that dinner ... and his wife *was* really surprised!

It's our belief that a hotel should do *more* than have large, airy rooms, comfortable beds, spacious closets. Beyond that, we daily try to meet the surprise situation *(without surprise)*, no matter what the guest wants.

Cues for Cupid's Captives

(*Continued from page 69*)

a toast to his daughter and son-in-law to be.

On the subject of the presents that a man may make to his fiancée, a rich man who is marrying a girl who is poor, may give her jewels or almost anything he chooses that is for her adornment, but he may not give her anything that can be called maintenance! He may not give her clothes or pay her rent—even pay for the wedding. On the other hand if a man has a modest salary out of which he is trying to save in order that they may be married, a girl would prove herself a not very promising helpmeet were she to encourage him to spend his savings on flowers and gifts to her.

The detail that is of greatest concern to etiquette—or to good taste—since they mean the same, is the behaviour of the engaged couple in public. Conspicuous demonstrations of affection such as kissing and snuggling and whispering in public is entirely outside the pale of proper conduct. To be sure, they might hold hands in a movie, and one expects their attention absorbed in each other, but the behaviour that they should strive for is to appear as nearly as possible like brother and sister who are obviously sympathetic and devoted. This is an ideal attitude to keep in mind, because it perfectly includes loyal devotion, interest and sympathy, yet at the same time it avoids every suggestion of lovemaking in public. Remember that good taste never approves of any public display of intimate feelings or emotions and that instinctive reserve is one of the hallmarks of the thoroughbred.

From Dog Whip to Baton

(*Continued from page 16*)

"I know, but how come you're a symphony conductor?" I insist.

"Well," he admitted, "I once composed a symphonic suite for orchestra, called *Les Etoiles*. Walter Damrosch heard it and recommended me for a scholarship that gave me three years of study under Andre Bloch, at Fontainebleau, France."

It subsequently developed, in our conversation, that three years of the best instruction in composition was not all he brought back from Fontainebleau—it seems that he met the charming and talented Mrs. Crawford while she was also a student there.

A fine tribute to his vocal accomplishments is manifested in the pre nence of the baritone solo parts he s each year with the Bach Choir on t annual Bethlehem Pilgrimage.

For a man thirty-one years old, Crawford has climbed high on the la of musical fame, yet his ambition is one whit lessened. He intends to ge the top, and my prediction is that he His vitality is tremendous and his nerves, that received their early trai facing daily dangers, are as taut as strings of his beloved grand piano.

He is always on the go. So muc that he sometimes uses an airpla which by the way has been his h ever since he got his aviator's lic three years ago. His life is a merry round of rehearsals, concerts, broad and composition work. Regular d may be listed as Conductor of the N ark Music Foundation Chorus, Air D tor of the Newark Symphony Orche Conductor of the Bach Singers Clu New York, and last, but not least, sin a little pink bundle known as "Ski Crawford to sleep. It isn't every yo ster that can have a concert bari sing his lullaby for him.

And that is what talent, coupled ambition, will do for a man who once a dog musher. The next time hear that beautiful music setting of T A. Daly's *Romany Rye* just remer that it was written by a true, th truant, Alaskan . . . Robert M. Craw

Helen Keller's Radio Adventures

(*Continued from page 20*)

music that comes to us through the Radio —we can get these sounds through our ears—but Helen Keller has had to hear with her fingers. And into those sensitive fingers and palms have been spelled words contained in thousands of books, fascinating descriptions of events and conversations with the greatest persons of today.

I asked her what her biggest moment was and she said, "When I was able to utter my first phrase, 'I am not dumb any more'. It was like entering a new life —like gaining a freedom for which I had been struggling for many dark years. It was like the sudden removal of a gigantic barrier against which I had been vainly beating to make room for everything that cried within me for expression.

"I think my next greatest experience was my meeting with Professor Einstein. I felt of his head and when I did this it was as if I had suddenly come upon a new universe—a spiritual universe."

Miss Keller spoke very clearly, carefully and slowly, and all of my questions were spelled into her hands by her other companion, Miss Thompson, an energetic woman whose scintillating personality would brighten up any dark corner.

Miss Keller's first trip in an aeroplane was another experience that she has stored away in the abundance of her memories. "The plane rose higher and higher until we lost the odors of the earth. Then we soared over the tops of the buildings—and finally we felt ourselves at home with the clouds."

Her manner of expression is poetic and has no taint of the platitudes which find their way in the best of conversations. Her favorite poets are Keats, Shelley, Swinburne and Wadsworth, and of her trip to London she said that she enjoyed the voyage in spite of the heavy storm which lasted several days. "And I was very happy to put my feet on English soil—for I realized that it was the land of my favorite poets and the country from which our Pilgrim fathers came.

"What do you think of the younger generation?" I asked. "Do you agree with some of the religious leaders that they are heading for wastefulness and destruction?"

"Oh, no," she answered, "The youth of today is the hope of the world. Its freshness and force are opening up new opportunities for the development of nations. Its buoyancy and optimism are foundations for a greater faith and understanding."

At this I looked towards Miriam Brown who was quietly sketching away in a corner. She said nothing, but I interpreted her expression to mean, "Now, that's the first intelligent attitude that has yet been expressed with regard to the young boys and girls."

Those who have read Miss Keller's book, *The Story of My Life*, will recall the incident that led to her understanding of the word "love." She writes, "I remember the morning when I first asked the meaning of the word 'love'. This was years ago before I knew many words. I had found a few early violets in the garden . . . and brought them to my teacher, Miss Sullivan. She tried to kiss me; but at that time I did not like to have anyone to kiss me except my mother. Then Miss Sullivan put her arm gently around me and spelled into my hand the words, 'I love you, Helen

" 'What is love?' I asked.

"Miss Sullivan drew me closer to and said, 'It is here', pointing to heart. But still I could not understan

Miss Sullivan persevered for m weeks and one day she said, "Do know, Helen, that without love you cc not be happy and you would not wan play."

And then like a shaft of light penetrates the thick darkness the w "love" took on a new meaning for little deaf, dumb and blind girl. was some forty years ago.

Today Miss Keller's keen intellect mastered the most abstract subjects discusses them with great facility.

Miss Keller enjoys music, she goe the movies, and likes to jostle in Br way crowds. She enjoys the organ cause she says it is so like the voice— man and appealing. She listens to Radio by placing her fingers on the ceiver and in this way the sound w are transmitted to her.

Her home in Long Island is far f a dreary place. It bristles with acti Parties are held on the slightest pr cation, Miss Keller's dogs are eter romping about their beloved mistress there are no wasted moments.

Time is a very precious elemen Helen Keller. No minutes are allowe slip by. There are always things a that must be done and most of her tir spent in writing letters and in reading

During the interview as Miss K was speaking, I must confess the were streaming down my cheeks. those who were around us and who listening to our conversation also moist eyes. We could not hold back tears. No one could who understood i slightest how the chains of blindness deafness had tried to hold back woman from the rest of the world.

Our hearts welled up with admir for this great woman who rose abov tragedy that has made pitiful wrec so many human lives.

Her imagination has been the which has lighted up so many of human experiences, and in a way s able better to preserve her ideals in sublimity and chastity than are we eyes are continually faced with ir that would shatter every temple r in an hour of solitude.

Miss Keller's life is an indicati man's potentialities. Handicappe the loss of two vital human faculties has accomplished more perhaps tha woman who is in possession of them. secret is that her capacities are awake and there is not a dormant q in her make-up.

Miriam and I left Miss Keller wit inspiration that made our steps ligh our hearts happier—with a feeling all's still well in the world and indomitable courage, an unfalterin and an innate sense of beauty can up for any lost physical senses.

Fashion Formulas

(*Continued from page 71*)

come to town in tailored suits, and formal occasions, they appear in versions of organdie or soft eyelet e. They adapt themselves beautito fashion's new mood. They are ful, practical and comfortable."

ien Winifred J. Ovitte of *Women's* talked she called attention to two novelties.

etticoats," Mrs. Ovitte declared, thought to be gone forever—but they are, swishing and ruffled as h they had been taken out of the and with a nice naughty flavor of mother's days. In taffeta or crepe th lingerie or lace ruffles, they apunder spring frocks and summer ng gowns. Why not? There is y of room under the full skirts.

ow, the question goes around," Mrs. e said, "as to whether or not you l or wouldn't wear evening pajamas? are really evening gowns with a ed skirt. Paris couturiers have made in lovely filmy fabrics, some of veiled discreetly, others draped so give almost a pantalette effect. we ski in trousers, ride in them, sun in them, swim in them, bridge in sleep in them—why shouldn't we in them?"

isters of the Skillet

(*Continued from page 18*)

en follow "Hints to Housewives" by oys who brag, "When Better House-Hints are Hinted, We Will be the rs." Next come answers to domesroblems sent in by Sisters all over Jnited States. These come in at the of 1500 a week, and as nearly every contains a problem they have plenty estions to answer.

re is an example of a typical letter Newton, Kansas, "our home town".

Eddie and Ralph
re Sisters of the Skillet
NBC, Chicago

e are having a great deal of uble at our house because we are forgetful. Our basement lights on a switch at the top of the irs and by the time we climb them cannot remember whether the hts are on or off. As a result our ht bills are terrific. What can we ? You have helped thousands of ers, now help us.

A Sister of the Skillet in Distress

ys Ralph, after reading this, "A r of the Skillet in Distress"—I ght she was in Newton, Kansas. e explains that a Sister could be in ss and Kansas at the same time—

re is a typical solution of the em.

RALPH: Well, what she needs is something to jog her memory, so why don't she just nail a board across the top of the stairs and then every time that she comes upstairs she will hit her head on the board and that means, "Lights on!"

EDDIE: A simpler thing to do would be to replace all the floors over the basement with glass. Then you see she could always look down through the glass and see whether the lights are on or off.

RALPH: That's a great idea. And there's an advantage in that for she could fill the basement with water and have a goldfish farm. And it would give her the effect of being in a glass bottomed boat.

I might mention also the two ladies who appear in these programs—Miss Isabella Fryit, the domestic science expert, and Miss Pet Plenty, the love authority. Or in private life Messrs. Dumke and East.

As you may imagine all these laughs and comedy don't just happen. Eddie and Ralph have a studio where they put in many hours of real work on their skits. They personally read all their mail and say that most of their inspirations and laughs come directly.

Ed East told me that he had scarcely any appetite recently. Said that all he could eat at a meal was three steaks, rare and smothered in pork chops. Ralph added dolefully, "And all he gives me is a carrot."

When I asked them why they didn't try the eighteen day diet, I received a scornful look and a "Huh, we did. Ate the whole eighteen days' worth in two, and so came to the conclusion that a man can drive an ice wagon all his life and not learn to skate."

Mid-West "Folk Tales"

(*Continued from page 64*)

on the Philadelphia Press, Pontius was offered a job as secretary to him when he was appointed consul to Hull, England. An agreement was made that Pontius should go to England shortly after Watts arrived at Hull. The new consul wrote back to Pontius that college graduates were getting $3 a week running street cars, so he decided to stay in America.

Even then he did not know he could sing and it was not until after he had married his girlhood sweetheart that he became interested in being a concert tenor. Pontius says he owes all his success in his profession to his wife. . . . After singing in the camps during the World War, Pontius became known as the "John McCormack of the Moving Picture Theatre," and toured the United States.
